\* Non-executive Director.

## About the Fund

BlackRock US Dynamic Fund (the “Fund”) is a UK UCITS scheme under the COLL Sourcebook. The Fund was established on 1 December 1982. The Fund was previously known as Mercury American Growth Fund. It was renamed Mercury American Fund and the investment objective changed on 26 March 1992. With effect from 30 September 2000, the Fund was renamed Merrill Lynch American Fund. It was renamed Merrill Lynch US Dynamic Fund and the investment objective changed on 1 October 2006. The Fund adopted its present name with effect from 28 April 2008. The Fund’s FCA product reference number is 108374.

### Assessment of value

The FCA requires UK fund managers to complete an annual assessment of whether their UK authorised funds provide value for investors. Our assessment considers fund and unit class level performance, costs and charges, and service quality, concluding with an evaluation of whether investors receive value. BlackRock has fulfilled its obligations for the reporting requirement, including assessing relevant charges, and published the annual assessment of value statements on the BlackRock website on 30 October 2023 in a composite report for all funds managed by BlackRock Fund Managers Limited subject to these requirements. The next annual assessment is due for publication by the end of October 2024.

### Task Force on Climate-Related Financial Disclosures

The Manager has produced a supplemental detailed Climate Report which can be found on BlackRock’s website [www.blackrock.com/uk/literature/public-disclosure/tcfd-product-level-disclosure-report-bibf.pdf](https://www.blackrock.com/uk/literature/public-disclosure/tcfd-product-level-disclosure-report-bibf.pdf) which is a response to, and is consistent with, all the recommendations and relevant recommended disclosures of the Task Force on Climate-related Financial Disclosures (TCFD). These disclosures describe how the Manager incorporates climate-related risks and opportunities into governance, strategy, risk management, metrics and targets and how the Manager is responding to the expectations of our stakeholders.

## Fund Managers

As at 31 August 2024, the Fund Managers were Todd Burnside and Ibrahim Kanan.

## Significant Events

### Changes in the Directors of the Manager

T S Hale was appointed as a Director effective 16 April 2024.

H N Mephram resigned as a Director effective 30 June 2024.

# Risk and Reward Profile

	Lower risk Typically lower rewards					Higher risk Typically higher rewards	
Unit Class							
A Income	1	2	3	4	5	6	7
A Accumulation	1	2	3	4	5	6	7
D Income	1	2	3	4	5	6	7
D Accumulation	1	2	3	4	5	6	7

- The risk indicator was calculated incorporating historical or simulated historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk category shown is not guaranteed and may change over time.
- The lowest category does not mean risk free.

For more information on this, please see the Fund's Key Investor Information Documents ("KIIDs"), which are available at [www.blackrock.com](http://www.blackrock.com).

# Investment Manager’s Report

for the six months ended 31 August 2024

## Investment Objective

The aim of the Fund is to provide a return on your investment (generated through an increase in the value of the assets held by the Fund) (gross of fees) over the long term (5 or more consecutive years beginning at the point of investment) by investing in shares of companies incorporated or listed in the United States.

Comparator benchmark	Investment management approach
Russell 1000 Index	Active

## Performance Summary

The following table compares the Fund’s realised performance against the performance of the comparator benchmark during the financial period ended 31 August 2024.

	Fund return %	Comparator benchmark %
Class D Accumulation Units	3.33	6.85

Further information on the performance measures and calculation methodologies used is detailed below:

- Fund returns shown, calculated net of fees, are the performance returns for the primary unit class of the Fund which has been selected as a representative unit class. The primary unit class represents the class of unit which is the highest charging unit class, free of any commissions or rebates, and is freely available. Performance returns for any other unit class can be made available on request.
- Fund returns are based on the NAV per unit as at close of business for reporting purposes only, for the purpose of fair comparison and presentation with the comparator benchmark close of business valuation point.
- Due to the Financial Reporting Standard 102 (“FRS 102”) and the Statement of Recommended Practice for Authorised Funds (“SORP”) requirements, including the accounting policy for the valuation point at 12 noon, there may be differences between the NAV per unit as recorded in the financial statements and the NAV per unit calculated in accordance with the Prospectus.

All financial investments involve an element of risk. Therefore, the value of your investment and the income from it will vary and the return of your initial investment amount cannot be guaranteed. Past performance is not a guide to future performance and should not be the sole factor of consideration when selecting a product.

## Global Economic Overview

Global equities, as represented by the MSCI All Country World Index, returned 6.40% (in GBP terms) during the six months ended 31 August 2024. Equities gained amid milder inflation (the rate of increase in the prices of goods and services) and investor expectations of a shift in monetary policy from the world’s largest central banks. However, heightened geopolitical tensions, including the war in the Middle East and attacks on Red Sea shipping lanes, raised the prospect of disruption to the global economy.

# Investment Manager's Report continued

Economic growth in the US slowed somewhat in the first quarter of 2024 but outperformed analysts' expectations in the second quarter. Demand from companies for workers remained high for most of the six-month period, but there were signs of weakness in the US jobs market in August 2024. In Japan, gross domestic product ("GDP") contracted in the first quarter of 2024, but recovered strongly in the second quarter due to rising private consumption. The UK economy rebounded from a mild recession with positive growth in the first and second quarters as services and production output accelerated. The Eurozone also returned to growth, helped by the strong performance of several of the bloc's smaller nations, including Ireland, Spain and Portugal. Eurozone inflation remained moderate, as consumer spending was tepid and consumer confidence remained below pre-pandemic levels.

Most emerging market economies continued to expand, although geopolitical tensions and higher interest rates presented significant economic challenges. China's GDP grew more slowly than expected despite significant government stimulus, and investors remained concerned about the country's real estate sector and weak retail sales. India's economy continued to post strong growth and industrial production grew on an annual basis throughout the period.

Central banks in the West started to loosen monetary policy, or prepared to do so. The US Federal Reserve ("the Fed") kept interest rates steady but suggested that an initial rate cut was likely in September 2024. The Fed continued to reduce some of the accumulated bond holdings on its balance sheet. Both the Bank of England ("BoE") and the European Central Bank ("ECB") cut interest rates later in the six month period. Furthermore, the ECB continued to reduce the size of its balance sheet by allowing some of its outstanding bonds to mature without reinvestment. In a notable shift, the Bank of Japan ("BoJ") raised interest rates in March 2024 – its first hike since 2007 – and then again in July.

Global equity performance was strong overall: declining inflation drove hopes that monetary policy would begin to loosen, although signs of slowing economic growth caused concern among investors in August. US stocks posted robust gains as the US economy performed better than most developed countries, with major technology stocks advancing on hopes that developments in artificial intelligence would drive growth. European stocks rose as declining inflation drove hopes for lower interest rates. Stocks in Asia also gained, despite continued concerns about China's economy and regulatory environment. Emerging markets stocks posted solid returns, helped by the prospect of monetary policy loosening in developed economies. Globally, bonds and equities that factor companies' environmental, social and governance ("ESG") characteristics faced regulatory concerns and shifting investor sentiment. ESG funds experienced positive inflows overall. Although European investment held up, there were outflows in the US following politicians' attempts to impose restrictions on investing in ESG-focused funds. In both the US and Europe, regulators proposed new rules to ensure investment companies were able to substantiate claims related to sustainability. The US Securities and Exchange Commission ("SEC") is expected to introduce regulations governing investment companies' climate disclosures by the end of 2024. Meanwhile, the European Securities and Markets Authority ("ESMA") published guidelines relating to the how investment companies use ESG-related terms. These are due to come into effect later in 2024. In the UK, the Financial Conduct Authority ("FCA") introduced a package of measures to improve the trust and transparency of sustainable investment products. The anti-greenwashing rule came into effect on 31 May 2024 and UK-based fund managers were able to start using the new investment labels from 31 July 2024.

# Investment Manager’s Report continued

Global government bond yields (which move inversely to prices) rose early in the six month period as inflation remained stubbornly above central bank targets. However, US Treasury yields fell sharply in August 2024 as expectations of an interest rate cut by the Fed increased. Yields on UK gilts and European government bonds followed a similar trajectory, although yields on French government bonds rose particularly sharply after the surprise announcement of national elections in June 2024. Japanese government bond yields rose following changes to the BoJ's yield curve control policy and increases in interest rates but fell back late in the six month period due to the strengthening Japanese yen. Global corporate bond performance was broadly positive; increasing bond yields attracted investors, and continued resilience in the global economy alleviated credit concerns, particularly for high-yield bonds.

In the commodities markets, Brent crude oil prices rose in April as continued instability in the Middle East caused concern among investors but fell back following global production increases and concerns about global growth. Gold prices increased significantly amid rising geopolitical tensions, the possibility of Fed interest rate reductions and rising demand from investors in Asia. Copper prices also rose due to supply constraints and demand from decarbonisation and electrification efforts.

In the foreign exchange markets, the US dollar was down relative to other major global currencies. The US dollar fell against sterling, the euro, the Japanese yen and the Chinese yuan.

## Fund Performance Review and Activity

Over the six month period to 31 August 2024, the Fund's performance return was 3.33% and the active return was (3.52%), very regrettably underperforming its comparator benchmark which returned 6.85% (active return is the difference between the Fund's return and the comparator benchmark return).

Large-cap U.S. equities, as represented by the S&P 500 Index, returned +11.59% in US Dollar terms during the period. U.S stocks continued to rally higher with narrow market leadership persisting through the first half of the year. Growth stocks generally outperformed value stocks, with markets boosted by healthy earnings results and enthusiasm for potential artificial intelligence ("AI")-driven innovation. Market expectations for interest rate cuts were pushed out from the start of the year to later in the year, but further easing of inflation and recent cooling in employment growth has Federal Reserve (the "Fed") officials signaling their intentions to begin easing monetary conditions via future interest rate cuts.

During the six month period, the following were the largest contributors to and detractors from the Fund's return relative to the comparator benchmark:

Largest Contributors		Largest Detractors	
Sector	Effect on Fund return	Sector	Effect on Fund return
Health Care <sup>#</sup>	0.54%	Information Technology <sup>^</sup>	(1.62%)
Financials <sup>^</sup>	0.25%	Consumer Staples <sup>^</sup>	(1.55%)
Real Estate <sup>^</sup>	0.03%	Utilities <sup>^</sup>	(0.28%)
		Consumer Discretionary <sup>#</sup>	(0.27%)
		Energy <sup>#</sup>	(0.11%)

<sup>#</sup> Overweight position - holds more exposure than the comparator benchmark.

<sup>^</sup> Underweight position - holds less exposure than the comparator benchmark.

# Investment Manager’s Report continued

The largest detractor from the Fund's relative performance was selection in the Information Technology sector. Notably, stock selection within the semiconductors and semiconductor equipment subsector weighed on the Fund's relative returns. Within the Consumer Staples sector, stock selection in consumer staples distribution and retail companies detracted from performance. Lack of exposure to the Utilities sector proved to be unfavourable to the Fund, specifically avoiding the electric utilities industry.

The largest contributor to the Fund's relative performance was stock selection in the Health Care sector. Notably, selection in the health care providers and services subsector proved beneficial. Investment decisions within Financials boosted relative results, specifically within the insurance industry. Underweight positioning in the Real Estate sector was additive to the Fund's relative returns.

The following table details the significant active positions, where the Fund was overweight (held more exposure than the comparator benchmark) and underweight (held less exposure than the comparator benchmark), at 31 August 2024 and 29 February 2024:

Top overweight positions			
31 August 2024		29 February 2024	
Sector	Active Weighting	Sector	Active Weighting
Communication Services	4.98%	Communication Services	5.30%
Health Care	4.57%	Health Care	3.30%
Materials	1.15%	Consumer Discretionary	1.67%

Top underweight positions			
31 August 2024		29 February 2024	
Sector	Active Weighting	Sector	Active Weighting
Consumer Staples	(3.43%)	Industrials	(3.73%)
Utilities	(2.32%)	Information Technology	(3.64%)
Financials	(1.90%)	Real Estate	(2.59%)

Where the Fund is underweight to a sector, the return from such sector will have an opposite effect on the Fund's active return. This may result in a sector being listed as a contributor/detractor but not listed on the Fund's Portfolio Statement.

## Net Asset Value

At 31 August 2024	Units in Issue	Net Asset Value £000's	Net Asset Value per Unit p
A Income	60,426	1,551	2,567
A Accumulation	2,506,943	69,052	2,754

# Notes to Financial Statements (unaudited)

for the six months ended 31 August 2024

## Accounting Policies

The financial statements have been prepared in accordance with United Kingdom Generally Accepted Accounting Practice ("UK GAAP") and the Statement of Recommended Practice for Authorised Funds (the "SORP") issued by the Investment Management Association (now known as the Investment Association) in May 2014 and amended in June 2017.

The accounting policies applied are consistent with those of the financial statements for the year ended 29 February 2024 and are described in those annual financial statements.

# Supplementary Information

## Efficient Portfolio Management Techniques

The Manager may, on behalf of the Fund and subject to the conditions and within the limits laid down by the FCA, the Prospectus, as amended from time to time, and the ESMA Guidelines (as adopted by the FCA), employ techniques and instruments relating to transferable securities. These include repurchases/reverse repurchase transactions ("repo transactions") and securities lending, provided that such techniques and instruments are used for efficient portfolio management purposes.

## Securities Lending

Securities lending transactions entered into by the Fund are subject to a written legal agreement between the Fund and the Stock Lending Agent, BlackRock Advisors (UK) Limited, a related party to the Fund, and separately between the Stock Lending Agent and the approved borrowing counterparty. Collateral received in exchange for securities lent is transferred under a title transfer arrangement and is delivered to and held in an account with a tri-party collateral manager in the name of The Bank of New York Mellon (International) Limited ("the Trustee") on behalf of the Fund. Collateral received is segregated from the assets belonging to the Fund's Trustee or the Stock Lending Agent.

The following table details the value of securities on loan as a proportion of the Fund's total lendable assets and Net Asset Value (NAV) as at 31 August 2024 and the income earned for the period ended 31 August 2024. Total lendable assets represents the aggregate value of assets forming part of the Fund's securities lending programme. This excludes any assets held by the Fund that are not considered lendable due to any market, regulatory, investment or other restriction.

Securities on loan		
% of lendable assets	% of NAV	Income earned £000's
2.53	2.51	5

The total income earned from securities lending transactions is split between the relevant Fund and the Stock Lending Agent. The Fund receives 62.5% while the Stock Lending Agent receives 37.5% of such income, with all operational costs borne out of the Stock Lending Agent's share.

The following table details the value of securities on loan (individually identified in the Fund's portfolio statement) and associated collateral received, analysed by counterparty as at 31 August 2024.

Counterparty	Counterparty's country of establishment	Securities Lending	
		Amount on loan	Collateral received
		£000's	£000's
J.P. Morgan Securities Plc	UK	3,618	3,929
The Bank of Nova Scotia	Canada	155	168
UBS	Switzerland	2,285	2,580
<b>Total</b>		<b>6,058</b>	<b>6,677</b>

All securities on loan have an open maturity tenor as they are callable or terminable on a daily basis.

## Supplementary Information continued

### Collateral

The Fund engages in activities which may require collateral to be provided to a counterparty ("collateral posted") or may hold collateral received ("collateral received") from a counterparty.

The following table provides an analysis by currency of the underlying cash and non-cash collateral received/posted by way of title transfer collateral arrangement by the Fund, in respect of securities lending transactions, as at 31 August 2024.

Currency	Cash collateral received £000's	Cash collateral posted £000's	Non-cash collateral received £000's	Non-cash collateral posted £000's
<b>Securities lending transactions</b>				
AUD	–	–	6	–
CAD	–	–	751	–
CHF	–	–	634	–
EUR	–	–	1,162	–
GBP	–	–	72	–
HKD	–	–	17	–
JPY	–	–	2,787	–
SGD	–	–	47	–
USD	–	–	1,201	–
<b>Total</b>	<b>–</b>	<b>–</b>	<b>6,677</b>	<b>–</b>

Non-cash collateral received by way of title transfer collateral arrangement in relation to securities lending transactions cannot be sold, re-invested or pledged.

The following table provides an analysis of the type, quality and maturity tenor of non-cash collateral received/posted by the Fund by way of title transfer collateral arrangement in respect of securities lending transactions, as at 31 August 2024.

Collateral type and quality	Maturity Tenor					Open transactions	Total
	1 - 7 days	8 - 30 days	31 - 90 days	91 - 365 days	More than 365 days		
	£000's	£000's	£000's	£000's	£000's		
<i>Collateral received - securities lending</i>							
<b>Fixed income</b>							
Investment grade	–	–	454	729	793	–	<b>1,976</b>
<b>Equities</b>							
Recognised equity index	–	–	–	–	–	4,701	<b>4,701</b>
<b>Total</b>	<b>–</b>	<b>–</b>	<b>454</b>	<b>729</b>	<b>793</b>	<b>4,701</b>	<b>6,677</b>

Investment grade securities are those issued by an entity with a minimum investment grade credit rating from at least one globally recognised credit rating agency; Standard & Poor's, Moody's or Fitch.

Supplementary Information continued

A recognised equity index contains at least 20 equities where no single equity represents more than 20% of the total index and no five equities combined represent more than 60% of the total index.

The maturity tenor analysis for fixed income securities received as collateral is based on the respective contractual maturity date, while for equity securities received as collateral are presented as open transactions as they are not subject to a contractual maturity date.

As at 31 August 2024, all non-cash collateral received by the Fund in respect of securities lending transactions is held by the Fund's Trustee (or through its delegates).

The following table lists the top ten issuers (or all the issuers if less than ten) by value of non-cash collateral received by the Fund by way of the title transfer collateral arrangement across securities lending transactions as at 31 August 2024.

Issuer	Value £000's	% of the Fund's NAV
United States Treasury	741	0.31
Canada (Government)	729	0.30
Netherlands, Kingdom Of The (Government)	439	0.18
Novartis Ag	402	0.17
Alphabet Inc Class C	402	0.17
Allianz	402	0.17
Intesa Sanpaolo	288	0.12
Japan Tobacco Inc	277	0.12
Tdk Corp	258	0.11
Zurich Insurance Group Ag	231	0.10
Other issuers	2,508	1.02
<b>Total</b>	<b>6,677</b>	<b>2.77</b>
