

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

ASI Sterling Money Market Fund, a Sterling denominated sub fund of the Aberdeen Standard OEIC I, I Acc Shares (ISIN: GB00B1C42332). This fund is managed by Aberdeen Standard Fund Managers Limited.

OBJECTIVES AND INVESTMENT POLICY

Investment Objective

The fund aims to generate income and preserve some capital over the short term (2 years or less) by investing in cash deposits and money market instruments.

Performance Target: The fund targets a return equivalent to SONIA. The Performance Target is the level of performance that the management team hopes to achieve for the fund. There is however no certainty or promise that they will achieve the Performance Target. SONIA has been chosen as a proxy for the return from cash deposits.

Investment Policy

Portfolio Securities

- The fund invests at least 80% in cash deposits and money market instruments.
- The fund may also invest in reverse repos, securitisations and asset-backed commercial paper.
- The fund may also invest in other funds (including those managed by abrdn).
- The fund qualifies as a money-market fund under the MMF Regulation and more specifically as a Standard VNAV MMF.

Management Process

- The management team use their discretion (active management) to maintain a diverse asset mix at country, sector and company level.
- The fund is managed in line with the MMF Regulation which is used as a reference for portfolio management and risk monitoring of the fund. For example, constraints include limits on the average maturity of the portfolio.

Derivatives and Techniques

- The fund may use derivatives to reduce risk, reduce cost and/or

generate extra income or growth consistent with the risk profile of the fund (often referred to as "Efficient Portfolio Management").
- Derivatives include instruments used to manage expected changes in interest rates.

Investors in the fund may buy and sell shares on any dealing day (as defined in the Prospectus).
If you invest in income shares, income from investments in the fund will be paid out to you. If you invest in accumulation shares, income will be added to the value of your shares.
Recommendation: the fund may not be appropriate for investors who plan to withdraw their money within two years. Investors should satisfy themselves that their attitude to risk aligns with the risk profile of this fund before investing.

RISK AND REWARD PROFILE

The fund could lose money as the result of a failure or delay in operational processes and systems including but not limited to third party providers failing or going into administration.

This indicator reflects the volatility of the fund's share price over the last five years which in turn reflects the volatility of the underlying assets in which the fund invests. Historical data may not be a reliable indication for the future.

The current rating is not guaranteed and may change if the volatility of the assets in which the fund invests changes. The lowest rating does not mean risk free.

The fund is rated as 1 because of the extent to which the following risk factors apply:

- The fund price can go up or down daily for a variety of reasons including changes in interest rates, inflation expectations or the perceived credit quality of individual countries or securities.
- The fund may hold money-market instruments, the value of which may be subject to adverse movements in extreme market conditions.
- The fund invests in securities which are subject to the risk that the issuer may default on interest or capital payments.
- The use of derivatives carries the risk of reduced liquidity, substantial loss and increased volatility in adverse market conditions, such as a failure amongst market participants. The use of derivatives may result in the fund being leveraged (where market exposure and thus the potential for loss by the fund exceeds the amount it has invested) and in these market conditions the effect of leverage will be to magnify losses.

All investment involves risk. This fund offers no guarantee against loss or that the fund's objective will be attained.

The price of assets and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment.

Inflation reduces the buying power of your investment and income.

The value of assets held in the fund may rise and fall as a result of exchange rate fluctuations.

The fund could lose money if an entity (counterparty) with which it does business becomes unwilling or unable to honour its obligations to the fund.

In extreme market conditions some securities may become hard to value or sell at a desired price. This could affect the fund's ability to meet redemptions in a timely manner.

CHARGES

The charges you pay are used to pay the costs of running the fund including marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

Charges taken from the fund over a year

Ongoing charges	0.15%
-----------------	-------

Charges taken from the fund under certain specific conditions

Performance fee	0.00%
-----------------	-------

The entry and exit charges shown are maximum figures. In some cases you might pay less – you can find this out from your financial adviser. The Ongoing Charges figure reflects the amount based on the expenses within the annual report for each financial year. This figure may vary from year to year. It excludes: performance fees (where applicable); portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling in another collective investment undertaking.

Where the Fund invests in an open-ended collective investment scheme which is operated or managed by the ACD/the Manager or an associate of the ACD/the Manager, no additional annual management charge will be incurred by the Fund on such an investment.

The annual report for each financial year will include detail on the exact charges made.

The Ongoing Charge figure is as at 31/07/2021.

A switching charge may be applied in accordance with the Prospectus. For more information about charges please see Prospectus.

Further information on the charges can be found in the Prospectus.

PAST PERFORMANCE

ASI Sterling Money Market Fund, I Acc, 31. December 2021

% Returns

Past performance is not a guide to future performance.

Performance is net of charges and does not take into account any entry, exit or switching charges but does take into account the ongoing charge, as shown in the Charges section.

Performance is calculated in GBP.

The fund was launched in 1990. The share/unit class was launched in 2007.

Performance Target – SONIA GBP from 01/10/2021. 1 Week GBP LIBID from 31/07/2007 to 30/09/2021.
