

# Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

## Core Corporate Bond Fund ("the Fund") A Gross Income Shares

This is a sub fund of MI TwentyFour Investment Funds. The Fund is an Open Ended Investment Company. ISIN GB00BDD0M018. Apex Fundrock Ltd is the Authorised Corporate Director of the Fund ("MI" and "MI Funds" are trading names of the ACD).

### Objectives and investment policy

The Fund aims to provide income and capital growth and to target an overall return in excess of that achieved by the iBoxx GBP Corporate Bond Index (the benchmark index) over a rolling 3 year period.

The Fund will invest primarily in investment grade corporate bonds (which are like loans that can pay a fixed or variable interest rate) that are priced in sterling or in other currencies which are then hedged back to sterling.

The bond ratings are determined by international agencies that provide such ratings. Although the Fund will invest primarily in investment grade bonds, it can also invest up to 20% of its value in non-investment grade (higher-yielding) bonds, government bonds or asset backed securities. Non-investment grade bonds, whilst potentially producing a higher level of income than investment grade bonds, are considered to be higher risk. Asset back securities are bonds linked to assets which provide some security on the investment. Examples of these are securities which are backed by mortgages on residential and commercial property, loans on automobiles and loans to small or medium sized businesses.

'Interest rate duration' indicates how price sensitive a bond is to changes in interest rate; the longer a bond's duration, the more sensitive its price is likely to be to changing interest rates. The average duration of the Fund's portfolio as a whole will be within two years (plus or minus) of the benchmark index.

The Fund will aim to reduce the effect of exchange rate movements in the underlying investments relative to the base currency of the Fund. However, these hedging techniques may not be fully effective in completely removing the exchange rate risk.

The Fund will only use derivative instruments for the purposes of efficient portfolio management, with the aim of managing risk and cost.

The investment process of the Fund integrates the consideration of environmental and social factors and is described in more detail in the prospectus.

Any income this share class generates will be paid out to you.

You can buy and sell shares on any business day in London.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

For full investment objectives and policy details please refer to the prospectus.

### Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

- The Fund is ranked at 4 because funds of this type have experienced average rises and falls in value in the past. Please note that even the lowest risk class can lose you money and that extreme market circumstances can mean you suffer severe losses in all cases. The indicator does not take into account the following risks of investing in this Fund:
- Bond values are affected by changes in interest rates, inflation and any decline in creditworthiness of the bond issuer. Bonds that produce a higher level of income usually also carry greater risk as such bond issuers may not be able to pay the bond income as promised or could fail to repay the capital amount used to purchase the bond.
- There may be cases where the organisation from which we buy a bond fails to carry out its obligations, which could cause losses to the Fund.
- There is no guarantee that an asset which provides the security for a bond will maintain its value.
- Currency risk reduction techniques can have an effect on the value of your investment and on the performance of the share class.
- Derivatives can be used to help reduce risk but may not be fully successful. Derivatives can also reduce gains you may otherwise have made.
- In difficult market conditions, the value of some investments may be less predictable than normal and the Fund may not be able to buy and sell these investments at the best time or at a fair price. This could affect the Fund's performance, potentially reducing your returns.
- For further risk information please see the prospectus.

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

### One-off charges taken before or after you invest

Entry charge	5.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

### Charges taken from the Fund over a year

Ongoing charges	0.39%
-----------------	-------

### Charges taken from the Fund under specific conditions

Performance fee	NONE
-----------------	------

- Switching charge (for switching into the Fund from another fund) 0.05%.
- The ongoing charges figure is based on the last year's expenses and may vary from year to year. It excludes the costs of buying or selling assets for the Fund (unless these assets are shares of another fund).
- For the ongoing charge, the figure is as at 30 September 2024.
- You may also be charged a dilution levy on entry to or exit from the Fund, this is to cover costs associated with your transaction.
- Certain charges are deducted from the capital of the Fund. This may allow more income to be paid but it may also restrict capital growth.
- For more information about charges, please see the prospectus.
