Objectives and investment policy

The investment objective of the Fund is to provide income and capital growth.

The Fund will invest all or substantially all of its assets in the shares of the BMO UK Property Fund ICVC. To the extent that the Fund is not fully invested in the BMO UK Property Fund ICVC the Fund will hold its remaining assets in cash. The BMO UK Property Fund ICVC is a property authorised investment fund which invests mainly in a diversified portfolio of commercial property.

Any income earned by this unit class will be reinvested back into the unit class to grow the value of your investment.

There is no minimum holding period for this Fund. However, it may not be appropriate for investors who plan to withdraw their money in under 5 years.

You may buy or sell units daily on demand (but not weekends or UK bank holidays or other days when the Fund is not open for dealing). Orders to buy or sell must be received by 12 noon (UK time) to receive the price calculated at that day's valuation point.

Risk and reward profile

Historical data may not be a reliable indicator of the Fund's future risk and reward profile. The value of your investment may fall as well as rise.

You need to be aware of the following risks before investing:

Property Risk: the value of such investments is likely to reflect valuations of property assets as determined by professional valuers. Such valuations are the opinion of the valuer at a particular time, may not be supported by recent transactions and are liable to revision, up or down.

Fund Liquidity Risk: the ability of the Fund to meet redemptions within normal settlement terms depends on the readily realisable assets held in the Fund. If properties have to be sold quickly this could result in lower prices being obtained for them.

Liquidity Risk: the ability to buy and sell assets at a favourable price may be affected by a low level of counterparties willing to enter into a transaction with the Fund.

Restricted Diversification: investments are concentrated in direct property in the UK. These investments are limited to a relatively narrow segment of the economy. Performance may differ in direction and degree from that of the stock market.
