

Key Investor Information

This document provides you with the key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

LF Canlife Global Macro Bond Fund, Class C Accumulation, a fund within LF Canada Life Investments Fund (ISIN: GB00B4LW2X97)

The fund is managed by Link Fund Solutions Limited.

Objective and investment policy

Objective

To achieve income (money available to be paid out by the fund) with the potential growth in capital (an increase in the value of the fund), after all costs and charges have been taken, over at least five years.

There is no guarantee that the objective will be met over any time period and you may get back less than you invest.

Investment Policy

To invest at least 80% of the fund worldwide and in other geographical regions in bonds (loans to either a company or government that usually pay interest) and are rated as investment grade; the risk of default (that is whether the issuer will pay interest and repay the loan) is lower on bonds rated as investment grade than it is on non-investment grade bonds).

The fund may also invest up to 20% worldwide in non-investment grade bonds, money market instruments (which are short term loans that pay interest) and cash.

The Investment Manager analyses macroeconomics factors (such as economic growth, inflation and interest rates) to determine which countries, currencies and sectors (such as I.T., healthcare, energy, etc) to invest in and then uses a bottom-up approach (analysing individual bonds rather than markets) to determine which companies to invest in.

Other features of the fund:

- The fund is actively managed. The Investment Manager uses its expertise to select investments for the fund and has the discretion to invest without the need to adhere to a particular benchmark.
- The fund may invest in other funds (including those managed by the Manager, the Investment Manager and their associates).
- The fund can invest across different geographic areas and industry sectors without limitation. However, the Investment Manager will seek to maintain diversification (that is holding a variety of investments that typically perform differently from one another).
- The bonds are rated by the Investment Manager. They will generally be in line with the major external rating agencies and should not be higher than the highest external rating agency rating.
- You can buy and sell shares in the fund each business day.
- Income from the fund will be added to the value of your investment.
- Derivatives (whose value is linked to that of another investment, e.g company shares, currencies) may be used to manage the risk profile of the fund.
- Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and reward profile

- This indicator shows how much a fund has risen and fallen in the past, and therefore how much a fund's returns have varied. It is a measure of a fund's volatility. The higher a fund's past volatility the higher the number on the scale and the greater the risk that investors in that fund may have made losses as well as gains.
- The fund has been classed as 4 because its volatility has been measured as average.
- This indicator is based on historical data and may not be a reliable indication of the future risk profile of this fund.
- The risk and reward profile shown is not guaranteed to remain the same and may shift over time. The lowest number on the scale does not mean that a fund is risk free.
- Currency Risk: As the fund invests globally, movements in exchange rates may, when not hedged, cause the value of your investment to increase or decrease.
- Counterparty Risk: The failure of a firm involved in a transaction with the fund or providing services to the fund may expose the fund to financial loss.
- Emerging Markets Risk: The fund may invest in emerging markets, which are markets in countries that are developing. Emerging markets may have more political and economic risks than developed markets, resulting in price movements that may cause a loss to the fund.
- Changes in Interest Rate risk: A rise in interest rates generally causes bond prices to fall.
- Credit Risk: The value of a bond may be affected by its credit rating, the lower the rating the higher the risk of the issuer not paying interest or repaying the loan.
- Company Bond Risk: In unfavourable market conditions, bonds issued by companies may be harder to sell in a timely manner and at reasonable prices, than in normal market conditions. This could have a negative impact on the value of the fund. In extreme market conditions this could affect the fund's ability to meet investors' redemptions.
- Securities Investment Risk: The fund may receive additional income for lending the investments it holds (e.g bonds) to other parties. If the borrower fails to meet their obligations then the fund may incur a financial loss.
- For full details of the fund's risks, please see the prospectus which may be obtained from the address in 'Practical Information' below.

Charges for this fund

The charges you pay are used to pay the costs of running the fund. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry Charge	None
Exit Charge	None
Charges taken from the fund over the year	
Ongoing Charges	0.58%
Charges taken from the fund under certain specific conditions	
Performance Fee	None

The ongoing charges figure is based on expenses as at 15 February 2022. This figure may vary from year to year. The ongoing charges are taken from the capital of the fund. They exclude portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling units in another collective investment undertaking.

You may also be charged a dilution levy (an amount to cover dealing costs incurred by the fund) on entry to or exit from the fund.

For more information about the dilution levy and other charges, please see the prospectus Sections 3.5 and 7, which may be obtained free of charge from the address in 'Practical Information' below.

Past performance

- Past performance is not a guide to future performance.
- The past performance in the chart shown opposite is net of tax and charges but excludes the entry charge that may be paid on the purchase of an investment.
- The fund was launched in May 2012, the fund was renamed in February 2019 and was previously known as the LF Global Bond Fund.
- Performance is calculated in Pounds Sterling.
