

KEY INVESTOR INFORMATION

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Aviva Investors Global Equity Income Fund, Class 1, Income shares, GBP, a sub-fund of the Aviva Investors Investment Funds ICVC (ISIN: GB00B9L9WC44). The Fund is managed by Aviva Investors UK Fund Services Limited.

OBJECTIVES AND INVESTMENT POLICY

Objective: The Fund aims to grow your investment through a combination of income and capital growth and provide an average annual net return greater than the MSCI® All Country World Index (GBP) (the "Index") over a rolling 5 year period, by investing in shares of global companies.

Within this combined return, the Fund aims to deliver an income equivalent of at least 125% of the income return of the Index, over any given 12-month period.

Core investment: At least 80% of the Fund will be invested in shares of global companies. "Global companies" means companies in any country across the globe, including with up to 20% of the Fund invested in emerging markets.

Other investments: The Fund may also invest in other shares, other funds (including funds managed by Aviva Investors companies), cash and deposits.

Derivatives, such as futures, may be used from time to time, to gain a particular market exposure which would otherwise be difficult or costly to achieve, or to manage the Fund's cash flows in a cost-effective manner. Derivatives may also be used to reduce risk, such as foreign currency risk within the Fund, which is hedged using Forward Foreign Exchange contracts. This type of derivative usage is called "efficient portfolio management".

Strategy: The Fund is actively managed, and the Investment Manager will adopt a high conviction (strong belief) approach aiming to generate the Fund's target income. This will focus on opportunities across what the Investment Manager considers to be mature companies which potentially offer sustainably high dividends, or those which are felt able to steadily grow their dividends while showing financial strength and/or low levels of debt, with a strong management capability. The Fund will also take advantage of businesses in the early stages of development, where high cash generation is driving strong dividend growth. The Investment Manager will aim to invest in companies which have a diversified range of successful products, and which are active in a range of geographical markets.

Environmental, Social and Governance (ESG) factors: ESG factors are integrated into the investment process and are considered alongside a range of financial metrics and research, but the Investment Manager retains discretion over which investments are selected. We also actively engage with companies and use voting rights with the aim of positively influencing company behaviour and helping to create competitive returns. In addition, the Fund has limited exclusions based on Aviva Investors' UK Responsible Investment policy. Further information on how we integrate ESG and the Aviva Investors UK Responsible Investment policy into our investment approach, and how we engage with

companies is available on our website and in the prospectus.

Performance & Risk Measurement: The Fund's income return target is measured against the Index before the deduction of charges and taxes. The Fund's overall performance is also measured against the Index, after charges and taxes.

The Fund does not base its investment process upon the Index, so will not hold every company in the Index and may also hold companies that do not form part of it.

The Fund uses a "tracking error" to measure the consistency between the Fund's returns and the returns of the Index. In general, the lower the tracking error, the more consistent the Fund's returns are relative to the Index, and vice-versa. The Fund is expected to have an average yearly tracking error of between 2% and 6% when compared to the Index. In certain conditions the Fund may be outside of this range.

The Index comprises large and medium sized companies, as determined by their market capitalisation (total market value of a company's outstanding shares), from both developed and emerging markets, and the Index is designed to provide a broad measure of global equity market performance.

The Index has been selected as a benchmark for the income target and performance and risk measurement because it is representative of the type of companies in which the Fund is likely to invest, and it is therefore an appropriate measure for the Fund's performance.

Note: MSCI makes no express or implied warranties or representations and shall have no liability whatsoever with respect to any MSCI data contained herein. The MSCI data may not be further redistributed or used as a basis for other indices or any securities or financial products. This KIID is not approved, endorsed, reviewed or produced by MSCI. None of the MSCI data is intended to constitute investment advice or a recommendation to make (or refrain from making) any kind of investment decision and may not be relied on as such.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Other information: You can buy and sell shares on any London business day.

This is an income share class and any distributions from the Fund will be paid to you.

For full investment objectives and policy details please refer to the Prospectus.

RISK AND REWARD PROFILE

Lower risk

Typically lower rewards

Higher risk

Typically higher rewards

This indicator is based on historical data, calculated using European Union rules, and may not be a reliable indication of the future risk profile of the Fund.

The risk and reward category shown is not guaranteed to remain unchanged and may change over time. The lowest category does not mean 'risk free'.

The value of investments and the income from them will change over time.

The Fund price may fall as well as rise and as a result you may not get back the original amount you invested.

The Fund has been allocated a risk number based on the historic volatility of its share price or where insufficient information is available appropriate asset classes.

Currency risk: Changes in currency exchange rates could reduce investment gains or increase investment losses. Exchange rates can change rapidly, significantly and unpredictably.

Emerging markets risk: Compared to developed markets, emerging markets can have greater political instability and limited investor rights and freedoms,

and their securities can carry higher equity, market, liquidity, credit and currency risk.

Equities Risk: Equities can lose value rapidly, can remain at low prices indefinitely, and generally involve higher risks — especially market risk — than bonds or money market instruments. Bankruptcy or other financial restructuring can cause the issuer's equities to lose most or all of their value.

Hedging risk: Any measures taken to offset specific risks will generate costs (which reduce performance), could work imperfectly or not at all, and if they do work will reduce opportunities for gain.

Illiquid securities risk: Certain assets held in the Fund could, by nature, be hard to value or to sell at a desired time or at a price considered to be fair (especially in large quantities), and as a result their prices could be very volatile.

Income Risk: The investment objective of a Fund is to generate income, at times this may limit opportunities for capital growth.

Full information on the risks applicable to the Fund is detailed in the Prospectus.

CHARGES

One-off charges taken before or after you invest

Entry charge None

Exit charge None

Charges taken from the Fund over a year

Ongoing charges 1.12%

Charges taken from the Fund under certain specific conditions

Performance fee None

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.

The ongoing charges figure is based on last year's expenses for the year ending 15 October 2023. The figure for ongoing charges excludes performance fees and portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another collective investment undertaking. This Share Class integrates Economies of Scale discounts to the Fund Management Fee ("FMF") which is a component of the Ongoing Charge Figure. Consequently, when a Fund reaches a certain size (a pre-defined "trigger point") a discount will automatically apply to the FMF. However, at all other times the FMF will be charged at the rate as set out in the Fund's prospectus. For further details on the Economies of Scale discounts and the trigger points at which they apply, please refer to the Fund's prospectus.

For more information about charges please see the charges sections of the Fund's Prospectus.

PAST PERFORMANCE

Past performance is no guide to future performance.

The past performance shown in the chart opposite takes into account all charges except entry charges.

The Share Class was launched on 12 April 2013.

Performance is calculated in the Share Class currency which is GBP.

Source: Aviva Investors/Morningstar as at 31 December 2023.
