

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Sanlam Strategic Bond Fund – Class I Income (GBP)

A sub-fund of Sanlam Universal Funds plc (the “Company”)
Managed by Sanlam Asset Management (Ireland) Limited

ISIN: IE00B7VMRN51

Investment objective

Objectives

The investment objective of the Sanlam Strategic Bond Fund (the Fund) is to provide a total return for investors, through a monthly income generation that can either be distributed or reinvested, with the potential for capital growth.

Investment policy

The Fund will invest globally in debt securities, and cash and cash equivalents. Debt securities are any debt instrument which can be bought or sold between two parties with basic terms as to amount borrowed, interest rate and maturity defined. The Fund will invest primarily in investment grade debt securities.

The Fund may also invest in instruments such as bonds and preference shares to ensure that the Fund retains its ability to deal with redemptions as they fall due.

The Fund may use financial derivatives instruments (FDIs) for investment, efficient portfolio management and hedging

purposes. FDIs are financial instruments the value of which is linked to the expected future price movement of underlying assets (i.e. company shares).

You can sell your shares any day (except Saturday or Sunday) that banks are open in London and Dublin.

Your shares may pay you income. Any income you may be entitled to will be paid monthly.

Recommendation: The Fund is suitable for investors with a time horizon of 5 years.

Risk and Reward Profile

Lower risk Higher risk

←—————→

Typically lower rewards Typically higher rewards

Why is this Fund in category 3?

The Fund is rated 3 due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.

The Fund may charge fees and expenses against the capital of the Fund, accordingly the value of your potential return from the Fund may be diminished.

Companies or governments issuing the debt may become insolvent or suffer financial difficulties.

The debt securities may in some cases be below investment grade, which means that while they may deliver a higher return, there is potentially a higher risk of default and loss to the fund.

The Fund uses FDIs for investment purposes and sometimes in an attempt to reduce risk (hedging). It may be that the use of FDIs causes losses to the Fund.

The prices of FDIs are volatile. Securities in the Fund may be sold below their valuation due to insufficient liquidity in the market. The eventual price of a security may be influenced by a broad variety of events or risks, many of which may be difficult to predict or assess.

What do these numbers mean?

They rate how a fund might behave and how much risk there is to your capital. Generally, the chance to make large gains means a risk of suffering large losses.

A **Category 1** fund is not a risk-free investment - the risk of losing your money is small, but the chance of making gains is also limited. With a **Category 7** fund, the risk of losing your money is high but there is also a chance of making higher gains. The seven-category scale is complex (for example, 2 is not twice as risky as 1).

More about this rating:

This rating system is based on the average fluctuations of the prices of funds over the past 5 years - that is, by how much the value of their assets taken together has moved up and down. Historical data, such as is used in calculating the synthetic risk indicator, may not be a reliable indication of the future risk profile of the Fund.

For a more detailed explanation of risks, please refer to the "Risk Factors" section of the prospectus.

Charges

These charges are used to pay the costs of running the Fund, including the costs of marketing and selling. Overall, they reduce the growth of your investment.

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None
Switching charge	2.00%
This is the maximum that might be taken out of your money before it is invested and before the proceeds of your investment are paid out.	
Charges taken from the Fund over a year	
Ongoing charge	0.64%
Charges taken from the Fund under certain specific conditions	
Performance fee	None

The entry and exit charges shown are the maximum figures. In some cases you might pay less - you can find this out from your financial adviser.

The ongoing charges figure is an estimate based on the expected total charges as the figures based on last year's expenses are not representative. This figure, which excludes portfolio transaction costs, may vary from year to year.

You can find out more details about the charges by looking at the "Charges and Expenses" section of the prospectus.

Past Performance

Past performance is not a reliable indicator of future performance.

The past performance takes account of all charges and costs, excluding entry and exit charges.

The performance of this class is calculated in British Pounds.

The Fund launched on 2 March 2012. This class started to issue shares on 9 May 2014.

Practical Information
