INTERIM MANAGEMENT REPORT

CHAIRMAN'S STATEMENT

Introduction

In addition to the Ukraine war, the six month period under review includes the resignation of Boris Johnson, the appointment of Ms Truss, a rise in UK base rates from 0.75% to 2.25%, the death of HM The Queen, the collapse of the Gilt market in response to the "mini Budget", the resignation of Ms Truss and, in the last week of the period, the appointment of Rishi Sunak as Prime Minister. This represents an unusual concentration of some of the more remarkable events in recent British political and economic history into just a six month reporting period.

It should therefore come as no surprise that the volatility experienced in our last financial year increased during this period. Inflation expectations rose steadily, as did the probability of a recession in the UK. The NAV total return in the six months to 31 October 2022 was -10.4%. The share price total return was -10.6%, reflecting a small widening of the discount.

Performance

The portfolio again underperformed its benchmark during the period which fell by 6.9%. It is important to recognise that benchmarks are tools for helping to analyse performance rather than to measure it. We do not expect performance to mirror the benchmark every year, but over the longer term the Fund Managers do expect to outperform it. This is an actively managed portfolio and this means sometimes there will be periods of underperformance: it is important to understand why.

As you will see in the Fund Managers' report, the main contributor was that they held considerably more of the portfolio in higher quality, safer investment grade bonds than the benchmark. This reflected the managers' very cautious outlook. They are positioning the portfolio for a fall in inflation and the possibility of a hard landing for the economy. If this proves to be the case then a lower risk portfolio is potentially very attractive relative to the benchmark's riskier composition.

In order to provide the Fund Managers with the greatest possibility of flexibility to react to what could be very volatile markets, the Board resolved earlier this year that if necessary the dividend can be paid in part from reserves rather than current year income. This potentially allows greater flexibility for the Fund Managers to reduce gearing and invest in lower risk, lower yielding assets should this be their preference. Both the Board and the managers are very conscious that maintaining the dividend is important for shareholders. We therefore wish to be able to maintain the dividend while giving the manager freedom to react to events.

They took advantage of this earlier in the year and we do not anticipate that dividends for the financial year ending 30 April 2023 will be fully covered by income. The Board continues to monitor the situation.

Dividends

A first interim dividend for the year ended 30 April 2023 of 1.10p (2022: 1.10p) per ordinary share was paid to shareholders on 30 September 2022 to shareholders on the register at close of business on 2 September 2022.

A second interim dividend for the year ended 30 April 2023 of 1.10p (2022: 1.10p) per ordinary share was paid on 30 December 2022 to shareholders on the register at close of business on 2 December 2022. The shares were quoted ex-dividend on 1 December 2022.

Buying Back Shares

As previously notified to shareholders, the Board has a policy which gives discretion to the Fund Managers to buy-back the Company's shares, where it is deemed accretive to shareholders to do so. During the period 3.8 million shares were bought back at an average discount of 6.63%. The Board continues to work with both the Fund Managers and its broker to enhance the market in the Company's shares.

Outlook

For the moment at least markets have stablised and interest rate expectations are falling. Since the period end, we have seen some encouraging signs that performance has started to pick up, and we hope that markets may be beginning to reward the cautious approach taken by the Managers.

Looking forward to the full year, critical questions are whether inflation has peaked and whether Central Banks have achieved this without triggering a hard landing for global economies. The managers remain cautious on this point and the focus on investment grade bonds reflects this.

Angus Macpherson Chairman 6 January 2023

FUND MANAGERS' REPORT

Performance

The Company's net asset value fell by 10.4% over the six months to 31 October 2022, underperforming the benchmark which returned -6.9%. The under-performance is predominantly driven by a larger holding in investment grade. The share price return was –10.6% (all figures on a total return basis) which reflected a widening in the discount. Earnings remain relatively stable and we remain confident in maintaining the dividend in the medium term, using revenue reserves as permitted by the Board if necessary. We continued buying back shares in the quarter and will look to continue to do so in the market if we consider it to be accretive for the shareholders.

Macro

The first six months under review have been difficult for financial markets. In developed economies, government bonds were hit by rising interest rate expectations to combat high inflation, terminal rates are now at 5% in the US, 4.7% in the UK, and 2.9% in Europe and have kept climbing during the period under review. For stocks and credit markets too, it's been a tough six months. It has only been the US dollar and commodities like oil that performed well during this period.

The worry among investors is that the cumulative effect of all these rate increases will be enough to push economies into a recession. The current argument is centred around whether this will be a hard or soft landing for the global economy. It is clear that the UK and some European countries have entered a recession but the response by country differs. The UK is pursuing relatively tight fiscal policies which may prolong the downturn but is necessary to re-establish credibility post the ex-Chancellor Kwarteng's budget at the end of September.

Europe has no such issues and is pursuing looser fiscal measures to buffer the effects of the downturn. The US has proved resilient so far, buoyed by a strong labour market as well as excess savings from the pandemic. We can, however, see the reversal in the housing market and tightening of financial conditions engineered by the Fed. Even there, it's in the process of turning down, but it's taking time to do so, and it's more likely to be a story for 2023. It is consensual amongst economists now to forecast a recession but it's the depth which provokes disagreements.

The COVID period has marked a return to boom-bust economics which are easier to forecast and predict from a growth perspective – over stimulus followed by contraction. The difficulty has been the return and cause of inflation and how to put the inflation issue "back in the bottle". We have seen encouraging signs in the US with both core and headline falling in the last print and forecasters predicting a declining trajectory. Europe and the UK will take a little longer and we should see declines post-winter when energy costs will ease. There is one truism in economics which is that recessions kill inflation cycles and central banks agree with this and want to undo the fiscal and monetary splurge from COVID by keeping policy tight.

During this period however rates and spreads have made huge adjustments to a level where we think some parts of the fixed income markets start looking attractive. We think 2023's theme will not be inflation but growth, or the lack of it.

Asset Allocation & Stock Selection

The Board gave us permission to reduce gearing if we felt necessary which we used during the summer on our fears of a hard landing. Into the autumn we foresaw a tactical rally in the credit markets and chose to add gearing back to take part in the rally through a combination of financial gearing (borrowing money and investing at a better yield than the cost of debt) and synthetic gearing (the use of credit derivatives). We will continue to use some of the gearing facility in a tactical sense as opportunities present themselves given the continued volatility of market prices, which at times seem devoid of fundamentals.

In terms of activity, we spent time making the portfolio more defensive during the period as we saw growth turning down and reduced our high yield weighting and increased investment grade weighting. This usually works in a cycle as the investment grade holding has a lower beta to growth than subinvestment credit like high yield and loans and therefore outperforms. It has been an unusual cycle in terms of inflation proving to be a more important factor driving market returns this year than growth. However, we expect this to correct itself in the coming financial year with inflation falling and think the portfolio is well set up for that. We think the aggressive rate hikes means the odds of a hard landing have increased but it's hard to quantify the lagged impact on policy tightening but we remain cautious. In terms of performance both our high yield and loan holdings outperformed their relative benchmark but our greater weighting to investment grade detracted.

Notable additions to the portfolio include the short dated senior paper in banks such as JP Morgan, Lloyds and Barclays. We added corporate investment grade bonds too including Abbvie (pharmaceuticals), T-Mobile (US mobile phone operator) and AB Inbev (beverages) to the portfolio. This more defensive positioning we think will benefit holders; whilst 2022 saw both rates and spreads sell off in unison, in 2023 we foresee a more traditional relationship will ensue where rates and spreads may move in opposite directions but the carry from investment grade will ensure a decent cushion to generate a positive return.

ESG

We have seen no material change to our investment policy following the amendments to the investment objective and policy that we made for ESG considerations. Those amendments largely reflect the strategy and processes employed by the Investment Manager on behalf of the Company.

Outlook

We feel that the market now understands and prices monetary policy risks increasingly well, but fundamental risks are not in the price. We remain cautious on gearing and credit in the short term given current valuations and possible hard landing outlook. We feel a hard economic landing outlook is much more likely than a soft landing. Consequently, we are taking a more defensive stance against default risk:- by favouring investment grade bonds over high yield bonds (and secured loans). We feel the Company would be better positioned, in a relative sense, with this asset class bias. However, if a softer economic landing were to occur, the Company would be expected to perform reasonably well but with a lower beta to the upside. Further, if we were to experience increased risk aversion, which we do expect, we would be well positioned to add more high yield bonds at more attractive yields going forwards.

John Pattullo, Jenna Barnard and Nicholas Ware Fund Managers 6 January 2023

PRINCIPAL RISKS AND UNCERTAINTIES

The principal risks and uncertainties associated with the Company's business can be divided into the following main areas:

- General market risks associated with the Company's investments, including interest rate, credit and currency risks.
- Operational risks, including:
 - Continued interest and commitment of the Fund Managers and Investment Manager.
 - Janus Henderson's effective operation of systems of internal control and management reporting.
 - Credit standing and quality of service of the Depositary.
 - Reliance on service providers.

Information on these risks and uncertainties and how they are managed are given in the annual report for the year-ended 30 April 2022.

In the view of the Board these principal risks and uncertainties are as applicable to the remaining six months of the financial year as they were to the six months under review.

STATEMENT OF DIRECTORS' RESPONSIBILITIES

Each of the directors confirm that, to the best of their knowledge:

- the condensed set of financial statements for the half-year ended 31 October 2022 have been prepared in accordance with UK adopted international accounting standards, and give a true and fair view of the assets, liabilities, financial position and profit or loss of the Company;
- (b) this report and condensed set of financial statements include a fair review of the information required by Disclosure Guidance and Transparency Rule 4.2.7R (indication of important events during the six month period and description of principal risks and uncertainties for the remaining six months of the year); and
- (c) this report includes a fair review of the information required by Disclosure Guidance and Transparency Rule 4.2.8R (disclosure of related party transactions and changes therein).

For and on behalf of the Board Angus Macpherson Chairman 6 January 2023

¹ Cash inflow from interest income was £4,352,000 (31 October 2021: £4,295,000; 30 April 2022: £8,892,000) and cash inflow from dividends was £132,000 (31 October 2021: £132,000; 30 April 2022: £264,000).

NOTES TO THE INTERIM FINANCIAL INFORMATION

1. Accounting policies – basis of accounting

The Company is a registered investment company as defined by Section 833 of the Companies Act 2006 and operates as an investment company in accordance with Section 1158 of the Corporation Tax Act 2010.

These condensed financial statements comprise the unaudited results of the Company for the half-year ended 31 October 2022. They have been prepared on a going concern basis and in accordance with International Accounting Standard 34, "Interim Financial Reporting", as adopted by the European Union and with the Statement of Recommended Practice for Investment Trusts ("SORP") issued by the Association of Investment Companies dated November 2014, and updated in April 2021, where the SORP is consistent with the requirements of IFRS.

For the period under review the Company's accounting policies have not varied from those described in the Annual Report for the year-ended 30 April 2022. The condensed set of financial statements has been neither audited nor reviewed by the Company's auditors.

2. Return per ordinary share

	(Unaudited)	(Unaudited)	(Audited)
	Half-year ended	Half-year ended	Year-ended
	31 October 2022	31 October 2021	30 April 2022
	£'000	£'000	£'000
Net revenue return	3,702	4,314	8,775
Net capital return	(18,959)	(1,142)	(23,891)
	(15,257)		
Net total return		3,172	(15,116)
	=====	======	=====
Weighted average number of ordinary			
shares	184,891,469	190,102,392	188,788,384
Revenue return per ordinary share	2.00p	2.27p	4.65p
Capital return per ordinary share	(10.25p)	(0.60p)	(12.66p)
Total return per ordinary share	(8.25p)	1.67p	(8.01p)

The Company has no securities in issue that could dilute the return per ordinary share. Therefore, the basic and diluted earnings per ordinary share are the same.

3. Net asset value per ordinary share

The net asset value per ordinary share is based on the net asset value attributable to ordinary shareholders at 31 October 2022 of £126,075,000 (31 October 2021: £172,561,000; 30 April 2022: £148,417,000) and on 182,072,717 ordinary shares, being the number of ordinary shares in issue at 31 October 2022 (31 October 2021: 188,764,303; 30 April 2022: 186,559,219).

4. Share capital

During the half-year ended 31 October 2022, 4,486,502 ordinary shares were bought back. At 31 October 2022 there were 182,072,717 ordinary shares of 1p nominal value in issue. Since 31 October 2022, no shares have bought back. The Company has 5,361,586 shares held in Treasury.

5. Dividends

The following dividends have been paid during the period, or will be paid, as interest distributions for UK tax purposes from the Company's revenue account.

A fourth interim dividend for the year ended 30 April 2022 of 1.10p (2021: 1.10p) per ordinary share was paid on 30 June 2022 to shareholders on the register at close of business on 6 June 2022.

A first interim dividend payment for the year ended 30 April 2023 of 1.10p (2022: 1.10p) per ordinary share was paid on 30 September 2022 to shareholders on the register at close of business on 9 September 2022.

On 22 November 2022 the Board declared a second interim dividend payment for the year ending 30 April 2023 of 1.10p (2022: 1.10p) per ordinary share that was paid to shareholders on 30 December 2022. The shares went ex-dividend on 1 December 2022. This dividend was paid as an interest distribution for UK tax purposes from the Company's revenue account.

6. Financial instruments

The table below sets out the fair value measurements using the IFRS 13 fair value hierarchy. Categorisation within the hierarchy has been determined on the basis of the lowest level of input that is significant to the fair value measurement of the relevant asset as follows:

- Level 1: quoted (unadjusted) market prices in active markets for identical assets or liabilities;
- Level 2: valuation techniques for which the lowest level of input that is significant to the fair value measurement is directly or indirectly observable; and
- Level 3: valuation techniques for which the lowest level of input that is significant to the fair value measurement is unobservable.

At the end of the period, the levels of each investment have been assessed in line with the criteria above. Any investment that did not meet the level 1 criteria has been classified as level 2. This will include any investments where there is insufficient liquidity in trading volumes at the period end.

The financial assets and liabilities measured at fair value in the Condensed Statement of Financial Position are grouped into the fair value hierarchy at the reporting date as follows:

As at 31 October 2022 (unaudited)	Level 1 £'000	Level 2 £'000	Level 3 £'000	Total £'000
	2 000	2 000	2000	2 000
Financial assets at fair value through profit or loss:				
Investments	126,814	14,100	-	140,914
Total	126,814	14,100	-	140,914
	======	======	======	======
Financial liabilities at fair value through profit or loss:				
Credit default swaps	-	132	-	132
Currency forward exchange contracts	-	1,254	-	1,254
Total	-	1,386	-	1,386
	======	======	======	======

As at 31 October 2021 (unaudited)	Level 1 £'000	Level 2 £'000	Level 3 £'000	Total £'000
Financial assets at fair value through profit or loss:				
Investments	182,542	15,040	_	197,582
Credit default swaps	-	2,676	-	2,676
Total	182,542	17,716	-	200,258
	======	======	======	======
Financial liabilities at fair value through profit or loss				
Currency forward exchange contracts	-	578	-	578
Total	-	578	-	578
	======	======	======	======
	Level 1	Level 2	Level 3	Total
As at 30 April 2022 (audited)	£'000	£'000	£'000	£'000
Financial assets at fair value through profit or loss:

Credit default swaps	-	727	-	727
Total	152,690	21,261	-	173,951
	======	======	======	======
Financial liabilities at fair value through profit or loss:				
Currency forward exchange contracts	-	4,256	-	4,256
Total	-	4,256 ======	-	4,256 =====
				=

There have been no transfers between levels of fair value hierarchy during the period. Transfers between levels of fair value hierarchy are deemed to have occurred at the date of the event or change in circumstances that caused the transfer.

Valuation techniques used by the Company are explained in the accounting policies note in the Company's Annual Report for the year-ended 30 April 2022.

There were no transfers to or from level 3 during the period.

7. Related party transactions

The Company's transactions with related parties in the half-year were with its directors and Janus Henderson Investors (Manager). There have been no material transactions between the Company and its directors during the period. In relation to the provision of services by the Manager, other than fees payable by the Company in the ordinary course of business and the provision of sales and marketing services, there have been no material transactions with the Manager affecting the financial position of the Company during the period under review.

8. Going concern

The assets of the Company consist mainly of securities that are listed and readily realisable and, accordingly, the directors believe that the Company has adequate financial resources to continue in existence for at least twelve months from the date of approval of the financial statements. Having assessed these factors, the principal risks, and other matters discussed in connection with the viability statement set out in the Annual Report for the year-ended 30 April 2022, the directors have decided that it is appropriate for the financial statements to be prepared on a going concern basis.

9. Comparative information

The financial information contained in this half-year report does not constitute statutory accounts as defined in section 434 of the Companies Act 2006. The financial information for the half year periods ended 31 October 2022 and 31 October 2021 have not been audited or reviewed by the Company's auditors. The financial information for the year-ended 30 April 2022 has been extracted from the latest published accounts, and does not constitute the statutory accounts for that year. Those accounts have been delivered to the Registrar of Companies and included the Report of the Independent Auditors, which was unqualified and did not include a statement under either section 498(2) or 498(3) of the Companies Act 2006.
