Loomis Sayles U.S. Equity Leaders Fund (I/A(GBP) ISIN: GB00B97J2N98), a sub-fund of Natixis Investment Funds U.K. ICVC

Authorised Corporate Director: Natixis Investment Managers S.A., part of the Natixis group of companies

Objectives and Investment Policy

Investment objective:

The Loomis Sayles U.S. Equity Leaders Fund (the "Fund") seeks to grow your investment over the long term (at least 5 years).

Investment policy:

Types of asset and investment limits

At least 80% of the Fund's assets will be invested directly in U.S. equity securities (shares of companies which are located in the United States).

Up to 20% of the Fund's assets can be invested in instruments related to non-U.S. equity securities, such as depositary receipts (negotiable securities traded on a U.S. stock exchange but represent a holding in a non-U.S. equity security).

It is not intended that any of the Fund's assets are invested in other Collective Investment Schemes (which can include those managed by the ACD, the Investment Manager, or any of their associates). However, in the event that the Fund does invest in other Collective Investment Schemes (for example for cash management purposes), this will not exceed 10% of the Fund's assets.

Derivatives (financial contracts that derive their value from other investments) may be used to reduce the risks or costs which might be incurred through investing in a particular asset directly or to generate additional income or capital (this is known as "efficient portfolio management" or "EPM"). For example, the Investment Manager may use currency futures and forwards in the Fund when seeking exposure to assets which are based in currencies other than sterling to reduce the risk of any losses caused by currency exchanges.

In the case of exceptional or adverse market conditions, instead of investing in line with the limits set out above, the Investment Manager can invest up to 100% of the Fund's assets in cash. The Investment Manager will only invest in this way if it believes that this is necessary to try to protect the Fund from any risks and/or losses which could arise from these market conditions. It is not expected that the Investment Manager will do so for long periods. In the event that the Investment Manager takes this action, the Fund may not achieve its investment objective.

The Investment Manager can invest the Fund's assets in any country, sector and currency which may include emerging market countries.

Investment strategy:

The Investment Manager actively manages the Fund and, when investing in equity securities, the Investment Manager will adopt a growth style of active equity management to identify and select companies which it believes are high quality and are expected to grow and lead above the average market rate. When investing in equity securities, the Investment Manager seeks companies that trade at a discount to the Investment Manager's estimate of that company's true value. The Investment Manager focuses 80% of the Fund's assets upon investment in companies with market capitalisation (which is established by multiplying the number of a company's shares outstanding by its price per share) greater than US$500m. However, the Investment Manager may also invest in companies of any market capitalisation size.

For indicative purposes only, the Fund's performance may be compared to the S&P 500 Index (total return) (the "Comparative Benchmark"). The Fund is unconstrained by the Comparative Benchmark and may therefore significantly deviate from it.

The base currency of the Fund is the US Dollar.

Shares in the Fund may be purchased, sold or exchanged on any business day in the U.K.

Income derived from the Fund is distributed for distributing Shares and reinvested for accumulating Shares. Please refer to the section entitled "Distribution and Accumulation Shares; Net and Gross Shares" of the Prospectus for additional information.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 5 years.
