FTGF Martin Currie Global Long-Term Unconstrained Fund

Class X GBP ACC H • ISIN IE00BYT1LM06

A subfund of: Franklin Templeton Global Funds plc (the "Company")

Managed by: Franklin Templeton International Services S.à r.l., part of the Franklin Templeton group of companies.

Objectives and Investment Policy

Objective

The Fund's investment objective is to produce long-term capital appreciation.

Investment Policy

- The Fund will invest at least 80% of its assets in shares of companies located anywhere in the world, including emerging market countries. Such investment may be directly in such shares or indirectly via derivatives (financial instruments whose value is derived from the value of other assets).
- The investment manager seeks to identify shares of companies that historically have demonstrated consistent, long-term value creation. If a company passes the investment manager's initial screening then an in-depth analysis and valuation of the company is undertaken. The companies that are still considered attractive at this point are then subjected to a final due diligence analysis.
- The Fund will typically invest in 20 to 40 companies.
- The Fund may invest in derivatives, to help try to achieve the fund's objective as well as to reduce risk or cost or to generate additional growth for the fund.
- The Fund may invest in Chinese equities (meaning equities issued by companies domiciled in or deriving the predominant portion of their revenues from China), including certain eligible China A-Shares via the Shanghai-Hong Kong Stock Connect and/or Shenzhen-Hong Kong Stock Connect.

The Fund may also have exposure to China A-Shares indirectly.

• This is an Article 8 fund under the EU Sustainable Finance Disclosure Regulation.

• **Benchmark:** MSCI All Country World (Net Dividends) Index

• **Manager's Discretion:** The Fund is actively managed, and the investment manager is not constrained by the benchmark. The Fund uses the benchmark for performance comparison purposes. While many of the fund's investments will be components of the benchmark, the weightings of the fund's holdings may differ materially from the weightings in the benchmark. The Fund will also invest in securities that are not included in the benchmark. The Fund's percentage exposures to sectors and industries may differ materially from those of the benchmark.

Fund's Base Currency: USD
Share Class Currency: GBP

• **Transaction Costs:** The Fund bears costs in buying and selling investments, which may have a material impact on the fund's performance.

Dealing Frequency: You can buy, sell and switch your shares on each day that the New York Stock Exchange is open for business.

Minimum Initial Investment: For this share class the minimum initial investment is GBP 1,000.

Treatment of Income: Income and gains from the fund's investments are not paid but instead are reflected in the fund's share price.

Risk and Reward Profile

The indicator is based on the volatility of the returns (past performance) of the reported share class (calculated on a 5 year rolling return basis). Where a share class is inactive / has less than 5 years of returns, the returns of a representative benchmark are used.

There is no guarantee that the fund will remain in the indicator category shown above and the categorisation of the fund may shift over time. Historical data, which is used in calculating the indicator, may not be a reliable indicator of the future risk profile of this fund.

The lowest category does not mean a risk-free investment.

The fund does not offer any capital guarantee or protection and you may not get back the amount invested.

The fund invests in a concentrated manner (the fund holds fewer investments than many other funds) in shares of companies from various countries and sectors. As a result, the performance of the Fund can fluctuate significantly over relatively short time periods.

The fund is subject to the following risks which are materially relevant but may not be adequately captured by the indicator:

Concentrated fund: The fund invests in fewer companies than other funds which invest in shares usually do. This means that the fund does not spread its risk as widely as other funds and will therefore be affected more if an

individual company has significant losses.

Emerging markets investment: The fund may invest in the markets of countries which are smaller, less developed and regulated, and more volatile than the markets of more developed countries.

Fund currency: Changes in exchange rates between the currencies of investments held by the fund and the fund's base currency may negatively affect the value of an investment and any income received from it.

Fund operations: The fund is subject to the risk of loss resulting from inadequate or failed internal processes, people or systems or those of third parties such as those responsible for the custody of its assets, especially to the extent that it invests in developing countries.

Investment in company shares: The fund invests in shares of companies, and the value of these shares can be negatively affected by changes in the company, its industry or the economy in which it operates.

Sustainability: The fund's integration of sustainability risks in the investment decision process may have the effect of excluding profitable investments from the investment universe of the fund and may also cause the fund to sell investments that will continue to perform well. A sustainability risk could materialise due to an environmental, social or governance event or condition which may impact the fund's investments and negatively affect the returns of the fund.

Hedged class currency: The value of your investment may fall due to changes in the exchange rate between the currency of your share class and the base currency of the fund. Efforts will be made to try to protect the value of your investment against such changes, but such efforts may not succeed.

For further explanation on the risks associated with an investment in the fund, please refer to the section entitled "Risk Factors" in the base prospectus and "Primary Risks" in the fund supplement.

Charges

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.
