Premier Miton Diversified Dynamic Growth Fund – Class D Shares

A sub-fund of Premier Miton Multi-Asset Funds

Class D Income Shares, ISIN no.GB00BHNWH995

Authorised Corporate Director - Premier Portfolio Managers Ltd.

Objectives and investment policy

The objective of the Fund is to provide total returns comprised of capital growth and income over the long term.

The Fund will invest globally in a diversified portfolio of investments across different asset classes. These will include bonds, company shares, property company shares, alternative investments, cash and cash deposits.

The Fund is actively managed which means that the fund manager will manage and adapt the portfolio depending on their assessment of the broad economic environment and market conditions, focussing on areas such as economic growth, inflation expectations and the outlook for interest rates. The fund manager will then analyse the individual investments to ensure they are suitable for inclusion in the fund.

Within each asset class there will be sub-sectors, for example bonds will include those issued by governments and companies. Company shares will be spread across different geographic regions, industry sectors and sizes of company. Shares in property companies may include those focussed on offices, retail or industrial property across the UK and Europe. Alternative investments may have a range of underlying assets including hedge funds, commodities and bond-like loans.

The Fund may invest in derivatives and forward transactions for efficient portfolio management and investment purposes, including hedging.

The minimum recommended holding term is at least five years. This does not mean that the Fund will achieve the objective over this, or any other, specific time period and there is a risk of loss to the original capital invested.

The full investment objective and policy, which outline all the eligible investments, as well as more information on the Fund's investment strategy, are available in the Fund's prospectus.

You can buy, sell and switch shares in the Fund on any UK business day. We will need to receive your instruction before 12 noon to buy shares at that day's price.

Terms explained:

Income shares: any income made by the Fund will be paid out to you.

Structured investments: are typically investments which are linked to the performance of one or more underlying instruments or assets such as securities, currencies and other financial instruments. They frequently provide an augmented fixed return in exchange for accepting a degree of risk, for instance to market falls or gains.

Derivatives: this is a financial contract whose value is related to the value of an underlying asset or index, often used with the aim of managing risk or enhancing returns.

Efficient portfolio management: managing the Fund in a way that is designed to reduce risk or cost and/or generate extra income or growth.

Hedge: an investment which aims to reduce the risk of adverse price movements in an asset or group of assets.

Bonds: Issued by companies or governments and similar to a loan in nature, usually paying a fixed or variable interest rate.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Typically lower rewards,
lower risk

Typically higher rewards,
higher risk

1	2	3	4	5	6	7
---	---	---	---	---	---	---

The Fund is ranked as 5 because funds and portfolios holding similar assets have experienced medium to high rises and falls in value over the past five years.

Please note that even the lowest ranking does not mean a risk-free investment.

The Fund holds equities, property linked securities and non-traditional investments, which as asset classes tend to experience higher price volatility than many other classes such as investment grade fixed income or money market instruments. The risks of increased price volatility are reduced by diversifying by geography, industry and sector.

The Fund uses Derivatives in a controlled manner and whilst their use is not necessarily expected to increase risk within the Fund, these instruments can be highly sensitive to changes in the value of the assets on which they are based.

The indicator may not take fully into account the following risks of investing in this Fund:

- **Derivatives:** these instruments can be highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains, resulting in larger fluctuations in the value of the Fund.
- **Liquidity risk:** during difficult market conditions some securities in some locations may become more difficult to sell at a desired price.
- **Operational risk:** arising from investments in overseas markets which may not have the same level of safekeeping and other controls as UK markets or from investments in non-standard securities such as derivatives, which require more complex systems, processes and controls.
- **Legal or tax risk:** arising from a change in legal regulations, tax rules or the application of them.

A more detailed description of the risks identified as being applicable to the Fund are set out in the 'Risk Factors' section of the Prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	0.00%
Exit charge	0.00%
These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.	
Charges taken from the Fund over a year	
Ongoing charges	0.65%
Charges taken from the Fund under specific conditions	
Performance fee	NONE

- Switching charge (for switching into the Fund from another fund) 0%.
- The ongoing charges figure is based on the last year's expenses and may vary from year to year. It excludes the costs of buying or selling assets for the Fund (unless these assets are shares of another fund).
- For the Ongoing Charge, the figure was calculated as at 28/02/2022. The ACD is capping the "other costs" element of the OCF at 0.25%, meaning that any costs above that rate will be reimbursed. For the avoidance of doubt, ongoing charges are made up of three elements, being 1) the annual management charge which is fixed at 0.50% per annum; 2) other costs payable directly from the Fund which are being capped at 0.25%; and 3) ongoing charges from underlying investments which are not capped.
- For more information about charges, please refer to the Fund's prospectus.

Past performance

- You should be aware that past performance is not a guide to future performance.
- Fund launch date: 01/03/2019.
- Share/unit class launch date: 01/03/2019.
- Performance is calculated in GBP.
- Performance is net of charges (excluding entry charge) and net of tax.
- Performance allows for distributions having been reinvested.
