Janus Henderson
— INVESTORS —

A sub-fund of Janus Henderson Investment Fund Series I, a UK OEIC managed by Henderson Investment Funds Limited.

Objective and investment policy

Objective

The Fund aims to provide a return, from a combination of capital growth and income over the long term (5 years or more).

Investment policy

The Fund invests at least 80% of its assets in shares (also known as equities) of smaller companies, in any industry, in the UK and Ireland. Companies will be incorporated, headquartered, or deriving significant revenue from, the UK or Ireland.

The Fund may also invest in other assets including other shares, cash and money market instruments.

The investment manager may use derivatives (complex financial instruments) to reduce risk or to manage the Fund more efficiently.

The Fund is actively managed with reference to the Numis Sub-£1bn ex Investment Companies Index, which is broadly representative of the companies in which it may invest, as this can provide a useful comparator for assessing the Fund's performance. The investment manager has discretion to choose investments for the Fund with weightings different to the index or not in the index.

As an additional means of assessing the performance of the Fund, the IA UK Smaller Companies sector average, which is based on a peer group of broadly similar funds, may also provide a useful comparator.

Strategy

The investment manager believes that investing in companies is about the future and taking a long term view. The investment process is grounded

both in fundamental analysis, which aims to gain a clear understanding of individual companies and their markets, and in a strong valuation discipline. The universe of potential investments is reduced in stages using broad-based screening and ranking of companies, detailed profiling, meetings with management and the detailed analysis of financial data. The Fund has a well-diversified portfolio and normally avoids very small 'micro-cap' companies due to the more difficult nature of buying and selling shares in these companies.

Distribution policy The Fund offers accumulation shares (shares in which net income is retained within the price).

Recommendation This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

The Fund is designed to be used only as one component of several in a diversified investment portfolio. Investors should consider carefully the proportion of their portfolio invested into this Fund.

You can buy, sell or switch shares in the Fund on any dealing day and according to certain restrictions, both defined in detail in the Company's Prospectus.

For an explanation of some of the terms used in this document, please visit the glossary on our website at www.janushenderson.com.

Risk and reward profile

The value of an investment and any income from it can go up or down. When you sell your shares they may be worth less than you paid for them.

The risk/reward rating above is based on medium-term volatility. In the future, the Fund's actual volatility could be higher or lower and its rated risk/reward level could change.

The share class appears at 6 out of 7. Share classes in higher categories have shown greater and/or more frequent variations in net asset value in the past 5 years than those in lower categories. The lowest category does not mean risk free.

Historical data, such as is used in calculating the SRRI, may not be a reliable indication of the future risk profile of the Fund.

The rating does not reflect the possible effects of unusual market conditions or large unpredictable events. Under normal market conditions the following risks may apply:

Equities Shares can lose value rapidly, and typically involve higher risks than bonds or money market instruments. The value of your investment may fall as a result.

Smaller Companies Shares of small and mid-size companies can be more volatile than shares of larger companies, and at times it may be difficult to value or to sell shares at desired times and prices, increasing the risk of losses.

Country or Region If a Fund has a high exposure to a particular country or geographical region it carries a higher level of risk than a Fund which is more broadly diversified.

Derivatives The Fund may use derivatives with the aim of reducing risk or managing the portfolio more efficiently. However this introduces other risks, in particular, that a derivative counterparty may not meet its contractual obligations.

Counterparty Risk and Operational Risk The Fund could lose money if a counterparty with which the Fund trades becomes unwilling or unable to meet its obligations, or as a result of failure or delay in operational processes or the failure of a third party provider.

For more information please see the Company's Prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of managing and distributing it. These charges reduce the potential growth of your investment.

If you invest through a third party provider you are advised to consult them directly as charges, performance and terms and conditions may differ materially to those shown in this document.

One-off charges taken before or after you invest*

Entry Charge	0.00%
Exit Charge	0.00%**

* The charges shown are maximum figures. In some cases you may pay less.

** Subject to a charge of up to 3.00% where the Manager suspects excessive trading by an investor (and specifically on subscriptions held for less than 90 days).

Charges taken from the Fund over a year

Ongoing Charges	0.85%
-----------------	-------

The ongoing charges are based on actual annualised expenses for the period ending 31 May 2020. Ongoing charges may vary from year to year.

The figure for ongoing charges excludes portfolio transaction costs, except in the case of an initial charge paid by the Fund when buying shares or units in another fund.

For more information please see the Company's Prospectus.

The past performance is calculated in GBP.

The Fund was launched in December 1994 and the share class was launched in September 2014.

Past performance is not a guide to future performance.

The past performance shown in the chart takes into account all charges except one-off charges.

The Fund does not aim to track the performance of the index.

*Class I Acc was launched in September 2014. Performance prior to that date is simulated past performance based on the Class A Acc of the same fund which reflects a different ongoing charge, which is currently 1.71%.
