## US OPPORTUNITIES FUND

KEY INVESTOR  
INFORMATION  
DOCUMENT

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Liontrust US Opportunities Fund is a sub-fund of the Liontrust Investment Funds I and categorised as a UCITS scheme. This document is based upon the C Acc class (ISIN: GB00B7K9LQ88). This Fund is managed by Liontrust Fund Partners LLP, a subsidiary of Liontrust Asset Management PLC.

### Objective

- To generate long term (5 years or more) capital growth.

### Policy

- The Fund is considered to be actively managed in reference to the benchmark(s) in the performance table by virtue of the fact that it uses the benchmark(s) for performance comparison purposes. The benchmark(s) are not used to define the portfolio composition of the Fund and the Fund may be wholly invested in securities which are not constituents of the benchmark.
- The Fund invests at least 80% in shares of US companies. These are companies which, at the time of purchase, are incorporated, domiciled, listed or conduct significant business in the US. The Fund may also invest up to 20% in companies outside of the US, as well as in other eligible asset classes as detailed within the prospectus.

### Recommendation

- This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

### How to buy

- You may buy or sell shares on a daily basis (but not weekends or Bank Holidays). Orders must be received by 11:59am for execution at 12:00 midday valuation point on the same day. Further details can be found at [www.liontrust.co.uk](http://www.liontrust.co.uk).

### Investment process

- The fund managers believe the key to generating outperformance is through high conviction, long-term, research-led company selection. There are five key elements to the investment process:
- Identifying long-term winners. The managers seek to invest in excellent companies that are positively exposed to powerful trends or have distinct and differentiated characteristics that will result in consistently above market returns over the long term.
- The portfolios are actively managed and only consist of stocks in which there is high conviction that they will be long-term winners. This typically leads to funds having a high tracking error and active share against their respective benchmarks.
- Constructing concentrated portfolios. This enables long-term winners to drive investment returns rather than the market and therefore each idea will have a material impact on fund performance.
- The portfolios are constructed so that they can generate returns which are not overly dependent on the success and failure of any one individual investment style, such as growth and value, or macro factors.
- The Funds aim to be liquid in all market conditions.
- The Liontrust US Opportunities Fund's investment process leans upon the belief that technological disruption will have a marked impact on global stock markets in the years ahead. Understanding the pervasive role that technology is playing in every sector will be key to distinguishing the winners and losers of the future.
- The Fund aims to create a portfolio focused on the beneficiaries of digitalisation but importantly doing so in a style conscious manner, building a 'core' portfolio. The manager does this by investing across three different categories of digitalisation beneficiaries: the disruptors, which tend to be growth orientated, and embracers and enablers of digitalisation which offer a mix of 'growth', 'value' and potentially more cyclical opportunities.
- The Fund aims to provide balanced exposure across disruptors, embracers and enablers. Each of these categories have different stock characteristics and we believe as part of a balanced portfolio, that they can benefit from the hugely powerful theme of disruption.

## Risk and reward profile

- This Synthetic Risk and Reward Indicator (SRRRI) is based on historical data and may not be relied upon to gauge the future risk profile of the Fund.
- The SRRRI shown is not guaranteed to remain the same and may shift over time.
- The lowest category (1) does not mean 'risk free'.
- The Fund's risk and reward category has been calculated using the methodology set by the European Commission. It is based upon the rate by which the Fund or a representative fund or index's value has moved up and down in the past.
- The Fund is categorised 6 primarily for its exposure to US equities.
- The SRRRI may not fully take into account the following risks:
  - that a company may fail thus reducing its value within the Fund;
  - overseas investments may carry a higher currency risk. They are valued by reference to their local currency which may move up or down when compared to the currency of the Fund.
- This Fund may have a concentrated portfolio, i.e. hold a limited number of investments. If one of these investments falls in value this can have a greater impact on the Fund's value than if it held a larger number of investments.
- The Fund may, under certain circumstances, invest in derivatives, but it is not intended that their use will materially affect volatility. Derivatives are used to protect against currencies, credit and interest rate moves or for investment purposes. There is a risk that losses could be made on derivative positions or that the counterparties could fail to complete on transactions. The use of derivatives may create leverage or gearing resulting in potentially greater volatility or fluctuations in the net asset value of the Fund. A relatively small movement in the value of a derivative's underlying investment may have a larger impact, positive or negative, on the value of a fund than if the underlying investment was held instead. The use of

derivative contracts may help us to control Fund volatility in both up and down markets by hedging against the general market.

- The Fund may encounter liquidity constraints from time to time. The spread between the price you buy and sell shares will reflect the less liquid nature of the underlying holdings.
- The Fund may have both Hedged and Unhedged share classes available. The Hedged share classes use forward foreign exchange contracts to protect returns in the base currency of the Fund.
- Outside of normal conditions, the Fund may hold higher levels of cash which may be deposited with several credit counterparties (e.g. international banks). A credit risk arises should one or more of these counterparties be unable to return the deposited cash.
- Counterparty Risk: any derivative contract, including FX hedging, may be at risk if the counterparty fails.
- ESG Risk: there may be limitations to the availability, completeness or accuracy of ESG information from third-party providers, or inconsistencies in the consideration of ESG factors across different third party data providers, given the evolving nature of ESG.
- For full details of the Fund's risks, please see the prospectus which may be obtained from Liontrust (address overleaf) or online at [www.liontrust.co.uk](http://www.liontrust.co.uk).

## US OPPORTUNITIES FUND

### Charges for this fund

- The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None

- This is the maximum that might be taken out of your money before it is invested.

Charges taken from the Fund over the year	
Ongoing charges	0.88%

Charges taken from the Fund under certain specific circumstances	
Performance fee	None

### Past performance

- Past performance is not a guide to future performance. It has been calculated on the basis that any distributable income of the Fund has been reinvested. The past performance shown in the chart takes into account all charges except entry and exit charges.
- The Fund launch date is 31 December 2002.
- The C Acc share class launch date is 01 October 2012. Performance shown before this date relates to the A Acc share class.
- The base currency of the Fund is pounds sterling.
