IFSL SIM Junior Gold & Silver Miners Fund Class C Shares

A Sub-fund of the IFSL SIM Junior Gold & Silver Miners OEIC (ISIN Accumulation GB00B39RN474)

This Fund is managed by Investment Fund Services Limited (IFSL)

Objectives and Investment Policy

The aim of the Fund is to provide capital growth, that is, to increase the value of your holding, by investing in small and medium sized companies which specialise in identifying and extracting gold and other precious metals;

At least 80% of the Fund will be invested in the shares of these companies.

The Fund may also invest in bonds issued by companies operating in this sector.

The companies that the Fund invests in operate in a range of jurisdictions, however the Investment Manager will avoid companies with substantial operational exposure to politically unstable regions.

The Investment Manager aims to invest in companies that produce from material proven reserves as well as those that have significant recent discoveries being developed towards production. The fund will also invest in companies with active exploration programmes in highly prospective areas. A strong balance sheet and experienced management are also key considerations.

The Fund is actively managed, which means the investment manager decides which investments to buy or sell and when.

The Fund may hold up to 20% in cash to enable the ready settlement of liabilities, for the efficient management of the Fund and in pursuit of the Fund's objectives.

The Fund does not invest directly into gold or silver.

In order to assess the performance of the Fund, you may wish to compare it with the performance of the FTSE Gold Mines Index, which includes companies which operate in the same sector as the Fund. However, this should not be seen as a direct comparison, as the Fund has a specialised mandate to select only small to medium sized companies, rather than selecting from all companies making up this Index.

This Fund may not be appropriate for investors who plan to withdraw their money within 10 years.

IFSL SIM Junior Gold & Silver Miners does not pay income. Instead, any income received by the Fund is reinvested back into the Fund.

You can buy or sell all or part of your investment on any business day subject to the minimum holding requirements.

Risk and Reward Profile

This indicator aims to give you a measure of the price movement of this share class based on past data. It uses historic returns over the last five years. If five years' data is not available, simulated data based on a representative portfolio is used.

Past data may not be a reliable indication of the future risk profile of the Fund. The risk category may change in the future and is not guaranteed. The lowest category does not mean risk free. The value of investments and the income from them may fall as well as rise and you may not get back the amount you originally invested.

This Fund has been measured as 7 because its investments have experienced very high volatility in the past. The Fund's volatility is affected by various risks, including:

- The Fund will be exposed to stock markets and market conditions can change rapidly. Prices can move irrationally and be affected unpredictably by diverse factors, including political and economic events.
- The Fund will be exposed to smaller companies which are typically riskier than larger, more established companies. Difficulty in trading may arise, resulting in a negative impact on your investment. Shares in smaller companies may be harder to sell at a desired price and/or in a timely manner, especially in difficult market

conditions.

- The Fund invests in other currencies. Changes in exchange rates will therefore affect the value of your investment.

- The Fund will have exposure to commodities or commodity indices, the prices of which may be impacted by diverse factors, including supply and demand, inflation, political, economic and financial events.

- The Fund invests mainly in the gold & silver sector therefore investments will be vulnerable to sentiment in that sector. The Fund may therefore be more volatile than more diversified funds.

Risks which are not adequately captured by the risk indicator include:

- In certain market conditions some assets may be less predictable than usual. This may make it harder to sell at a desired price and/or in a timely manner.

- In extreme market conditions redemptions in the underlying funds or the Fund itself may be deferred or suspended.

A more detailed description of the risks that apply to this Fund can be found in the Fund's prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment. The entry and exit charges shown are maximum figures. In some cases you may pay less - you can find this out from your financial adviser.

The ongoing charges figure is based on expenses for the year ending 31/08/2021. From 30 April 2021, the Ongoing Charge calculation has been extended to include, where relevant, charges incurred by closed-ended vehicles such as investment trusts. This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the UCITS when buying or selling units in another collective investment undertaking.

For more information about charges, please see Section 7 of the Fund's Prospectus, which is available at www.ifslfunds.com.
