

KEY INVESTOR INFORMATION

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

LANDSEERAM EUROPEAN EQUITY FOCUS LONG/SHORT FUND

a sub-fund of Coremont Investment Fund

(ISIN: LU2221849321, share class: B (USD) (Accumulation))

Management Company: Carne Global Fund Managers (Luxembourg) S.A.

OBJECTIVES AND INVESTMENT POLICY

- > The sub-fund (the "Fund") is actively managed. This means that the investment manager has full discretion over the composition of the portfolio. The Fund is not managed in reference to any benchmarks.
- > The Fund seeks to achieve positive risk adjusted returns for investors primarily through investing in equity and equity like assets. The Fund aims to provide a positive (absolute) return, regardless of market conditions, over any 12-month period.
- > The Fund may obtain its investment exposure through direct investments or through the use of financial derivative investment. Each derivative's return is linked to movements in the underlying asset.
- > The Fund shall seek to achieve its investment objective by investing primarily in, but not limited to, European equities and equity related instruments (i.e. equities (and related instruments) of issuers that are incorporated, listed or have the focus of their operations in continental Europe, Republic of Ireland and/or the United Kingdom).
- > The Fund intends to focus on equities which are listed or traded on a Regulated Market, and may include direct investments in common stock, preferred stock, warrants, and securities convertible into such equities. Share purchase rights and convertible securities may also be acquired by the Fund pursuant to its investment in a particular security and, in such cases, may be retained for the purposes of efficient portfolio management and traded or exercised when considered appropriate.
- > The Fund may use financial derivatives instruments (such as futures, forwards, swaps, options and contracts for differences) to take both "long" and "short" positions referencing the above assets.

- > The Fund offers accumulation shares (shares in which net income is retained within the price) and distribution shares (shares which may distribute net income at the Directors' discretion).

For full details on the investment objectives and strategy of the Fund, please refer to Appendix 2 of the prospectus of Coremont Investment Fund (the "Company").

You should also note the following important characteristics:

- > The Fund has daily liquidity. Shares may generally be bought and sold on days that are business days in Luxembourg and London provided the Fund's administrator is given notice before 4pm (Luxembourg time) on the prior valuation day, as further set out in the prospectus.
- > The Fund has several share classes. These may differ with regards to charges and currencies. Share classes denominated in any currency other than USD are hedged. Where the hedging transactions are not completely effective, the value of the assets of such share class may be affected favourably or unfavourably by fluctuations in currency rates.
- > The share classes of the Fund set out above may be non-distributing. Therefore, the Fund may not declare dividends in respect of these share classes. Any income and gains not distributed will be reinvested by the Fund in accordance with its investment objectives and strategy.
- > The Fund is promoting environmental and/or social characteristics as per Article 8 of the EU Sustainable Finance Disclosure Regulation (SFDR). Further information regarding the way the Fund takes environmental and/or social criteria into account in its investment decision making process is available in the Fund's prospectus.
- > Recommendation: This Fund is suitable for long-term investors.

RISK AND REWARD PROFILE

The risk indicator above is intended to help investors assess how the value of the Fund may fluctuate over time. The indicator will be based on the annual fluctuations in the value of the Fund's investments; however due to the lack of historical performance and risk data for the Fund, the relevant values are currently simulated based on the risk limit set for the Fund.

- > Any historical data that may be used in preparing the indicator above may not be a reliable indicator of the future risk profile of the Fund.
- > The indicated risk and reward category is not definitive and may alter over time.
- > The lowest category does not mean 'risk free'.
- > The Fund does not offer investors a guaranteed level of risk or return.
- > The Fund does not offer any guarantee that the original capital value of any investment will be maintained.

In addition to the risk expressed through the indicator, the overall Fund value may also be significantly affected by the following risks:

- > **Liquidity risk:** The Fund invests in assets which are generally easy to trade and therefore sold at their market value under normal market conditions. However, in certain extreme situations (e.g. periods of market turbulence) the tradeability of the assets may be adversely affected so that it may be difficult to buy or sell assets in a timely fashion or it may only be possible to sell the assets at a loss, thereby reducing the value of investments in the Fund.

- > **Counterparty risk:** The Fund may suffer losses if a counterparty to a financial instrument defaults and fails to meet its payment obligations to the Fund.
- > **Credit risk:** The Fund may invest in convertible debt securities which are exposed to the risk that the borrower will be unable to meet its repayment obligations. The credit rating and risks associated with such securities can change over time and therefore affect the performance of the Fund.
- > **Risks associated with complex financial instruments:** The Fund may invest in complex financial instruments (e.g. derivatives), the value of which is connected to underlying assets. Investment in these financial instruments may give rise to leverage whereby gains or losses exceed the original amount invested by the Fund. Any such losses may significantly reduce the value of the Fund as a whole.
- > **Exchange rate risk and currency risk:** Changes in exchange rates may cause the value of the Fund's investments to decrease or increase.
- > **Risks associated with the use of leverage:** The Fund will use leverage to meet its investment objective. This may accentuate the Fund's losses where the markets move against the Fund.
- > **Operational risk:** This is the risk that systems and process failures (in particular by the investment manager) may cause losses to the Fund. Operational risk is monitored by the Fund and the investment manager of the Fund.
- > **Model and data risk:** The investment manager may use in-house quantitative models and information and data supplied by third parties to help it make investment decisions. No assurance can be given that the models will achieve their intended results due to the risks associated with possible incorrect or incomplete data, their predictive nature and their dependence on information technology systems.
- > **Geographic Concentration Risk:** The Fund has a high exposure to particular geographical region it carries a higher level of risk than a Fund which is more broadly diversified.

KEY INVESTOR INFORMATION

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

CHARGES

The charges you pay are used to pay the costs of running the Fund (including management, administration and custody costs) and its marketing and distribution. These charges reduce the Fund's performance and the value of your investment.

One-off charges taken before or after you invest

| | |
|---------------------|------|
| Subscription charge | None |
| Exit charge | None |

This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.

Charges taken from the share class over a year

| | |
|----------------|-------|
| Ongoing charge | 1.81% |
|----------------|-------|

Charges taken from the share class under certain specific conditions

| | |
|-----------------|--|
| Performance fee | The performance fees are calculated in accordance with the methodology described in the prospectus using a participation rate of 20.00% of any returns the Fund achieves above the high water mark (provided the hurdle rate (the greater of the US Federal Funds Effective Rate or 1%) is also exceeded). |
|-----------------|--|

- > **Subscription charge:** This is the maximum amount that may be deducted from your money before it is invested. In practice, the subscription charge may be a lesser amount or zero. Any subscription charge would be payable to the principal distributor of the Fund, Landseer Asset Management UK LLP. You can obtain details of the actual charges payable from your financial advisor or the principal distributor of the Fund.
- > **Ongoing charges:** The manager of the Fund, Landseer Asset Management UK LLP will ensure that all ongoing charges incurred by the share class do not exceed the level indicated. The ongoing charges figure consists of management fees, all fund expenses which are capped and the applicable local Luxembourg tax ("Taxe d'abonnement").
- > For more information about fees and charges, please refer to Appendix 2 of the Company's prospectus, which is available from clientservices@landseeram.com.

PAST PERFORMANCE

The share class described in this document has not yet launched.

PRACTICAL INFORMATION
