Verus Sustainable Balanced Fund, a sub fund of EF UCITS ICVC

Class A Income Shares (ISIN GB00BCW3L962)

The Fund is managed by WAY Fund Managers Limited

Investment Objective and Investment Policy

Objective:
The investment objective of the Fund is to provide capital growth.

Policy:
The Fund will invest a minimum of 75% of the invested portfolio (excluding cash) in assets that provide sustainable solutions to global social and environmental challenges. This will be made up of a combination of equity securities and collective investment schemes, and once the Fund reaches circa £25M in size, also corporate bond securities. A maximum of 75% of the Fund will be invested in equity assets, either directly or through collective investment schemes.

Meeting the "sustainable solutions" requirement is to be achieved by investing in companies that meet at least one of the United Nations' Sustainable Development Goals, or collective funds that align to the UN SGDs. The collective investment schemes can be invested in fixed interest assets, alternatives, and equities.

Up to 25% of the portfolio may be invested in stabilizing assets including Government Bonds and Gold (via physically backed ETFs) which are assessed to be sustainable or at least 'neutral'. This is in order to increase diversification and reduce volatility during times of adverse market and/or economic conditions.

The Fund may also invest in deposits, money market instruments, cash, and near cash. In the event of extremely adverse market conditions, the Fund could move to an increased position in cash in the best interests of the Fund and its shareholders.

All of the Fund's investable securities will undergo an independent ethical screening test, on a periodic basis, to ensure that none of the underlying assets directly contravene the UN SGDs.

The portfolio will be actively managed and normally remain fully invested save for such operational liquidity as is required from time to time. There will, however, be no restrictions on the underlying content of the investments held, in terms of geographical area or economic sector, other than those imposed by the Regulations.

The Fund may make use of borrowing in line with the Regulations.

Upon giving 60 days' written notice to Shareholders, the Fund may use derivatives and/or hedging transactions permitted in connection with efficient portfolio management and/or for investment purposes. It is not intended that the use of derivatives in this way will change the risk profile of the Fund.

Benchmark:
The appropriate comparator benchmark against which the performance of the Fund can be measured is the Investment Association's Mixed Investment 40-85% Shares sector.

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may shift over time.
- The lowest category does not mean 'risk-free'.
- The Class A Shares above appear as a "5" on the scale. This is because the Fund invests in a combination of equity securities and collective investment schemes specializing in a mixture of ethical or sustainable industry sectors. The value of some of these investments may vary more widely than others.
- The indicator is not a measure of the risk that you may lose the amount you have invested.
- The Fund does not provide its investors with any guarantee on performance, nor on monies invested in it.
- The indicator above does not take account of the following risks of investing in the Fund:

- The underlying investments of the Company are subject to normal market fluctuations and other risks inherent in investing in securities. There can be no assurance that any appreciation in the value of investments will occur.
- As an investor of other collective investment schemes, the Fund will bear, along with the other investors, its portion of the expenses of those other collective investment schemes, including management, performance, and/or other fees. These fees will be in addition to the management fees and other expenses which the Fund bears directly with its own operations.
- The Fund may invest in other currencies. As a result, changes in the rates of exchange between currencies may cause the value of the shares to go up or down. Fixed interest securities (bonds) are particularly affected by trends in interest rates and inflation. If interest rates go up, the value of the capital may fall, and vice versa. Inflation will also decrease the real value of capital.

- For full details of the Fund's risks, please see the "Risks" section of the Fund's Prospectus which is available from the ACD at WAY Fund Managers Limited, 3 Cedar Park, Cobham Road, Wimborne, Dorset, BH21 7SB or, during normal business hours on 01202 855856, or via www.wayfunds.com.
