

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

ASI Financial Equity Fund Class A Inc (ISIN GB00BWK25P97) A sub-fund of Aberdeen Standard OEIC I. Aberdeen Standard Fund Managers Limited is the Authorised Corporate Director that manages the Fund.

OBJECTIVES AND INVESTMENT POLICY

Investment Objective
To generate growth over the long term (5 years or more) by investing in equities (company shares) issued by financial institutions.
Performance Target: To achieve the return of the MSCI AC World Financials Index plus 3% per annum over rolling three year periods (before charges). The Performance Target is the level of performance that the management team hopes to achieve for the fund. There is however no certainty or promise that they will achieve the Performance Target.
The ACD believes this is an appropriate target for the fund based on the investment policy of the fund and the constituents of the index.

Investment Policy
Portfolio Securities
- The fund will invest at least 70% in equities and equity related securities of financial institutions, such as banking, insurance, financial services and property companies, listed on global stock exchanges.
- The fund may also invest in companies which generate a significant part of their earnings from financial activity.
- The fund may also invest in other funds (including those managed by Aberdeen Standard Investments), money-market instruments and cash.

Management Process
- The management team use their discretion (active management) to maintain a concentrated but diversified asset mix at country and stock level.
- Their primary focus is on stock selection using research techniques to select individual holdings. The research process is focused on finding high quality companies at attractive valuations that can be held for the long term.
- In seeking to achieve the Performance Target, the MSCI AC Financial Index is used as a reference point for portfolio construction and as a basis for setting risk constraints. The expected variation ('tracking error') between the returns of the fund and the index is not ordinarily expected to exceed 9%. Due to the active nature of the management process, the fund's performance profile may deviate significantly from that of the index over the long term.

Derivatives and Techniques
- The fund may use derivatives to reduce risk, reduce cost and/or generate additional income or growth consistent with the risk profile of the fund (often referred to as "Efficient Portfolio Management").
- Derivative usage in the fund is expected to be very limited. Where derivatives are used, this would mainly be in response to significant inflows into the fund so that in these instances, cash can be invested while maintaining the fund's existing allocations to company shares.

Investors in the fund may buy and sell shares on any dealing day (as defined in the Prospectus).
If you invest in income shares, income from investments in the fund will be paid out to you. If you invest in accumulation shares, income will be added to the value of your shares.
Recommendation: the fund may not be appropriate for investors who plan to withdraw their money within five years. Investors should satisfy themselves that their attitude to risk aligns with the risk profile of this fund before investing.

RISK AND REWARD PROFILE

This indicator reflects the volatility of the fund's share price over the last five years which in turn reflects the volatility of the underlying assets in which the fund invests. Historical data may not be a reliable indication for the future.
The current rating is not guaranteed and may change if the volatility of the assets in which the fund invests changes. The lowest rating does not mean risk free.
The fund is rated as 5 because of the extent to which the following risk factors apply:

- A concentrated portfolio may be more volatile and less liquid than a more broadly diversified one. The fund's investments are concentrated in a particular country or sector.
- The use of derivatives carries the risk of reduced liquidity, substantial loss and increased volatility in adverse market conditions, such as a failure amongst market participants. The use of derivatives may result in the fund being leveraged (where market exposure and thus the potential for loss by the fund exceeds the amount it has invested) and in these market conditions the effect of leverage will be to magnify losses.
- The fund invests in emerging market equities and / or bonds. Investing in emerging markets involves a greater risk of loss than investing in more developed markets due to, among other factors, greater political, tax, economic, foreign exchange, liquidity and regulatory risks.
- The fund invests in equity and equity related securities. These are sensitive to variations in the stock markets which can be volatile and change substantially in short periods of time.

All investment involves risk. This fund offers no guarantee against loss or that the fund's objective will be attained.
The price of assets and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than

their original investment.
Inflation reduces the buying power of your investment and income.
The value of assets held in the fund may rise and fall as a result of exchange rate fluctuations.
The fund could lose money if an entity (counterparty) with which it does business becomes unwilling or unable to honour its obligations to the fund.
In extreme market conditions some securities may become hard to value or sell at a desired price. This could affect the fund's ability to meet redemptions in a timely manner.
The fund could lose money as the result of a failure or delay in operational processes and systems including but not limited to third party providers failing or going into administration.

CHARGES

The charges you pay are used to pay the costs of running the fund including marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

Charges taken from the fund over a year

Ongoing charges	1.32%
-----------------	-------

Charges taken from the fund under certain specific conditions

Performance fee	0.00%
-----------------	-------

The Ongoing Charges figure reflects the amount based on the expenses within the annual report for each financial year. This figure may vary from year to year. It excludes: performance fees (where applicable); portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling in another collective investment undertaking.

Where the Fund invests in an open-ended collective investment scheme which is operated or managed by the ACD/the Manager or an associate of the ACD/the Manager, no additional annual management charge will be incurred by the Fund on such an investment.

The annual report for each financial year will include detail on the exact charges made.

The Ongoing Charge figure is as at 31/07/2020.

A switching charge may be applied in accordance with the Prospectus.

For more information about charges please see Prospectus.

Further information on the charges can be found in the Prospectus.

PAST PERFORMANCE

ASI Financial Equity Fund, Class A Inc, 31 December 2020

% Returns

Past performance is not a guide to future performance.

Performance is net of charges and does not take into account any entry, exit or switching charges but does take into account the ongoing charge, as shown in the Charges section.

Performance is calculated in GBP.

The fund was launched in 2015. The share/unit class was launched in 2015.

The past performance information for the period prior to 19 June 2015 reflects that of the Aberdeen Investment Funds ICVC II Financial Equity Fund.

Performance Target - MSCI AC World Financials (GBP) +3.00% from 07/08/2019. FTSE World Financials (GBP) +3.00% from 19/06/2015 to 06/08/2019.
