Lyxor CAC 40 (DR) UCITS ETF - Dist (the "Fund")

ISIN: FR0007052782 - Sub-fund of the MULTI UNITS FRANCE investment company (the "Company") domiciled in France.
Managed by Lyxor International Asset Management S.A.S. ("LIAM")

Investment objectives and policies

The Fund is an index-tracking UCITS passively managed.

Its investment objective is to track both upwards and downwards movements on the CAC 40 Gross Total Return index (gross dividends reinvested) (the "Benchmark Index"), denominated in euros (EUR) and representative of the 40 largest companies listed on Euronext Paris, while minimising the tracking error between the Fund's performance and the Benchmark Index's performance as much as possible.

The expected level of tracking error under normal market conditions is indicated in the Fund Prospectus.

Further information about Euronext indices can be found on the Euronext website (www.euronext.com).

The Fund aims to achieve its objective through direct replication, i.e. by investing predominantly in a basket of assets comprised of instruments representative of some or all instruments making up the Benchmark Index. The Fund may use a sampling technique to optimise Benchmark Index replication as well as collateralised securities financing transactions.

Any use of these techniques is indicated at www.lyxoretf.com.

The updated composition of the Fund holdings is available on www.lyxoretf.com.

In addition, the indicative net asset value appears on the Fund's Reuters and Bloomberg pages and may also be indicated on the websites of the exchanges where the Fund is listed.

The Fund is eligible for the French PEA (share savings plan) and therefore invests at least 75% of its assets in shares in companies in the European Union.

The share currency is the Euro (EUR).

The risk and return category given above is based on the historical performance of the Fund's component assets or the performance of its benchmark index or the simulated performance of a portfolio model. As such, this risk estimation cannot be a reliable indicator of future risk, and it could change over time. The lowest category does not mean a risk-free investment. The Fund has been classified as category 6 given its exposure to the Benchmark Index. Category 6 indicates that it is possible to suffer a very large capital loss, under normal market conditions, as the value of your investment could fluctuate strongly and quite quickly both upward and downward each day.

The significant risks for the UCITS not taken into account in the above-mentioned indicator and which could result in a decrease in the Fund's net asset value and which the Fund is authorised to include in this document (see the Risk Profile section of the prospectus for more information concerning the risks):

Such an event could result in a significant decrease in the Fund's net asset value.
