WAY Global Momentum Fund, a sub fund of WAY Momentum Portfolio

Class D Accumulation Shares (ISIN GB00B63N0B80)

The Fund is managed by WAY Fund Managers Limited

Investment Objective and Investment Policy

Objective:

The objective of the Fund is to achieve long-term capital growth.

Policy:

The Fund aims to achieve its objective by using a systematic and low-cost approach to gain exposure to a range of developed global equity markets via investing in and regular rebalancing of exchange traded funds (or similar instruments). The strategy relies on remaining exposed to each market whilst certain trend-following signals are positive (whilst there is positive market momentum) but withdrawing to defensive assets during periods when those signals turn negative.

The Fund will invest a minimum of 70% of its net asset value in exchange traded funds (or similar instruments) which themselves invest a minimum of 80% in equities during periods when all of the trend following signals are positive. However it also means that the Fund can invest up to 100% of its net asset value in cash and bonds during periods when all of the trend following signals are negative. This is intended to reduce volatility within long-only equity investment, thereby securing a much improved risk-return outcome.

The Fund may also invest in transferable securities, other collective investment schemes (regulated and unregulated), deposits, money market instruments, derivatives and cash or near cash.

The asset allocation between markets favours no particular country and does not reflect market capitalisations.

The algorithms used within the management approach have been developed and back-tested by academic researchers.

The Fund may invest in derivatives and forward transactions for investment purposes as well as for efficient portfolio management purposes (including hedging, which attempts to mitigate against falls in the value of the Fund's assets and the effects of changes in currency exchange rates against the Fund's base currency, which is Pounds Sterling).

Benchmark:

The appropriate comparator benchmark against which the performance of the Fund can be measured is the UK Consumer Prices Index (CPI) + 2%.

Other information:

- Investment in the Fund should be regarded as long-term, which is at least five years.
- There can be no guarantee that the objective of the Fund will be achieved.
- On encashment, particularly in the short-term, you may receive less than the original amount invested.
- The Authorised Corporate Director (ACD) carries out investors' requests, to buy, sell or switch, at 12:00 hours (UK time) on each business day (which excludes public holidays in England and Wales). If the ACD receives a request after 12:00 hours (UK time), the ACD will deal with it on the next business day.
- As you hold accumulation shares, income from investments in the Fund will be rolled up into the value of your shares.

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may shift over time.
- The lowest category does not mean 'risk free'.
- The indicator is not a measure of the risk that you may lose the amount you have invested.
- The Fund is ranked as a "4" on the scale. This is because the Fund by its nature has varying exposure to equities and cash. The value of some of these investments may vary more widely than others. Please note that even the lowest risk class can lose you money and that extreme market circumstances can mean you suffer severe losses in all cases.
- The indicator above does not take account of the following risks of investing in the Fund:
 - The Fund invests indirectly in some overseas markets which carry a higher than average risk of investment and the Fund may have problems or delays in getting its investments back.
 - Investments may be made in assets denominated in various currencies and the movements of exchange rates may have an effect, unfavourable as well as favourable, on the gains and losses otherwise experienced on such investments.

- There is a credit risk, where the counterparty to a deal may default on repayment or not deliver its side of the deal.
- The Fund aims to minimise concentrations of credit risk by undertaking transactions with a large number of counterparties on recognised and reputable exchanges. The Fund will only buy and sell equity investments through brokers which have been approved as an acceptable counterparty.

- The Fund is classed as a Non-UCITS Retail Scheme (NURS) and can have wider investment and borrowing powers than a UCITS scheme with higher investment limits in various areas. It can also invest to a greater extent in areas such as property and unregulated schemes and have the option to borrow on a permanent basis. Such additional powers can increase potential reward, but may also increase risk.
- Derivative instruments may be used in the Fund for the purposes of investment and efficient portfolio management (EPM). Where the Fund invests in derivatives and forward transactions in the pursuit of the Fund's objective, the net asset value of the Fund may at times be volatile (in the absence of compensating investment techniques).
- The Fund's investment model is unable to adjust to rapid and volatile changes in market conditions when they occur. For example, the model would not be able to mitigate against rapid shocks experienced by global stock markets such as the 2020 Covid-19 coronavirus or the 2008 banking crisis.
