Magna MENA Fund (the "Fund"), a sub-fund of Magna Umbrella Fund plc (the "Company")
The Company is managed by Bridge Fund Management Limited (the "Manager"), a member of the MJ Hudson Group

OBJECTIVES AND INVESTMENT POLICY

The investment objective of the Fund is to achieve capital appreciation through investment in a portfolio consisting primarily of MENA Securities. The Fund may invest in MENA Securities listed or traded on Recognised Exchanges located in MENA as defined and listed in Appendix II (ii) to the Prospectus and/or Recognised Exchanges as defined and listed in Appendix II (i) to the Prospectus. In addition the Fund may invest in unlisted securities subject to the investment restrictions disclosed in the Prospectus and this Supplement.

The Fund may invest up to one third of its total assets (without taking into account ancillary liquid assets) in equity and debt securities issued by, or in relation to, companies located outside MENA and carrying out business in MENA, without such business being predominant, or companies located in the neighbouring countries of MENA, which in accordance with the UCITS Regulations, will be listed or traded on Recognised Exchanges referred to in Appendix II to the Prospectus.

The Fund will invest at least two thirds of its total assets (without taking into account ancillary liquid assets) in MENA Securities. Investments in MENA Debt shall not exceed 15% of the Fund's total assets. A small part of the Fund may also be invested in unlisted securities. The Fund may not purchase units of any other open-ended collective investment vehicle (excluding exchange traded funds). The Fund may invest up to 10%, in aggregate, of its net assets in exchange traded funds. The Fund may invest in certain derivative instruments to gain efficient exposure to underlying companies, which may result in the fund being leveraged.

The Fund is considered to be actively managed in reference to the S&P Pan Arab Composite Index (the "Benchmark") by virtue of the fact that it uses the Benchmark for performance comparison purposes, it seeks to outperform the Benchmark and the

performance fee payable to the Investment Manager is calculated based on the performance of the Fund against the Benchmark. However the Benchmark is not used to define the portfolio composition of the Fund or as a performance target and the Fund may be wholly invested in securities which are not constituents of the Benchmark.

The allocation of the Fund's assets will be determined by the Investment Manager at its sole discretion and may vary according to market conditions.

The Fund is managed with a bottom-up stock picking investment style and is subject to rigorous risk management process.

The Fund may employ leverage up to 100% of its NAV.

Portfolio transaction costs will have a material impact on performance. These costs are taken from the assets of the Fund.

The base currency of the Fund is Euro. Any non-base currency share classes will be currency hedged against the currency exposure between the denominated currency of the class and the base currency of the Fund.

Recommendation: This Fund should be considered as a long-term investment.

This Class is an accumulating class and does not intend to distribute any income arising from the investments that it holds. Other classes in the Fund are either accumulating or distributing.

You may redeem your Shares in the Fund on any day on which banks in Dublin, London, Dubai, Riyadh and Cairo are open for business.

For further information, please see the "Investment Objective" and "Investment Policy" sections of the supplement in respect of the Fund (the "Supplement"). Unless otherwise defined in this document, all words and expressions defined in the prospectus in respect of the Company (the "Prospectus") shall have the same meaning herein.

RISK AND REWARD PROFILE

These numbers rate how the Fund may perform. Generally the potential for higher gains also mean a larger risk of losses.

The lowest category does not mean a risk free investment. Historical data, such as is used for calculating this indicator, may not be a reliable indication of the future risk profile of this Fund.

The risk and reward category for this Fund is not guaranteed to remain unchanged, and may shift over time.

This Fund is ranked at 5 because funds of this type have experienced medium to high rises and falls in value in the past.

The following risks may not be fully captured by the risk and reward indicator:

Emerging Markets Risk: The securities markets in emerging markets countries are typically smaller, less liquid and significantly more volatile than securities markets in developed countries and may be subject to additional risks including political, economic, legal, currency, inflation and taxation risks.

Liquidity Risk: Lower liquidity means there may be insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

Sub-Custodial Risk: The assets of funds traded in emerging markets may require the depositary to entrust safekeeping to sub-custodians which may not provide the same degree of investor protection.

Taxation Risk: The laws and practices of certain emerging countries may not be as well established as those of developed countries and the Company could become subject to taxation laws applied retrospectively and not envisaged at the date investments are made, valued or sold.

Credit Risk: This refers to the likelihood of the Fund losing money if an issuer is unable to meet its financial obligations or goes bankrupt.

Share Currency Designation Risk: Changes in the value of the base currency of the Fund relative to the denominated currency of a share class may give rise to a risk for investors.

Counterparty Risk: The Fund may invest in derivative contracts and may find itself exposed to risk arising from the solvency of its counterparties and from their ability to respect the conditions of these contracts.

Derivatives Risk: Derivatives are highly sensitive to changes in the value of the assets they are based on. The impact on the Fund is greater where derivatives are used in an extensive way. The use of derivatives may result in the Fund being leveraged whereby the exposure of the Fund as a result of all positions held by it may exceed its net asset value and may result in gains or losses that are greater than the original amount invested. For more information on risks, please see the 'Risk Factors' section of the Prospectus and the Supplement.
