iShares MSCI UK IMI ESG Leaders UCITS

ETF

A sub-fund of iShares VII plc

GBP (Dist) Share Class

ISIN: IE00BMDBMH44 Exchange Traded Fund (ETF)

Manager: BlackRock Asset Management Ireland Limited

Objectives and Investment Policy

- ▶ The Share Class is a share class of a Fund which aims to provide you with total return on your investment, through a combination of capital growth and income on the Fund's investments, which reflects the return of MSCI UK IMI Country ESG Leaders 5% Issuer Capped Index, the Fund's benchmark index (Index).
- ▶ The Share Class, via the Fund is passively managed, and aims to invest in equity securities (e.g. shares) that, so far as possible and practicable, make up the Index.
- ▶ The Index measures the performance of a sub-set of equity securities of companies in the UK within the MSCI United Kingdom IMI Index (Parent Index) with higher ESG ratings than other sector peers within the Parent Index based on a series of exclusionary and ratings based criteria. Companies involved in certain business lines/ activities are excluded, as outlined in the Fund's Prospectus.
- ▶ The Index targets 50% cumulative coverage of the free float adjusted market capitalisation of each Global Industry Classification Standard ("GICS") sector within the Parent Index with a minimum cumulative coverage set at 45%. Eligible constituents within each GICS sector are ranked by the index provider and are weighted based on their free float adjusted market capitalisation. Free float-adjusted means that only shares available to international investors, rather than all of a company's issued shares, are used in calculating the Index. Free float-adjusted market capitalisation is the share price of the company multiplied by the number of shares available to international investors.
- ▶ The Index rebalances on a quarterly basis and targets 5% issuer exposure capping. To reduce the risk of non-compliance with the 5% threshold due to market movements, the weight of each issuer is capped at 4.5%. The Fund uses optimising techniques to achieve a similar return to its Index. These techniques may include the strategic selection of certain securities that make up the Index or other securities which provide similar performance to certain constituent securities. These may include the use of financial derivative instruments (FDIs) (i.e. investments the prices of which are based on one or more underlying assets). FDIs (including FX contracts) may be used for direct investment purposes.
- ▶ The Fund adopts a best-in-class approach to sustainable investing, i.e. it is expected that the Fund will invest in the best issuers from an ESG perspective (based on the ESG criteria of the Index) within each relevant sector of activities covered by the Index.
- ▶ The Fund may also engage in short-term secured lending of its investments to certain eligible third parties to generate additional income to offset the costs of the Fund.
- ▶ Recommendation: This Fund is suitable for medium to long term investment, though the Fund may also be suitable for shorter term exposure to the Index.
- ▶ Your shares will be distributing shares (i.e. income will be paid on the shares semi-annually).
- ▶ Your shares will be denominated in Sterling, the Fund's base currency.
- ▶ The shares are listed on one or more stock exchanges and may be traded in currencies other than their base currency. The performance of your shares may be affected by this currency difference. In normal circumstances, only authorised participants (e.g. select financial institutions) may deal in shares (or interests in shares) directly with the Fund. Other investors can deal in shares (or interests in shares) daily through an intermediary on stock exchange (s) on which the shares are traded. Indicative net asset value is published on relevant stock exchanges websites.

Risk and Reward Profile

- ▶ The risk indicator was calculated incorporating simulated historical data and may not be a reliable indication of the future risk profile of the Share Class.
- ▶ The risk category shown is not guaranteed and may change over time.
- ▶ The lowest category does not mean risk free.
- ▶ The Share Class is rated six due to the nature of its investments which include the risks listed below. These factors may impact the value of the Share Class or expose the Share Class to losses.
 - Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political, sustainability-related or regulatory events.

- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- The benchmark index only excludes companies engaging in certain activities inconsistent with ESG criteria if such activities exceed the thresholds determined by the index provider. Investors should therefore make a personal ethical assessment of the benchmark index's ESG screening prior to investing in the Fund. Such ESG screening may adversely affect the value of the Fund's investments compared to a fund without such screening.
- ▶ Particular risks not adequately captured by the risk indicator include:
 - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Share Class to financial loss.

Charges

The charges are used to pay the costs of running the Share Class, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

*Not applicable to secondary market investors. Investors dealing on a stock exchange will pay fees charged by their stock brokers. Such charges are publicly available on exchanges on which the shares are listed and traded, or can be obtained from stock brokers.

*Authorised participants dealing directly with the Fund will pay related transaction costs including, on redemptions, any applicable capital gains tax (CGT) and other taxes on underlying securities.

The ongoing charges figure is based on the fixed annualised fee charged to the Share Class in accordance with the Fund's prospectus. This figure excludes portfolio trade related costs, except costs paid to the depositary and any entry/exit charge paid to an underlying collective investment scheme (if any).

** To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.
