

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

MI Charles Stanley Monthly High Income Fund ("the Fund") A Accumulation Shares

This is a sub fund of MI Charles Stanley Investment Funds II. The Fund is an Open Ended Investment Company.
ISIN: GB00B09CC332.
Maitland Institutional Services Ltd is the Authorised Corporate Director of the Fund.

Objectives and investment policy

The Fund aims to provide a high income with the potential for capital growth from a low risk portfolio consisting predominantly of UK bonds, which are like loans that pay a fixed or variable rate of interest, issued by companies and governments, shares of companies and preference shares, which are shares with special rights to income or capital, that aim to generate a high income.

The Fund is actively managed and the investment manager has discretion to select its investments. The Fund must hold at least 60% of its investments in bonds in order to retain its identity as a "Distribution Fund" for tax purposes.

The Fund may also invest in shares of companies that have a good record of proven management and rising dividend payments, collective investment schemes and money market instruments and cash.

The Fund will only use derivatives for the purposes of efficient portfolio management, with the aim of managing risk and cost.

Any income this share class generates will be reinvested to grow the value of your investment.

You can buy and sell shares on any business day in London.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

For full investment objectives and policy details please refer to the prospectus.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Typically lower rewards,
lower risk

Typically higher rewards,
higher risk

- This Fund is ranked at 4 because funds of this type have experienced average rises and falls in value in the past. Please note that even the lowest risk class can lose you money and that extreme market circumstances can mean you suffer severe losses in all cases. The indicator does not take into account the following risks of investing in this Fund:
 - The level of income targeted by the Fund is not guaranteed.
 - Bond values are affected by changes in interest rates, inflation and any decline in creditworthiness of the bond issuer. Bonds that produce a higher level of income usually also carry greater risk as such bond issuers may not be able to pay the bond income as promised or could fail to repay the capital amount used to purchase the bond.
 - For funds investing globally, currency exchange rate fluctuations may have a positive or negative impact on the value of your investment.
 - The Fund invests into other funds which themselves invest in assets such as bonds, company shares, cash and currencies. The objectives and risk profiles of these underlying funds may not be fully in line with those of this Fund.
- For further risk information please see the prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.
