INVESTMENT MANAGEMENT

BNY Mellon Emerging Markets Debt Total Return Fund

STERLING W (ACC.) (HEDGED) (ISIN: IE00BD9PY599)

a sub-fund of BNY Mellon Global Funds, plc. This Fund is managed by BNY Mellon Fund Management (Luxembourg) S.A.

Objectives and Investment Policy

OBJECTIVE

To generate a total return in excess of the benchmark as detailed below.

POLICY

The Fund will:

- invest in emerging markets;
- invest in a broad universe of debt and debt related securities (e.g. bonds issued by governments, companies and other public entities);
- invest in debt and debt related securities denominated in hard currencies (e.g. US dollars) and in local currencies of the respective emerging market countries;
- invest in debt and debt related securities with high and low credit ratings (i.e. investment grade and/or sub-investment grade bonds as rated by Standard and Poor's or similar agencies);
- invest in derivatives (financial instruments whose value is derived from other assets) to help achieve the Fund's investment objective. The Fund will also use derivatives with the aim of risk or cost reduction or to generate additional capital or income;
- invest in currencies and currency-related investments;
- limit investment in other collective investment schemes to 10%; and
- neither promote environmental and/or social characteristics pursuant to Article 8 of the Sustainable Finance Disclosure Regulation "SFDR" nor have sustainable investment as its objective pursuant to Article 9 of SFDR. Consequently, for the purposes of SFDR it is considered an Article 6 Fund.

The Fund may:

- invest more than 10% of its Net Asset Value (NAV) and up to 35% in debt and debt related securities issued and/or guaranteed by a single sovereign issuer which is below investment grade;

- invest up to 10% of its Net Asset Value (NAV) in Contingent Convertible Securities (CoCo's); and
- hold high levels of cash and cash-like investments in order to protect the value of the Fund.

Benchmark: The Fund will measure its performance against the 1/3 JP Morgan Government Bond Index – Emerging Markets Global Diversified TR Index, 1/3 JP Morgan Emerging Markets Bond Index Global Diversified TR Index, 1/3 JP Morgan Corporate Emerging Markets Bond Index Broad Diversified TR Index (the "Benchmark"). The Fund is actively managed, which means the Investment Manager has absolute discretion to invest outside the Benchmark subject to the investment objective and policies disclosed in the Prospectus. While the Fund's holdings may include constituents of the Benchmark, the selection of investments and their weightings in the portfolio are not influenced by the Benchmark. The investment strategy does not restrict the extent to which the Investment Manager may deviate from the Benchmark.

OTHER INFORMATION

Share Class Hedging: The Fund's base currency is USD whereas this share class currency is GBP. In order to reduce the risk of exchange rate movements between the share class currency and the base currency, a hedging strategy is used, although its outcome is not guaranteed.

Treatment of income: net income generated will be retained within the Fund and reflected in the value of your shares.

Dealing: you can buy and sell your shares in the Fund between 9:00 and 17:00 (Irish time) on each business day in Ireland. Instructions received before 12:00 will receive the price quoted on that day. The minimum initial investment for this share class is GBP 15,000,000.

Risk and Reward Profile

We have calculated the risk and reward indicator, as shown above. It is based on the rate at which the value of the Fund has moved up and down in the past (i.e. volatility). It is not a guide to the future risk and reward rating of the Fund. The rating shown is not a target or guarantee and may shift over time. Even the lowest rating of 1 does not mean a risk-free investment.

This Fund is rated 5 because its historical value has shown moderately high volatility. With a Fund rating of 5, you have a moderately high risk of losing money but your chance for gains is also moderately high.

THE FOLLOWING RISKS MAY NOT BE FULLY CAPTURED BY THE RISK AND REWARD INDICATOR:

Geographic Concentration Risk: Where the Fund invests significantly in a single market, this may have a material impact on the value of the Fund.

Objective/Performance Risk: There is no guarantee that the Fund will achieve its objectives.

Currency Risk: This Fund invests in international markets which means it is exposed to changes in currency rates which could affect the value of the Fund.

Derivatives Risk: Derivatives are highly sensitive to changes in the value of the asset from which their value is derived. A small movement in the value of the underlying asset can cause a large movement in the value of the derivative. This can increase the sizes of losses and gains, causing the value of your investment to fluctuate. When using derivatives, the Fund can lose significantly more than the amount it has invested in derivatives.

Changes in Interest Rates & Inflation Risk: Investments in bonds/money market securities are affected by interest rates and inflation trends which may negatively affect the value of the Fund.

Credit Ratings and Unrated Securities Risk: Bonds with a low credit rating or unrated bonds have a greater risk of default. These investments may negatively affect the value of the Fund.

Credit Risk: The issuer of a security held by the Fund may not pay income or repay capital to the Fund when due.

Emerging Markets Risk: Emerging Markets have additional risks due to less-developed market practices.

Charges to Capital: The Fund takes its charges from the capital of the Fund. Investors should be aware that this has the effect of lowering the capital value of your investment and limiting the potential for future capital growth. On redemption, you may not receive back the full amount you initially invested.

Share Class Hedging Risk: The hedging strategy is used to reduce the impact of exchange rate movements between the share class currency and the base currency. It may not completely achieve this due to factors such as interest rate differentials.

CoCo's Risk: Contingent Convertible Securities (CoCo's) convert from debt to equity when the issuer's capital drops below a pre-defined level. This may result in the security converting into equities at a discounted share price, the value of the security being written down, temporarily or permanently, and/or coupon payments ceasing or being deferred.

Counterparty Risk: The insolvency of any institutions providing services such as custody of assets or acting as a counterparty to derivatives or other contractual arrangements, may expose the Fund to financial loss.

A complete description of risk factors is set out in the Prospectus in the section entitled "Risk Factors".
