

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

ASI Diversified Income Fund, a Sterling denominated sub fund of the Aberdeen Standard OEIC I, A Inc Shares (ISIN: GB00B1BW3J18). This fund is managed by Aberdeen Standard Fund Managers Limited.

OBJECTIVES AND INVESTMENT POLICY

Investment Objective

To generate a positive return through income and some capital growth over the long term (5 years or more) by investing in a globally diversified portfolio of assets whilst reducing the risk of losses. Invested capital is however at risk and there is no guarantee that this will be attained over any time period.

Performance Target: To exceed the return of SONIA by 5% per annum over rolling five year periods (before charges). The Performance Target is the level of performance that the management team hopes to achieve for the fund. There is however no certainty or promise that they will achieve the Performance Target.

SONIA has been chosen as a proxy for the return on cash deposits.

Investment Policy

Portfolio Securities

- The fund invests globally in a range of asset classes, derivatives, money-market instruments and cash.
- The fund may also invest in other funds (including those managed by abrdn) to gain exposure to a broad mix of assets from across the global investment universe.
- Asset classes that the fund invests in may include listed equities, private equity, property, infrastructure, high yield bonds, loans, emerging market debt, asset-backed securities, alternative risk premia, insurance linked securities, litigation finance, peer-to-peer lending, aircraft leasing and healthcare royalties.
- Asset classes such as infrastructure, property or private equity will typically be accessed through investment route such as listed equities.

Management Process

- The management team use their discretion (active management) to identify a diverse mix of investments which they believe are most appropriate for the investment objective. As a result of this diversification, and during extreme equity market falls, we expect losses to be below those of conventional global equity markets, with a volatility typically less than two thirds of equities.
- Their primary focus is on stock selection using the management team's quality, growth and momentum approach. It aims to identify companies that show a range of high quality characteristics, operate in growing markets and display positive business momentum.
- The team separately conduct extensive research to identify the most

appropriate type of investment for each asset class.

Derivatives and Techniques

- The fund may use derivatives to reduce risk, reduce cost and/or generate additional income or growth consistent with the risk profile of the fund (often referred to as 'Efficient Portfolio Management').
- Where derivatives are used, this would mainly be in response to significant inflows into the fund so that in these instances, cash can be invested while maintaining the fund's existing allocations to company shares or management of currency risk.
- Some underlying funds invested in by the fund may use derivatives more extensively. Derivatives may be used within underlying funds to generate growth if market prices are expected to rise ('long positions') or fall ('short positions').

Investors in the fund may buy and sell shares on any dealing day (as defined in the Prospectus).

If you invest in income shares, income from investments in the fund will be paid out to you. If you invest in accumulation shares, income will be added to the value of your shares.

Recommendation: the fund may not be appropriate for investors who plan to withdraw their money within five years. Investors should satisfy themselves that their attitude to risk aligns with the risk profile of this fund before investing.

RISK AND REWARD PROFILE

This indicator reflects the volatility of the fund's share price over the last five years which in turn reflects the volatility of the underlying assets in which the fund invests. Historical data may not be a reliable indication for the future.

The current rating is not guaranteed and may change if the volatility of the assets in which the fund invests changes. The lowest rating does not mean risk free.

The fund is rated as 4 because of the extent to which the following risk factors apply:

- The fund invests in emerging market equities and / or bonds. Investing in emerging markets involves a greater risk of loss than investing in more developed markets due to, among other factors, greater political, tax, economic, foreign exchange, liquidity and regulatory risks.
- The fund price can go up or down daily for a variety of reasons including changes in interest rates, inflation expectations or the perceived credit quality of individual countries or securities.
- The fund invests in securities which are subject to the risk that the issuer may default on interest or capital payments.
- Dividend payment policies of the REITs in which the fund invests are not representative of the dividend payment policy of the fund.
- The use of derivatives carries the risk of reduced liquidity, substantial loss and increased volatility in adverse market conditions, such as a failure amongst market participants. The use of derivatives may result in the fund being leveraged (where market exposure and thus the potential for loss by the fund exceeds the amount it has invested) and in these market conditions the effect of leverage will be to magnify losses.

All investment involves risk. This fund offers no guarantee against loss or that the fund's objective will be attained.

The price of assets and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment.

Inflation reduces the buying power of your investment and income. The value of assets held in the fund may rise and fall as a result of exchange rate fluctuations.

The fund could lose money if an entity (counterparty) with which it does business becomes unwilling or unable to honour its obligations to the fund.

In extreme market conditions some securities may become hard to value or sell at a desired price. This could affect the fund's ability to meet redemptions in a timely manner.

The fund could lose money as the result of a failure or delay in operational processes and systems including but not limited to third party providers failing or going into administration.

CHARGES

The charges you pay are used to pay the costs of running the fund including marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

Charges taken from the fund over a year

Ongoing charges	1.22%
-----------------	-------

Charges taken from the fund under certain specific conditions

Performance fee	0.00%
-----------------	-------

The entry and exit charges shown are maximum figures. In some cases you might pay less – you can find this out from your financial adviser. The Ongoing Charges figure reflects the amount based on the expenses within the annual report for each financial year. This figure may vary from year to year. It excludes: performance fees (where applicable); portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling in another collective investment undertaking.

Where the Fund invests in an open-ended collective investment scheme which is operated or managed by the ACD/the Manager or an associate of the ACD/the Manager, no additional annual management charge will be incurred by the Fund on such an investment.

The annual report for each financial year will include detail on the exact charges made.

The Ongoing Charge figure is as at 31/07/2021.

A switching charge may be applied in accordance with the Prospectus. For more information about charges please see Prospectus.

Further information on the charges can be found in the Prospectus.

PAST PERFORMANCE

ASI Diversified Income Fund, A Inc, 31 December 2021

% Returns

Past performance is not a guide to future performance.

Performance is net of charges and does not take into account any entry, exit or switching charges but does take into account the ongoing charge, as shown in the Charges section.

Performance is calculated in GBP.

The fund was launched in 2003. The share/unit class was launched in 2003.

Performance up to 01 September 2016 was achieved under a different investment objective and policy that no longer apply.

Performance Target - SONIA GBP +5.00% from 01/10/2021. GBP 1M LIBOR (365 Day Count) +5.00% from 08/12/2003 to 30/09/2021
