Client Challenges - Incident Response (1)

It's 9 a.m. and we walk into the office of an IT Director, within an NHS hospital. He looks like a broken man, the pressure and stress of his situation are too much and he starts to cry. He explains that he's had no computer network for two weeks and the hospital has had no choice but to cancel all operations.

A computer 'worm' has spread around the NHS (the IT supplier for this hospital had connected all local hospitals together without firewalls), and their global networking provider was struggling to fix the issue, so much so they failed to actually visit the site.

By 5 p.m. the hospital network is fully working, as a result of us having cleaned the network, and protected them from further infection.

The IT Director has briefed the hospital board and heads home for a well earned rest.

"Really professional, flexible but with a human and common sense approach. You have a great team. I would always recommend you to another organisation if the opportunity came up as my experience has been really good"

Quality Coordinator | Charity

Client Challenges - Incident Response (2)

With access to our expertise a major UK charity were able to contain a potentially serious breach before ransomware was activated. However, they came across another challenge. An arm of the charity provided services to corporate clients, and even though the breach was successfully contained, contractually they had to report the incident.

In turn, all their corporate clients shut down connections to the service. This had the potential to impact numerous jobs, and a valuable source of income, that was vital for the charity's good work.

We responded quickly, formulating an effective communications strategy to re-establish trust with their clients. The next four days were spent dealing with cyber security teams within their various clients, who were seeking answers about how the incident originated, and in total we dealt with over 1,000 detailed questions.

In turn, 100% of clients re-connected and resumed business as usual by the end of day four.

"From start to finish, all aspects were undertaken in an efficient, effective and professional manner"

Business Operations | Pharmaceuticals

Client Challenges - Testing

We were providing protection for an organisation guarding the British Embassies with one of our first global managed services.

Through our additional cyber monitoring and testing services we uncovered that a tracking system used to track vehicles carrying Embassy personnel through high-risk areas had near-zero security, meaning it could be easily intercepted, with hosting in a location near the country in question.

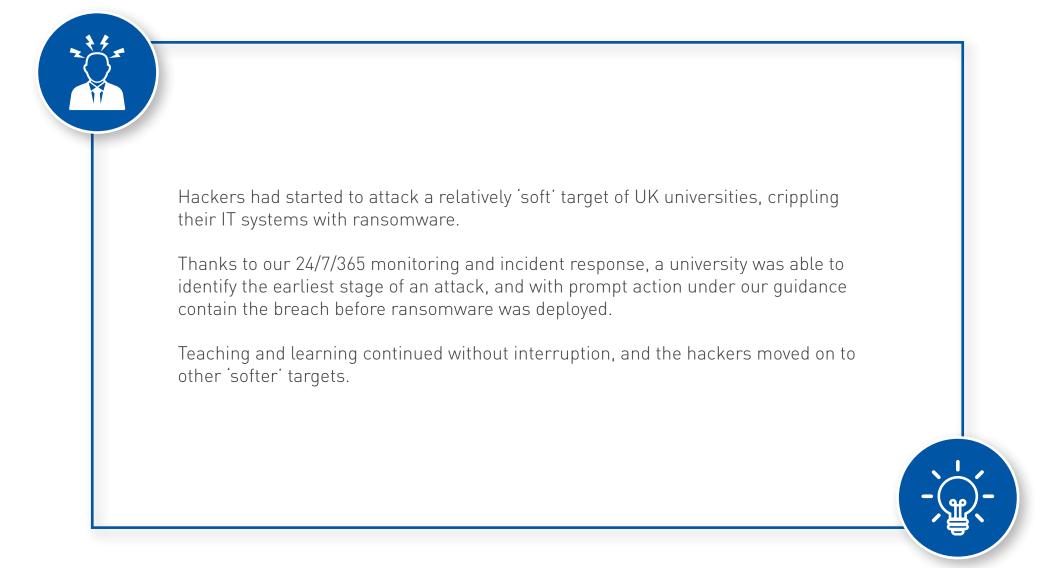

The provider had actually just re-purposed a system for tracking taxis! Our intervention prevented the worst possible outcome where local 'insurgents' could have tracked and attacked 'high value' targets.

"The consultancy was excellent and achieved our goals. The reporting from the testing was to a very high standard"

Client Challenges - Managed Detection and Response

ECSC Partner Programme

Established in 2019 to broaden the sales coverage, particularly within the SME market.

Partners range from individual IT consultants that 'refer' opportunities to the ECSC sales team, to IT Value Added Resellers (VARs) with their own sales teams.
