INDEX FUND MANAGEMENTTEAM

Celebrating
35+
Years

The skill set and expertise we have developed over 35+ years in index management has allowed us to continuously evolve our investment processes. The Index Fund Management team comprises 30 fund managers with an average experience of 15 years, supported by 33 broader team members. Management oversight is provided by Howie Li, Global Head of Index Funds. The team also has full access to the resources and research of other specialists within L&G, including economists and strategists.

Higher fund constituents vs. index constituents may be due to liquidity positions, derivatives, short term investments and fractional unit differences.

#### **KEY RISKS**

- The value of an investment and any income taken from it is not guaranteed and can go down as well as up; you may not get back the amount you originally invested.
- This fund holds bonds that are traded through agents, brokers or investment banks matching buyers and sellers. This makes the bonds less easy to buy and sell than investments traded on an exchange. In exceptional circumstances the fund may not be able to sell bonds and may defer withdrawals, or suspend dealing. The Directors can only delay paying out if it is in the interests of all investors and with the permission of the fund depositary.
- The fund invests directly or indirectly in bonds which are issued by companies
  or governments. If these companies or governments experience financial
  difficulty, they may be unable to pay back some or all of the interest, original
  investment or other payments that they owe. If this happens, the value of the
  fund may fall.
- This fund invests in inflation-linked bonds, which are particularly sensitive to changes in inflation rates. Their values are likely to fall when inflation rates fall.
- The fund could lose money if any institution providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the fund.
- Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains.
- We may take some or all of the ongoing charges from the fund's capital rather than the fund's income. This increases the amount of income, but it reduces the growth potential and may lead to a fall in the value of the fund.
- Investment returns on bonds are sensitive to trends in interest rate movements. Such changes will affect the value of your investment.
