

JPMorgan Global Growth & Income plc

Fund overview

ISIN GB00BYMKY695	Sedol BYMKY69	Bloomberg JGGI LN	Reuters JGG.L
-----------------------------	-------------------------	-----------------------------	-------------------------

Objective: To provide superior total returns and outperform the MSCI All Country World Index over the long-term by investing in companies based around the world. The Company makes quarterly distributions, that are set at the beginning of each financial year. On aggregate, the intention is to pay dividends totalling at least 4% of the NAV at the time of announcement. The manager is focused on building a high conviction portfolio of typically 50 - 90 stocks, drawing on an investment process underpinned by fundamental research. Portfolio construction is driven by bottom up stock selection rather than geographical or sector allocation. Currency exposure is predominantly hedged back towards the benchmark. The Company uses borrowing to gear the portfolio within a range of 5% cash to 20% geared under normal market conditions. The Company will repurchase its shares with the aim of maintaining an average discount of around 5% or less calculated with debt at par value.

Portfolio manager(s) Helge Skibeli (2019) Rajesh Tanna (2019) Timothy Woodhouse (2017)	Company assets £765.4m	Potential gearing range -5% to 20%

Key risks

Exchange rate changes may cause the value of underlying overseas investments to go down as well as up.

Investments in emerging markets may involve a higher element of risk due to political and economic instability and underdeveloped markets and systems. Shares may also be traded less frequently than those on established markets. This means that there may be difficulty in both buying and selling shares and individual share prices may be subject to short-term price fluctuations.

Where permitted, a Company may invest in other Investment Funds that utilise gearing (borrowing) which will exaggerate market movements both up and down.

This Company may use derivatives for investment purposes or for efficient portfolio management.

External factors may cause an entire asset class to decline in value. Prices and values of all shares or all bonds and income could decline at the same time, or fluctuate in response to the performance of individual companies and general market conditions.

This Company may utilise gearing (borrowing) which will exaggerate market movements both up and down.

This Company may also invest in smaller companies which may increase its risk profile.

The share price may trade at a discount to the Net Asset Value of the Company.

General Disclosures

Investment is subject to documentation. The Annual Reports and Financial Statements, AIFMD art. 23 Investor Disclosure Document and PRIIPs Key Information Document can be obtained free of charge in English from JPMorgan Funds Limited or www.jpnam.co.uk/investmenttrust.

This material should not be considered as advice or an investment recommendation. Company holdings and performance are likely to have changed since the report date. No provider of information presented here, including index and ratings information, is liable for damages or losses of any type arising from use of their information. No warranty of accuracy is given and no liability in respect of any error or omission is accepted.

To the extent permitted by applicable law, we may record telephone calls and monitor electronic communications to comply with our legal and regulatory obligations and internal policies. Personal data will be collected, stored and processed by J.P. Morgan Asset Management in accordance with our EMEA Privacy Policy www.jpmorgan.com/emea-privacy-policy

Risk indicator Based on the Company volatility for the past 5 years. See the Key Information Document (KID) for details.

Ongoing charges are the management fee and all other operating expenses, excluding interest charges on any borrowing and any performance fee payable expressed as a percentage of the average daily net assets during the year. All the figures are for the previous financial year unless where indicated. For information on ongoing charges please refer to the Company's Annual Report and Accounts. www.jpmglobalgrowthandincome.co.uk

Performance information

Source: J.P. Morgan Asset Management/Morningstar. Net asset value performance data has been calculated on a NAV to NAV basis, including ongoing charges and any applicable fees, with any income reinvested, in GBP.

NAV is the cum income NAV with debt at fair value, diluted for treasury and/or subscription shares if applicable, with any income reinvested. Share price performance figures are calculated on a mid market basis in GBP with income reinvested on the ex-dividend date. The performance of the company's portfolio, or NAV performance, is not the same as share price performance and shareholders may not realise returns which are the same as NAV performance.

Indices do not include fees or operating expenses and you cannot invest in them.

Prospective dividend yield is for the investment trust's current financial year. It is indicative only and based on the latest month end mid-market price and the declared and net prospective dividends for the current financial year.

Prior to the 01/07/08 benchmark was the MSCI World Index (£).

Holdings information

Market Cap excludes cash.

Definitions

Overall Morningstar Rating™ assessment of a fund's past performance, based on both return and risk and shows how similar investments compare with their competitors. Investment decisions should not be based on a high rating alone.

FE Crown rating are quantitative ratings ranging from one to five designed to help investors identify funds which have displayed superior performance in terms of stockpicking, consistency and risk control.

FE Crown Fund Ratings are however purely quantitative and backward looking, and, as such, cannot offer any certainty about the future.

FE Trustnet crown rating as at 31 May 2022.

Benchmark comparison Comparison of the Company's performance is made with the benchmark. The benchmark is a recognised index of stocks which should not be taken as wholly representative of the Company's investment universe. The Company's investment strategy does not follow or track this index and therefore there may be a degree of divergence between its performance and that of the Company.

Gearing Gearing represents the excess amount above shareholders' funds of total investments (excluding liquidity fund holdings) expressed as a percentage of the shareholders' funds. If the amount calculated is negative, this is known as a "net cash" position.

Discount/Premium If the share price of an investment company is lower than the net asset value (NAV) per share, the company is said to be trading at a discount. If the share price of an investment company is higher than the net asset value (NAV) per share, the company is said to be trading at a premium. The discount/premium is shown as a percentage of the NAV.

NAV The value of investment and cash, including current year revenue, less liabilities (prior charges such as loans, debenture stock and preference shares at fair value).

Cash A company's net exposure to cash / cash equivalents [includes investment in liquidity funds and treasury stocks if held] expressed as a percentage of shareholders funds after any offset against its gearing.
