

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Emerging Markets Total Return Bond Fund, a US Dollar denominated sub fund of the abrdn SICAV I, I QInc Hedged GBP Shares (ISIN: LU1760137023). This fund is managed by abrdn Investments Luxembourg S.A.

OBJECTIVES AND INVESTMENT POLICY

Investment Objective

The Fund aims to achieve long term total return by investing in Emerging Market Government bonds (loans to governments).

Investment Policy Portfolio Securities

- The Fund invests at least two-thirds of its assets in bonds issued by governments and government-related bodies in Emerging Market countries. These countries are typically countries that are still developing their economies.
- The Fund will invest in Emerging Market bonds denominated in any currency or maturity. These include bonds issued by governments, government-related bodies and quasi-sovereigns, including inflation-linked bonds and floating rate notes (FRNs).
- The Fund may also invest in Frontier Markets, which are typically smaller, less developed constituents of the JP Morgan EMBI Global Diversified Index that exhibit similar economic characteristics to Emerging Market countries.
- The Fund may invest up to 100% of its Net Asset Value in sub-investment grade bonds.
- The Fund may; in times of extreme market stress and increased volatility, increase allocations to developed market securities with a view to reducing portfolio risk and volatility.
- Bonds may only be of a credit quality greater than or equal to B- by Standard & Poor's Corporation ("S&P") or an equivalent rating from another rating agency as at the date of investment.

Management Process

- The Fund is actively managed.
- The holdings of the Fund are not selected with reference to a benchmark index and the fund does not aim to outperform any benchmark but the performance of the Fund (before charges) can be compared over the long term (5 years or more) against a basket of the following indices, which is rebalanced to the stated weights on a daily basis: 75% JP Morgan EMBI Global Diversified Index (USD) and 25% JP Morgan GBI-EM Global Diversified Index (USD). These indices are used as a basis for setting risk constraints. The potential change in value of the Fund (as measured by expected volatility) is ordinarily expected to be lower than the potential change in value of the above basket of indices over the longer term.
- In order to achieve its objective, the Fund has the flexibility to seek opportunities across the full range of the bond universe. The Fund will take positions whose weightings diverge from these indices or invest in securities which are not included in these indices. Due to the active

nature of the management process, the Fund's performance profile may deviate significantly from that of these indices over the longer term.

- abrdn integrate environmental, social and governance (ESG) considerations within the investment process. Details of the Fixed Income ESG Integration Approach are published at www.abrdn.com under "Sustainable Investing".

Derivatives and Techniques

- The Fund may use investment techniques (including Derivatives) to seek to protect and enhance the value of the Fund and to manage the Fund's risks. Derivatives, such as futures, options and swaps, are linked to the rise and fall of other assets. In other words, they "derive" their price from another asset. They can generate returns when share prices and/or indices fall.

Investors in the fund may buy and sell shares on any dealing day (as defined in the Prospectus).

If you invest in income shares, income from investments in the fund will be paid out to you. If you invest in accumulation shares, income will be added to the value of your shares.

Recommendation: the fund may not be appropriate for investors who plan to withdraw their money within five years. Investors should satisfy themselves that their attitude to risk aligns with the risk profile of this fund before investing.

RISK AND REWARD PROFILE

This indicator reflects the volatility of the fund's share price over the last five years which in turn reflects the volatility of the underlying assets in which the fund invests. Historical data may not be a reliable indication for the future.

The current rating is not guaranteed and may change if the volatility of the assets in which the fund invests changes. The lowest rating does not mean risk free.

The fund is rated as 4 because of the extent to which the following risk factors apply:

- The fund invests in securities which are subject to the risk that the issuer may default on interest or capital payments.
- The fund price can go up or down daily for a variety of reasons including changes in interest rates, inflation expectations or the perceived credit quality of individual countries or securities.
- The fund invests in emerging market equities and / or bonds. Investing in emerging markets involves a greater risk of loss than investing in more developed markets due to, among other factors, greater political, tax, economic, foreign exchange, liquidity and regulatory risks.
- The fund invests in high yielding bonds which carry a greater risk of default than those with lower yields.
- Convertible securities are investments that can be changed into another form upon certain triggers. As such, they can exhibit credit,

- equity and fixed interest risk. Contingent convertible securities (CoCos) are similar to convertible securities but have additional triggers which mean that they are more vulnerable to losses and volatile price movements and hence become less liquid.
 - The fund invests in mortgage and asset-backed securities (which may include collateralised loan, debt or mortgage obligations (respectively CLOs, CDOs or CMOs)). These are subject to prepayment and extension risk and additional liquidity and default risk compared to other credit securities.
 - The use of derivatives carries the risk of reduced liquidity, substantial loss and increased volatility in adverse market conditions, such as a failure amongst market participants. The use of derivatives may result in the fund being leveraged (where market exposure and thus the potential for loss by the fund exceeds the amount it has invested) and in these market conditions the effect of leverage will be to magnify losses.
- All investment involves risk. This fund offers no guarantee against loss or that the fund's objective will be attained.
- The price of assets and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment.
- Inflation reduces the buying power of your investment and income.
- The value of assets held in the fund may rise and fall as a result of exchange rate fluctuations.
- The fund could lose money if an entity (counterparty) with which it does business becomes unwilling or unable to honour its obligations to the fund.
- In extreme market conditions some securities may become hard to value or sell at a desired price. This could affect the fund's ability to meet redemptions in a timely manner.
- The fund could lose money as the result of a failure or delay in operational processes and systems including but not limited to third party providers failing or going into administration.

Where the share class is described as "hedged", currency hedging techniques are used which will reduce, but not eliminate, exchange rate risk. In particular, the currency being hedged is not necessarily related to

the currencies within the fund. Such techniques also give rise to additional risks and costs.

CHARGES

The charges you pay are used to pay the costs of running the fund including marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

Charges taken from the fund over a year

Ongoing charges	0.73%
-----------------	-------

Charges taken from the fund under certain specific conditions

Performance fee	0.00%
-----------------	-------

The entry and exit charges shown are maximum figures. In some cases you might pay less – you can find this out from your financial adviser. The Ongoing Charges figure is an estimate based on the last year's expenses and may vary from year to year. It excludes the costs of buying or selling assets for the Fund. An estimate is used in order to provide the figure that will most likely be charged. The ongoing charges figure is at 05/06/2023. A switching charge may be applied in accordance with the Prospectus. For more information about charges please see Prospectus. For more information about charges, please see the Prospectus which is available at www.abrdn.com.

PAST PERFORMANCE

Emerging Markets Total Return Bond Fund, I Qlnc Hedged GBP Shares, 31 December 2023
% Returns

Past performance is not a guide to future performance. Performance is net of charges and does not take into account any entry, exit or switching charges but does take into account the ongoing charge, as shown in the Charges section. Performance is calculated in GBP. The fund was launched in 2018. The share/unit class was launched in 2018. Performance prior to the launch date is based on the performance of Aberdeen Global II – Emerging Markets Total Return Bond Fund I-1 (GBP) Inc LU1665266471 which merged into this share class on 23/03/2018. Benchmark – [75% JP Morgan EMBI Global Diversified Index, 25% JP Morgan GBI-EM Global Diversified Index] (NAV Hedged to GBP) from 21/06/2021. FTSE World Government Bond US (Hedged to GBP) from 25/09/2017 to 20/06/2021.
