Invesco Fixed Interest Investment Series (the "Company")

Report of the Authorised Corporate Director (the "Manager")

The Company

The Invesco Fixed Interest Investment Series is an investment company with variable capital ("ICVC"), incorporated in England and Wales on 8 May 2003.

The Company is a "UK UCITS Scheme" and an "Umbrella Company" (under the OEIC Regulations) and therefore new Funds may be formed by the Manager, subject to regulatory approval. Any changes to Funds or share classes will be included in an updated Prospectus.

The Company is a Financial Conduct Authority (FCA) authorised scheme complying with the FCA's Collective Investment Schemes sourcebook.

Terms used in this report shall have the same meaning as defined in the Prospectus.

At 30 April 2021, the Company consisted of eight Funds:

Invesco Corporate Bond Fund (UK)
Invesco Distribution Fund (UK)
Invesco European High Income Fund (UK)
Invesco Global Bond Fund (UK)
Invesco Global Financial Capital Fund (UK)
Invesco High Yield Fund (UK)
Invesco Monthly Income Plus Fund (UK)
Invesco Tactical Bond Fund (UK)

Accounting Periods

Annual accounting date	30 April
Interim accounting date	31 October

Invesco Corporate Bond Fund (UK), Invesco Global Bond Fund (UK), Invesco Global Financial Capital Fund (UK) and Invesco Tactical Bond Fund (UK) will make distribution payments on 31 December (interim) and 30 June (final).

Invesco High Yield Fund (UK) will make distribution payments quarterly on 30 September, 31 December, 31 March and 30 June (final).

Invesco Distribution Fund (UK), Invesco European High Income Fund (UK) and Invesco Monthly Income Plus Fund (UK) will make monthly distributions, with the payment date being the last day of the month following the end of the distribution period.

Should expenses and taxation exceed revenue in a distribution period for a share class, no distribution will be payable for that class.

Fund Management Fee Changes

Effective 1 April 2020 Invesco Corporate Bond Fund (UK) changed the Fund Management Fee for the Accumulation shares and Income shares from 1.16% to 1.05%, Accumulation shares (No Trail) and Income shares (No Trail) from 0.91% to 0.80%, Z Accumulation shares and Z Income shares from 0.66% to 0.55% and Y Accumulation shares and Y Income shares from 0.61% to 0.50%. Effective 1 April 2020 Invesco High Yield Fund (UK) changed the Fund Management Fee for the Accumulation shares and Income shares from 1.44% to 1.29%, Accumulation shares (No Trail) and Income shares (No Trail) from 0.94% to 0.79%, Z Accumulation shares and Z Income shares from 0.75% to 0.60% and Y Accumulation shares and Y Income shares from 0.70% to 0.55%.

Remuneration Policy (Unaudited)

On 18 March 2016, Invesco Fund Managers Limited (the "Manager") adopted a remuneration policy consistent with the principles outlined in the European Securities and Markets Authority (ESMA) Guidelines, on sound remuneration policies under the UCITS Directive (the "Remuneration Policy").

The policy was revised in 2020, to include specificities for some Invesco EU regulated Management Companies. The Manager was not impacted by the changes.

The purpose of the Remuneration Policy is to ensure the remuneration of the staff of the Manager is consistent with and promotes sound and effective risk management, does not encourage risk-taking which is inconsistent with the risk profiles, rules or instruments of incorporation of the Manager and of the UK UCITS Schemes it manages and does not impair the Manager's compliance with its duty to act in the best interests of the UK UCITS Schemes it manages. The Manager's summary Remuneration Policy is available from the corporate policies section of our website (www.invesco.co.uk). Paper copies of the full Remuneration Policy can be obtained for free from the registered office of the Manager, Invesco Fund Managers Limited, Perpetual Park, Perpetual Park Drive, Henley-on-Thames, Oxfordshire, RG9 1HH, UK upon request.

The Remuneration Policy is reviewed annually by the Compliance, Human Resources and Risk Management functions, who recommend any adjustments to ensure continued alignment of the policy with sound risk management. The board of directors of the Manager are responsible for the oversight of remuneration and for ensuring adherence to this policy through the Human Resources function.

The Internal Audit function conducts regular testing of administration of the Remuneration Policy to assess its ongoing compliance with the Invesco Group's remuneration policies and procedures.

The Manager does not employ any direct staff. The aggregate total remuneration of Invesco staff involved in UK UCITS related activities of the Manager in respect of performance year (1 January 2020 to 31 December 2020) is £53.51m of which £33.07m is fixed remuneration and £20.44m is variable remuneration. The number of beneficiaries is 261.

The Manager has identified individuals considered to have a material impact on the risk profile of the Manager or the UK UCITS Schemes it manages ("Identified Staff"), who include board members of the Manager, senior management, heads of control functions, other risk takers and any employees receiving total remuneration that takes them into the same remuneration bracket as senior management and risk takers. Identified Staff of the Manager are employed by Invesco.

The aggregate total remuneration paid to the Identified Staff of the Manager for UK UCITS related activities for the performance year (1 January 2020 to 31 December 2020) is £11.44m of which £3.11m is paid to Senior Management and £8.33m is paid to other Identified Staff.

The prices of shares will appear on our website (www.invesco.co.uk). This is the primary method of price publication. The prices of shares may also be obtained by calling 0800 085 8677 during the Manager's normal business hours.

Brexit

The UK left the EU on 31 January 2020, an event commonly referred to as Brexit. The Authorised Corporate Director does not believe that Brexit presents significant issues that cannot be mitigated given that no Fund is passported into Europe, Shareholders are predominantly UK-based and core counterparties of and service providers to the Company have contingency arrangements available as necessary to ensure that activities can continue with minimal disruption. In addition, EU27 national regulators and the UK's Financial Conduct Authority have agreed Memoranda of Understanding on various matters related to the conduct of financial services and trading activities.

The Company's Manager, Invesco Fund Managers Limited "IFML", is part of a global group and has been committed for many years to meeting clients' needs across Europe in both EU and non-EU countries. The change in the UK's status from an EU to a non-EU country has not changed the group's focus or commitment to serve its clients across Europe. IFML is monitoring developments closely, through a Brexit Steering Committee, to ensure that the impact on clients and the Company is minimal.

Managing the risks presented by the outbreak of Coronavirus

The spread of a new coronavirus (COVID-19) disease has caused significant volatility within the global economy and financial markets. There has been no significant impact on the Company's operation as a result of COVID-19 during the financial period ended 30 April 2021.

Invesco Fixed Interest Investment Series (the "Company")

Report of the Authorised Corporate Director (the "Manager")

Managing the risks presented by the outbreak of Coronavirus continued

The directors of Invesco Fund Managers Limited are actively monitoring the situation and, with the support of the investment manager, continue to manage the Funds' assets within their investment and risk parameters that have been established. The Directors will continue to review the situation in order to navigate through this period of heightened uncertainty.

Risk Profile

Shareholders should be aware of the risks inherent in investing in securities and other financial instruments. Financial markets can be vulnerable to unpredictable price movements and are affected by a number of factors, both political and economic.

The value of investments and any income will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested. Over time, inflation may erode the value of investments. The securities that the Funds invest in may not always make interest and other payments nor is the solvency of the issuers guaranteed. Market conditions, such as a decrease in market liquidity for the securities in which the Fund invests, may mean that the Fund may not be able to sell those securities at their true value. These risks increase where the Fund invests in high yield or lower credit quality bonds.

The Funds have the ability to make use of financial derivatives (complex instruments) – significant use in the case of the Invesco Tactical Bond Fund (UK) – which may result in the Fund being leveraged and can result in large fluctuations in the value of the Fund. The leverage on certain types of transactions including derivatives may impair the Fund's liquidity, cause it to liquidate positions at unfavourable times or otherwise cause the Fund not to achieve its intended objective. Leverage occurs when the economic exposure created by the use of derivatives is greater than the amount invested, resulting in the Fund being exposed to a greater loss than the initial investment.

The Funds may be exposed to counterparty risk should an entity with which the Fund does business become insolvent resulting in financial loss. The Funds' performance may be adversely affected by variations in interest rates. The performance of the Invesco European High Income Fund (UK), the Invesco Global Bond Fund (UK) and the Invesco Tactical Bond Fund (UK) may be adversely affected by variations in the relative strength of world currencies or if Sterling strengthens against those currencies.

As one of the key objectives of the Invesco Distribution Fund (UK), the Invesco European High Income Fund (UK), the Invesco Global Financial Capital Fund (UK), the Invesco High Yield Fund (UK) and the Invesco Monthly Income Plus Fund (UK) is to provide income, the ongoing charge is taken from capital rather than income. This can erode capital and reduce the potential for capital growth.

As the Invesco Tactical Bond Fund (UK) can rapidly change its holdings across the fixed income and debt spectrum and cash, this can increase its risk profile.

As the Invesco Global Financial Capital Fund (UK) is a theme-based Fund, which only invests in fixed interest and other debt securities and shares of banks and other financial institutions, investors should be prepared to accept a higher degree of risk than for a Fund that is more widely diversified across different sectors.

The Invesco Corporate Bond Fund (UK), Invesco Distribution Fund (UK), Invesco European High Income Fund (UK), Invesco High Yield Fund (UK), Invesco Monthly Income Plus Fund (UK) and Invesco Tactical Bond Fund (UK) may invest in contingent convertible bonds and the Invesco Global Financial Capital Fund (UK) can invest in contingent convertible bonds, which may result in significant risk of capital loss based on certain trigger events.

Although the Invesco Global Bond Fund (UK) invests mainly in established markets, it can invest in emerging and developing markets, where there is potential for a decrease in market liquidity, which may mean that it is not easy to buy or sell securities. There may also be difficulties in dealing and settlement, and custody problems could arise.

The Invesco Global Bond Fund (UK) and the Invesco Tactical Bond Fund (UK) have the ability to invest more than 35% of its value in securities issued by a single government or public international body.

As a result of COVID-19, markets have seen a noticeable increase in volatility as well as, in some cases, lower liquidity levels; this may continue and may increase these risks in the future. In addition, some companies are suspending, lowering or postponing their dividend payments, which may cause funds which have an income objective to pay a lower income during this period.

A more detailed description of risk factors that apply to these Funds is set out in the Prospectus.

Value Assessment (Unaudited)

The Manager conducted an assessment of value for each Fund. The assessment of value report will be made available to investors annually in a composite report for all the funds in Invesco's ICVC range on our website www.invesco.co.uk.

Holdings in other Funds of the Company

As at 30 April 2021, no Funds held shares in any other Fund of the Company.

Liability

The Company is structured by having different Funds. The assets and liabilities of each Fund are segregated in accordance with the law of England and Wales. As a consequence the assets of a Fund will not be available to meet the liabilities of another Fund within the Company.

The Shareholders are not liable for the debts of the Company.

ISA Eligibility

All the Company's Funds qualify for stocks and shares ISA investment. None of the Funds qualify for cash ISA investment.

Invesco Global Financial Capital Fund (UK)³

Invesco High Yield Fund (UK)²

Invesco Monthly Income Plus Fund (UK)²

Invesco Tactical Bond Fund (UK)⁴

The risk categories shown are not a measure of capital losses or gains, but of how significant the rises and falls in the share class prices have been historically. For example a share class whose price has experienced significant rises and falls will be in a higher risk category, whereas a share class whose price has experienced less significant rises and falls will be in a lower risk category. As the Share Class risk category has been calculated using historical data, it may not be a reliable indication of the Share Class future risk profile. Please note that the Share Class risk category may change in the future and is not guaranteed. The lowest risk category does not mean a risk free investment.

A share class in risk category 1 indicates its price has experienced very low rises and falls historically.

A share class in risk category 2 indicates its price has experienced minor rises and falls historically.

A share class in risk category 3 indicates its price has experienced very moderate rises and falls historically.

A share class in risk category 4 indicates its price has experienced moderate rises and falls historically.

A share class in risk category 5 indicates its price has experienced significant rises and falls historically.

A share class in risk category 6 indicates its price has experienced very significant rises and falls historically.

A share class in risk category 7 indicates its price has experienced major rises and falls historically.

For more information on our Funds' risk and reward profiles, please refer to the most up to date relevant Fund and share class specific Key Investor Information Documents (KIIDs), which are available at www.invesco.co.uk or by contacting us.

¹ The risk category for the Fund changed from 3 to 4 on 1 July 2020.

² The risk category for the Fund changed from 3 to 4 on 1 August 2020.

³ The risk category for the Fund changed from 4 to 5 on 1 August 2020.

⁴ The risk category for the Fund changed from 2 to 4 on 1 August 2020.

Invesco Fixed Interest Investment Series (the "Company")

Report of the Authorised Corporate Director (the "Manager")

Securities Lending (Unaudited)

for the year 1 May 2020 to 30 April 2021

Securities Lending

Securities lending transactions entered into by the Funds, including transfer of collateral received in exchange for securities lent, are subject to a written legal agreement between Invesco Asset Management Limited (the "investment adviser", on behalf of the Funds); Citibank Europe plc, UK Branch (the "Depositary"); and The Bank of New York Mellon, London Branch (the "Securities Lending Agent").

Collateral received is segregated from the assets belonging to the Depositary or the Securities Lending Agent.

The following table details the value of securities on loan as a proportion of the Funds' total lendable assets and Net Asset Value (NAV) as at 30 April 2021. The income earned from securities lending are also shown for the period ended 30 April 2021. Total lendable assets represents the aggregate value of assets forming part of the Funds' securities lending programme. This excludes any assets held by the Funds that are not considered lendable due to any market, regulatory, investment or other restriction.

Securities on loan

Fund	% of lendable assets	% of NAV	Income earned £'000
Invesco Corporate Bond Fund (UK)	0.57	0.75	6
Invesco Distribution Fund (UK)	1.50	2.07	-
Invesco European High Income Fund (UK)	3.46	4.65	2
Invesco Global Bond Fund (UK)	4.42	5.02	1
Invesco Global Financial Capital Fund (UK)	0.16	0.37	-
Invesco High Yield Fund (UK)	7.45	13.28	20
Invesco Monthly Income Plus Fund (UK)	2.30	3.43	59
Invesco Tactical Bond Fund (UK)	1.40	1.66	31

The Funds entered into the securities lending programme on 10 February 2021.

The total income earned from securities lending transactions is split between the relevant Fund and the Securities Lending Agent. The Securities Lending Agent shall retain 10% of the securities lending revenues generated as compensation for its securities lending services and the Fund shall be entitled to the remainder of such net securities lending revenues.

Investment grade securities are those issued by an entity with a minimum investment grade credit rating from at least one globally recognised credit rating agency; Standard & Poor's, Moody's or Fitch.

A recognised equity index contains at least 20 equities where no single equity represents more than 20% of the total index and no five equities combined represent more than 60% of the total index.

The maturity tenor analysis for fixed income securities received as collateral is based on the respective contractual maturity date, while for equity securities and exchange traded funds (ETFs) received as collateral are presented as open transactions as they are not subject to a contractual maturity date.

As at 30 April 2021, all non-cash collateral received by the Funds in respect of securities lending transactions is held by the Funds (or through its delegates).

The following table lists the top ten issuers (or all the issuers if less than ten) by value of non-cash collateral received by the Funds by way of the title transfer collateral arrangement across securities lending transactions as at 30 April 2021.

Invesco Fixed Interest Investment Series (the "Company")

Notes applicable to the financial statements of all Funds

1 Accounting Policies

a) Basis of preparation

The financial statements have been prepared on a going concern basis, under the historical cost convention as modified by the revaluation of certain financial assets and liabilities held at fair value through profit and loss. The financial statements have also been prepared in accordance with the United Kingdom Generally Accepted Accounting Practice (UK GAAP), as defined within the UK Financial Reporting Standard (FRS 102) and the Statement of Recommended Practice 'Financial Statements of UK Authorised Funds' (the "SORP"), issued by the Investment Management Association (now known as the Investment Association) in May 2014 and updated in June 2017, the COLL and the Company's Instrument of Incorporation and Prospectus.

b) Recognition of revenue

- i) Distributions and accumulations, excluding equalisation, receivable on the underlying collective investment schemes are recognised as revenue when the shares are quoted ex-dividend. The Manager rebates an amount equivalent to the ongoing charge suffered on this Fund's share in the underlying collective investment schemes. Each rebate is paid to either the capital or revenue element of the Fund depending on whether the fee of the underlying Fund is charged to capital or revenue.
- ii) Dividends on quoted ordinary shares, collective investment schemes and preference shares are recognised when the securities are quoted ex-dividend. Where such securities are not quoted, dividends are recognised when they are declared.
- iii) Interest on bank balances and deposits is recognised on an accruals basis.
- iv) Revenue arising on debt securities is accreted or amortised over the life of such securities and recognised at a consistent rate over the life of the instrument (effective yield accounting). Future cash flows on all debt securities are considered when calculating revenue on an effective yield basis and where purchase costs are considered to reflect incurred credit losses, such losses are taken into account so that interest is recognised at a reasonably expected commercial rate. Accrued interest purchased and sold on interest-bearing securities is excluded from the capital cost of these securities and dealt with as part of the revenue of the Company.
- v) All revenue is recognised at a gross amount that includes any withholding taxes but excludes any other taxes, such as attributable tax credits.
- vi) Bond, equity and index futures consist of both a capital and revenue return. The split of the overall futures return into its revenue and capital components is calculated as the underlying instrument yield less the implied cost of borrowing. The net revenue on long positions and the net expense on short positions are recognised as revenue and forms part of the Company's distribution.
- vii) Returns from derivative securities are taken to capital and/or revenue depending on the motive and circumstances surrounding the particular transaction. The net revenue/expense on derivative positions are recognised as revenue and form part of the Company's distribution.

c) Stock dividends

Ordinary stock dividends are recognised wholly as revenue and are based on the market value of the shares on the dates they are quoted ex-dividend. Where an enhancement is offered, the amount by which the market value of the shares on the date they are quoted ex-dividend exceeds the cash dividend is taken to capital.

d) Special dividends and share buy-backs

The underlying circumstances behind both special dividends and the proceeds from share buybacks are reviewed on a case by case basis in determining whether the amount is capital or revenue in nature. Amounts recognised as revenue will form part of the Company's distribution. Any tax treatment thereon will follow the accounting treatment of the principal amount.

e) Underwriting commission

Underwriting commission is wholly recognised as revenue when the issue takes place, except where the Company is required to take up all or some of the shares underwritten, in which case an appropriate proportion of the commission received is deducted from the cost of those shares.

f) Expenses

All expenses, except for those relating to the purchase and sale of investments are accounted for on an accruals basis.

g) Revenue allocation to share classes

Revenue is allocated each day pro rata to the capital value of assets attributable to each class and taxation is computed by reference to the net revenue after expenses and tax attributable to each class.

h) Measurement basis

The measurement basis used in preparing the financial statements is fair value for investments and historical cost for all other assets and liabilities.

Invesco Fixed Interest Investment Series (the "Company")

Notes applicable to the financial statements of all Funds

1 Accounting Policies continued

i) Basis of valuation of investments

All investments are valued at their fair value as at the balance sheet date.

All investments have been valued on the last business day of the year at bid market value net of any accrued revenue, at close of business. Where there is no price source from an active market for an investment, the Manager will assess any information available from internal and external sources in order to arrive at an estimated fair value. The fair value is established by using measures of value such as the price of recent transactions, earnings multiple and net assets. The Manager of the Company also makes judgements and estimates based on their knowledge of recent investment performance, historical experience and other assumptions that are considered reasonable under the circumstances. The estimates and the assumptions used are under continuous review by the Manager with particular attention paid to the carrying value of the investments. Over-the-counter derivative contracts shall be valued on the basis of unrealised gain or loss on the contract using current settlement price. When settlement price is not used, the over-the-counter derivative contracts will be valued at their fair value in accordance with the method of valuation (as used on a consistent basis) as shall have been agreed between the Manager and the Depositary.

j) Accounting for Options

For written (sold) options, the premium received, where the express purpose is to generate revenue, is accrued to the revenue account on a straight line basis over the life of the contract. Where the call option is exercised early the remainder of the premium to expiry will be retained in capital. The Portfolio Statement and Balance Sheet will also reflect any unrealised gain or loss on the underlying securities, this being measured by the difference between strike price and the market price at the balance sheet date.

k) Exchange rates

Assets and liabilities in foreign currencies are translated into Sterling at the exchange rates ruling at close of business on the last business day of the year. Revenue items denominated in foreign currencies are translated into Sterling at the exchange rates ruling at the times of the transactions. Foreign exchange gains and losses arising from translation are included in the Statement of Total Return and are included in net capital gains/(losses) on investments.

l) Taxation and deferred taxation

Provision is made for corporation tax at the current rate on the excess of taxable revenue over allowable expenses. Corporation tax is charged at 20% of the revenue liable to corporation tax less expenses. Provision is made on all material timing differences arising from the different treatment of items for accounting and tax purposes. A deferred tax asset is recognised only to the extent that there will be taxable profits in the future against which the asset can be offset. Overseas capital gains tax is accounted for on a cash basis. There is no material difference between recognition of overseas capital gains tax on an accruals or cash basis.

m) Efficient portfolio management

Where appropriate, certain permitted transactions such as derivatives or forward currency transactions are used for efficient portfolio management. Where such transactions are used to protect or enhance revenue, the revenue and expenses derived therefrom are included in 'Revenue' or 'Interest payable and similar charges' in the Statement of Total Return. Where such transactions are used to protect or enhance capital, the gains and losses derived therefrom are included in 'Net capital gains/losses' in the Statement of Total Return. Any positions on such transactions open at the period end are reflected in the Balance Sheet at their marked to market value.

n) Dilution adjustment

The need to apply a dilution adjustment will depend on the volume of sales (where they are issued) or redemptions (where they are cancelled) of shares. The Manager may apply a dilution adjustment on the issue and redemption of such shares if, in its opinion, the existing Shareholders (for sales) or remaining Shareholders (for redemptions) might otherwise be adversely affected, and if applying a dilution adjustment, so far as practicable, is fair to all Shareholders and potential Shareholders. In particular, the dilution adjustment may be applied in the following circumstances for all Funds in the Invesco Fixed Interest Investment Series:

- where over a dealing period a Fund has experienced a large level of net issues or redemptions relative to its size. For these purposes a large level of net dealing is defined as 1% or more of the net asset value of the Fund in question (as calculated at the last valuation point); or
- where the Manager considers it necessary to protect the interests of the Shareholders of the Company.

Invesco Fixed Interest Investment Series (the “Company”)

Notes applicable to the financial statements of all Funds

1 Accounting Policies continued

- n) Dilution adjustment** continued
On the occasions that the dilution adjustment is not applied there may be an adverse impact on the total assets of the Fund which may otherwise constrain the future growth of the Fund in question.
- Please refer to Appendix 6 of the Prospectus which shows the size of typical dilution adjustments by Fund and an indication of the frequency of application of such adjustments.
- o) Credit default swaps**
Open credit default swaps are shown in the Portfolio Statement and are priced at fair value. The treatment of the returns from Credit Default Swaps depends upon the nature of the transaction. Both motives and circumstances are used to determine whether returns should be treated as capital or revenue. The capital element is reflected within Derivative Securities under Net capital gains and the revenue or expense element is reflected within Credit default swaps under Revenue or under Interest payable and similar charges.

2 Distribution Policies

The Funds will distribute all revenue disclosed in the annual financial statements (less expenses and taxation). The ordinary element of stock dividends is treated as revenue and forms part of the Fund's distribution. Should expenses and taxation exceed revenue for a share class, there will be no distribution for that share class and the shortfall will be met from capital. All Fund accumulations and distributions are paid as interest distributions except for Invesco European High Income Fund (UK), which pays a dividend distribution.

In calculating the amount to be distributed, the following Funds allocate the Manager's ongoing charge to capital, thereby increasing the amount available for distribution:

Invesco Distribution Fund (UK)
Invesco European High Income Fund (UK)
Invesco Global Financial Capital Fund (UK)
Invesco High Yield Fund (UK)
Invesco Monthly Income Plus Fund (UK)

Distributions which have remained unclaimed by Shareholders for more than six years are credited to the capital property of the Fund.

Marginal tax relief is not taken into account when determining the distribution.

3 Dealing Charges and Research Payments

The cost of the execution service provided by brokers may be included as part of the spread between the bid and offer price or paid through a separate dealing commission. Dealing commissions are used in the equity securities market, whilst the fixed income market includes the cost of execution in the spread. Prior to 3 January 2018, it was market practice for investment managers to enter into dealing commission arrangements under which, as well as paying for execution, part of the commission would be used to pay for research services. This was in accordance with regulation.

The European Union legal framework governing financial markets, known as the Markets in Financial Instruments Directive (MiFID I), was replaced by a revised Directive (the recast MiFID) and new Regulation (MiFIR) - referred to together as MiFID II. MiFID II became effective on 3 January 2018. MiFID II changes the way investment managers operate their businesses. Following the expiry on 31 December 2020 of the transition period for the UK's departure from the EU (commonly referred to as Brexit), note that MiFID II (as modified) now forms part of domestic law by the application of the European Union (Withdrawal) Act 2018 (and the relevant secondary legislation under it). In particular, under MiFID II firms can either pay for research material/services out of their own resources or from a separate research payment account (RPA). From 3 January 2018, the Manager, the Investment Adviser and any sub-adviser pay for all external research materials/services procured for the Funds out of their own resources across equity, fixed income, derivatives and currency securities. They do not operate a RPA.

With effect from 4 May 2020, the entry charge was removed from the Trail share classes.

References in this report to Trail classes mean the Accumulation Shares and Income Shares.

The net assets attributable to each share class, the net asset value per share and the number of shares in issue of each share class are shown in the comparative tables of each Fund. These can be found on:

Invesco Corporate Bond Fund (UK)	pages 27 to 31
Invesco Distribution Fund (UK)	pages 50 to 53
Invesco European High Income Fund (UK)	pages 88 to 91
Invesco Global Bond Fund (UK)	pages 120 to 123
Invesco Global Financial Capital Fund (UK)	pages 142 to 145
Invesco High Yield Fund (UK)	pages 163 to 166
Invesco Monthly Income Plus Fund (UK)	pages 188 to 191
Invesco Tactical Bond Fund (UK)	pages 226 to 230

Each share class has the same rights on a winding up of the Company.

5 Generic Risk Factors

In pursuing their investment objectives, the Funds of the Company hold a number of financial instruments that may comprise securities and other investments, cash balances and debtors and creditors that arise directly from their operations. Political and economic events in the major economies of the world, such as the United States, Japan and the European Union, will influence stock and securities markets worldwide.

The main risks from the Funds' holding of financial instruments are set out below together with the Manager's policy for managing these risks.

Invesco Fixed Interest Investment Series (the “Company”)

Notes applicable to the financial statements of all Funds

5 Generic Risk Factors continued

Counterparty risk

The Funds may enter into derivatives transactions or place cash in bank deposit accounts, which would expose the Funds to the credit of its counterparties and their ability to satisfy the terms of such contracts. In the event of a bankruptcy or insolvency of a counterparty, the Funds could experience delays in liquidating positions and significant losses, including declines in the value of investments during the year in which the Funds seek to enforce its rights, inability to realise any gains on their investments during such year and fees and expenses incurred in enforcing their rights.

In order to mitigate this risk, the Funds conduct trades through reputable counterparties. A diligent process to select and approve a new counterparty, as well as monitoring existing counterparties, is in place. During the approval process, various verifications are performed such as assessing the counterparty's operational capabilities as well as their credit quality. On an ongoing basis, market analysis is reviewed by the firm's trading and credit research teams in order to detect warning signs of a counterparty default. If the firm believes high risk of default exists, the counterparty is removed with immediate effect from the approved counterparty list.

Custody risk

The assets owned by each Fund are held on trust for the Fund by a custodian that is also regulated by the Financial Conduct Authority. The Financial Conduct Authority requires that the custodian ensures that there is legal separation of non-cash assets held under custody and that records are maintained that clearly identify the nature and amount of all assets under custody, the ownership of each asset and where the documents of title to that asset are located. In case of a potential bankruptcy of the custodian, cash positions in the Fund are not protected and there may be a delay in regaining full control of the non-cash assets.

Currency exchange risk

The Funds' assets may be invested in securities denominated in currencies other than Sterling. As a result, changes in exchange rates may adversely affect the value of any investment, which will have a related effect on the price of shares.

Currency exchange risk may be mitigated by hedging the exposure through the use of forward currency contracts.

Interest rate risk

Interest rate risk refers to the risk that bond prices generally fall as interest rates rise. Conversely, bond prices generally rise as interest rates fall. Specific bonds differ in their sensitivity to changes in interest rates depending on their individual characteristics. One measure of this sensitivity is called duration. The longer the duration of a particular bond, the greater its price sensitivity is to interest rate. Similarly, a longer duration portfolio of securities has greater price sensitivity. Falling interest rates may also prompt some issuers to refinance existing debt, which could affect the Fund's performance.

Investing in Financial Derivative Instruments

There are certain investment risks which apply in relation to the use of derivatives. Derivatives may be used to provide protection for an investment or as a cheaper or more liquid alternative for an investment. However, should the Manager's expectations in employing such techniques and instruments be incorrect, a Fund may suffer a substantial loss, having an adverse effect on the net asset value of shares. Such instruments may cause greater fluctuations of the net asset value of the Fund concerned. Transactions in derivatives are used in the Funds for both efficient portfolio management and investment purposes. Derivatives exposure is managed within the investment limits set by the Manager to ensure that the use of derivatives does not materially alter the overall risk profile of a Fund.

Investing in High Yield Bonds

Where a Fund's investment policy is to invest in higher risk fixed interest securities, many of the investments will be in “below investment grade” securities (generally defined as below BBB- by leading rating agencies). Investment in such securities brings an increased risk of default on repayment and therefore increases the risk that the income and capital of the Fund will be affected.

As a general rule, fixed interest securities with an above average yield tend to be less liquid than securities issued by issuers with a higher investment grade. Furthermore, the solvency of issuers of such fixed interest securities may not be guaranteed in respect of either the principal claim or regarding the interest payments and it may not be excluded that such issuers may become insolvent.

Issuer risk

The Funds are subject to the risk that issuers of bonds or other fixed income securities do not make payments on such securities. A lowering of the credit rating of the issuer of a bond or of the bond itself may cause volatility in the price or reduce the security's liquidity, making it more difficult to sell.

Invesco Fixed Interest Investment Series (the “Company”)

Notes applicable to the financial statements of all Funds

5 Generic Risk Factors continued

Liquidity risk

The Funds may be affected by a decrease in market liquidity for the securities in which they invest, which may mean that the Funds may not be able to sell some securities at a fair price in a timely manner. In order to mitigate this risk, a substantial proportion of the Funds’ assets consist of readily realisable assets.

Furthermore, Invesco monitors liquidity risk for each portfolio against its required minimum liquidity threshold. This includes holding a high enough proportion of assets that can be liquidated quickly and with a limited impact on price, also depending on its actual or hypothetical redemption profile, investment strategy, regulatory framework or contractual obligations. This is done by implementing a monitoring framework focused on Liquidation Size and Liquidation Cost.

Liquidity results are monitored at Fund level on a daily basis including against internally defined limits.

Market price risk

The Funds are exposed to the risks normally associated with investment in stocks and shares such as general economic conditions, market events or the performance of underlying stocks. As such the prices of and the income generated by the Funds’ securities may go down as well as up and an investor may not get back the full amount invested.

Adhering to investment guidelines and avoiding excessive exposure to one particular issuer can mitigate market risk.

Taking charges from capital

Where the investment objective of a Fund is to treat the generation of income as a higher priority than capital growth, or the generation of income and capital growth have equal priority, all or part of the ongoing charge as well as other fees and expenses of the Fund may be taken from capital instead of income. The Funds take such fees and expenses from capital in order to manage the level of income paid and/or available to Shareholders. This may result in capital erosion or may constrain capital growth.

Calculation methods of the Risk Exposure

Following the assessment of the investment policy of each Fund of the Company, Invesco Fund Managers Limited has decided to use Value at Risk (VaR) for the assessment of the global exposure of each Fund.

Value-at-Risk (VaR) is a statistical measurement. It intends to measure the maximum potential loss at a given confidence level (probability) over a specific time period under normal market conditions. All of the positions within the portfolio are taken into account for the VaR calculation, not just derivatives.

Absolute and Relative VaR are calculated daily using a VaR risk model based on a two years historical simulation methodology. This method for calculating VaR contains no standard distribution assumption and assumes that history repeats itself.

Under the relative VaR approach, the VaR of the Fund is compared to that of a benchmark or reference portfolio. With this approach, the choice of benchmark is important and hence the Manager will choose a leverage free benchmark with similar risks to the Fund.

The calculation standards used for the VaR model are in compliance with the provisions in box 15 of ESMA Guidelines on Risk Measurement and the calculation of Global Exposure and Counterparty Risk for UCITS (Ref: 10-788) (“ESMA Guidelines”).

The Absolute VaR of a UK UCITS cannot be greater than 20% of its NAV. The Relative VaR of a UK UCITS cannot be more than two times the VaR of the reference portfolio. Invesco Fund Managers Limited monitors that the $(\text{VaR of the UK UCITS Scheme}) / (2 * \text{VaR of the reference portfolio})$ is not greater than 100%.

The calculation of the Absolute and Relative VaR is carried out in accordance with the following parameters:

- one-tailed confidence interval of 99%;
- holding period equivalent to one month (i.e. 20 business days);
- effective observation period (history) of risk factors of two years;
- daily calculation.

In line with box 25 of ESMA Guidelines, as the Funds use the VaR approach to monitor the global exposure, Invesco Fund Managers Limited calculates the leverage for each Fund on a daily basis, as the sum of the absolute value of the notionals of the derivatives used. With respect to financial derivative instruments which do not have a notional value attached to them, the calculation of the value is based upon the market value of the equivalent position of the underlying asset that is attached to the financial derivative instrument and applied consistently and appropriately.

5 Generic Risk Factors continued

Calculation methods of the Risk Exposure continued

The average level of leverage figures provided below does not take into account any netting and hedging arrangements that the Funds may have in place at any time even though these netting and hedging arrangements are used for risk reduction purpose.

The table below details the VaR approach for each Fund and, for those Funds utilising the relative VaR methodology, it details the reference portfolio. The table also details the minimum, maximum and average daily VaR utilisation that occurred during the one year period ending 30 April 2021, as well as the daily average level of leverage for each Fund during the one year period ending 30 April 2021.

Fund name	Period of Observation	Global Exposure								Leverage	
		Method used to calculate Global exposure (Commitment, Absolute VaR, Relative VaR)	Method used to calculate VaR (Type of model (Historical Simulation, Monte Carlo)	Parameters (Confidence Interval, holding period, observation period)	Reference portfolio for using Relative VaR	VaR limits reached for last financial year			VaR limits	Leverage level reached during the financial year (Average levels as a % of NAV, calculated at least twice per month)	Leverage calculation method used

10 Post Balance Sheet Events

The net asset value in pence per share at the balance sheet date and the latest practicable date prior to the publication of the report has been shown in the table below. The % increase/(decrease) is a reflection of market fluctuations during this period. It is likely markets will continue to be much more volatile than normal over the next few months until the coronavirus impact passes.

	Net Asset Value 30.4.21 (pence per share)	Net Asset Value 03.8.21 (pence per share)	Increase/ Decrease %
Invesco Corporate Bond Fund (UK)	286.75	292.45	1.99
Invesco Distribution Fund (UK)	321.94	333.82	3.69
Invesco European High Income Fund (UK)	370.17	378.92	2.37
Invesco Global Bond Fund (UK)	256.29	256.76	0.18
Invesco Global Financial Capital Fund (UK)	357.57	376.22	5.22
Invesco High Yield Fund (UK)	316.21	326.24	3.17
Invesco Monthly Income Plus Fund (UK)	323.65	333.71	3.11
Invesco Tactical Bond Fund (UK)	279.27	281.56	0.82

The net asset value in pence per share is based on the Z Accumulation shares.

Invesco Corporate Bond Fund (UK)

Investment report for the year

The Investment Objective and Policy of the Invesco Corporate Bond Fund (UK)

The Fund aims to achieve income and capital growth over the medium to long term (3 to 5 years plus). The Fund invests at least 80% of its assets in investment grade corporate debt securities. In pursuing the Fund's investment objective, the fund manager may consider it appropriate to also invest in other transferable securities (including government, unrated and non-investment grade corporate debt securities), money market instruments, collective investment schemes (including funds managed by the Invesco group), deposits and cash. The Fund may use derivatives for investment purposes to meet the Fund's investment objective and for efficient portfolio management purposes to reduce risk, reduce costs and/or generate additional capital or income. They may include derivatives on currencies, interest rates and credit, and may be used to obtain exposure to long and short positions. The Fund may engage in securities lending. The expected proportion of total assets that may be subject to securities lending arrangements is 20%. Such level might be exceeded or might be subject to changes in the future. The Fund may engage in securities lending. The expected proportion of total assets that may be subject to securities lending arrangements is 20%. Such level might be exceeded or might be subject to changes in the future.

The objectives currently shown within these financial statements are those objectives that were in place as at 30 April 2021.

This standardised past performance information is updated on a quarterly basis. Should you require up to date past performance information, this is available on our website www.invesco.co.uk or by contacting us.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. This may differ from the performance figure shown on page 28 for Z Accumulation shares as the figure above is based on the quoted 12pm price and the figure shown on page 28 is based on the close of business bid price.

The value of investments and any income from them will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested.

Past performance is not a guide to future returns. Current tax levels and reliefs may change. Depending on individual circumstances, this may affect investment returns.

¹ Effective 18 April 2016, the primary share class changed from Accumulation share class to Z Accumulation share class. Performance figures are based on the Z Accumulation share class. As this was launched on 12 November 2012, for the years prior to this launch date, performance figures are based on the Accumulation share class, without any adjustment for fees.

² This is a Comparator Benchmark. Given its asset allocation the Fund's performance can be compared against the Benchmark. However, the Fund is actively managed and is not constrained by any benchmark.

Invesco Corporate Bond Fund (UK)

Investment report for the year

Strategy, review and outlook

The Fund returned 6.0% over the twelve months to the end of April 2021. This placed the Fund in the first quartile of its peer group, the IA £ Corporate Bond Sector NR, which returned 4.9%.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. Fund performance figures are based on the Z Accumulation share class.

Past performance is not a guide to future returns.

Corporate bond markets generated positive returns as they continued to recover from the lows of March 2020. The catalyst was the extraordinary monetary and fiscal policy response to the virus from central banks and governments. However, as autumn began, a resurgence of Covid-19 cases in Europe, as well as rising US political uncertainty, led to some consolidation within bond markets. News of a vaccine breakthrough from Pfizer triggered fresh demand for corporate bonds towards the tail end of 2020 before rising inflation expectations (which are normally negative for bonds) pushed prices down across the board in the early months of 2021.

As well as our core portfolio of investment grade corporate bonds, drivers of performance included subordinated financials, corporate hybrids (both of which are junior debt in the capital structure) and high yield bonds. The largest sector contributors were insurance, utilities and telecoms.

In terms of Fund activity, we took advantage of price weakness at the beginning of the review period to increase exposure to subordinated banks and insurers. We also added to holdings in corporate hybrids. Throughout the review period we exited positions where we thought value had been realised.

Financials remain the Fund's largest allocation by sector and interest rate sensitivity (duration) remains low relative to the broader sterling bond market. A relatively high allocation is retained in cash and government bonds. This helps to mitigate against periods of market weakness and should mean the Fund is well placed to exploit future opportunities.

As we look ahead, we are cognisant that a lot of the opportunities available in investment grade markets at the height of market volatility in the first quarter of 2020 have now been realised. However, we remain confident that pockets of attractive investment opportunities still exist.

As at 3 August 2021 the Z Accumulation share class (pence per share) of the Invesco Corporate Bond Fund (UK) had risen 1.99% since the balance sheet date 30 April 2021. It is likely markets will continue to be much more volatile than normal over the next few months until the coronavirus impact passes.

On 31 August 2020 Senior Credit Analyst Tom Hemmant expanded his responsibilities to become a Co-Fund Manager on the Fund alongside Paul Causer and Michael Matthews.

Paul Causer, Michael Matthews and Tom Hemmant, Fund Managers

Highest share price	269.02	254.80	239.76
Lowest share price	248.54	233.39	229.38

Direct transaction costs comprise commission and taxes, principally applicable to equity investment purchases and sales. Shareholders should note that additionally there are other transaction costs such as dealing spread and underlying costs with regard to Collective Investment Scheme holdings which will also have reduced the Fund and share class returns before operating charges.

The operating charges figure is equivalent to the FMF shown on page 18, which we also refer to as the ongoing charge in our Key Investor Information Documents (KIIDs) and our literature.

Notes to the financial statements

6 Taxation	01.5.20 to 30.4.21 £'000	01.5.19 to 30.4.20 £'000
-------------------	---	---

a) Analysis of charge for the year

Overseas tax	1	-
Total tax charge	1	-

There is no corporation tax charge for the year (2020 - Nil).

b) Factors affecting the tax charge for the year

The tax assessed for the year is lower (2020 - lower) than the standard rate of corporation tax in the UK for an authorised investment company with variable capital. The differences are explained below:

	01.5.20 to 30.4.21 £'000	01.5.19 to 30.4.20 £'000
Net revenue before taxation	82,437	101,231
Corporation tax at 20% (2020 - 20%)	16,487	20,246
Effects of:		
Overseas tax	1	-
Tax deductible interest distributions	(16,487)	(20,246)
Total tax charge	1	-

Authorised investment companies with variable capital are exempt from tax on capital gains. Therefore any capital return is not included in the above reconciliation.

7 Distributions	01.5.20 to 30.4.21 £'000	01.5.19 to 30.4.20 £'000
------------------------	---	---

Accumulations and distributions paid 31 December 2020	42,826	52,073
Accumulations and distributions paid 30 June 2021	33,427	43,358
	76,253	95,431
Amounts deducted on redemption of shares	7,270	6,291
Amounts received on issue of shares	(1,074)	(389)
	82,449	101,333

The distributable amount has been calculated as follows:

Net revenue after taxation	82,436	101,231
Equalisation on conversions	13	102
	82,449	101,333

8 Debtors	30.4.21 £'000	30.4.20 £'000
------------------	--------------------------	--------------------------

Accrued revenue	36,438	47,416
Amounts receivable for issue of shares	3,921	4,053

Notes to the financial statements

11 Commitments, contingent liabilities and contingent assets

There were no commitments, contingent liabilities or contingent assets at the balance sheet date (2020 - Nil).

12 Related parties

Related party interests in the Fund are disclosed in note 9 of the notes applicable to the financial statements of all Funds on page 24. Amounts payable to Invesco Fund Managers Limited in respect of Fund Management Fees are disclosed in note 4. Amounts received in respect of sales in the accounting year is £1,097,935,000 (2020 - £1,168,310,000) and amounts paid in respect of purchases in the accounting year is £1,065,745,000 (2020 - £1,074,873,000). Amounts due at the end of the accounting year for Fund Management Fees of £1,588,000 (2020 - £1,883,000) are disclosed in note 10 within accrued expenses.

13 Generic Risk factors

The Fund invests in bonds and other fixed income securities that are subject to the risk that issuers do not make payments on such securities. The solvency of organisations with whom the Fund invests cannot be guaranteed and may adversely affect performance. The Fund may be adversely affected by a decrease in market liquidity which may impair the Fund's ability to acquire or to dispose of securities at their intrinsic value. The Fund may invest in high yield bonds which are regarded as being more speculative (than investment grade bonds) as to the issuer's ability to make payments of principal and interest.

The Fund may invest in contingent convertible bonds which may result in significant risk of capital loss based on certain trigger events.

The Fund's performance may be adversely affected by variations in interest rates and by variations in the relative strength of world currencies or if Sterling strengthens against those currencies.

The Fund may use derivatives (complex instruments) in an attempt to reduce the overall risk of their investments, reduce the costs of investing and/or generate additional capital or income, although this may not be achieved. The use of such complex instruments may result in greater fluctuations of the value of the Fund. The Manager, however, will ensure that the use of derivatives within the Fund does not materially alter the overall risk profile of the Fund.

The generic risk factors relating to the Fund are discussed more fully in note 5 of the notes applicable to the financial statements of all Funds on pages 18 to 23.

a) Counterparty risk

The Fund's exposure to counterparty risk in respect of 'Over The Counter' (OTC) derivative contracts is the fair value of these contracts as shown in the portfolio statement. This is reflected in the table below.

Counterparty Details of OTC Financial Derivative Transactions

30.4.21 Broker	Forwards £'000	Total Exposure £'000
BNP Paribas	513	513
Citigroup	(113)	(113)
Goldman Sachs	76	76
JP Morgan	135	135

Counterparty Details of OTC Financial Derivative Transactions

30.4.20 Broker	Credit Default Swaps £'000	Forwards £'000	Total Exposure £'000
Bank of America Merrill Lynch	664	-	664
BNP Paribas	-	2,638	2,638
Citigroup	-	564	564
Goldman Sachs	-	902	902

RBS	-	2,643	2,643

Invesco Corporate Bond Fund (UK)

Notes to the financial statements

13 Generic Risk factors continued

a) Counterparty risk continued

Counterparty exposure has not been disclosed for exchange traded derivatives as the exchange requirements in respect of collateral mean that, in the opinion of the Manager, the counterparty risk is mitigated. In respect of derivative assets (positive numbers per the table), the Fund is exposed to counterparty risk from the counterparty shown, whereas in respect of derivative liabilities (negative numbers per the table) the counterparty shown is exposed to counterparty risk from the Fund.

b) Portfolio Statement Credit Ratings Breakdown	30.4.21	30.4.20
	%	%
Investment Grade	82.60	82.28
Non-Investment Grade	8.26	7.97
Not Rated	5.29	5.08
Other	2.75	3.58
Portfolio of investments	98.90	98.91
Net other assets	1.10	1.09
Net Assets	100.00	100.00

c) Valuation of financial instruments

The categorisation of financial instruments in the tables below reflect the basis of valuation of instruments used to measure their fair value.

	Assets	Liabilities
	£'000	£'000
30.4.21		
Level 1: Quoted prices	-	-
Level 2: Observable market data	2,706,930	1,369
Level 3: Unobservable data	-	-
	2,706,930	1,369
30.4.20		
Level 1: Quoted prices	107,496	831
Level 2: Observable market data	3,209,487	3,502
Level 3: Unobservable data	-	-
	3,316,983	4,333

All financial instruments are classified as level 1: Quoted prices and level 2: Observable market data. The instruments classified as level 2 mainly comprises Bonds and Derivatives. Bonds are valued using prices provided by the primary vendor and validated to the secondary vendor. The OTC derivatives are valued by the primary vendor using various valuation techniques, reviewed and validated to the secondary vendor.

Total sales net of transaction costs	1,406,872				
Derivative transaction costs		14		-	
Total transaction costs		14		-	
Total transaction costs as a % of average net assets		0.00%		0.00%	

Invesco Corporate Bond Fund (UK)

Notes to the financial statements

14 Portfolio transaction costs continued

for the year 1 May 2019 to 30 April 2020

Purchases (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Debt instruments	1,349,974	-	-	-	-
Total purchases	1,349,974	-		-	
Total purchases including transaction costs	1,349,974				

Sales (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Debt instruments	2,038,988	-	-	-	-
Total sales	2,038,988	-		-	
Total sales net of transaction costs	2,038,988				
Derivative transaction costs		19		-	
Total transaction costs		19		-	
Total transaction costs as a % of average net assets		0.00%		0.00%	

The above analysis covers any direct transaction costs suffered by the Fund during the year. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instruments types.

Separately identifiable direct transaction costs (commissions and taxes etc.) are attributable to the Fund's purchase and sale of equity shares. Additionally for equity shares, there is a dealing spread cost (the difference between the buying and selling prices) which will be suffered on purchase and sale transactions.

For the Fund's investment transactions in debt and money market instruments any applicable transaction charges form part of the dealing spread for these instruments. Transactions in money market instruments, cash and short-term collective investment schemes utilised as part of a daily sweep to manage the Fund's daily liquidity position are excluded from the analysis.

For the Fund's investment in collective investment scheme holdings there will potentially be dealing spread costs applicable to purchases and sales. However, additionally there are indirect transaction costs suffered in those underlying Funds, throughout the holding period for the instruments, which are not separately identifiable and do not form part of the analysis above.

During the year the Fund utilised derivative instruments including contract for differences, interest rate swaps, futures and options covering different underlying asset classes. The settlement values for opening and closing derivative positions are not comparable to principal values for transactions in direct holding investments and therefore purchase and sale amounts for derivative transactions are not quantified in the analysis above. Transaction costs for derivatives positions will be either suffered as direct costs or form part of the dealing spread for the instruments. Any direct costs are identified in the analysis above.

Dealing spread costs suffered by the Fund vary considerably for the different asset/instrument types depending on a number of factors including transaction value and market sentiment.

At the balance sheet date the average portfolio dealing spread (difference between bid and offer prices of all investments expressed as a percentage of the offer price value) was 0.56% (2020 - 0.38%).

Group 1: shares purchased prior to 1 November 2020
Group 2: shares purchased on or after 1 November 2020

Equalisation applies only to shares purchased during the distribution period (Group 2). It is the average amount of revenue included in the purchase price of all Group 2 shares and is refunded to holders of these shares as a return of capital. Being capital it is not liable to income tax. Instead, it must be deducted from the cost of shares for capital gains purposes.

Invesco Distribution Fund (UK)

Investment report for the year

The Investment Objective and Policy of the Invesco Distribution Fund (UK)

The Fund aims to achieve income and capital growth over the medium to long term (3 to 5 years plus). The Fund may invest up to 80% of its assets globally in corporate and government debt securities (including investment grade, non investment grade and unrated) and up to 40% of its assets in shares or other equity related securities of companies globally. In pursuing the Fund's investment objective, the fund manager may consider it appropriate to also invest in other transferable securities, money-market instruments, collective investment schemes (including funds managed by the Invesco group), deposits and cash. The Fund may use derivatives for investment purposes to meet the Fund's investment objective and for efficient portfolio management purposes to reduce risk, reduce costs and/or generate additional capital or income. They may include derivatives on currencies, interest rates and credit, and may be used to obtain exposure to long and short positions. The Fund may engage in securities lending. The expected proportion of total assets that may be subject to securities lending arrangements is 20%. Such level might be exceeded or might be subject to changes in the future.

The objectives currently shown within these financial statements are those objectives that were in place as at 30 April 2021.

Performance to 30 April 2021	Since	Since	Since	Percentage growth	
	31.10.20 %	30.4.20 %	30.4.18 %	Since 30.4.16 %	Since 30.4.11 %

IA Mixed Investment 20-60% Shares Sector NR ²	13.1	0.8	2.9	-7.5	20.5

This standardised past performance information is updated on a quarterly basis. Should you require up to date past performance information, this is available on our website www.invesco.co.uk or by contacting us.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. This may differ from the performance figure shown on page 51 for Z Accumulation shares as the figure above is based on the quoted 12pm price and the figure shown on page 51 is based on the close of business bid price.

The value of investments and any income from them will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested.

Past performance is not a guide to future returns. Current tax levels and reliefs may change. Depending on individual circumstances, this may affect investment returns.

¹ Effective 18 April 2016, the primary share class changed from Accumulation share class to Z Accumulation share class. Performance figures are based on the Z Accumulation share class. As this was launched on 12 November 2012, for the years prior to this launch date, performance figures are based on the Accumulation share class, without any adjustment for fees.

² This is a Comparator Benchmark. Given its asset allocation the Fund's performance can be compared against the Benchmark. However, the Fund is actively managed and is not constrained by any benchmark.

Invesco Distribution Fund (UK)

Investment report for the year

Strategy, review and outlook

The Fund returned 17.8% over the twelve months to the end of April 2021. This placed it in the second quartile of its peer group, the IA Mixed Investment 20-60% Shares Sector NR, which returned 16.4%.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. Fund performance figures are based on the Z Accumulation share class.

Past performance is not a guide to future returns.

Both corporate and equity markets generated healthy returns with positive sentiment aided by the unprecedented monetary and fiscal responses from central banks and governments in dealing with the negative economic fallout from the Covid-19 crisis. While news of a vaccine breakthrough from Pfizer provided further support to bond and equity prices, some of these gains, particularly in the bond market, were tempered in the early months of 2021 as worries over inflation increased.

The biggest contribution to performance came from our bond holdings. Adding the most to returns were subordinated financials (junior debt), high yield and investment grade bonds. The strongest sector performers were retail, insurance and oil. There was also significant contribution from our equity portfolio, which benefited from a gradual reopening of the UK economy.

We took advantage of price weakness at the beginning of the review period to buy bonds which, in our view, were attractively priced. The Fund's exposure to subordinated financials and corporate high yield was increased. The Fund's liquidity (cash, government bonds and bonds maturing within one year) was reduced but remains at a level that can allow us to exploit future opportunities as and when they occur.

The financial sector, particularly the subordinated debt of high-quality banks, remains the fund's largest sectoral exposure. Outside of the financial sector our largest allocations are to the utilities, insurance and industrials sectors.

While equities are likely to draw support from strengthening economies, the outlook for bond markets is more challenging. Bond yields and credit spreads (the difference in yield between bonds of a similar maturity but with different credit quality) are close to historic lows. This leads us to maintain a balanced approach, deploying capital only when we believe we are being appropriately rewarded for doing so.

As at 3 August 2021 the Z Accumulation share class (pence per share) of the Invesco Distribution Fund (UK) had risen 3.69% since the balance sheet date 30 April 2021. It is likely markets will continue to be much more volatile than normal over the next few months until the coronavirus impact passes.

On 31 August 2020 Senior Credit Analyst Edward Craven expanded his responsibilities to become a Co-Fund Manager on the Fund alongside Paul Causer and Ciaran Mallon. Although Paul Read is no longer a named manager on the Fund, he remains Co-Head of the team and an important part of the wider strategy adopted by the team, he also continues to manage a number of other funds, particularly on the Invesco offshore fund range.

Paul Causer, Edward Craven and Ciaran Mallon, Fund Managers

Where Paul Causer, Edward Craven and Ciaran Mallon have expressed opinions, they are based on current market conditions, they may differ from those of other investment professionals and are subject to change without notice.

Direct transaction costs comprise commission and taxes, principally applicable to equity investment purchases and sales. Shareholders should note that additionally there are other transaction costs such as dealing spread and underlying costs with regard to Collective Investment Scheme holdings which will also have reduced the Fund and share class returns before operating charges.

The operating charges figure is equivalent to the FMF shown on page 18, which we also refer to as the ongoing charge in our Key Investor Information Documents (KIIDs) and our literature.

Prices			
Highest share price	274.00	262.63	241.26
Lowest share price	227.76	207.14	223.65

Direct transaction costs comprise commission and taxes, principally applicable to equity investment purchases and sales. Shareholders should note that additionally there are other transaction costs such as dealing spread and underlying costs with regard to Collective Investment Scheme holdings which will also have reduced the Fund and share class returns before operating charges.

The operating charges figure is equivalent to the FMF shown on page 18, which we also refer to as the ongoing charge in our Key Investor Information Documents (KIIDs) and our literature.

Notes to the financial statements

6 Taxation

	01.5.20 to 30.4.21 £'000	01.5.19 to 30.4.20 £'000
--	--------------------------------	--------------------------------

a) Analysis of charge for the year

Overseas tax	476	477
Total tax charge	476	477

There is no corporation tax charge for the year (2020 - Nil).

b) Factors affecting the tax charge for the year

The tax assessed for the year is lower (2020 - lower) than the standard rate of corporation tax in the UK for an authorised investment company with variable capital. The differences are explained below:

	01.5.20 to 30.4.21 £'000	01.5.19 to 30.4.20 £'000
Net revenue before taxation	66,503	79,813
Corporation tax at 20% (2020 - 20%)	13,301	15,963
Effects of:		
Movement in unrecognised tax losses	7	5
Overseas tax	476	477
Relief on overseas tax expensed	(7)	(5)
Revenue not subject to tax	(3,472)	(5,551)
Tax deductible interest distributions	(9,829)	(10,412)
Total tax charge	476	477

Authorised investment companies with variable capital are exempt from tax on capital gains. Therefore any capital return is not included in the above reconciliation.

7 Distributions

	01.5.20 to 30.4.21 £'000	01.5.19 to 30.4.20 £'000
--	--------------------------------	--------------------------------

Accumulations and distributions paid 30 June 2020	7,536	13,019
Accumulations and distributions paid 31 July 2020	7,342	9,003
Accumulations and distributions paid 31 August 2020	7,924	9,581
Accumulations and distributions paid 30 September 2020	7,188	11,130
Accumulations and distributions paid 31 October 2020	6,609	7,378
Accumulations and distributions paid 30 November 2020	7,552	7,376

11 Commitments, contingent liabilities and contingent assets

There were no commitments, contingent liabilities or contingent assets at the balance sheet date (2020 - Nil).

12 Related parties

Related party interests in the Fund are disclosed in note 9 of the notes applicable to the financial statements of all Funds on page 24. Amounts payable to Invesco Fund Managers Limited in respect of Fund Management Fees are disclosed in note 4. Amounts received in respect of sales in the accounting year is £402,833,000 (2020 - £361,112,000) and amounts paid in respect of purchases in the accounting year is £427,788,000 (2020 - £303,733,000). Management fee rebates are disclosed in note 3. Amounts due at the end of the accounting year for Fund Management Fees of £1,655,000 (2020 - £1,622,000) are disclosed in note 10 within accrued expenses.

13 Generic Risk factors

The Fund invests in bonds and other fixed income securities that are subject to the risk that issuers do not make payments on such securities. The solvency of organisations with whom the Fund invests cannot be guaranteed and may adversely affect performance. The Fund may be adversely affected by a decrease in market liquidity which may impair the Fund's ability to acquire or to dispose of securities at their intrinsic value. The Fund may invest in high yield bonds which are regarded as being more speculative (than investment grade bonds) as to the issuer's ability to make payments of principal and interest.

As one of the key objectives of the Fund is to provide income, the Manager's ongoing charge is taken from capital rather than income. This can erode capital and reduce the potential for capital growth.

In accordance with the tax constraints of an interest distribution fund, it is not currently our intention to exceed a 40% equity asset allocation. However, investors should be aware that the Fund's IA sector classification (Mixed Investment 20-60% Shares) would permit an equity allocation of up to 60%.

The Fund may invest in contingent convertible bonds which may result in significant risk of capital loss based on certain trigger events. The Fund's performance may be adversely affected by variations in interest rates and by variations in the relative strength of world currencies or if Sterling strengthens against those currencies.

The Fund may use derivatives (complex instruments) in an attempt to reduce the overall risk of their investments, reduce the costs of investing and/or generate additional capital or income, although this may not be achieved. The use of such complex instruments may result in greater fluctuations of the value of the Fund. The Manager, however, will ensure that the use of derivatives within the Fund does not materially alter the overall risk profile of the Fund.

The generic risk factors relating to the Fund are discussed more fully in note 5 of the notes applicable to the financial statements of all Funds on pages 18 to 23.

Invesco Distribution Fund (UK)

Notes to the financial statements

13 Generic Risk factors continued

a) Counterparty risk

The Fund's exposure to counterparty risk in respect of 'Over The Counter' (OTC) derivative contracts is the fair value of these contracts as shown in the portfolio statement. This is reflected in the table below.

Counterparty Details of OTC Financial Derivative Transactions

30.4.21 Broker	Credit Default Swaps £'000	Foreign Exchange Options £'000	Forwards £'000	Total Exposure £'000
Bank of America Merrill Lynch	7,566	-	-	7,566
BNP Paribas	-	281	878	1,159
Citigroup	-	-	(459)	(459)
Goldman Sachs	-	-	(218)	(218)
JP Morgan	-	-	271	271

Counterparty Details of OTC Financial Derivative Transactions

30.4.20 Broker	Credit Default Swaps £'000	Foreign Exchange Options £'000	Forwards £'000	Total Exposure £'000
Bank of America Merrill Lynch	221	-	-	221
BNP Paribas	-	-	14,150	14,150
Citigroup	-	268	396	664
Deutsche Bank	-	-	(311)	(311)
Goldman Sachs	-	142	2,292	2,434
JP Morgan	-	122	1,621	1,743
RBS	-	195	3,467	3,662

Counterparty exposure has not been disclosed for exchange traded derivatives as the exchange requirements in respect of collateral mean that, in the opinion of the Manager, the counterparty risk is mitigated. In respect of derivative assets (positive numbers per the table), the Fund is exposed to counterparty risk from the counterparty shown, whereas in respect of derivative liabilities (negative numbers per the table) the counterparty shown is exposed to counterparty risk from the Fund.

Collateral received from counterparties in respect of derivative contracts was £270,000 (2020 - £880,000) in the form of cash and is shown in note 10.

b) Portfolio Statement Credit Ratings Breakdown	30.4.21	30.4.20

c) Valuation of financial instruments

The categorisation of financial instruments in the tables below reflect the basis of valuation of instruments used to measure their fair value.

	Assets £'000	Liabilities £'000
30.4.21		
Level 1: Quoted prices	613,028	454
Level 2: Observable market data	1,233,697	2,389
Level 3: Unobservable data	7,175	-
	1,853,900	2,843
30.4.20		
Level 1: Quoted prices	554,252	-
Level 2: Observable market data	1,379,724	8,092
Level 3: Unobservable data	13,040	-
	1,947,016	8,092

The majority of financial instruments are classified as level 1: Quoted prices and level 2: Observable market data. The instruments classified as level 2 mainly comprises Bonds and Derivatives. Bonds are valued using prices provided by the primary vendor and validated to the secondary vendor. The OTC derivatives are valued by the primary vendor using various valuation techniques, reviewed and validated to the secondary vendor. Instruments classified as level 3: Unobservable data mainly comprise non-market traded and unquoted securities.

Generally for the non-market traded and unquoted securities, where there is no price source from an active market for an investment, the Manager has applied judgement in determining the fair value. The Manager has used several valuation methodologies as prescribed in the International Private Equity and Venture Capital valuation guidelines to arrive at their best estimate of fair value. Valuation techniques used by the Manager are set out in Accounting Policies note 1 (i). The fair value is established by using measures of value such as:

- Price of recent transactions – Management determine the fair value based on the price of recent transactions made by management or a third party.
- Milestone analysis – Management assess the investment company's progress against milestones expected at the time of investment in order to determine whether an adjustment is required to the transaction price to determine fair value.
- Multiples – Earnings or Revenue multiples are selected from comparable public companies based on geographic location, industry, size, risk profile, earnings growth prospects, target markets and other factors that management consider reasonable. A discount for lack of liquidity may then be applied to represent the adjustment to comparable company multiples to reflect the illiquidity of the portfolio companies relative to the comparable peer group. Management determines the discount for lack of liquidity based on its judgement, after considering market liquidity conditions and company specific factors such as the development stage of the portfolio company. One of the most common forms of multiples used for cash generating companies are EV/EBITDA multiples as EBITDA is generally seen to represent a good proxy for free cash flow. These are applied where appropriate based on the development of underlying portfolio companies but other multiples such as EV/Revenue may also be considered.
- Net assets – Management determine the fair value based on the net asset value of the underlying portfolio company

In applying the above valuation techniques in arriving at the fair value the Manager has assessed any further information available from internal and external sources to arrive at an estimated fair value, which includes but is not limited to the following:

- Reference to listed securities of the same company;
- Consideration of seniority of the securities held and terms of repayment upon realisation;
- Consideration of any trading restrictions on the investment company's shares that would limit Invesco's ability to realise its holding;
- Consideration of any outstanding payments to be made by Invesco;
- Industry statistics or events (such as mergers, acquisitions and the risk of default).

Invesco Distribution Fund (UK)

Notes to the financial statements

14 Portfolio transaction costs

for the year 1 May 2020 to 30 April 2021

Purchases (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Equity instruments	96,014	32	0.03	169	0.18
Debt instruments	349,558	-	-	-	-
Total purchases	445,572	32		169	
Total purchases including transaction costs	445,773				

Sales (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Equity instruments	133,621	57	0.04	11	0.01
Debt instruments	579,182	-	-	-	-
Total sales	712,803	57		11	
Total sales net of transaction costs	712,735				
Derivative transaction costs		31		-	
Total transaction costs		120		180	
Total transaction costs as a % of average net assets		0.01%		0.01%	

Invesco Distribution Fund (UK)

Notes to the financial statements

14 Portfolio transaction costs continued

for the year 1 May 2019 to 30 April 2020

Purchases (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Equity instruments	128,788	37	0.03	156	0.12
Debt instruments	414,668	-	-	-	-
Total purchases	543,456	37		156	
Total purchases including transaction costs	543,649				

Sales (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Equity instruments	310,497	132	0.04	5	-
Debt instruments	557,431	-	-	-	-
Total sales	867,928	132		5	
Total sales net of transaction costs	867,791				

Derivative transaction costs		56		-	
Total transaction costs		225		161	
Total transaction costs as a % of average net assets		0.01%		0.01%	

The above analysis covers any direct transaction costs suffered by the Fund during the year. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instruments types.

Separately identifiable direct transaction costs (commissions and taxes etc.) are attributable to the Fund's purchase and sale of equity shares. Additionally for equity shares, there is a dealing spread cost (the difference between the buying and selling prices) which will be suffered on purchase and sale transactions.

For the Fund's investment transactions in debt and money market instruments any applicable transaction charges form part of the dealing spread for these instruments. Transactions in money market instruments, cash and short-term collective investment schemes utilised as part of a daily sweep to manage the Fund's daily liquidity position are excluded from the analysis.

For the Fund's investment in collective investment scheme holdings there will potentially be dealing spread costs applicable to purchases and sales. However, additionally there are indirect transaction costs suffered in those underlying Funds, throughout the holding period for the instruments, which are not separately identifiable and do not form part of the analysis above.

During the year the Fund utilised derivative instruments including contract for differences, interest rate swaps, futures and options covering different underlying asset classes. The settlement values for opening and closing derivative positions are not comparable to principal values for transactions in direct holding investments and therefore purchase and sale amounts for derivative transactions are not quantified in the analysis above. Transaction costs for derivatives positions will be either suffered as direct costs or form part of the dealing spread for the instruments. Any direct costs are identified in the analysis above.

Dealing spread costs suffered by the Fund vary considerably for the different asset/instrument types depending on a number of factors including transaction value and market sentiment.

At the balance sheet date the average portfolio dealing spread (difference between bid and offer prices of all investments expressed as a percentage of the offer price value) was 0.77% (2020 - 0.43%).

Group 1: shares purchased prior to 1 April 2021
Group 2: shares purchased on or after 1 April 2021

Equalisation applies only to shares purchased during the distribution period (Group 2). It is the average amount of revenue included in the purchase price of all Group 2 shares and is refunded to holders of these shares as a return of capital. Being capital it is not liable to income tax. Instead, it must be deducted from the cost of shares for capital gains purposes.

Invesco European High Income Fund (UK)

Investment report for the year

The Investment Objective and Policy of the Invesco European High Income Fund (UK)

The Fund aims to achieve income and capital growth over the medium to long term (3 to 5 years plus). The Fund may invest up to 80% of its assets in European government and corporate debt securities (including investment grade, non-investment grade and unrated) and up to 60% of its assets in shares or other equity related securities of companies incorporated, domiciled or carrying out the main part of their economic activity in Europe. In pursuing the Fund's investment objective, the fund manager may consider it appropriate to also invest in other transferable securities (including non European securities), money market instruments, collective investment schemes (including funds managed by the Invesco group), deposits and cash. The Fund may use derivatives for investment purposes to meet the Fund's investment objective and for efficient portfolio management purposes to reduce risk, reduce costs and/or generate additional capital or income. They may include derivatives on currencies, interest rates and credit, and may be used to obtain exposure to long and short positions. The Fund may engage in securities lending. The expected proportion of total assets that may be subject to securities lending arrangements is 20%. Such level might be exceeded or might be subject to changes in the future.

The objectives currently shown within these financial statements are those objectives that were in place as at 30 April 2021.

IA Mixed Investment 20-60% Shares Sector NR ²	13.1	0.8	2.9	-7.5	20.5

This standardised past performance information is updated on a quarterly basis. Should you require up to date past performance information, this is available on our website www.invesco.co.uk or by contacting us.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. This may differ from the performance figure shown on page 89 for Z Accumulation shares as the figure above is based on the quoted 12pm price and the figure shown on page 89 is based on the close of business bid price.

The value of investments and any income from them will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested.

Past performance is not a guide to future returns. Current tax levels and reliefs may change. Depending on individual circumstances, this may affect investment returns.

¹ Effective 18 April 2016, the primary share class changed from Accumulation share class to Z Accumulation share class. Performance figures are based on the Z Accumulation share class. As this was launched on 12 November 2012, for the years prior to this launch date, performance figures are based on the Accumulation share class, without any adjustment for fees.

² This is a Comparator Benchmark. Given its asset allocation the Fund's performance can be compared against the Benchmark. However, the Fund is actively managed and is not constrained by any benchmark.

Invesco European High Income Fund (UK)

Investment report for the year

Strategy, review and outlook

The Fund returned 19.0% over the twelve months to the end of April 2021, placing it in the first quartile of its peer group, the IA Mixed Investment 20-60% Shares Sector NR, which returned 16.4%.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. Fund performance figures are based on the Z Accumulation share class.

Past performance is not a guide to future returns.

Both corporate bond and equity markets generated positive returns as they continued to recover from the lows of March 2020. The catalyst was the extraordinary monetary and fiscal policy response to the virus from central banks and governments. European markets were also supported by the first ever agreement between eurozone governments for a mutualisation of debt through a €750bn joint recovery fund. This was particularly important for peripheral European issuers which rallied as a result. However, as autumn began, a resurgence of Covid-19 cases in Europe, rising US political uncertainty and more recently, inflation jitters, led to some consolidation within bond markets.

The Fund benefitted from positive performance from both its bond and equity allocations. Holdings in high yield bonds and subordinated financials (junior debt), particularly additional tier 1 bank capital, contributed strongly towards performance. There were also strong contributions from the food, oil and rental sectors.

We took advantage of price weakness at the beginning of the review period to buy bonds which, in our view, were attractively priced. The Fund's exposure to subordinated financials was increased. The allocation to equities was also raised. The Fund's liquidity (cash, government bonds and bonds maturing within one year) was reduced but remains at a level that allows us to exploit future opportunities as and when they occur.

The Fund's high yield bond exposure is focused on higher quality companies that we consider have a lower risk of default. We also have significant exposure to subordinated bonds within the financial sector. These are junior bonds within a company's capital structure that may have some equity like features. The Fund's overall interest rate sensitivity (duration) remains low. More than 40% of the Fund is currently invested in equity. Our focus for this allocation is on stocks with strong cash flow generation, which we believe can maintain or grow dividends. The Fund currently has a high allocation to cash and other highly liquid assets.

As at 3 August 2021 the Z Accumulation share class (pence per share) of the Invesco European High Income Fund (UK) had risen 2.37% since the balance sheet date 30 April 2021. It is likely markets will continue to be much more volatile than normal over the next few months until the coronavirus impact passes.

Direct transaction costs comprise commission and taxes, principally applicable to equity investment purchases and sales. Shareholders should note that additionally there are other transaction costs such as dealing spread and underlying costs with regard to Collective Investment Scheme holdings which will also have reduced the Fund and share class returns before operating charges.

The operating charges figure is equivalent to the FMF shown on page 18, which we also refer to as the ongoing charge in our Key Investor Information Documents (KIIDs) and our literature.

Direct transaction costs comprise commission and taxes, principally applicable to equity investment purchases and sales. Shareholders should note that additionally there are other transaction costs such as dealing spread and underlying costs with regard to Collective Investment Scheme holdings which will also have reduced the Fund and share class returns before operating charges.

The operating charges figure is equivalent to the FMF shown on page 18, which we also refer to as the ongoing charge in our Key Investor Information Documents (KIIDs) and our literature.

Bank interest	2	3

Invesco European High Income Fund (UK)

Notes to the financial statements

6 Taxation	01.5.20 to 30.4.21 £'000	01.5.19 to 30.4.20 £'000
a) Analysis of charge for the year		
Corporation tax	112	130
Double taxation relief	(4)	-
	108	130
Overseas tax	42	34
Total tax charge	150	164

b) Factors affecting the tax charge for the year

The tax assessed for the year is lower (2020 - lower) than the standard rate of corporation tax in the UK for an authorised investment company with variable capital. The differences are explained below:

	01.5.20 to 30.4.21 £'000	01.5.19 to 30.4.20 £'000
Net revenue before taxation	934	1,249
Corporation tax at 20% (2020 - 20%)	187	250
Effects of:		
Double taxation relief	(4)	-
Overseas tax	42	34
Revenue not subject to tax	(75)	(120)
Total tax charge	150	164

Authorised investment companies with variable capital are exempt from tax on capital gains. Therefore any capital return is not included in the above reconciliation.

7 Distributions	01.5.20 to 30.4.21 £'000	01.5.19 to 30.4.20 £'000
Accumulations and distributions paid 30 June 2020	121	313
Accumulations and distributions paid 31 July 2020	118	150
Accumulations and distributions paid 31 August 2020	77	85
Accumulations and distributions paid 30 September 2020	67	99
Accumulations and distributions paid 31 October 2020	69	82
Accumulations and distributions paid 30 November 2020	63	62
Accumulations and distributions paid 31 December 2020	55	75
Accumulations and distributions paid 31 January 2021	67	90
Accumulations and distributions paid 28 February 2021	66	72
Accumulations and distributions paid 31 March 2021	65	96
Accumulations and distributions paid 30 April 2021	106	114
Accumulations and distributions paid 31 May 2021	131	112
	1,005	1,350
Amounts deducted on redemption of shares	10	15
Amounts received on issue of shares	(2)	(4)
	1,013	1,361

The distributable amount has been calculated as follows:

Net revenue after taxation	784	1,085
Fund Management Fee taken to capital	285	345
Tax relief on expenses taken to capital	(56)	(69)
	1,013	1,361

8 Debtors	30.4.21 £'000	30.4.20 £'000
Accrued revenue	249	292
Amounts receivable for issue of shares	18	26
Double taxation relief	4	-
Overseas tax recoverable	52	53
Sales awaiting settlement	-	120
	323	491

Invesco European High Income Fund (UK)

	160	289

11 Commitments, contingent liabilities and contingent assets

There were no commitments, contingent liabilities or contingent assets at the balance sheet date (2020 - Nil).

12 Related parties

Related party interests in the Fund are disclosed in note 9 of the notes applicable to the financial statements of all Funds on page 24. Amounts payable to Invesco Fund Managers Limited in respect of Fund Management Fees are disclosed in note 4. Amounts received in respect of sales in the accounting year is £8,745,000 (2020 - £4,585,000) and amounts paid in respect of purchases in the accounting year is £6,322,000 (2020 - £5,429,000). Amounts due at the end of the accounting year for Fund Management Fees of £23,000 (2020 - £23,000) are disclosed in note 10 within accrued expenses.

13 Generic Risk factors

The Fund invests in bonds and other fixed income securities that are subject to the risk that issuers do not make payments on such securities. The solvency of organisations with whom the Fund invests cannot be guaranteed and may adversely affect performance. The Fund may be adversely affected by a decrease in market liquidity which may impair the Fund's ability to acquire or to dispose of securities at their intrinsic value. The Fund may invest in high yield bonds which are regarded as being more speculative (than investment grade bonds) as to the issuer's ability to make payments of principal and interest.

As one of the key objectives of the Fund is to provide income, the Manager's ongoing charge is taken from capital rather than income. This can erode capital and reduce the potential for capital growth.

The Fund may invest in contingent convertible bonds which may result in significant risk of capital loss based on certain trigger events.

The Fund's performance may be adversely affected by variations in interest rates and by variations in the relative strength of world currencies or if Sterling strengthens against those currencies.

The Fund may use derivatives (complex instruments) in an attempt to reduce the overall risk of their investments, reduce the costs of investing and/or generate additional capital or income, although this may not be achieved. The use of such complex instruments may result in greater fluctuations of the value of the Fund. The Manager, however, will ensure that the use of derivatives within the Fund does not materially alter the overall risk profile of the Fund.

The generic risk factors relating to the Fund are discussed more fully in note 5 of the notes applicable to the financial statements of all Funds on pages 18 to 23.

a) Counterparty risk

The Fund's exposure to counterparty risk in respect of 'Over The Counter' (OTC) derivative contracts is the fair value of these contracts as shown in the portfolio statement. This is reflected in the table below.

Counterparty Details of OTC Financial Derivative Transactions

30.4.21	Forwards	Total
Broker	£'000	Exposure
		£'000
BNP Paribas	(41)	(41)
Citigroup	(17)	(17)
Goldman Sachs	(7)	(7)
JP Morgan	(17)	(17)

Invesco European High Income Fund (UK)

Notes to the financial statements

13 Generic Risk factors continued

a) Counterparty risk continued

Counterparty Details of OTC Financial Derivative Transactions

30.4.20 Broker	Forwards £'000	Total Exposure £'000
BNP Paribas	102	102
Citigroup	113	113
Goldman Sachs	44	44
JP Morgan	272	272
RBS	37	37

Counterparty exposure has not been disclosed for exchange traded derivatives as the exchange requirements in respect of collateral mean that, in the opinion of the Manager, the counterparty risk is mitigated. In respect of derivative assets (positive numbers per the table), the Fund is exposed to counterparty risk from the counterparty shown, whereas in respect of derivative liabilities (negative numbers per the table) the counterparty shown is exposed to counterparty risk from the Fund.

b) Portfolio Statement Credit Ratings Breakdown	30.4.21 %	30.4.20 %
Investment Grade	16.61	22.41
Non-Investment Grade	35.55	30.52
Not Rated	1.18	2.38
Other	45.19	40.19
Portfolio of investments	98.53	95.50
Net other assets	1.47	4.50
Net Assets	100.00	100.00

c) Valuation of financial instruments

The categorisation of financial instruments in the tables below reflect the basis of valuation of instruments used to measure their fair value.

	Assets £'000	Liabilities £'000
30.4.21		
Level 1: Quoted prices	13,269	-
Level 2: Observable market data	16,460	136
Level 3: Unobservable data	-	-
	29,729	136
30.4.20		
Level 1: Quoted prices	11,860	-
Level 2: Observable market data	17,675	4
Level 3: Unobservable data	-	-
	29,535	4

All financial instruments are classified as level 1: Quoted prices and level 2: Observable market data. The instruments classified as level 2 mainly comprises Bonds and Derivatives. Bonds are valued using prices provided by the primary vendor and validated to the secondary vendor. The OTC derivatives are valued by the primary vendor using various valuation techniques, reviewed and validated to the secondary vendor.

Invesco European High Income Fund (UK)

Notes to the financial statements

14 Portfolio transaction costs

for the year 1 May 2020 to 30 April 2021

Purchases (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Equity instruments	5,367	2	0.04	7	0.13
Debt instruments	1,095	-	-	-	-

Derivative transaction costs		-		-	
Total transaction costs		4		7	
Total transaction costs as a % of average net assets		0.02%		0.02%	

Invesco European High Income Fund (UK)

Notes to the financial statements

14 Portfolio transaction costs continued

for the year 1 May 2019 to 30 April 2020

Purchases (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Equity instruments	2,123	1	0.05	1	0.05
Debt instruments	3,958	-	-	-	-
Total purchases	6,081	1		1	
Total purchases including transaction costs	6,083				

Sales (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Equity instruments	6,628	3	0.05	-	-
Debt instruments	6,650	-	-	-	-
Total sales	13,278	3		-	
Total sales net of transaction costs	13,275				

Derivative transaction costs		-		-	
Total transaction costs		4		1	
Total transaction costs as a % of average net assets		0.01%		0.00%	

The above analysis covers any direct transaction costs suffered by the Fund during the year. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instruments types.

Separately identifiable direct transaction costs (commissions and taxes etc.) are attributable to the Fund's purchase and sale of equity shares. Additionally for equity shares, there is a dealing spread cost (the difference between the buying and selling prices) which will be suffered on purchase and sale transactions.

For the Fund's investment transactions in debt and money market instruments any applicable transaction charges form part of the dealing spread for these instruments. Transactions in money market instruments, cash and short-term collective investment schemes utilised as part of a daily sweep to manage the Fund's daily liquidity position are excluded from the analysis.

For the Fund's investment in collective investment scheme holdings there will potentially be dealing spread costs applicable to purchases and sales. However, additionally there are indirect transaction costs suffered in those underlying Funds, throughout the holding period for the instruments, which are not separately identifiable and do not form part of the analysis above.

During the year the Fund utilised derivative instruments including contract for differences, interest rate swaps, futures and options covering different underlying asset classes. The settlement values for opening and closing derivative positions are not comparable to principal values for transactions in direct holding investments and therefore purchase and sale amounts for derivative transactions are not quantified in the analysis above. Transaction costs for derivatives positions will be either suffered as direct costs or form part of the dealing spread for the instruments. Any direct costs are identified in the analysis above.

Dealing spread costs suffered by the Fund vary considerably for the different asset/instrument types depending on a number of factors including transaction value and market sentiment.

At the balance sheet date the average portfolio dealing spread (difference between bid and offer prices of all investments expressed as a percentage of the offer price value) was 0.41% (2020 - 0.34%).

Group 1: shares purchased prior to 1 April 2021
Group 2: shares purchased on or after 1 April 2021

Equalisation applies only to shares purchased during the distribution period (Group 2). It is the average amount of revenue included in the purchase price of all Group 2 shares and is refunded to holders of these shares as a return of capital. Being capital it is not liable to income tax. Instead, it must be deducted from the cost of shares for capital gains purposes.

Invesco Global Bond Fund (UK)

Investment report for the year

The Investment Objective and Policy of the Invesco Global Bond Fund (UK)

The Fund aims to achieve income and capital growth over the medium to long term (3 to 5 years plus). The Fund invests at least 80% of its assets in debt securities (including investment grade, non-investment grade and unrated) issued by governments, supranational bodies, other public entities as well as by companies, globally. The Fund will take active currency positions globally. In pursuing the Fund's investment objective, the fund manager may consider it appropriate to also invest in other transferable securities, money market instruments, collective investment schemes (including funds managed by the Invesco group), deposits and cash. The Fund uses derivatives for investment purposes to meet the Fund's investment objective and for efficient portfolio management purposes to reduce risk, reduce costs and/or generate additional capital or income. They may include derivatives on currencies, interest rates and credit, and may be used to obtain exposure to long and short positions. The Fund may engage in securities lending. The expected proportion of total assets that may be subject to securities lending arrangements is 20%. Such level might be exceeded or might be subject to changes in the future.

The objectives currently shown within these financial statements are those objectives that were in place as at 30 April 2021.

Performance to 30 April 2021	Since	Since	Since	Percentage growth	
	31.10.20 %	30.4.20 %	30.4.18 %	30.4.16 %	30.4.11 %

Invesco Global Bond Fund (UK) (Z Accumulation shares) ¹	8.6	-1.2	1.2	0.3	5.3
IA Global Mixed Bonds Sector NR ²	9.7	-0.9	3.3	1.6	4.5

This standardised past performance information is updated on a quarterly basis. Should you require up to date past performance information, this is available on our website www.invesco.co.uk or by contacting us.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. This may differ from the performance figure shown on page 121 for Z Accumulation shares as the figure above is based on the quoted 12pm price and the figure shown on page 121 is based on the close of business bid price.

The value of investments and any income from them will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested.

Past performance is not a guide to future returns. Current tax levels and reliefs may change. Depending on individual circumstances, this may affect investment returns.

¹ Effective 18 April 2016, the primary share class changed from Income share class to Z Accumulation share class. Performance figures are based on the Z Accumulation share class. As this was launched on 12 November 2012, for the years prior to this launch date, performance figures are based on the Income share class, without any adjustment for fees.

² This is a Comparator Benchmark. Given its asset allocation the Fund's performance can be compared against the Benchmark. However, the Fund is actively managed and is not constrained by any benchmark. On 19 April 2021, the Comparator Benchmark for the Invesco Global Bond Fund (UK) changed to Investment Association Global Mixed Bond Sector.

Invesco Global Bond Fund (UK)

Investment report for the year

Strategy, review and outlook

The Fund returned 3.9% over the twelve months to the end of April 2021. This placed it in the second quartile of its peer group, the IA Global Mixed Bonds Sector NR, which returned 4.8%.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. Fund performance figures are based on the Z Accumulation share class.

Past performance is not a guide to future returns.

Bond markets enjoyed positive returns over the period. Across many markets, government bond yields (which move inversely to prices) reached record lows and corporate bond markets delivered some of their best returns for many years. However, since the start of 2021, yields on government bonds have started to rise on inflation concerns amid an ongoing strong economic recovery.

The catalyst for the initial strong returns was the extraordinary monetary and fiscal policy response to the virus from central banks and governments. In the US, the Federal Reserve began an asset purchase programme that included buying bonds that had been downgraded to high yield status since the onset of the pandemic.

European markets were given a boost by the first ever agreement between eurozone governments for a mutualisation of debt through a €750bn joint recovery fund. This was particularly significant for peripheral European sovereign bonds, which rallied as a result. The success of Italian Prime Minister Giuseppe Conte in the Italian regional elections was a further strong catalyst for Italian government bonds and in turn Italian corporate bonds.

The Fund is mainly invested in government bonds (both developed and emerging markets). Currently this exposure includes both conventional and inflation linked government bonds. Additional exposure is held in investment grade corporate bonds and some corporate emerging market bonds where we can benefit from the extra yield available. Currency markets provide a further source of potential return for the Fund. Interest rate sensitivity (duration) of the Fund is actively managed.

As at 3 August 2021 the Z Accumulation share class (pence per share) of the Invesco Global Bond Fund (UK) had risen 0.18% since the balance sheet date 30 April 2021. It is likely markets will continue to be much more volatile than normal over the next few months until the coronavirus impact passes.

Invesco Global Bond Fund (UK)

Notes to the financial statements

6 Taxation

	01.5.20 to 30.4.21 £'000	01.5.19 to 30.4.20 £'000
--	--------------------------------	--------------------------------

a) Analysis of charge for the year

Corporation tax	(7)	7
Overseas tax	124	137
Total tax charge	117	144

b) Factors affecting the tax charge for the year

The tax assessed for the year is lower (2020 - lower) than the standard rate of corporation tax in the UK for an authorised investment company with variable capital. The differences are explained below:

	01.5.20 to 30.4.21 £'000	01.5.19 to 30.4.20 £'000
Net revenue before taxation	6,851	10,503
Corporation tax at 20% (2020 - 20%)	1,370	2,101
Effects of:		
Capitalised income subject to tax	7	7
Double taxation relief	(30)	-
Overseas tax	124	137
Prior year adjustment	(7)	-
Tax deductible interest distributions	(1,347)	(2,101)
Total tax charge	117	144

Authorised investment companies with variable capital are exempt from tax on capital gains. Therefore any capital return is not included in the above reconciliation.

7 Distributions

	01.5.20 to 30.4.21 £'000	01.5.19 to 30.4.20 £'000
--	--------------------------------	--------------------------------

Accumulations and distributions paid 31 December 2020	3,405	5,161
Accumulations and distributions paid 30 June 2021	2,992	4,358
	6,397	9,519
Amounts deducted on redemption of shares	558	950
Amounts received on issue of shares	(221)	(105)
	6,734	10,364

The distributable amount has been calculated as follows:

Net revenue after taxation	6,734	10,359
Equalisation on conversions	-	5
	6,734	10,364

8 Debtors

	30.4.21 £'000	30.4.20 £'000
--	------------------	------------------

Accrued revenue	2,035	2,198
Amounts receivable for issue of shares	573	99
Foreign currency contracts awaiting settlement	-	3,474
Sales awaiting settlement	-	6,536
	2,608	12,307

9 Cash and bank balances

	30.4.21 £'000	30.4.20 £'000
--	------------------	------------------

Amount held at futures clearing houses and brokers	623	3,100
Cash and bank balances	14,721	17,985
Term deposits	-	2,400
	15,344	23,485

Invesco Global Bond Fund (UK)

Notes to the financial statements

10 Other creditors	30.4.21 £'000	30.4.20 £'000
Accrued expenses	172	212
Amounts payable for redemption of shares	1,312	377
Amounts payable to counterparties in respect of collateral on derivatives	420	1,910
Corporation tax	-	7
Foreign currency contracts awaiting settlement	-	3,472
Purchases awaiting settlement	-	2,812
	1,904	8,790

11 Commitments, contingent liabilities and contingent assets

There were no commitments, contingent liabilities or contingent assets at the balance sheet date (2020 - Nil).

12 Related parties

Related party interests in the Fund are disclosed in note 9 of the notes applicable to the financial statements of all Funds on page 24. Amounts payable to Invesco Fund Managers Limited in respect of Fund Management Fees are disclosed in note 4. Amounts received in respect of sales in the accounting year of £91,012,000 (2020 - Nil) and amounts paid in respect of purchases in the accounting year of £91,012,000 (2020 - Nil) are included within the figures disclosed in note 14. Amounts received in respect of dividends in the accounting year is £323,000 (2020 - £319,000). Management fee rebates are disclosed in note 2. Amounts due at the end of the accounting year for Fund Management Fees of £172,000 (2020 - £212,000) are disclosed in note 10 within accrued expenses.

13 Generic Risk factors

The Fund invests in bonds and other fixed income securities that are subject to the risk that issuers do not make payments on such securities. The solvency of organisations with whom the Fund invests cannot be guaranteed and may adversely affect performance. The Fund may be adversely affected by a decrease in market liquidity which may impair the Fund's ability to acquire or to dispose of securities at their intrinsic value. The Fund may invest in high yield bonds which are regarded as being more speculative (than investment grade bonds) as to the issuer's ability to make payments of principal and interest.

The Fund has the ability to invest more than 35% of its value in government and public securities issued by any one body.

The Fund's performance may be adversely affected by variations in interest rates and by variations in the relative strength of world currencies or if Sterling strengthens against those currencies.

The Fund may use derivatives (complex instruments) in an attempt to reduce the overall risk of their investments, reduce the costs of investing and/or generate additional capital or income, although this may not be achieved. The use of such complex instruments may result in greater fluctuations of the value of the Fund. The Manager, however, will ensure that the use of derivatives within the Fund does not materially alter the overall risk profile of the Fund.

The generic risk factors relating to the Fund are discussed more fully in note 5 of the notes applicable to the financial statements of all Funds on pages 18 to 23.

Invesco Global Bond Fund (UK)

Notes to the financial statements

13 Generic Risk factors continued

a) Counterparty risk

The Fund's exposure to counterparty risk in respect of 'Over The Counter' (OTC) derivative contracts is the fair value of these contracts as shown in the portfolio statement. This is reflected in the table below.

Counterparty exposure has not been disclosed for exchange traded derivatives as the exchange requirements in respect of collateral mean that, in the opinion of the Manager, the counterparty risk is mitigated. In respect of derivative assets (positive numbers per the table), the Fund is exposed to counterparty risk from the counterparty shown, whereas in respect of derivative liabilities (negative numbers per the table) the counterparty shown is exposed to counterparty risk from the Fund.

Collateral received from counterparties in respect of derivative contracts was £420,000 (2020 - £1,910,000) in the form of cash and is shown in note 10.

c) Valuation of financial instruments

The categorisation of financial instruments in the tables below reflect the basis of valuation of instruments used to measure their fair value.

	Assets £'000	Liabilities £'000
30.4.21		
Level 1: Quoted prices	2,858	34
Level 2: Observable market data	241,557	1,452
Level 3: Unobservable data	-	-
	244,415	1,486
30.4.20		
Level 1: Quoted prices	80	-
Level 2: Observable market data	301,602	10,789
Level 3: Unobservable data	-	-
	301,682	10,789

All financial instruments are classified as level 1: Quoted prices and level 2: Observable market data. The instruments classified as level 2 mainly comprises Bonds and Derivatives. Bonds are valued using prices provided by the primary vendor and validated to the secondary vendor. The OTC derivatives are valued by the primary vendor using various valuation techniques, reviewed and validated to the secondary vendor.

14 Portfolio transaction costs

for the year 1 May 2020 to 30 April 2021

	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%

Derivative transaction costs		3		-	
Total transaction costs		3		-	
Total transaction costs as a % of average net assets		0.00%		0.00%	

Invesco Global Bond Fund (UK)

Notes to the financial statements

14 Portfolio transaction costs continued

for the year 1 May 2019 to 30 April 2020

Purchases (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Debt instruments	224,023	-	-	-	-
Total purchases	224,023	-		-	
Total purchases including transaction costs	224,023				

Sales (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Debt instruments	313,130	-	-	-	-
Total sales	313,130	-		-	
Total sales net of transaction costs	313,130				

Derivative transaction costs		13		-	
Total transaction costs		13		-	
Total transaction costs as a % of average net assets		0.00%		0.00%	

The above analysis covers any direct transaction costs suffered by the Fund during the year. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instruments types.

Separately identifiable direct transaction costs (commissions and taxes etc.) are attributable to the Fund's purchase and sale of equity shares. Additionally for equity shares, there is a dealing spread cost (the difference between the buying and selling prices) which will be suffered on purchase and sale transactions.

For the Fund's investment transactions in debt and money market instruments any applicable transaction charges form part of the dealing spread for these instruments. Transactions in money market instruments, cash and short-term collective investment schemes utilised as part of a daily sweep to manage the Fund's daily liquidity position are excluded from the analysis.

For the Fund's investment in collective investment scheme holdings there will potentially be dealing spread costs applicable to purchases and sales. However, additionally there are indirect transaction costs suffered in those underlying Funds, throughout the holding period for the instruments, which are not separately identifiable and do not form part of the analysis above.

During the year the Fund utilised derivative instruments including contract for differences, interest rate swaps, futures and options covering different underlying asset classes. The settlement values for opening and closing derivative positions are not comparable to principal values for transactions in direct holding investments and therefore purchase and sale amounts for derivative transactions are not quantified in the analysis above. Transaction costs for derivatives positions will be either suffered as direct costs or form part of the dealing spread for the instruments. Any direct costs are identified in the analysis above.

Dealing spread costs suffered by the Fund vary considerably for the different asset/instrument types depending on a number of factors including transaction value and market sentiment.

At the balance sheet date the average portfolio dealing spread (difference between bid and offer prices of all investments expressed as a percentage of the offer price value) was 0.37% (2020 - 0.30%).

Group 1: shares purchased prior to 1 November 2020
Group 2: shares purchased on or after 1 November 2020

Equalisation applies only to shares purchased during the distribution period (Group 2). It is the average amount of revenue included in the purchase price of all Group 2 shares and is refunded to holders of these shares as a return of capital. Being capital it is not liable to income tax. Instead, it must be deducted from the cost of shares for capital gains purposes.

Invesco Global Financial Capital Fund (UK)

Investment report for the year

The Investment Objective and Policy of the Invesco Global Financial Capital Fund (UK)

The Fund aims to achieve income and capital growth over the medium to long term (3 to 5 years plus). The Fund invests at least 80% of its assets in capital instruments which include debt securities (including non-investment grade, unrated and contingent convertible bonds), shares and other equity related securities issued by banks and other financial institutions globally. In pursuing the Fund's investment objective, the fund manager may consider it appropriate to also invest in other transferable securities, money market instruments, collective investment schemes (including funds managed by the Invesco group), government debt securities, deposits and cash. The Fund may use derivatives for investment purposes to meet the Fund's investment objective and for efficient portfolio management purposes to reduce risk, reduce costs and/or generate additional capital or income. They may include derivatives on currencies, interest rates and credit, and may be used to obtain exposure to long and short positions. Total return swaps will be used by the Fund. The expected proportion of total assets subject to total return swaps is 30%. Such level might be exceeded or might be subject to changes in the future. The Fund may engage in securities lending. The expected proportion of total assets that may be subject to securities lending arrangements is 20%. Such level might be exceeded or might be subject to changes in the future.

The objectives currently shown within these financial statements are those objectives that were in place as at 30 April 2021.

Performance to 30 April 2021	Since	Since	Since	Percentage growth

This standardised past performance information is updated on a quarterly basis. Should you require up to date past performance information, this is available on our website www.invesco.co.uk or by contacting us.

Fund performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. This may differ from the performance figure shown on page 143 for Z Accumulation shares as the figure above is based on the quoted 12pm price and the figure shown on page 143 is based on the close of business bid price. Invesco Composite Index² data source: Lipper, total return, in Sterling.

The value of investments and any income from them will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested.

Past performance is not a guide to future returns. Current tax levels and reliefs may change. Depending on individual circumstances, this may affect investment returns.

- ¹ Effective 18 April 2016, the primary share class changed from Accumulation share class to Z Accumulation share class. Performance figures are based on the Z Accumulation share class. As this was launched on 12 November 2012, for the years prior to this launch date, performance figures are based on the Accumulation share class, without any adjustment for fees.
- ² This is a Comparator Benchmark. The Benchmark is a blend of indices that represent the type of bonds and equities that the Fund may invest in and therefore, the Fund's performance can be compared against it. However, the Fund is actively managed and is not constrained by any benchmark. The Invesco Composite Index is calculated by reference to 50% ICE BofAML Global Financial Index GBP-Hedged (Total Return), 30% ICE BofAML Contingent Capital Index GBP-Hedged (Total Return) and 20% FTSE All World Financials Index GBP-Hedged (Total Return).

Invesco Global Financial Capital Fund (UK)

Investment report for the year

Strategy, review and outlook

The Fund returned 30.7% over the twelve months to the end of April 2021. This compares to a return of 16.1% for the Fund's comparator benchmark Invesco Composite Index¹.

Fund performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. Fund performance figures are based on the Z Accumulation share class. Invesco Composite Index¹ data source: Lipper, total return, in Sterling.

Past performance is not a guide to future returns.

Corporate bond and equity markets generated positive returns as they continued to recover from the lows of March 2020. The catalyst was the extraordinary monetary and fiscal policy response to the virus from central banks and governments. However, as autumn began, a resurgence of Covid-19 cases in Europe, as well as rising US political uncertainty, led to some consolidation within bond markets. By contrast, equity markets continued to advance, drawing support from encouraging economic data.

Looking at the financial sector in particular, bank bonds have seen positive returns, in line with other credit risk assets. Financial assets have outperformed the wider equity market as they have responded more positively to the rising expectations for economic growth in recent months.

Our holdings in subordinated financials - junior bonds with lower priority than senior debt - contributed the most towards fund performance. Gains here were led by holdings in contingent capital (CoCo) bonds. Most of our holdings in this category are bonds issued by high quality banks such as Barclays, NatWest and Lloyds Bank. Other notable contributors included tier 1 bank capital, senior bank bonds.

The Fund is invested across the capital structure of banks, insurers and other financials, but has a focus on subordinated bonds. To fully exploit opportunities in the sector the Fund also invests in equities.

As at 3 August 2021 the Net Asset Value (pence per share) of the Invesco Global Financial Capital Fund (UK) had risen 5.22% since the balance sheet date 30 April 2021. It is likely markets will continue to be much more volatile than normal over the next few months until the coronavirus impact passes.

¹ The Invesco Composite Index is calculated by reference to 50% ICE BofAML Global Financial Index GBP-Hedged (Total Return), 30% ICE BofAML Contingent Capital Index GBP-Hedged (Total Return) and 20% FTSE All World Financials Index GBP-Hedged (Total Return).

Lowest share price	117.28	115.22	140.99

Direct transaction costs comprise commission and taxes, principally applicable to equity investment purchases and sales. Shareholders should note that additionally there are other transaction costs such as dealing spread and underlying costs with regard to Collective Investment Scheme holdings which will also have reduced the Fund and share class returns before operating charges.

The operating charges figure is equivalent to the FMF shown on page 18, which we also refer to as the ongoing charge in our Key Investor Information Documents (KIIDs) and our literature.

Invesco Global Financial Capital Fund (UK)

Notes to the financial statements

6 Taxation	01.5.20 to 30.4.21 £'000	01.5.19 to 30.4.20 £'000
-------------------	---	---

a) Analysis of charge for the year

Overseas tax	8	15
Total tax charge	8	15

There is no corporation tax charge for the year (2020 - Nil).

b) Factors affecting the tax charge for the year

The tax assessed for the year is lower (2020 - lower) than the standard rate of corporation tax in the UK for an authorised investment company with variable capital. The differences are explained below:

	01.5.20 to 30.4.21 £'000	01.5.19 to 30.4.20 £'000
Net revenue before taxation	683	1,974
Corporation tax at 20% (2020 - 20%)	137	395
Effects of:		
Overseas tax	8	15
Revenue not subject to tax	(22)	(141)
Tax deductible interest distributions	(115)	(254)
Total tax charge	8	15

Authorised investment companies with variable capital are exempt from tax on capital gains. Therefore any capital return is not included in the above reconciliation.

7 Distributions

Invesco Global Financial Capital Fund (UK)

Notes to the financial statements

11 Commitments, contingent liabilities and contingent assets

There were no commitments, contingent liabilities or contingent assets at the balance sheet date (2020 - Nil).

12 Related parties

Related party interests in the Fund are disclosed in note 9 of the notes applicable to the financial statements of all Funds on page 24. Amounts payable to Invesco Fund Managers Limited in respect of Fund Management Fees are disclosed in note 4. Amounts due at the end of the accounting year for Fund Management Fees of £17,000 (2020 - £14,000) are disclosed in note 10 within accrued expenses.

13 Generic Risk factors

The Fund invests in bonds and other fixed income securities that are subject to the risk that issuers do not make payments on such securities. The solvency of organisations with whom the Fund invests cannot be guaranteed and may adversely affect performance. The Fund may be adversely affected by a decrease in market liquidity which may impair the Fund's ability to acquire or to dispose of securities at their intrinsic value. The Fund may invest in high yield bonds which are regarded as being more speculative (than investment grade bonds) as to the issuer's ability to make payments of principal and interest.

As one of the key objectives of the Fund is to provide income, the Manager's ongoing charge is taken from capital rather than income. This can erode capital and reduce the potential for capital growth.

As the Fund invests primarily in capital instruments issued by banks and financial institutions globally, it can invest extensively in contingent convertible bonds which may result in significant risk of capital loss based on certain trigger events.

The Fund's performance may be adversely affected by variations in interest rates and by variations in the relative strength of world currencies or if Sterling strengthens against those currencies.

The Fund may use derivatives (complex instruments) in an attempt to reduce the overall risk of their investments, reduce the costs of investing and/or generate additional capital or income, although this may not be achieved. The use of such complex instruments may result in greater fluctuations of the value of the Fund. The Manager, however, will ensure that the use of derivatives within the Fund does not materially alter the overall risk profile of the Fund.

The generic risk factors relating to the Fund are discussed more fully in note 5 of the notes applicable to the financial statements of all Funds on pages 18 to 23.

a) Counterparty risk

The Fund's exposure to counterparty risk in respect of 'Over The Counter' (OTC) derivative contracts is the fair value of these contracts as shown in the portfolio statement. This is reflected in the table below.

Counterparty Details of OTC Financial Derivative Transactions

30.4.21 Broker	Forwards £'000	Total Exposure £'000
BNP Paribas	(5)	(5)
Citigroup	(4)	(4)
JP Morgan	(2)	(2)
RBS	2	2

Counterparty Details of OTC Financial Derivative Transactions

30.4.20 Broker	Forwards £'000	Total Exposure £'000
BNP Paribas	44	44
Citigroup	68	68
Goldman Sachs	47	47
JP Morgan	131	131
RBS	32	32

Counterparty exposure has not been disclosed for exchange traded derivatives as the exchange requirements in respect of collateral mean that, in the opinion of the Manager, the counterparty risk is mitigated. In respect of derivative assets (positive numbers per the table), the Fund is exposed to counterparty risk from the counterparty shown, whereas in respect of derivative liabilities (negative numbers per the table) the counterparty shown is exposed to counterparty risk from the Fund.

Invesco Global Financial Capital Fund (UK)

Notes to the financial statements

13 Generic Risk factors continued

b) Portfolio Statement Credit Ratings Breakdown	30.4.21	30.4.20
	%	%
Investment Grade	6.54	7.04
Non-Investment Grade	47.25	44.42
Not Rated	7.08	15.76
Other	39.70	31.86
Portfolio of investments	100.57	99.08
Net other (liabilities)/assets	(0.57)	0.92
Net Assets	100.00	100.00

c) Valuation of financial instruments

The categorisation of financial instruments in the tables below reflect the basis of valuation of instruments used to measure their fair value.

	Assets	Liabilities
	£'000	£'000
30.4.21		
Level 1: Quoted prices	7,612	-
Level 2: Observable market data	15,408	75
Level 3: Unobservable data	427	-
	23,447	75
30.4.20		
Level 1: Quoted prices	5,325	-
Level 2: Observable market data	13,646	105
Level 3: Unobservable data	618	-
	19,589	105

The majority of financial instruments are classified as level 1: Quoted prices and level 2: Observable market data. The instruments classified as level 2 mainly comprises Bonds and Derivatives. Bonds are valued using prices provided by the primary vendor and validated to the secondary vendor. The OTC derivatives are valued by the primary vendor using various valuation techniques, reviewed and validated to the secondary vendor. Instruments classified as level 3: Unobservable data mainly comprise non-market traded and unquoted securities.

Generally for the non-market traded and unquoted securities, where there is no price source from an active market for an investment, the Manager has applied judgement in determining the fair value. The Manager has used several valuation methodologies as prescribed in the International Private Equity and Venture Capital valuation guidelines to arrive at their best estimate of fair value. Valuation techniques used by the Manager are set out in Accounting Policies note 1 (i). The fair value is established by using measures of value such as:

- Price of recent transactions – Management determine the fair value based on the price of recent transactions made by management or a third party.
- Milestone analysis – Management assess the investment company's progress against milestones expected at the time of investment in order to determine whether an adjustment is required to the transaction price to determine fair value.
- Multiples – Earnings or Revenue multiples are selected from comparable public companies based on geographic location, industry, size, risk profile, earnings growth prospects, target markets and other factors that management consider reasonable. A discount for lack of liquidity may then be applied to represent the adjustment to comparable company multiples to reflect the illiquidity of the portfolio companies relative to the comparable peer group. Management determines the discount for lack of liquidity based on its judgement, after considering market liquidity conditions and company specific factors such as the development stage of the portfolio company. One of the most common forms of multiples used for cash generating companies are EV/EBITDA multiples as EBITDA is generally seen to represent a good proxy for free cash flow. These are applied where appropriate based on the development of underlying portfolio companies but other multiples such as EV/Revenue may also be considered.
- Net assets – Management determine the fair value based on the net asset value of the underlying portfolio company

Invesco Global Financial Capital Fund (UK)

Notes to the financial statements

13 Generic Risk factors continued

c) Valuation of financial instruments continued

In applying the above valuation techniques in arriving at the fair value the Manager has assessed any further information available from internal and external sources to arrive at an estimated fair value, which includes but is not limited to the following:

- Reference to listed securities of the same company;
- Consideration of seniority of the securities held and terms of repayment upon realisation;
- Consideration of any trading restrictions on the investment company's shares that would limit Invesco's ability to realise its holding;
- Consideration of any outstanding payments to be made by Invesco;
- Industry statistics or events (such as mergers, acquisitions and the risk of default).

14 Portfolio transaction costs

for the year 1 May 2020 to 30 April 2021

Purchases (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%

Total transaction costs as a % of average net assets		0.02%		0.02%	

Invesco Global Financial Capital Fund (UK)

Notes to the financial statements

14 Portfolio transaction costs continued

for the year 1 May 2019 to 30 April 2020

Purchases (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Equity instruments	5,102	3	0.06	2	0.04
Debt instruments	1,421	-	-	-	-
Total purchases	6,523	3		2	
Total purchases including transaction costs	6,528				

Sales (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Equity instruments	18,967	10	0.05	-	-
Debt instruments	41,835	-	-	-	-
Total sales	60,802	10		-	
Total sales net of transaction costs	60,792				

Derivative transaction costs		-		-	
Total transaction costs		13		2	
Total transaction costs as a % of average net assets		0.03%		0.01%	

The above analysis covers any direct transaction costs suffered by the Fund during the year. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instruments types.

Separately identifiable direct transaction costs (commissions and taxes etc.) are attributable to the Fund's purchase and sale of equity shares. Additionally for equity shares, there is a dealing spread cost (the difference between the buying and selling prices) which will be suffered on purchase and sale transactions.

For the Fund's investment transactions in debt and money market instruments any applicable transaction charges form part of the dealing spread for these instruments. Transactions in money market instruments, cash and short-term collective investment schemes utilised as part of a daily sweep to manage the Fund's daily liquidity position are excluded from the analysis.

For the Fund's investment in collective investment scheme holdings there will potentially be dealing spread costs applicable to purchases and sales. However, additionally there are indirect transaction costs suffered in those underlying Funds, throughout the holding period for the instruments, which are not separately identifiable and do not form part of the analysis above.

During the year the Fund utilised derivative instruments including contract for differences, interest rate swaps, futures and options covering different underlying asset classes. The settlement values for opening and closing derivative positions are not comparable to principal values for transactions in direct holding investments and therefore purchase and sale amounts for derivative transactions are not quantified in the analysis above. Transaction costs for derivatives positions will be either suffered as direct costs or form part of the dealing spread for the instruments. Any direct costs are identified in the analysis above.

Dealing spread costs suffered by the Fund vary considerably for the different asset/instrument types depending on a number of factors including transaction value and market sentiment.

At the balance sheet date the average portfolio dealing spread (difference between bid and offer prices of all investments expressed as a percentage of the offer price value) was 2.07% (2020 - 0.82%).

Group 1: shares purchased prior to 1 November 2020
Group 2: shares purchased on or after 1 November 2020

Equalisation applies only to shares purchased during the distribution period (Group 2). It is the average amount of revenue included in the purchase price of all Group 2 shares and is refunded to holders of these shares as a return of capital. Being capital it is not liable to income tax. Instead, it must be deducted from the cost of shares for capital gains purposes.

Invesco High Yield Fund (UK)

Investment report for the year

The Investment Objective and Policy of the Invesco High Yield Fund (UK)

The Fund aims to achieve income and capital growth over the medium to long term (3 to 5 years plus). The Fund invests at least 80% of its assets in corporate and government debt securities which are either non-investment grade or unrated. In pursuing the Fund's investment objective, the fund manager may consider it appropriate to also invest in other transferable securities (including investment grade debt securities), equities, money market instruments, collective investment schemes (including funds managed by the Invesco group), deposits and cash. The Fund may use derivatives for investment purposes to meet the Fund's investment objective and for efficient portfolio management purposes to reduce risk, reduce costs and/or generate additional capital or income. They may include derivatives on currencies, interest rates and credit, and may be used to obtain exposure to long and short positions. The Fund may engage in securities lending. The expected proportion of total assets that may be subject to securities lending arrangements is 20%. Such level might be exceeded or might be subject to changes in the future.

The objectives currently shown within these financial statements are those objectives that were in place as at 30 April 2021.

This standardised past performance information is updated on a quarterly basis. Should you require up to date past performance information, this is available on our website www.invesco.co.uk or by contacting us.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. This may differ from the performance figure shown on page 164 for Z Accumulation shares as the figure above is based on the quoted 12pm price and the figure shown on page 164 is based on the close of business bid price.

The value of investments and any income from them will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested.

Past performance is not a guide to future returns. Current tax levels and reliefs may change. Depending on individual circumstances, this may affect investment returns.

¹ Effective 18 April 2016, the primary share class changed from Accumulation share class to Z Accumulation share class. Performance figures are based on the Z Accumulation share class. As this was launched on 12 November 2012, for the years prior to this launch date, performance figures are based on the Accumulation share class, without any adjustment for fees.

² This is a Comparator Benchmark. Given its asset allocation the Fund's performance can be compared against the Benchmark. However, the Fund is actively managed and is not constrained by any benchmark.

Invesco High Yield Fund (UK)

Investment report for the year

Strategy, review and outlook

The Fund returned 23.2% over the twelve months to the end of April 2021. This placed the Fund in the first quartile of its peer group, the IA £ High Yield Sector NR, which returned 19.0%.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. Fund performance figures are based on the Z Accumulation share class.

Past performance is not a guide to future returns.

Corporate bond markets generated positive returns as they continued to recover from the lows of March 2020. The catalyst was the extraordinary monetary and fiscal policy response to the virus from central banks and governments. However, as autumn began, a resurgence of Covid-19 cases in Europe, as well as rising US political uncertainty, led to some consolidation within bond markets. News of a vaccine breakthrough from Pfizer triggered fresh demand for corporate bonds towards the tail end of 2020 before rising inflation expectations (which are normally negative for bonds) pushed prices down across the board in the early months of 2021.

Holdings in the leisure, oil and food sectors contributed the most towards fund performance. There was also significant contribution from subordinated financials (junior debt). Having exposure to emerging market bonds generated positive returns.

The core of the Fund is invested in companies that we think are dominant within their industry or sector and that have predictable cash flows. Typically, but not always these bonds will be at the higher quality end of the high yield spectrum. Looking at the Fund by sector, the largest allocation is currently bonds issued by banks. Outside of the financial sector, our largest allocations are to bonds within the food, telecoms and retail sectors.

As at 3 August 2021 the Z Accumulation share class (pence per share) of the Invesco High Yield Fund (UK) had risen 3.17% since the balance sheet date 30 April 2021. It is likely markets will continue to be much more volatile than normal over the next few months until the coronavirus impact passes.

On 31 August 2020 Senior Credit Analyst, Tom Hemmant expanded his responsibilities to become a Co-Fund Manager on the fund alongside Thomas Moore.

Thomas Moore and Tom Hemmant, Fund Managers

Direct transaction costs comprise commission and taxes, principally applicable to equity investment purchases and sales. Shareholders should note that additionally there are other transaction costs such as dealing spread and underlying costs with regard to Collective Investment Scheme holdings which will also have reduced the Fund and share class returns before operating charges.

The operating charges figure is equivalent to the FMF shown on page 18, which we also refer to as the ongoing charge in our Key Investor Information Documents (KIIDs) and our literature.

Prices			
Highest share price	273.38	265.65	244.08
Lowest share price	221.18	207.48	226.16

Direct transaction costs comprise commission and taxes, principally applicable to equity investment purchases and sales. Shareholders should note that additionally there are other transaction costs such as dealing spread and underlying costs with regard to Collective Investment Scheme holdings which will also have reduced the Fund and share class returns before operating charges.

The operating charges figure is equivalent to the FMF shown on page 18, which we also refer to as the ongoing charge in our Key Investor Information Documents (KIIDs) and our literature.

Invesco High Yield Fund (UK)

Notes to the financial statements

6 Taxation	01.5.20 to 30.4.21 £'000	01.5.19 to 30.4.20 £'000
-------------------	---	---

a) Analysis of charge for the year

Overseas tax	-	(-)
Total tax charge	-	(-)

There is no corporation tax charge for the year (2020 - Nil).

b) Factors affecting the tax charge for the year

The tax assessed for the year is lower (2020 - lower) than the standard rate of corporation tax in the UK for an authorised investment company with variable capital. The differences are explained below:

	01.5.20 to 30.4.21 £'000	01.5.19 to 30.4.20 £'000
Net revenue before taxation	10,336	8,777
Corporation tax at 20% (2020 - 20%)	2,067	1,755
Effects of:		
Tax deductible interest distributions	(2,067)	(1,755)
Total tax charge	-	-

Authorised investment companies with variable capital are exempt from tax on capital gains. Therefore any capital return is not included in the above reconciliation.

7 Distributions	01.5.20 to 30.4.21 £'000	01.5.19 to 30.4.20 £'000
------------------------	---	---

Accumulations and distributions paid 30 September 2020	3,158	2,741
Accumulations and distributions paid 31 December 2020	3,158	2,434
Accumulations and distributions paid 31 March 2021	3,177	2,452
Accumulations and distributions paid 30 June 2021	2,986	2,397
	12,479	10,024
Amounts deducted on redemption of shares	483	400
Amounts received on issue of shares	(1,133)	(369)
	11,829	10,055

The distributable amount has been calculated as follows:

Net revenue after taxation	10,336	8,777
Fund Management Fee taken to capital	1,493	1,278
	11,829	10,055

8 Debtors	30.4.21 £'000	30.4.20 £'000
------------------	--------------------------	--------------------------

Accrued revenue	3,156	2,493
Amounts receivable for issue of shares	1,715	327
Sales awaiting settlement	641	2,149
	5,512	4,969

9 Cash and bank balances	30.4.21 £'000	30.4.20 £'000
---------------------------------	--------------------------	--------------------------

Cash and bank balances	1,217	279
------------------------	-------	-----

10 Other creditors	30.4.21 £'000	30.4.20 £'000
---------------------------	--------------------------	--------------------------

Accrued expenses	131	75
Amounts payable for redemption of shares	652	124
Purchases awaiting settlement	1,613	856
	2,396	1,055

Invesco High Yield Fund (UK)

Notes to the financial statements

11 Commitments, contingent liabilities and contingent assets

There were no commitments, contingent liabilities or contingent assets at the balance sheet date (2020 - Nil).

12 Related parties

Related party interests in the Fund are disclosed in note 9 of the notes applicable to the financial statements of all Funds on page 24. Amounts payable to Invesco Fund Managers Limited in respect of Fund Management Fees are disclosed in note 4. Amounts due at the end of the accounting year for Fund Management Fees of £131,000 (2020 - £75,000) are disclosed in note 10 within accrued expenses.

13 Generic Risk factors

The Fund invests in bonds and other fixed income securities that are subject to the risk that issuers do not make payments on such securities. The solvency of organisations with whom the Fund invests cannot be guaranteed and may adversely affect performance. The Fund may be adversely affected by a decrease in market liquidity which may impair the Fund's ability to acquire or to dispose of securities at their intrinsic value. The Fund may invest in high yield bonds which are regarded as being more speculative (than investment grade bonds) as to the issuer's ability to make payments of principal and interest.

The Fund may invest in contingent convertible bonds which may result in significant risk of capital loss based on certain trigger events.

The Fund's performance may be adversely affected by variations in interest rates and by variations in the relative strength of world currencies or if Sterling strengthens against those currencies.

The Fund may use derivatives (complex instruments) in an attempt to reduce the overall risk of their investments, reduce the costs of investing and/or generate additional capital or income, although this may not be achieved. The use of such complex instruments may result in greater fluctuations of the value of the Fund. The Manager, however, will ensure that the use of derivatives within the Fund does not materially alter the overall risk profile of the Fund.

The generic risk factors relating to the Fund are discussed more fully in note 5 of the notes applicable to the financial statements of all Funds on pages 18 to 23.

a) Counterparty risk

The Fund's exposure to counterparty risk in respect of 'Over The Counter' (OTC) derivative contracts is the fair value of these contracts as shown in the portfolio statement. This is reflected in the table below.

Counterparty Details of OTC Financial Derivative Transactions

30.4.21 Broker	Forwards £'000	Total Exposure £'000
BNP Paribas	(69)	(69)
Citigroup	(22)	(22)
Deutsche Bank	2	2
Goldman Sachs	(8)	(8)
JP Morgan	8	8
RBS	32	32

Counterparty Details of OTC Financial Derivative Transactions

30.4.20 Broker	Forwards £'000	Total Exposure £'000
BNP Paribas	302	302
Citigroup	501	501
Goldman Sachs	172	172
JP Morgan	853	853
RBS	235	235

Counterparty exposure has not been disclosed for exchange traded derivatives as the exchange requirements in respect of collateral mean that, in the opinion of the Manager, the counterparty risk is mitigated. In respect of derivative assets (positive numbers per the table), the Fund is exposed to counterparty risk from the counterparty shown, whereas in respect of derivative liabilities (negative numbers per the table) the counterparty shown is exposed to counterparty risk from the Fund.

Invesco High Yield Fund (UK)

Notes to the financial statements

13 Generic Risk factors continued

b) Portfolio Statement Credit Ratings Breakdown	30.4.21	30.4.20
	%	%
Investment Grade	4.27	7.77
Non-Investment Grade	89.90	79.35
Not Rated	2.77	8.44
Other	1.48	3.27
Portfolio of investments	98.42	98.83
Net other assets	1.58	1.17
Net Assets	100.00	100.00

c) Valuation of financial instruments

The categorisation of financial instruments in the tables below reflect the basis of valuation of instruments used to measure their fair value.

	Assets	Liabilities
	£'000	£'000
30.4.21		
Level 1: Quoted prices	932	-
Level 2: Observable market data	209,648	759
Level 3: Unobservable data	2,377	-
	212,957	759
30.4.20		
Level 1: Quoted prices	165	-
Level 2: Observable market data	132,910	729
Level 3: Unobservable data	2,314	-
	135,389	729

The majority of financial instruments are classified as level 1: Quoted prices and level 2: Observable market data. The instruments classified as level 2 mainly comprises Bonds and Derivatives. Bonds are valued using prices provided by the primary vendor and validated to the secondary vendor. The OTC derivatives are valued by the primary vendor using various valuation techniques, reviewed and validated to the secondary vendor. Instruments classified as level 3: Unobservable data mainly comprise non-market traded and unquoted securities.

Generally for the non-market traded and unquoted securities, where there is no price source from an active market for an investment, the Manager has applied judgement in determining the fair value. The Manager has used several valuation methodologies as prescribed in the International Private Equity and Venture Capital valuation guidelines to arrive at their best estimate of fair value. Valuation techniques used by the Manager are set out in Accounting Policies note 1 (i). The fair value is established by using measures of value such as:

- Price of recent transactions – Management determine the fair value based on the price of recent transactions made by management or a third party.
- Milestone analysis – Management assess the investment company's progress against milestones expected at the time of investment in order to determine whether an adjustment is required to the transaction price to determine fair value.
- Multiples – Earnings or Revenue multiples are selected from comparable public companies based on geographic location, industry, size, risk profile, earnings growth prospects, target markets and other factors that management consider reasonable. A discount for lack of liquidity may then be applied to represent the adjustment to comparable company multiples to reflect the illiquidity of the portfolio companies relative to the comparable peer group. Management determines the discount for lack of liquidity based on its judgement, after considering market liquidity conditions and company specific factors such as the development stage of the portfolio company. One of the most common forms of multiples used for cash generating companies are EV/EBITDA multiples as EBITDA is generally seen to represent a good proxy for free cash flow. These are applied where appropriate based on the development of underlying portfolio companies but other multiples such as EV/Revenue may also be considered.
- Net assets – Management determine the fair value based on the net asset value of the underlying portfolio company

Invesco High Yield Fund (UK)

Notes to the financial statements

13 Generic Risk factors continued

c) Valuation of financial instruments continued

In applying the above valuation techniques in arriving at the fair value the Manager has assessed any further information available from internal and external sources to arrive at an estimated fair value, which includes but is not limited to the following:

- Reference to listed securities of the same company;
- Consideration of seniority of the securities held and terms of repayment upon realisation;
- Consideration of any trading restrictions on the investment company's shares that would limit Invesco's ability to realise its holding;
- Consideration of any outstanding payments to be made by Invesco;
- Industry statistics or events (such as mergers, acquisitions and the risk of default).

14 Portfolio transaction costs

for the year 1 May 2020 to 30 April 2021

	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Purchases (excluding derivatives)					
Equity instruments	447	-	-	-	-

Derivative transaction costs		-		-	
Total transaction costs		-		-	
Total transaction costs as a % of average net assets		0.00%		0.00%	

Invesco High Yield Fund (UK)

Notes to the financial statements

14 Portfolio transaction costs continued

for the year 1 May 2019 to 30 April 2020

Purchases (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Equity instruments	953	-	-	-	-
Debt instruments	71,375	-	-	-	-
Total purchases	72,328	-		-	
Total purchases including transaction costs	72,328				

Sales (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Equity instruments	882	1	0.08	-	-
Debt instruments	72,437	-	-	-	-
Total sales	73,319	1		-	
Total sales net of transaction costs	73,318				

Derivative transaction costs		-		-	
Total transaction costs		1		-	
Total transaction costs as a % of average net assets		0.00%		0.00%	

The above analysis covers any direct transaction costs suffered by the Fund during the year. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instruments types.

Separately identifiable direct transaction costs (commissions and taxes etc.) are attributable to the Fund's purchase and sale of equity shares. Additionally for equity shares, there is a dealing spread cost (the difference between the buying and selling prices) which will be suffered on purchase and sale transactions.

For the Fund's investment transactions in debt and money market instruments any applicable transaction charges form part of the dealing spread for these instruments. Transactions in money market instruments, cash and short-term collective investment schemes utilised as part of a daily sweep to manage the Fund's daily liquidity position are excluded from the analysis.

For the Fund's investment in collective investment scheme holdings there will potentially be dealing spread costs applicable to purchases and sales. However, additionally there are indirect transaction costs suffered in those underlying Funds, throughout the holding period for the instruments, which are not separately identifiable and do not form part of the analysis above.

During the year the Fund utilised derivative instruments including contract for differences, interest rate swaps, futures and options covering different underlying asset classes. The settlement values for opening and closing derivative positions are not comparable to principal values for transactions in direct holding investments and therefore purchase and sale amounts for derivative transactions are not quantified in the analysis above. Transaction costs for derivatives positions will be either suffered as direct costs or form part of the dealing spread for the instruments. Any direct costs are identified in the analysis above.

Dealing spread costs suffered by the Fund vary considerably for the different asset/instrument types depending on a number of factors including transaction value and market sentiment.

At the balance sheet date the average portfolio dealing spread (difference between bid and offer prices of all investments expressed as a percentage of the offer price value) was 1.49% (2020 - 0.97%).

Group 2: shares purchased on or after 1 February 2021

Equalisation applies only to shares purchased during the distribution period (Group 2). It is the average amount of revenue included in the purchase price of all Group 2 shares and is refunded to holders of these shares as a return of capital. Being capital it is not liable to income tax. Instead, it must be deducted from the cost of shares for capital gains purposes.

Invesco Monthly Income Plus Fund (UK)

Investment report for the year

The Investment Objective and Policy of the Invesco Monthly Income Plus Fund (UK)

The Fund aims to achieve income and capital growth over the medium to long term (3 to 5 years plus). The Fund invests at least 80% of its assets globally in corporate and government debt securities (including investment grade, non-investment grade and unrated) and shares or other equity related securities of companies. In pursuing the Fund's investment objective, the fund manager may consider it appropriate to also invest in other transferable securities, money market instruments, collective investment schemes (including funds managed by the Invesco group), deposits and cash. The Fund may use derivatives for investment purposes to meet the Fund's investment objective and for efficient portfolio management purposes to reduce risk, reduce costs and/or generate additional capital or income. They may include derivatives on currencies, interest rates and credit, and may be used to obtain exposure to long and short positions. The Fund may engage in securities lending. The expected proportion of total assets that may be subject to securities lending arrangements is 20%. Such level might be exceeded or might be subject to changes in the future.

The objectives currently shown within these financial statements are those objectives that were in place as at 30 April 2021.

Performance to 30 April 2021	Since	Since	Since	Percentage growth	
	31.10.20 %	30.4.20 %	30.4.18 %	Since 30.4.16 %	Since 30.4.11 %

This standardised past performance information is updated on a quarterly basis. Should you require up to date past performance information, this is available on our website www.invesco.co.uk or by contacting us.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. This may differ from the performance figure shown on page 189 for Z Accumulation shares as the figure above is based on the quoted 12pm price and the figure shown on page 189 is based on the close of business bid price.

The value of investments and any income from them will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested.

Past performance is not a guide to future returns. Current tax levels and reliefs may change. Depending on individual circumstances, this may affect investment returns.

- ¹ Effective 18 April 2016, the primary share class changed from Income share class to Z Accumulation share class. Performance figures are based on the Z Accumulation share class. As this was launched on 12 November 2012, for the years prior to this launch date, performance figures are based on the Income share class, without any adjustment for fees.
- ² This is a Comparator Benchmark. Given its asset allocation the Fund's performance can be compared against the Benchmark. However, the Fund is actively managed and is not constrained by any benchmark.

Invesco Monthly Income Plus Fund (UK)

Investment report for the year

Strategy, review and outlook

The Fund returned 18.3% over the twelve months to the end of April 2021. This placed it in the first quartile of its peer group, the IA £ Strategic Bond Sector NR, which returned 9.1%.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. Fund performance figures are based on the Z Accumulation share class.

Past performance is not a guide to future returns.

Corporate bond markets generated positive returns as they continued to recover from the lows of March 2020. The catalyst was the extraordinary monetary and fiscal policy response to the virus from central banks and governments. However, as autumn began, a resurgence of Covid-19 cases in Europe, as well as rising US political uncertainty, led to some consolidation within bond markets. News of a vaccine breakthrough from Pfizer triggered fresh demand for corporate bonds towards the tail end of 2020 before rising inflation expectations (which are normally negative for bonds) pushed prices down in the early months of 2021, particularly for more interest rate-sensitive parts of the market.

The biggest contribution towards performance came from subordinated financials (junior debt) and high yield bonds. Other contributors were emerging market bonds, investment grade bonds and corporate hybrids. The Fund's allocation to equity markets, which is primarily focused on UK stocks, also delivered positive returns.

At the start of the period, credit spreads (the premium over government bonds that companies need to pay to borrow) were at their widest level since 2012. We used the Fund's liquidity (cash, government bonds and bonds maturing within 1-year) to add exposure to high yield bonds across a range of sectors. This benefitted performance through the subsequent months of outperformance for credit markets. Excluding financials, our largest allocations to bonds are in the insurance, retail and cable sectors.

As at 3 August 2021 the Z Accumulation share class (pence per share) of the Invesco Monthly Income Plus Fund (UK) had risen 3.11% since the balance sheet date 30 April 2021. It is likely markets will continue to be much more volatile than normal over the next few months until the coronavirus impact passes.

On 31 August 2020 Senior Credit Analyst and Fund Manager, Rhys Davies expanded his responsibilities to become a Co-Fund Manager on the Fund alongside Paul Causer and Ciaran Mallon. Although Paul Read is no longer a named manager on the Fund, he remains Co-Head of the team and an important part of the wider strategy adopted by the team, he also continues to manage a number of other funds, particularly on the Invesco offshore fund range.

Paul Causer, Rhys Davies and Ciaran Mallon, Fund Managers

Where Paul Causer, Rhys Davies and Ciaran Mallon have expressed opinions, they are based on current market conditions, they may differ from those of other investment professionals and are subject to change without notice.

Prices			
Highest share price	226.29	209.88	195.86
Lowest share price	190.72	175.54	185.40

Direct transaction costs comprise commission and taxes, principally applicable to equity investment purchases and sales. Shareholders should note that additionally there are other transaction costs such as dealing spread and underlying costs with regard to Collective Investment Scheme holdings which will also have reduced the Fund and share class returns before operating charges.

The operating charges figure is equivalent to the FMF shown on page 18, which we also refer to as the ongoing charge in our Key Investor Information Documents (KIIDs) and our literature.

Invesco Monthly Income Plus Fund (UK)

Notes to the financial statements

6 Taxation	01.5.20 to 30.4.21 £'000	01.5.19 to 30.4.20 £'000
a) Analysis of charge for the year		
Corporation tax	89	91
Overseas tax	111	104
Overseas capital gains tax	-	62
Total tax charge	200	257

b) Factors affecting the tax charge for the year

The tax assessed for the year is lower (2020 - lower) than the standard rate of corporation tax in the UK for an authorised investment company with variable capital. The differences are explained below:

	01.5.20 to 30.4.21 £'000	01.5.19 to 30.4.20 £'000
Net revenue before taxation	103,256	110,817
Corporation tax at 20% (2020 - 20%)	20,651	22,163
Effects of:		
Overseas capital gains tax	-	62
Overseas tax	111	104
Prior year adjustment	-	18
Revenue not subject to tax	(1,184)	(1,684)
Tax deductible interest distributions	(19,378)	(20,406)
Total tax charge	200	257

Authorised investment companies with variable capital are exempt from tax on capital gains. Therefore any capital return is not included in the above reconciliation.

7 Distributions	01.5.20 to 30.4.21 £'000	01.5.19 to 30.4.20 £'000
Accumulations and distributions paid 30 June 2020	11,439	14,173
Accumulations and distributions paid 31 July 2020	10,764	11,851
Accumulations and distributions paid 31 August 2020	9,944	13,123
Accumulations and distributions paid 30 September 2020	9,400	12,340
Accumulations and distributions paid 31 October 2020	10,378	10,671
Accumulations and distributions paid 30 November 2020	10,722	9,507
Accumulations and distributions paid 31 December 2020	9,193	10,555
Accumulations and distributions paid 31 January 2021	9,953	9,933
Accumulations and distributions paid 28 February 2021	10,269	10,200
Accumulations and distributions paid 31 March 2021	8,941	9,525
Accumulations and distributions paid 30 April 2021	10,983	11,643
Accumulations and distributions paid 31 May 2021	10,995	9,353
	122,981	132,874
Amounts deducted on redemption of shares	751	1,056
Amounts received on issue of shares	(259)	(46)
	123,473	133,884

The distributable amount has been calculated as follows:

Net revenue after taxation	103,056	110,560
Fund Management Fee taken to capital	20,417	23,262
Overseas capital gains tax	-	62
	123,473	133,884

8 Debtors	30.4.21 £'000	30.4.20 £'000
Accrued revenue	29,322	31,616
Amounts receivable for issue of shares	4,343	382
Overseas tax recoverable	117	68
Sales awaiting settlement	99	383
	33,881	32,449

Invesco Monthly Income Plus Fund (UK)

Corporation tax	59	45
Purchases awaiting settlement	4,466	10,426
	10,654	24,587

11 Commitments, contingent liabilities and contingent assets

There were no commitments, contingent liabilities or contingent assets at the balance sheet date (2020 - Nil).

12 Related parties

Related party interests in the Fund are disclosed in note 9 of the notes applicable to the financial statements of all Funds on page 24. Amounts payable to Invesco Fund Managers Limited in respect of Fund Management Fees are disclosed in note 4. Management fee rebates are disclosed in note 3. Amounts due at the end of the accounting year for Fund Management Fees of £1,682,000 (2020 - £1,607,000) are disclosed in note 10 within accrued expenses.

13 Generic Risk factors

The Fund invests in bonds and other fixed income securities that are subject to the risk that issuers do not make payments on such securities. The solvency of organisations with whom the Fund invests cannot be guaranteed and may adversely affect performance. The Fund may be adversely affected by a decrease in market liquidity which may impair the Fund's ability to acquire or to dispose of securities at their intrinsic value. The Fund may invest in high yield bonds which are regarded as being more speculative (than investment grade bonds) as to the issuer's ability to make payments of principal and interest.

The Fund may invest in contingent convertible bonds which may result in significant risk of capital loss based on certain trigger events.

The Fund's performance may be adversely affected by variations in interest rates and by variations in the relative strength of world currencies or if Sterling strengthens against those currencies.

The Fund may use derivatives (complex instruments) in an attempt to reduce the overall risk of their investments, reduce the costs of investing and/or generate additional capital or income, although this may not be achieved. The use of such complex instruments may result in greater fluctuations of the value of the Fund. The Manager, however, will ensure that the use of derivatives within the Fund does not materially alter the overall risk profile of the Fund.

The generic risk factors relating to the Fund are discussed more fully in note 5 of the notes applicable to the financial statements of all Funds on pages 18 to 23.

Invesco Monthly Income Plus Fund (UK)

Notes to the financial statements

13 Generic Risk factors continued

a) Counterparty risk

The Fund's exposure to counterparty risk in respect of 'Over The Counter' (OTC) derivative contracts is the fair value of these contracts as shown in the portfolio statement. This is reflected in the table below.

Counterparty Details of OTC Financial Derivative Transactions

30.4.21 Broker	Credit Default Swaps £'000	Foreign Exchange Options £'000	Forwards £'000	Interest Rate Swaps £'000	Total Exposure £'000
Bank of America Merrill Lynch	7,566	-	-	-	7,566
BNP Paribas	-	375	1,067	-	1,442
Citigroup	-	-	(27)	-	(27)
Goldman Sachs	-	-	(370)	41	(329)
JP Morgan	-	-	1,034	-	1,034
RBS	-	-	(541)	-	(541)

Counterparty Details of OTC Financial Derivative Transactions

30.4.20 Broker	Credit Default Swaps £'000	Foreign Exchange Options £'000	Forwards £'000	Interest Rate Swaps £'000	Total Exposure £'000
Bank of America Merrill Lynch	221	-	-	-	221
BNP Paribas	-	-	2,363	-	2,363
Citigroup	-	268	1,160	-	1,428
Deutsche Bank	-	-	(313)	-	(313)
Goldman Sachs	-	190	2,862	199	3,251
JP Morgan	-	122	12,486	-	12,608
RBS	-	195	3,810	-	4,005

Counterparty exposure has not been disclosed for exchange traded derivatives as the exchange requirements in respect of collateral mean that, in the opinion of the Manager, the counterparty risk is mitigated. In respect of derivative assets (positive numbers per the table), the Fund is exposed to counterparty risk from the counterparty shown, whereas in respect of derivative liabilities (negative numbers per the table) the counterparty shown is exposed to counterparty risk from the Fund.

Collateral received from counterparties in respect of derivative contracts was £480,000 (2020 - £890,000) in the form of cash and is shown in note 10.

b) Portfolio Statement Credit Ratings Breakdown	30.4.21 %	30.4.20 %

Portfolio of investments	95.87	97.62
Net other assets	4.13	2.38
Net Assets	100.00	100.00

Invesco Monthly Income Plus Fund (UK)

Notes to the financial statements

13 Generic Risk factors continued

c) Valuation of financial instruments

The categorisation of financial instruments in the tables below reflect the basis of valuation of instruments used to measure their fair value.

	Assets £'000	Liabilities £'000
30.4.21		
Level 1: Quoted prices	155,277	540
Level 2: Observable market data	2,039,816	3,667
Level 3: Unobservable data	10,504	-
	2,205,597	4,207
30.4.20		
Level 1: Quoted prices	150,840	-
Level 2: Observable market data	1,994,326	12,786
Level 3: Unobservable data	18,296	-
	2,163,462	12,786

The majority of financial instruments are classified as level 1: Quoted prices and level 2: Observable market data. The instruments classified as level 2 mainly comprises Bonds and Derivatives. Bonds are valued using prices provided by the primary vendor and validated to the secondary vendor. The OTC derivatives are valued by the primary vendor using various valuation techniques, reviewed and validated to the secondary vendor. Instruments classified as level 3: Unobservable data mainly comprise non-market traded and unquoted securities.

Generally for the non-market traded and unquoted securities, where there is no price source from an active market for an investment, the Manager has applied judgement in determining the fair value. The Manager has used several valuation methodologies as prescribed in the International Private Equity and Venture Capital valuation guidelines to arrive at their best estimate of fair value. Valuation techniques used by the Manager are set out in Accounting Policies note 1 (i). The fair value is established by using measures of value such as:

- Price of recent transactions – Management determine the fair value based on the price of recent transactions made by management or a third party.
- Milestone analysis – Management assess the investment company's progress against milestones expected at the time of investment in order to determine whether an adjustment is required to the transaction price to determine fair value.
- Multiples – Earnings or Revenue multiples are selected from comparable public companies based on geographic location, industry, size, risk profile, earnings growth prospects, target markets and other factors that management consider reasonable. A discount for lack of liquidity may then be applied to represent the adjustment to comparable company multiples to reflect the illiquidity of the portfolio companies relative to the comparable peer group. Management determines the discount for lack of liquidity based on its judgement, after considering market liquidity conditions and company specific factors such as the development stage of the portfolio company. One of the most common forms of multiples used for cash generating companies are EV/EBITDA multiples as EBITDA is generally seen to represent a good proxy for free cash flow. These are applied where appropriate based on the development of underlying portfolio companies but other multiples such as EV/Revenue may also be considered.
- Net assets – Management determine the fair value based on the net asset value of the underlying portfolio company

In applying the above valuation techniques in arriving at the fair value the Manager has assessed any further information available from internal and external sources to arrive at an estimated fair value, which includes but is not limited to the following:

- Reference to listed securities of the same company;
- Consideration of seniority of the securities held and terms of repayment upon realisation;
- Consideration of any trading restrictions on the investment company's shares that would limit Invesco's ability to realise its holding;
- Consideration of any outstanding payments to be made by Invesco;
- Industry statistics or events (such as mergers, acquisitions and the risk of default).

Invesco Monthly Income Plus Fund (UK)

Notes to the financial statements

14 Portfolio transaction costs

for the year 1 May 2020 to 30 April 2021

Purchases (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%

Invesco Monthly Income Plus Fund (UK)

Notes to the financial statements

14 Portfolio transaction costs continued

for the year 1 May 2019 to 30 April 2020

Purchases (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Equity instruments	6,279	1	0.02	12	0.19
Debt instruments	811,413	-	-	-	-
Total purchases	817,692	1		12	
Total purchases including transaction costs	817,705				

Sales (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Equity instruments	144,633	78	0.05	1	-
Debt instruments	1,131,347	-	-	-	-
Total sales	1,275,980	78		1	
Total sales net of transaction costs	1,275,901				

Derivative transaction costs		47		-	
Total transaction costs		126		13	
Total transaction costs as a % of average net assets		0.00%		0.00%	

The above analysis covers any direct transaction costs suffered by the Fund during the year. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instruments types.

Separately identifiable direct transaction costs (commissions and taxes etc.) are attributable to the Fund's purchase and sale of equity shares. Additionally for equity shares, there is a dealing spread cost (the difference between the buying and selling prices) which will be suffered on purchase and sale transactions.

For the Fund's investment transactions in debt and money market instruments any applicable transaction charges form part of the dealing spread for these instruments. Transactions in money market instruments, cash and short-term collective investment schemes utilised as part of a daily sweep to manage the Fund's daily liquidity position are excluded from the analysis.

For the Fund's investment in collective investment scheme holdings there will potentially be dealing spread costs applicable to purchases and sales. However, additionally there are indirect transaction costs suffered in those underlying Funds, throughout the holding period for the instruments, which are not separately identifiable and do not form part of the analysis above.

During the year the Fund utilised derivative instruments including contract for differences, interest rate swaps, futures and options covering different underlying asset classes. The settlement values for opening and closing derivative positions are not comparable to principal values for transactions in direct holding investments and therefore purchase and sale amounts for derivative transactions are not quantified in the analysis above. Transaction costs for derivatives positions will be either suffered as direct costs or form part of the dealing spread for the instruments. Any direct costs are identified in the analysis above.

Dealing spread costs suffered by the Fund vary considerably for the different asset/instrument types depending on a number of factors including transaction value and market sentiment.

At the balance sheet date the average portfolio dealing spread (difference between bid and offer prices of all investments expressed as a percentage of the offer price value) was 1.21% (2020 - 0.70%).

Group 1: shares purchased prior to 1 April 2021
Group 2: shares purchased on or after 1 April 2021

Equalisation applies only to shares purchased during the distribution period (Group 2). It is the average amount of revenue included in the purchase price of all Group 2 shares and is refunded to holders of these shares as a return of capital. Being capital it is not liable to income tax. Instead, it must be deducted from the cost of shares for capital gains purposes.

Invesco Tactical Bond Fund (UK)

Investment report for the year

The Investment Objective and Policy of the Invesco Tactical Bond Fund (UK)

The Fund aims to achieve income and capital growth over the medium to long term (3 to 5 years plus). The Fund has a flexible allocation to corporate and government debt securities (including investment grade, non-investment grade and unrated) and cash. Depending on market conditions the Fund may invest up to 100% of its net assets in cash, cash equivalents, short-term debt securities and money market instruments. In pursuing the Fund's investment objective, the fund manager may consider it appropriate to also invest in other transferable securities, collective investment schemes (including funds managed by the Invesco group) and deposits. The Fund may use derivatives for investment purposes to meet the Fund's investment objective and for efficient portfolio management purposes to reduce risk, reduce costs and/or generate additional capital or income. They may include derivatives on currencies, interest rates and credit, and may be used to obtain exposure to long and short positions. The Fund may engage in securities lending. The expected proportion of total assets that may be subject to securities lending arrangements is 20%. Such level might be exceeded or might be subject to changes in the future.

The objectives currently shown within these financial statements are those objectives that were in place as at 30 April 2021.

This standardised past performance information is updated on a quarterly basis. Should you require up to date past performance information, this is available on our website www.invesco.co.uk or by contacting us.

Fund performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. This may differ from the performance figure shown on page 227 for Z Accumulation shares as the figure above is based on the quoted 12pm price and the figure shown on page 227 is based on the close of business bid price. UK 3 Month Treasury Bills² data source: Lipper, total return, in Sterling.

The value of investments and any income from them will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested.

Past performance is not a guide to future returns. Current tax levels and reliefs may change. Depending on individual circumstances, this may affect investment returns.

¹ Effective 18 April 2016, the primary share class changed from Accumulation share class to Z Accumulation share class. Performance figures are based on the Z Accumulation share class. As this was launched on 12 November 2012, for the years prior to this launch date, performance figures are based on the Accumulation share class, without any adjustment for fees.

² This is a Comparator Benchmark. Given its asset allocation the Fund's performance can be compared against the Benchmark. However, the Fund is actively managed and is not constrained by any benchmark.

Invesco Tactical Bond Fund (UK)

Investment report for the year

Strategy, review and outlook

The Fund returned 12.4% over the twelve months to the end of April 2021. This compares to a return of 0.0% for the Fund's comparator benchmark, UK 3 Month Treasury Bills.

Fund performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. Fund performance figures are based on the Z Accumulation share class. UK 3 Month Treasury Bills data source: Lipper, total return, in Sterling

Past performance is not a guide to future returns.

Corporate bond markets generated positive returns as they continued to recover from the lows of March 2020. The catalyst was the extraordinary monetary and fiscal policy response to the virus from central banks and governments. However, as autumn began, a resurgence of Covid-19 cases in Europe, as well as rising US political uncertainty, led to some consolidation within bond markets. News of a vaccine breakthrough from Pfizer triggered fresh demand for corporate bonds towards the tail end of 2020 before rising inflation expectations (which are normally negative for bonds) pushed prices down in the early months of 2021, particularly for more interest rate-sensitive parts of the market.

Our holdings in subordinated financials (junior debt), high yield and investment grade bonds contributed the most towards performance. Duration risk (measures a bond's sensitivity to a change in interest rates) also made a positive contribution. Over recent months we have become much more cautious on interest rate risk, cutting the Fund's modified duration from five at the end of October 2020 to around two by the end of April 2021. This caution has protected the Fund from the full impact of rising bond yields.

At the start of the period, credit spreads (the premium over government bonds that companies need to pay to borrow) were at their widest level since 2012. We used the Fund's liquidity (cash, government bonds and bonds maturing within 1-year) to add exposure to some of these bonds. Bonds were added across a range of sectors. This benefitted performance through the subsequent months of outperformance for credit markets.

In terms of Fund positioning, the largest exposure is in higher credit risk bonds such as subordinated financials and high yield bonds. We reduced our holdings in investment grade bonds as well as senior bank bonds.

As at 3 August 2021 the Z Accumulation share class (pence per share) of the Invesco Tactical Bond Fund (UK) had risen 0.82% since the balance sheet date 30 April 2021. It is likely markets will continue to be much more volatile than normal over the next few months until the coronavirus impact passes.

On 31 August 2020 Fund Manager, Stuart Edwards and Deputy Fund Manager and Senior Macro Analyst, Jack Parker expanded their responsibilities to become Co-Fund Managers on the Fund. Although Paul Read is no longer a named manager on the Fund, he remains Co-Head of the team and an important part of the wider strategy adopted by the team, he also continues to manage a number of other funds, particularly on the Invesco offshore fund range.

Paul Causer, Stuart Edwards and Jack Parker, Fund Managers

Invesco Tactical Bond Fund (UK)

Notes to the financial statements

6 Taxation	01.5.20 to 30.4.21 £'000	01.5.19 to 30.4.20 £'000
-------------------	---	---

a) Analysis of charge for the year

Overseas tax	(1)	-
Total tax credit	(1)	-

There is no corporation tax charge for the year (2020 - Nil).

b) Factors affecting the tax charge for the year

The tax assessed for the year is lower (2020 - lower) than the standard rate of corporation tax in the UK for an authorised investment company with variable capital. The differences are explained below:

	01.5.20 to 30.4.21 £'000	01.5.19 to 30.4.20 £'000
Net revenue before taxation	16,250	16,098
Corporation tax at 20% (2020 - 20%)	3,250	3,220
Effects of:		
Overseas tax	(1)	-
Tax deductible interest distributions	(3,250)	(3,220)
Total tax credit	(1)	-

Authorised investment companies with variable capital are exempt from tax on capital gains. Therefore any capital return is not included in the above reconciliation.

7 Distributions	01.5.20 to 30.4.21 £'000	01.5.19 to 30.4.20 £'000
------------------------	---	---

Accumulations and distributions paid 31 December 2020	8,170	8,992
Accumulations and distributions paid 30 June 2021	8,493	6,238
	16,663	15,230
Amounts deducted on redemption of shares	456	1,502
Amounts received on issue of shares	(868)	(632)
	16,251	16,100

The distributable amount has been calculated as follows:

Net revenue after taxation	16,251	16,098
Equalisation on conversions	-	2
	16,251	16,100

8 Debtors	30.4.21 £'000	30.4.20 £'000
------------------	--------------------------	--------------------------

Accrued revenue	6,889	5,638
Amounts receivable for issue of shares	3,455	376
Amounts receivable from counterparties in respect of collateral on derivatives	310	-
Sales awaiting settlement	-	925
	10,654	6,939

9 Cash and bank balances	30.4.21 £'000	30.4.20 £'000
---------------------------------	--------------------------	--------------------------

Amount held at futures clearing houses and brokers	494	450
Cash and bank balances	6,692	1,891
Term deposits	22,590	-
	29,776	2,341

Invesco Tactical Bond Fund (UK)

Notes to the financial statements

10 Other creditors	30.4.21	30.4.20
	£'000	£'000
Accrued expenses	474	381
Amounts payable for redemption of shares	617	565
Amounts payable to counterparties in respect of collateral on derivatives	380	720
Purchases awaiting settlement	1,515	14,825
	2,986	16,491

11 Commitments, contingent liabilities and contingent assets

There were no commitments, contingent liabilities or contingent assets at the balance sheet date (2020 - Nil).

12 Related parties

Related party interests in the Fund are disclosed in note 9 of the notes applicable to the financial statements of all Funds on page 24. Amounts payable to Invesco Fund Managers Limited in respect of Fund Management Fees are disclosed in note 4. Amounts received in respect of sales in the accounting year is £215,491,000 (2020 - £290,819,000) and amounts paid in respect of purchases in the accounting year is £273,078,000 (2020 - £257,225,000). Amounts due at the end of the accounting year for Fund Management Fees of £474,000 (2020 - £381,000) are disclosed in note 10 within accrued expenses.

13 Generic Risk factors

The Fund invests in bonds and other fixed income securities that are subject to the risk that issuers do not make payments on such securities. The solvency of organisations with whom the Fund invests cannot be guaranteed and may adversely affect performance. The Fund may be adversely affected by a decrease in market liquidity which may impair the Fund's ability to acquire or to dispose of securities at their intrinsic value. The Fund may invest in high yield bonds which are regarded as being more speculative (than investment grade bonds) as to the issuer's ability to make payments of principal and interest.

The Fund may invest in contingent convertible bonds which may result in significant risk of capital loss based on certain trigger events.

The Fund's performance may be adversely affected by variations in interest rates and by variations in the relative strength of world currencies or if Sterling strengthens against those currencies.

The Fund may use derivatives (complex instruments) in an attempt to reduce the overall risk of their investments, reduce the costs of investing and/or generate additional capital or income, although this may not be achieved. The use of such complex instruments may result in greater fluctuations of the value of the Fund. The Manager, however, will ensure that the use of derivatives within the Fund does not materially alter the overall risk profile of the Fund.

The generic risk factors relating to the Fund are discussed more fully in note 5 of the notes applicable to the financial statements of all Funds on pages 18 to 23.

a) Counterparty risk

The Fund's exposure to counterparty risk in respect of 'Over The Counter' (OTC) derivative contracts is the fair value of these contracts as shown in the portfolio statement. This is reflected in the table below.

Counterparty Details of OTC Financial Derivative Transactions

30.4.21	Credit	Foreign		Interest Rate	Total
Broker	Default	Exchange	Forwards	Swaps	Exposure
	Swaps	Options	£'000	£'000	£'000

JP Morgan	-	49	3,880	-	3,929
RBS	-	195	1,319	-	1,514

Counterparty exposure has not been disclosed for exchange traded derivatives as the exchange requirements in respect of collateral mean that, in the opinion of the Manager, the counterparty risk is mitigated. In respect of derivative assets (positive numbers per the table), the Fund is exposed to counterparty risk from the counterparty shown, whereas in respect of derivative liabilities (negative numbers per the table) the counterparty shown is exposed to counterparty risk from the Fund.

Collateral received from counterparties in respect of derivative contracts was £380,000 (2020 - £720,000) in the form of cash and is shown in note 10.

Collateral pledged to these counterparties in respect of derivative contracts was £310,000 (2020 - Nil) in the form of cash and is shown in note 8.

b) Portfolio Statement Credit Ratings Breakdown	30.4.21 %	30.4.20 %
Investment Grade	44.41	61.01
Non-Investment Grade	39.36	29.97
Not Rated	1.53	8.13
Other	10.31	2.98
Portfolio of investments	95.61	102.09
Net other assets/(liabilities)	4.39	(2.09)
Net Assets	100.00	100.00

c) Valuation of financial instruments

The categorisation of financial instruments in the tables below reflect the basis of valuation of instruments used to measure their fair value.

	Assets £'000	Liabilities £'000
30.4.21		
Level 1: Quoted prices	1,441	516
Level 2: Observable market data	664,907	1,506
Level 3: Unobservable data	-	-
	666,348	2,022
30.4.20		
Level 1: Quoted prices	7,405	-
Level 2: Observable market data	580,194	3,392
Level 3: Unobservable data	-	-
	587,599	3,392

All financial instruments are classified as level 1: Quoted prices and level 2: Observable market data. The instruments classified as level 2 mainly comprises Bonds and Derivatives. Bonds are valued using prices provided by the primary vendor and validated to the secondary vendor. The OTC derivatives are valued by the primary vendor using various valuation techniques, reviewed and validated to the secondary vendor.

14 Portfolio transaction costs

for the year 1 May 2020 to 30 April 2021

Purchases (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Debt instruments	430,214	-	-	-	-
Total purchases	430,214	-		-	
Total purchases including transaction costs	430,214				

Sales (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Debt instruments	428,461	-	-	-	-
Total sales	428,461	-		-	
Total sales net of transaction costs	428,461				
Derivative transaction costs		9		-	
Total transaction costs		9		-	
Total transaction costs as a % of average net assets		0.00%		0.00%	

Invesco Tactical Bond Fund (UK)

Notes to the financial statements

14 Portfolio transaction costs continued

for the year 1 May 2019 to 30 April 2020

Purchases (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Debt instruments	556,099	-	-	-	-
Total purchases	556,099	-		-	
Total purchases including transaction costs	556,099				

Sales (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Debt instruments	652,681	-	-	-	-
Total sales	652,681	-		-	
Total sales net of transaction costs	652,681				
Derivative transaction costs		84		-	
Total transaction costs		84		-	
Total transaction costs as a % of average net assets		0.01%		0.00%	

The above analysis covers any direct transaction costs suffered by the Fund during the year. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instruments types.

Separately identifiable direct transaction costs (commissions and taxes etc.) are attributable to the Fund's purchase and sale of equity shares. Additionally for equity shares, there is a dealing spread cost (the difference between the buying and selling prices) which will be suffered on purchase and sale transactions.

For the Fund's investment transactions in debt and money market instruments any applicable transaction charges form part of the dealing spread for these instruments. Transactions in money market instruments, cash and short-term collective investment schemes utilised as part of a daily sweep to manage the Fund's daily liquidity position are excluded from the analysis.

For the Fund's investment in collective investment scheme holdings there will potentially be dealing spread costs applicable to purchases and sales. However, additionally there are indirect transaction costs suffered in those underlying Funds, throughout the holding period for the instruments, which are not separately identifiable and do not form part of the analysis above.

During the year the Fund utilised derivative instruments including contract for differences, interest rate swaps, futures and options covering different underlying asset classes. The settlement values for opening and closing derivative positions are not comparable to principal values for transactions in direct holding investments and therefore purchase and sale amounts for derivative transactions are not quantified in the analysis above. Transaction costs for derivatives positions will be either suffered as direct costs or form part of the dealing spread for the instruments. Any direct costs are identified in the analysis above.

Dealing spread costs suffered by the Fund vary considerably for the different asset/instrument types depending on a number of factors including transaction value and market sentiment.

At the balance sheet date the average portfolio dealing spread (difference between bid and offer prices of all investments expressed as a percentage of the offer price value) was 0.57% (2020 - 0.37%).

Group 1: shares purchased prior to 1 November 2020
Group 2: shares purchased on or after 1 November 2020

Equalisation applies only to shares purchased during the distribution period (Group 2). It is the average amount of revenue included in the purchase price of all Group 2 shares and is refunded to holders of these shares as a return of capital. Being capital it is not liable to income tax. Instead, it must be deducted from the cost of shares for capital gains purposes.

Invesco Fixed Interest Investment Series (the "Company")

Regulatory statements

Statement of the Manager's Responsibilities in relation to the Financial Statements

The Collective Investment Schemes sourcebook ("COLL") requires the Manager to prepare financial statements for each annual accounting period which give a true and fair view of the financial position of the Company as at the end of the year and of the net revenue or expense and the net capital gains or losses on the scheme property of the Company for the year then ended. In preparing the financial statements the Manager is required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in operation for the foreseeable future;
- comply with the disclosure requirements of the Statement of Recommended Practice relating to Financial Statements of Authorised Funds;
- follow applicable accounting standards; and
- keep proper accounting records which enable it to demonstrate that the financial statements as prepared comply with the above requirements.

The Manager is responsible for the management of the Company in accordance with the Prospectus and the OEIC Regulations.

The Manager is responsible for taking reasonable steps for the prevention and detection of fraud and other irregularities.

Statement of Depositary's Responsibilities in relation to the Financial Statements

The Depositary is responsible for the safekeeping of all the property of the Company which is entrusted to it and ensuring proper registration of tangible moveable property, and for the collection of income arising from all such scheme property. It is the duty of the Depositary to take reasonable care to ensure that the Company is managed and operated by the Manager in accordance with the Financial Conduct Authority's Collective Investment Schemes Sourcebook ("the Sourcebook"), the Open-Ended Investment Companies Regulations 2001 (SI 2001/1228) (the OEIC Regulations), the Company's Instrument of Incorporation, and the Prospectus, as appropriate, concerning: the pricing of and dealing in Shares in the Company; the application of income of the Company; and the investment portfolio and borrowing activities of the Company.

Depositary's Report to Shareholders

Having carried out procedures and enquiries considered duly necessary to discharge our responsibilities as Depositary of the Company, based on information and explanations provided to us, we believe that, in all material respects, the Company, acting through the Manager:

- (i) has carried out the issue, sale, redemption and cancellation and calculation of the price of the Company's shares and the application of the Company's income in accordance with the Sourcebook, and where applicable, the OEIC regulations, the Company's Instrument of Incorporation, and the Prospectus;
- (ii) has observed the investment and borrowing powers and restrictions applicable to the Company; and
- (iii) has otherwise, ensured the proper operation of the Company.

Invesco Fixed Interest Investment Series (the "Company")

Independent auditors' report to the Shareholders of Invesco Fixed Interest Investment Series

Report on the audit of the financial statements Opinion

In our opinion, the financial statements of Invesco Fixed Interest Investment Series' (the "Company"):

- give a true and fair view of the financial position of the Company and each of the sub-funds as at 30 April 2021 and of the net revenue and the net capital gains on the scheme property of the Company and each of the sub-funds for the year then ended; and
- have been properly prepared in accordance with United Kingdom Generally Accepted Accounting Practice (United Kingdom Accounting Standards, comprising FRS 102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland", and applicable law), the Statement of Recommended Practice for UK Authorised Funds, the Collective Investment Schemes sourcebook and the Instrument of Incorporation.

Invesco Fixed Interest Investment Series is an Open Ended Investment Company ('OEIC') with eight sub-funds. The financial statements of the Company comprise the financial statements of each of the sub-funds. We have audited the financial statements, included within the Annual Report Including Long Form Financial Statements (the "Annual Report"), which comprise: the Balance Sheets as at 30 April 2021; the Statements of Total Return and the Statements of Change in Net Assets Attributable to Shareholders for the year then ended; the Distribution tables; and the Notes to the financial statements, which include a description of the significant Accounting policies.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) ("ISAs (UK)") and applicable law. Our responsibilities under ISAs (UK) are further described in the Auditors' responsibilities for the audit of the financial statements section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We remained independent of the Company in accordance with the ethical requirements that are relevant to our audit of the financial statements in the UK, which includes the FRC's Ethical Standard, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

Conclusions relating to going concern

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the Company's or any sub-funds' ability to continue as a going concern for a period of at least twelve months from the date on which the financial statements are authorised for issue.

In auditing the financial statements, we have concluded that the Authorised Corporate Director's use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

However, because not all future events or conditions can be predicted, this conclusion is not a guarantee as to the Company's or any sub-funds' ability to continue as a going concern.

Our responsibilities and the responsibilities of the Authorised Corporate Director with respect to going concern are described in the relevant sections of this report.

Reporting on other information

The other information comprises all of the information in the Annual Report other than the financial statements and our auditors' report thereon. The Authorised Corporate Director is responsible for the other information. Our opinion on the financial statements does not cover the other information and, accordingly, we do not express an audit opinion or, except to the extent otherwise explicitly stated in this report, any form of assurance thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If we identify an apparent material inconsistency or material misstatement, we are required to perform procedures to conclude whether there is a material misstatement of the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report based on these responsibilities.

Authorised Corporate Director's Report

In our opinion, the information given in the Authorised Corporate Director's Report for the financial year for which the financial statements are prepared is consistent with the financial statements.

Invesco Fixed Interest Investment Series (the "Company")

Independent auditors' report to the Shareholders of Invesco Fixed Interest Investment Series continued

Responsibilities for the financial statements and the audit

Responsibilities of the Authorised Corporate Director for the financial statements

As explained more fully in the Statement of the Manager's Responsibilities in relation to the Financial Statements, the Authorised Corporate Director is responsible for the preparation of the financial statements in accordance with the applicable framework and for being satisfied that they give a true and fair view. The Authorised Corporate Director is also responsible for such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Authorised Corporate Director is responsible for assessing the Company's and each of the sub-funds' ability to continue as a going concern, disclosing as applicable, matters related to going concern and using the going concern basis of accounting unless the Authorised Corporate Director either intends to wind up or terminate the Company or individual sub-fund, or has no realistic alternative but to do so.

Auditors' responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Irregularities, including fraud, are instances of non-compliance with laws and regulations. We design procedures in line with our responsibilities, outlined above, to detect material misstatements in respect of irregularities, including fraud. The extent to which our procedures are capable of detecting irregularities, including fraud, is detailed below.

Based on our understanding of the Company/industry, we identified that the principal risks of non-compliance with laws and regulations related to breaches of the Collective Investment Schemes sourcebook, and we considered the extent to which non-compliance might have a material effect on the financial statements, in particular those parts of the sourcebook which may directly impact on the determination of amounts and disclosures in the financial statements. We evaluated management's incentives and opportunities for fraudulent manipulation of the financial statements (including the risk of override of controls), and determined that the principal risks were related to posting inappropriate journal entries to increase revenue or to increase the net asset value of the Company or the sub-funds and judgements and assumptions made by management in their significant accounting estimates. Audit procedures performed included:

- Discussions with the Authorised Corporate Director, including consideration of known or suspected instances of non-compliance with laws and regulation and fraud;
- Reviewing relevant meeting minutes, including those of the Authorised Corporate Director's board of directors;
- Identifying and testing journal entries, specifically any journals posted as part of the financial year end close process;
- Designing audit procedures to incorporate unpredictability around the nature, timing or extent of our testing; and
- Challenging assumptions and judgements made by management in their significant accounting estimates, in particular in relation to the valuation of over the counter (OTC) derivatives.

There are inherent limitations in the audit procedures described above. We are less likely to become aware of instances of non-compliance with laws and regulations that are not closely related to events and transactions reflected in the financial statements. Also, the risk of not detecting a material misstatement due to fraud is higher than the risk of not detecting one resulting from error, as fraud may involve deliberate concealment by, for example, forgery or intentional misrepresentations, or through collusion.

A further description of our responsibilities for the audit of the financial statements is located on the Financial Reporting Council's website at: www.frc.org.uk/auditorsresponsibilities. This description forms part of our auditors' report.

Use of this report

This report, including the opinions, has been prepared for and only for the Company's shareholders as a body in accordance with paragraph 4.5.12 of the Collective Investment Schemes sourcebook as required by paragraph 67(2) of the Open-Ended Investment Companies Regulations 2001 and for no other purpose. We do not, in giving these opinions, accept or assume responsibility for any other purpose or to any other person to whom this report is shown or into whose hands it may come save where expressly agreed by our prior consent in writing.

Other required reporting Opinion on matter required by the Collective Investment Schemes sourcebook

In our opinion, we have obtained all the information and explanations we consider necessary for the purposes of the audit.

Collective Investment Schemes sourcebook exception reporting

Under the Collective Investment Schemes sourcebook we are also required to report to you if, in our opinion:

- proper accounting records have not been kept; or
- the financial statements are not in agreement with the accounting records.

We have no exceptions to report arising from this responsibility.
