The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

TM Tellworth UK Income and Growth Fund - Class F

A sub Fund of the TM Investment Funds

This Fund is managed by Thesis Unit Trust Management Limited ISIN (Accumulation): GB00BKWHKT73 ISIN (Income): GB00BKWHNW18

Objectives and Investment Policy

The objective of the Fund is to achieve income (greater than the Numis UK All Share Index yield) and capital growth net of fees over the medium-term (over a rolling 3 year period). The Fund will aim to achieve this objective through investing at least 80% of its assets in shares of companies domiciled, incorporated or have a significant portion of their business in the UK. Whilst the Fund will invest across the market capitalisation, it will not invest more than 20% in the shares of smaller companies (<£500m market capitalisation). In addition, the Fund shall not acquire more than 10% of the share capital of any one company. The Fund may also invest in shares in other geographical areas and may also invest in warrants and cash. Up to 10% of the scheme property of the Fund may be invested in collective investment vehicles (including those managed by the ACD). The Fund may use derivatives, currency and fixed income investments for efficient portfolio management purposes only, with the aim of reducing risk, reducing costs and/or generating additional capital or income. The Fund is not constrained by a benchmark and has a flexible approach with no inbuilt bias to any sector. The Investment Manager will actively manage the Fund. This means the Investment Manager actively makes decisions about how to invest the Scheme Property of the Fund (and which investments to buy and sell) instead of simply following a market index. The portfolio selection is built on a thorough analysis of a company's ability to generate cashflow, to pay a consistent dividend income and importantly a subjective judgement of the intrinsic worth of that company. The portfolio will be a selection of the Investment Manager's best investment ideas based on the market opportunities at any given time. The Investment Manager will seek to look for companies that have alignment of interest with shareholders, demonstrate long-term commitment to the dividend and generate a sustainable cash flow. This will enable the Investment Manager to offer a growing yield in addition to delivering capital appreciation.

The target of the Fund is to seek to achieve income greater than the Numis UK All Share Index yield, as set out in the objective above. Therefore, the index is a target for the income returns. The Numis UK All Share Index yield has been selected as a target benchmark because the constituents are representative of the areas in which the Fund itself is likely to invest, and therefore an appropriate target for the Fund's performance in relation to income returns. The Fund uses the Investment Association UK Equity Income peer group for performance comparison purposes only. The peer group is not a target benchmark and the Fund is not constrained by it. The peer group has been selected as a comparator for performance because the parameters for this peer group, of at least 80% in UK equities, are closely aligned to the parameters as set out in the investment policy of the Fund. Many funds sold in the UK are grouped into sectors by the Investment Association (the trade body that represents UK investment managers), to help investors to compare funds with broadly similar characteristics. This Fund is classified in the Investment Association UK Equity Income peer group sector.

The base currency of the Fund is pounds sterling.

Income arising from the Fund is distributed to the holders of income shares and reinvested in the case of accumulation shares. Investors can buy and sell shares on demand when the scheme prices daily at midday.

Risk and Reward Profile

The risk rating of the Fund is category 6 due to the volatility of simulated data which sits in a range of between 15% and 25%. The risk rating is calculated using historical data and a prescribed standard deviation methodology. The simulated data used is consistent with risk limits of the Fund.

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may shift over time.
- The lowest category does not mean 'risk free'.
- This indicator is not a measure of the risk that you may lose the amount you have invested.

The following risks are material in addition to the risks captured by the indicator above:

- The price of units/shares and any income from them may fall as well as rise and investors may not get back the full amount invested. Past performance is not a guide to future performance. There is no assurance that the investment objective of the Fund will actually be achieved.
- Where investments are in the shares of companies (equities), the value of those equities may fluctuate, sometimes dramatically, in response to the activities and results of individual companies or because of general market and economic conditions or other events.
- Significant exposure to a particular industrial sector or geographical region puts the fund at risk of a localised event making a significant impact on the value of the Fund.
- The Fund's target income is not guaranteed, and the actual income may rise and fall in line with market movements.
- Where derivative or structured product investments in the Fund may include a counterparty, there is a risk that the counterparty will not fulfil their obligation.
- This Fund is allowed to use derivatives to achieve its objective. Derivatives can cause a Fund to become leveraged. Leverage occurs when exposure to an area invested in is greater than its amount invested, resulting in the Fund being exposed to a potentially greater loss than the initial investment.
- The Fund may use derivatives to reduce costs, overall risk and/or generate additional capital or income. This is known as Efficient Portfolio Management (EPM). When used for EPM purposes, there should not be an increase in the overall risk level of the Fund.

All the risks currently identified as being applicable to the Fund are set out in the 'Risk' section of the Prospectus.

Charges for this Fund

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry Charge	5.00%
Exit Charge	None
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investments are paid out	
Ongoing charges	0.60%
Charges taken from the Fund under certain specific conditions	
Performance fee	None

The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser.

The ongoing charges figure shown here is an estimate of the charges. The UCITS annual report for each financial year will include detail on the exact charges made. This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units/shares in another collective investment scheme.

For more information about charges, please see section headed "Charges and Expenses" of the Fund's Prospectus, which is available on request via email to thesisut@tutman.co.uk

Past Performance

There is insufficient historical data to provide a useful indication of past performance for the TM Tellworth UK Income and Growth Fund - Class F.
