a sub-fund of the Carmignac Portfolio SICAV

**Carmignac Gestion Luxembourg is the management company of this UCITS.**  
Fund management has been partly delegated to Carmignac Gestion (Carmignac Group)

## Objectives and investment policy

The key features of the sub-fund are as follows:

- The sub-fund aims to outperform its reference indicator through exposure to the small and mid-cap equity markets of emerging countries.
- This Sub-Fund is an actively managed UCITS. The investment manager has discretion over the composition of its portfolio, subject to the stated investment objectives and policy. The Sub-Fund's investment universe is totally independent from the indicator. The Sub-Fund's investment strategy is not dependent on the indicator; therefore, the Sub-Fund's holdings and the weightings may substantially deviate from the composition of the indicator. There is no limit set on the level of such deviation. The reference indicator comprises 50% MSCI EM Mid CAP NR (USD) index and 50% MSCI EM Small CAP NR (USD) index. It is rebalanced each quarter and converted into euro for EUR units and hedged units, and into the reference currency of the unit class for unhedged units.
- The portfolio is mainly invested in equities (at least 60%). It will be actively exposed to emerging markets through the selection of small and medium-sized companies offering mid to long-term return prospects and growth potential selected on the basis of their company fundamentals.
- The manager may use Relative Value strategies as performance drivers, looking to take advantage of the relative value between different instruments. Short positions may also be taken through derivatives.

### Other information:

- The sub-fund uses derivatives for hedging or arbitrage purposes, or to expose the portfolio to the following risks (directly or via indices): currencies, bonds, equities (all categories of capitalisation), ETFs, dividends, volatility, variance (the latter two categories for up to 10% of net assets) and commodities (up to 10% of assets). The derivatives available are options (vanilla, barrier, binary), futures and forwards, swaps (including performance) and CFDs (contracts for difference) on one or more underlyings.
- Up to 10 % of the net assets may be invested in contingent convertible bonds ("CoCos"). CoCos are regulated subordinated debt instruments that are complex, but consistent in nature. Please refer to the prospectus for more information.
- The sub-fund may invest up to 10% of its net assets in units or shares of investment funds.
- This sub-fund may not be suitable for investors planning to withdraw their investment within five years.
- Investments may be redeemed each business day on request. Subscription and redemption

- requests are centralised on each NAV calculation and publication day before 18:00 CET/CEST and are executed on the next business day using the previous day's NAV.
- This is an accumulation share.

## Risk and reward profile

This indicator represents the annual historical volatility of the sub-fund over a 5-year period. Its aim is to help investors understand the uncertainty attached to gains and losses that may have an impact on their investment.

- Historical data used to calculate this indicator may not be a reliable indication of the future risk profile of the sub-fund.
- The risk category of this sub-fund is not guaranteed and may change over time.
- Category 1 does not mean the investment is risk-free.

- The sub-fund's capital is not guaranteed.

Risks to which the sub-fund may be exposed and which could lead to a fall in the net asset value to which the indicator gives too little consideration:

- Counterparty risk: the sub-fund may suffer losses if a counterparty defaults and is unable to meet its contractual obligations, especially in the case of derivatives traded OTC.
- Risks associated with China: investing in this sub-fund entails risks associated with China, especially risks associated with the use of Stock Connect (a system facilitating equity investment in the A shares market via a Hong Kong-based entity acting as the sub-fund's nominee). Investors are advised to familiarise themselves with the specific risks of this system, as well as with other risks linked to investments in China (CIBM, RQFII status...) as outlined in the prospectus.
- For more information on risks, please refer to the prospectus.
