

Key Investor Information

This document provides you with the key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Spectrum Fund, I Accumulation, a fund within Trojan Investment Funds (ISIN: GB00B5TL9R83)

The fund is managed by Link Fund Solutions Limited.

Objective and investment policy

Objective

To seek to achieve capital growth over the longer term (5-7 years).

Capital invested is at risk and there is no guarantee that capital growth will be delivered or that the investment objective will be achieved.

Investment Policy

To invest at least 70% of assets globally in funds (and investment trusts) including funds managed by the Manager, the Investment Manager and their associates. These funds can invest in a range of assets including bonds (for example, loans to either a company or government that pay interest), equities (company shares), private equity, infrastructure, hedge funds, money market instruments (for example, short term loans that pay interest), deposits and cash. The fund can also invest up to 30% directly in these asset classes, except for private equity, property and precious metals which will be indirect.

The Investment Manager places an emphasis on long-term returns, investing in funds which it believes can grow in value over time. The Investment Manager favours fund managers which focus on one particular investment strategy.

Other features of the fund:

- The fund is actively managed. The Investment Manager uses its expertise to select investments for the fund and has the discretion to invest without the need to adhere to a particular benchmark.
- Whilst the fund can invest in different asset classes it may not have exposure to all asset classes at all times.
- The fund can invest across different geographic areas and industry sectors without limitation.
- You can buy and sell shares in the fund on each business day.
- Income from the fund will be added to the value of your investment.
- Derivatives (whose value is linked to that of another investment, e.g company shares, currencies) may be used to manage the risk profile of the fund.
- Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and reward profile

- This indicator shows how much a fund has risen and fallen in the past, and therefore how much a fund's returns have varied. It is a measure of a fund's volatility. The higher a fund's past volatility the higher the number on the scale and the greater the risk that investors in that fund may have made losses as well as gains.
- The fund has been classed as 4 because its volatility has been measured as average.
- This indicator may not be a reliable indication of the future risk profile of this fund.
- The risk and reward profile shown is not guaranteed to remain the same and may shift over time. Number 1 on the scale does not mean that a fund is risk free.
- Currency risk: As the fund can be exposed to different currencies, changes in exchange rates may decrease the value of your investment.
- Property Fund investment risk: Property funds can become illiquid increasing the risk that a position cannot be sold in a timely manner or at a reasonable price.

- Counterparty risk: The failure of a firm involved in a transaction with the fund or providing services to the fund may expose the fund to financial loss.
- Changes in interest rate risk: A rise in interest rates generally causes bond prices to fall.
- Credit risk: The value of a bond may be affected by its credit rating, the lower the rating the higher the risk of the issuer not paying interest or repaying the loan.
- Liquidity risk: Smaller companies' securities are often traded less frequently than those of larger companies which means they may be more difficult to buy and sell. Their prices may also be subject to short term swings.
- For full details of the fund's risks, please see the prospectus which may be obtained from the address in 'Practical Information' below.

Charges for this fund

The charges you pay are used to pay the costs of running the fund. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry Charge	None
Exit Charge	None
Charges taken from the fund over the year	
Ongoing Charges	1.97%
Charges taken from the fund under certain specific conditions	
Performance Fee	None

The ongoing charges figure is based on expenses for the year ended 31 January 2021. The ongoing charges figure is capped at 2.00% until further notice. The ongoing charges are taken from the income of the fund. They exclude portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling units in another collective investment undertaking.

You may also be charged a dilution levy (an amount to cover dealing costs incurred by the fund) on entry to or exit from the fund. This is normally only charged when the dealing costs are significant.

For more information about charges, please see the prospectus.

Past performance

- Past performance is not a guide to future performance.
- The past performance in the chart shown opposite is net of tax and charges. The share class was launched in August 2011.
- The fund was launched in February 2008.
- Performance is calculated in Pounds Sterling.
