## EQUITY

# AXA Rosenberg Asia Pacific Ex Japan Fund

A Sub-Fund of AXA Rosenberg Global Investment Company ICVC  
Share class : AXA Rosenberg Asia Pacific Ex Japan Fund R Accumulation GBP (ISIN : GB0007705071)  
This Sub-Fund is managed by AXA Investment Managers UK Limited, part of the AXA IM Group

## Objective and Investment Policy

### Investment Objective

The aim of this Fund is to provide medium to long-term capital growth with a return (net of fees) greater than the MSCI AC Asia Pacific Ex-Japan Index (the "Index") on a rolling three to five year basis. The return of the Index is subject to the performance of the relevant stock market and therefore the Fund may not provide capital growth in all market conditions.

### Investment Policy

The MSCI AC Asia Pacific Ex-Japan Index is designed to measure the performance of shares of companies listed on stock exchanges in the Asia Pacific region (excluding Japan).

The Fund is actively managed. The Fund invests in a diversified portfolio of shares of large and medium sized companies in all industry sectors which are listed on stock exchanges in the countries in the Asia Pacific region (including Australia but excluding Japan). The Fund manager uses a proprietary stock selection model to identify companies that it believes to be attractive, relative to their industry peers, based on the model's analysis of their financial data. In constructing the Fund's portfolio, the Fund manager references the index which means that, while the Fund manager has discretion to select the investments for the Fund, the Fund's divergence from the index is controlled.

The Fund may use derivatives (financial instruments that derive their value from the value of other assets) in an attempt to reduce the overall risk of its investments, reduce the costs of investing or generate additional capital or income known as Efficient Portfolio Management (EPM).

The Fund is a financial product that promotes environmental and/or social characteristics within the meaning of article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector.

### Income

Income from investments in the Fund will be rolled up into the value of your Accumulation shares.

### Fund Currency

The reference currency of the Fund is Sterling.

### Investment Horizon

This Fund may not be suitable for investors who plan to withdraw their contribution within five years.

### Processing of subscription and redemption orders

Your orders to buy, sell or transfer shares in the Fund, must be received by the Administrator by 12 noon on any working day to receive that day's Fund price.

Please note that if your order is placed by an intermediary or Financial Adviser, they may require extra processing time.

The Net Asset Value of this Fund is calculated on a daily basis.

Minimum initial investment: £1,000

Minimum subsequent investment: £500

## Risk and Reward Profile

The risk category is calculated using historical performance data and may not be a reliable indicator of the Fund's future risk profile.

The risk category shown is not guaranteed and may shift over time

The lowest category does not mean risk free.

### Why is this Fund in this category?

The capital of the Sub-Fund is not guaranteed. The Sub-Fund is invested in financial markets and uses techniques and instruments which may be subject to sudden and significant variation, which may result in substantial gains or losses.

### Additional Risks (risks materially relevant to the fund which are not adequately captured by the indicator)

**Counterparty Risk:** failure by any counterparty to a transaction (e.g. derivatives) with the Fund to meet its obligations may adversely affect the value of the Fund. The Fund may receive assets from the counterparty to protect against any such adverse effect but there is a risk that the value of such assets at the time of the failure would be insufficient to cover the loss to the Fund.

**Derivatives:** derivatives can be more volatile than the underlying asset and may result in greater fluctuations to the Fund's value. In the case of derivatives not traded on an exchange they may be subject to additional counterparty and liquidity risk.

**Operational Risk:** the Fund is subject to the risk of loss resulting from inadequate or failed internal processes, people or systems or those of third parties such as those responsible for the custody of the Fund's assets.

**Risk linked to Method and Model:** attention is drawn to the fact that the Fund's strategy is based on the utilisation of a proprietary share selection model. The effectiveness of the model is not guaranteed and the utilisation of the model may not result in the investment objective being met.

**Emerging Market Risks:** emerging markets or less developed countries may face more political, economic or structural challenges than developed countries. As a result, investments in such countries may cause greater fluctuations in the Fund's value than investments in more developed countries. In addition the reliability of trading, settlement and custody systems in some emerging market countries may not be equal to more developed countries and result in greater operational and liquidity risk.

**Currency Risk:** the Fund holds investments denominated in currencies other than the base currency of the Fund. As a result, exchange rate movements may cause the value of investments (and any income received from them) to fall or rise affecting the Fund's value.

Further explanation of the risks associated with an investment in this Fund can be found in the prospectus.
