RISK/REWARD PROFILE

The Fund is ranked at 5 because funds of this type have experienced moderate to high rises and falls in value in the past.

The Fund’s risk category has been calculated using historical data, which may not be a reliable indication of the future risk profile of the Fund.

The Fund’s category is not guaranteed to remain the same and may change over time.

Even a fund in the lowest category is not a risk-free investment.

The value of your investment and any income you take from it may fall as well as rise and is not guaranteed.

You might get back less than you invest.

The indicator does not take into account the following risks of investing in this Fund:

- The Fund may invest in smaller companies, which are

more volatile and sometimes more difficult to trade than larger companies.

- The Fund may invest in emerging markets which are generally less well-regulated than the UK.
- The Fund may invest in overseas holdings and so will be exposed to currency movements.
- The issuers of floating or fixed interest securities may suspend or cease interest payments, or may default on their debt.
- The Fund may invest in high yield bonds which carry a greater risk of default than investment grade bonds.
- Floating or fixed interest securities may not be liquid, particularly during stressed market conditions.
- In extreme liquidity conditions, redemptions in the underlying funds, and/or the Fund itself, may need to be deferred or suspended.
- The Fund is valued using the latest available price for each underlying holding. These prices may not fully reflect changing market conditions. The Fund can apply a ‘fair value price’ to all or part of its portfolio to mitigate this risk.
- The Fund may use derivatives for efficient portfolio management purposes. There is a risk that any counterparty used does not fulfil its obligation.
