

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest. Unless otherwise defined in this document, all words and expressions defined in the Fund's current Prospectus shall have the same meaning herein.

GAM Emerging Equity

hereafter the "Fund", a sub-fund of GAM Funds.

Institutional GBP accumulation - GBP (the "Share Class") **ISIN: GB00BYQJ5H00**

ACD: GAM Sterling Management Limited part of GAM Group AG.

Objectives and investment policy

- The investment objective of the feeder Fund is to provide capital appreciation by investing at least 85% of its net assets in GAM Multistock – Emerging Markets Equity (the "Master Fund"), the investment objective of which is to achieve long-term capital growth. For this purpose, the Master Fund invests at least two thirds of its assets in carefully selected shares and other equity securities of companies in emerging economies.
- The Master Fund invests at least two thirds of its assets in companies in emerging markets. Through the link between the Shanghai and Hong Kong stock exchanges (Shanghai-Hong Kong Stock Connect), the Fund can invest directly in Chinese A shares. In addition, investments in China B and H shares can be built up.
- The Master Fund may also use the following techniques and instruments for efficient portfolio management purposes: Repurchase and Reverse Repurchase Agreements and Stocklending Agreements.
- Shares in the Fund can be bought and sold daily (every Business Day of the Fund).
- The Fund has several share classes. These may differ with regard to fees, minimum investment, currency, use of revenues and investor qualification.
- Any income arising from this Share Class will be accumulated. Other share classes of the Fund may distribute income.
- The Fund is actively managed and it does not refer to any benchmark index. The fund manager uses their expertise to pick investments to achieve the Fund's investment objective.
- The Master Fund may use complex financial instruments to hedge the Master Fund assets and to profit from promising investments. These instruments entail additional leverage and, as a result, the Master Fund assets may fluctuate significantly up or down.
- Recommendation: this fund may not be appropriate for investors who plan to withdraw their money within five years.

Risk and reward profile

The risk indicator is based on the volatility of the Fund's performance over the last 5 years. Where 5 years' performance history is not available the data is supplemented by proxy fund, benchmark data or a simulated historical series as appropriate.

- The Fund is assigned to the above category based on its historical fluctuations in value.
- The indicator helps investors to have a better understanding of the potential gains and losses related with the Fund. In this context, even the lowest category does not represent a risk-free investment.
- This profile is determined using historical data, as such may not be a reliable indication for the future risk profile. It is not guaranteed and may shift over time.
- This allocation to a risk category may change over time because the future performance of the Fund may fluctuate differently from in the past.
- The Fund does not offer the investor a guaranteed return. Nor does it guarantee the fixed repayment of the money invested in the Fund by the investor.

Further risks that may have a significant effect on the net asset value of the Fund include:

- **Liquidity Risk:** some investments can be difficult to sell quickly which may affect the value of the Fund and, in extreme market conditions, its ability to meet redemption requests.
- **Leverage Risk:** derivatives may multiply the exposure to underlying assets and expose the Fund to the risk of substantial losses.
- **Counterparty / Derivatives Risk:** if a counterparty to a financial derivative contract were to default, the value of the contract, the cost to replace it and any cash or securities held by the counterparty to facilitate it, may be lost.
- **Special Country Risk / China:** changes in China's political, social or economic policies may significantly affect the value of the Fund's investments. China's tax law is also applied under policies that may change without notice and with retrospective effect.
- **Capital at Risk:** all financial investments involve an element of risk. Therefore, the value of the investment and the income from it will vary and the initial investment amount cannot be guaranteed
- **Market Risk / Emerging Markets:** emerging markets will generally be subject to greater political, market, counterparty and operational risks.

The "Investment Objectives and Policy" section of the Prospectus for this Fund give you more details about all the risks for the Fund – see under "Practical Information" for how to obtain a copy.
