

## **Key Investor Information**

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

## Invesco US Treasury Bond UCITS ETF (the "Fund") A sub-fund of Invesco Markets II plc (the "Umbrella Fund") GBP Hdg Dist (ISIN: IE00BF2GFM70) (the "Share Class")

The Fund is managed by Invesco Investment Management Limited, part of the Invesco Group.

## **Objectives and Investment Policy**

- The Fund is a passively managed Exchange-Traded Fund (ETF), which aims to achieve the total return performance of the Bloomberg US Treasury Index (the "Index")<sup>1</sup>, less fees, expenses and transaction costs.
- To achieve the investment objective, the Fund will employ sampling techniques to select securities in the Index which may include but are not limited to index weighted average duration, industry sectors, country weights, liquidity and credit quality. The use of the sampling approach will result in the Fund holding a smaller number of securities than are in the underlying Index.
- The Fund's shares are listed on one or more Stock Exchange(s). Investors can buy or sell shares daily through an intermediary directly or on Stock Exchange(s) on which the shares are traded. In exceptional circumstances investors will be permitted to redeem their shares directly from Invesco Markets II plc in accordance with the redemption procedures set out in the prospectus, subject to any applicable laws and relevant charges.
- The Fund's base currency is USD. The Share Class currency is GBP. To minimise exposure to fluctuations in the exchange rate between the Fund's base currency and the Share Class currency, the Share Class enters into foreign exchange transactions (typically FX forwards).
- Dividend Policy: This Share Class declares and distributes a dividend on a quarterly basis.
- Net Asset Value: This is calculated daily and the Fund is open for subscriptions and redemptions on each day the United States Federal Reserve System is open.
   Please refer to the prospectus for further information.
- The Index: The Index is designed to measure the performance of US dollar-denominated, fixed-rate, nominal debt issued by the US Treasury. The securities which comprise the Index must be US dollar-denominated, rated investment grade (Baa3/BBB-/BBB- or higher) using the middle rating of Moody's, S&P and Fitch, with a minimum par amount outstanding USD 300mn, and at least one year until final maturity, regardless of optionality. Both fixed-rate coupon and original zero coupon issues are included in the Index. Security types excluded from the Index are, among others: Inflation-linked bonds, floating-rate bonds, STRIP bonds (being bonds where both the principal and regular coupon payments which have been removed are sold separately to investors as new securities), and Treasury bills. The Index rebalances monthly.

## Risk and Reward Profile

# Lower Risk Higher Risk Typically lower rewards Typically higher rewards 1 2 3 4 5 6 7

- The Share Class is in risk category 4 due to the rises and falls of its price or simulated data in the past.
- As the Share Class' risk category has been calculated using historical data, it may not be a reliable indication of the Share Class' future risk profile.
- The risk category may change in the future and is not guaranteed.
- The lowest category does not mean a risk free investment.

## Other Risks

- General Investment Risk: The value of investments, and income from them, can go down as well as up and you may not get back the full amount you invested.
- Concentration risk: The Fund might be concentrated in a specific region or sector or be exposed to a limited number of positions, which might result in greater fluctuations in the value of the Fund than for a fund that is more diversified.
- Credit risk: The creditworthiness of the debt the Fund is exposed to may weaken and result in fluctuations in the value of the Fund. There is no guarantee the issuers of debt will repay the interest and capital on the redemption date. The risk is higher when the Fund is exposed to high yield debt securities.
- Interest Rate Risk: Changes in interest rates will result in fluctuations in the value of the Fund.
- Securities lending: The Fund may be exposed to the risk of the borrower defaulting
  on its obligation to return the securities at the end of the loan period and of being
  unable to sell the collateral provided to it if the borrower defaults.
- Currency hedging: Currency hedging between the base currency of the Fund and the currency of the share class may not completely eliminate the currency risk between those two currencies and may affect the performance of the share class.
- For more information on risks, please see the Fund prospectus under "Risk Factors", which is available at etf.invesco.com (select your country and navigate to the Prospectus on the Documents section on the product page).

Charges
The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	None*
Exit charge	None*
Charges taken from the Share Class over a year	
Ongoing charge	0.10%
Charges taken from the Share Class under certain specific conditions	
Performance fee	None

- \*Currently, the Fund is not exercising its entitlement to apply entry and exit charges.
- The **ongoing charge** is based on the fee paid to the Manager. The Manager is responsible for discharging from its fee, costs attributable to the Investment Manager, Administrator, Depositary as well as the Operational Expenses incurred by the Fund. It excludes portfolio transaction costs except in the case of an entry or exit charge paid by the Fund when buying or selling shares/units in another fund.
- Because the Fund is an ETF, investors will typically only be able to buy or sell shares in the secondary market. Accordingly, investors may incur brokerage and / or transaction fees in connection with their dealings. Investors may also bear the costs of "bid-ask" spreads; meaning the difference between the prices at which shares can be bought and sold. You should discuss these fees and costs with your broker before you invest, as they may reduce the amount of your initial investment and the amount you receive on disposal.
- The Fund may engage in securities lending, whereby 90% of the revenues arising from securities lending will be returned to the Fund and 10% of the revenues will be retained by the securities lending agent.
- For more information on charges, please see the relevant charges section in the Fund supplement under "General Information Relating to the Fund", which is available at etf.invesco.com (select your country and navigate to the Documents section on the product page.)
