Class I Acc ISIN: GB0007656001

Fund Currency: GBP Share Class Currency: GBP

Janus Henderson
INVESTORS

A sub-fund of Janus Henderson UK & Europe Funds, a UK OEIC managed by Henderson Investment Funds Limited.

Objective and investment policy

Objective

The Fund aims to provide a return, from a combination of income and capital growth over the long term.

Performance target: To outperform the IA Sterling Strategic Bond sector average, after the deduction of charges, over any 5 year period.

Investment policy

The Fund invests at least 80% of its assets in a global portfolio of bonds of any quality, including high yield (non-investment grade) bonds, issued by governments or companies. Where investments are made in assets in currencies other than Sterling, the Fund will seek to hedge at least 80% of those assets back to Sterling to largely remove the risk of currency exchange rate movements.

The Fund may also hold other assets including bonds of other types from any issuer, preference shares, cash and money market instruments. In certain market conditions, the Fund may invest more than 35% of its assets in government bonds issued by any one body.

The investment manager may use derivatives (complex financial instruments), including total return swaps, with the aim of making investment gains in line with the Fund's objective, to reduce risk or to manage the Fund more efficiently.

The Fund is actively managed with reference to the IA Sterling Strategic Bond sector average, which is based on a peer group of broadly similar funds, as this forms the basis of the Fund's performance target. The investment manager has complete freedom to choose individual investments for the Fund and to vary allocations between different types of bonds.

Strategy

The investment manager looks to create a diversified portfolio of bonds that can deliver a quarterly income. Free from a benchmark but with a strong focus on income generation, the portfolio managers search for investment opportunities across the entire spectrum of fixed income assets in the developed world using macroeconomic research and company analysis. The portfolio is then actively managed to include the most suitable investments for the prevailing market and economic environment.

Distribution policy The Fund offers accumulation shares (shares in which net income is retained within the price) and income shares (shares in which net income may be paid out to investors).

Recommendation This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

The Fund is designed to be used only as one component of several in a diversified investment portfolio. Investors should consider carefully the proportion of their portfolio invested into this Fund.

You can buy, sell or switch shares in the Fund on any dealing day and according to certain restrictions, both defined in detail in the Company's Prospectus.

Risk and reward profile

♦ Potentially lower reward			Potentially higher reward ♦			
♦ Lower risk			Higher risk ♦			
1	2	3	4	5	6	7

The value of an investment and any income from it can go up or down. When you sell your shares they may be worth less than you paid for them.

The risk/reward rating above is based on medium-term volatility. In the future, the Fund's actual volatility could be higher or lower and its rated risk/reward level could change.

The share class appears at 4 out of 7. Share classes in higher categories have shown greater and/or more frequent variations in net asset value in the past 5 years than those in lower categories. The lowest category does not mean risk free.

Historical data, such as is used in calculating the SRRI, may not be a reliable indication of the future risk profile of the Fund.

The rating does not reflect the possible effects of unusual market conditions or large unpredictable events. Under normal market conditions the following risks may apply:

Credit Risk An issuer of a bond (or money market instrument) may become unable or unwilling to pay interest or repay capital to the Fund. If this happens or the market perceives this may happen, the value of the bond will fall.

Interest Rates When interest rates rise (or fall), the prices of different securities will be affected differently. In particular, bond values generally fall when interest rates rise. This risk is generally greater the longer the maturity of a bond investment.

High Yield Bonds The Fund invests in high yield (non-investment grade) bonds and while these generally offer higher rates of interest than investment grade bonds, they are more speculative and more sensitive to adverse changes in market conditions.

Derivatives and Leverage The Fund may use derivatives towards the aim of achieving its investment objective. This can result in 'leverage', which can magnify an investment outcome and gains or losses to the Fund may be greater than the cost of the derivative. Derivatives also introduce other risks, in particular, that a derivative counterparty may not meet its contractual obligations.

Currency Hedging When the Fund, or a hedged share/unit class, seeks to mitigate exchange rate movements of a currency relative to the base currency, the hedging strategy itself may create a positive or negative impact to the value of the Fund due to differences in short-term interest rates between the currencies.

Liquidity Securities within the Fund could become hard to value or to sell at a desired time and price, especially in extreme market conditions when asset prices may be falling, increasing the risk of investment losses.

Charges to Capital Some or all of the ongoing charges may be taken from capital, which may erode capital or reduce potential for capital growth.

Counterparty Risk and Operational Risk The Fund could lose money if a counterparty with which the Fund trades becomes unwilling or unable to meet its obligations, or as a result of failure or delay in operational processes or the failure of a third party provider.

For more information please see the Company's Prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of managing and distributing it. These charges reduce the potential growth of your investment.

If you invest through a third party provider you are advised to consult them directly as charges, performance and terms and conditions may differ materially to those shown in this document.

One-off charges taken before or after you invest*

Entry Charge	0.00%
Exit Charge	0.00%**

* The charges shown are maximum figures. In some cases you may pay less.

** Subject to a charge of up to 3.00% where the Manager suspects excessive trading by an investor (and specifically on subscriptions held for less than 90 days).

Past performance

Charges taken from the Fund over a year

Ongoing Charges	0.69%
-----------------	-------

The ongoing charges are based on actual annualised expenses for the period ending 30 June 2020. Ongoing charges may vary from year to year.

The figure for ongoing charges excludes portfolio transaction costs, except in the case of an initial charge paid by the Fund when buying shares or units in another fund.

For more information please see the Company's Prospectus.

The past performance is calculated in GBP.

The Fund was launched in October 1978 and the share class was launched in September 2000.

Past performance is not a guide to future performance.

The past performance shown in the chart takes into account all charges except one-off charges.

The Fund does not aim to track the performance of the index.

*Class I Acc was launched in September 2000. Performance prior to that date is simulated past performance based on the Class A Inc of the same fund which reflects a different ongoing charge, which is currently 1.41%.
