Kames Global Equity Fund

a sub-fund of Kames Capital ICVC

Sterling Class A - Accumulation shares (ISIN: GB0007254229)

This fund is managed by Kames Capital plc. ("the authorised corporate director (ACD)").

Objectives and investment policy

Objective: to provide a combination of income and capital growth over any 7 year period.

Policy: The Fund will be invested in equities of companies which may be listed, quoted or traded anywhere in the world and denominated in any currency.

The Fund is actively managed and can invest in companies of any market capitalization (small, medium or large) and in any industry sector although will tend to have a bias towards small-medium companies. At any one time, the scope of investment may be themed by geography, industry, size or style to take advantage of opportunities identified by the ACD.

The ACD places emphasis on growth-oriented companies with low debt and high returns on invested capital. The ACD also has a preference for avoiding investment in the largest companies by market capitalisation within the investment universe.

To the extent that the Fund is not fully invested in the main asset class listed above, the Fund may also invest in other transferable securities, collective investment schemes (up to 10% of Net Asset Value and which may include schemes managed by the ACD or its affiliates), money market instruments, deposits and cash and near cash. It is intended that investment in any other collective investment schemes will be predominately in approved money market instruments.

Derivatives can be used by the Fund for efficient portfolio management (including hedging to reduce currency risk).

Non-Sterling exposure will typically not be hedged back to Sterling.

Other information

You can buy, sell or exchange the Fund's shares on any business day (see 'Dealing Day' in the Prospectus Definitions for more information).

Income the Fund receives will be reinvested and automatically reflected in the value of your shares.

The Fund is not managed in reference to any index or benchmark. It is expected that the Fund will be held as part of a diversified portfolio which may include other assets such as bonds, equities, property and cash.

Risk and reward profile

1	2	3	4	5	6	7
Lower risk / potentially lower rewards					Higher risk / potentially higher rewards	

The risk/reward profile shows the risk of investing in the Fund, based on the rate at which its value has changed in the past. This Fund has the above risk/reward rating because share prices can change quickly and unpredictably, for example due to political or economic events and also changes in exchange rates.

The Fund's category is not guaranteed and may change over time. It is calculated using historical data, which may not be a reliable indication for the future. Category 1 does not mean 'risk free'.

The following risks, which are not, or are not fully, reflected in the risk/reward profile are also relevant to the Fund:

Liquidity: The Fund's value may fall if shares, especially those of smaller companies and companies in emerging markets, become more difficult to trade or value due to market conditions or lack of supply and demand.

Other markets: The Fund may invest in countries which have less developed political, economic and legal systems and which provide fewer investor protections. Difficulties in buying, selling, safekeeping or valuing investments in such countries may reduce the value of the Fund.

Concentration Risk: Holding a limited number of underlying investments means a change in the value of any one investment has more impact on the Fund's value. This increases potential gain but also potential loss.

Foreign Exchange Risk: The Fund's portfolio of investments may be denominated in a range of currencies which differ from the Fund's base currency. Fluctuations in these currencies may increase the risk of losses to the Fund where hedging is not used or is incomplete or unsuccessful.

Full details of risks are disclosed in the section 'Risk Factors' in the Prospectus.
