Objectives and investment policy

Objectives

The Fund aims to achieve long term capital growth by investing in a diversified portfolio of company shares listed in the UK.

Investment policy

The Fund will seek to achieve its investment objective by investing in undervalued company shares which are trading below their intrinsic value, whilst striving to reduce volatility (the rate at which the value of your investment moves up or down) in the Fund.

The Fund may invest in financial derivatives (complex instruments based upon the value of underlying assets) for hedging, to reduce risk, to manage the Fund more efficiently, or to gain exposure to securities in a more efficient way.

The Fund is actively managed and uses the FTSE All-Share Total Return Index benchmark for performance comparison purposes and to calculate the performance fee.

Any income which the Fund generates may be paid out in the form of an annual dividend at the sole discretion of the Directors.

You may sell your shares on days which banks are normally open for business in Dublin and London.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within five years.

Pursuant to the EU's Sustainable Finance Disclosure Regulation 2019/2088 ('SFDR'), this Fund is classified as a fund that promotes environmental or social characteristics. For more information on this Fund's investment approach with respect to sustainability and non-financial criteria, please refer to Annex I of the Fund's prospectus supplement or to Polar Capital's website, www.polarcapital.co.uk.

Risk and reward profile

Why is this fund in category 6?

The Fund has a high risk rating because it invests in equities, the value of which can move up and down over time to a greater extent than some other investments.

In addition to the risk captured by the indicator, the overall fund value may be considerably affected by:

Investment Risk - the Fund invests in equities globally, share prices can rise or fall due to a number of factors affecting global stock markets.

Derivative Risk - certain derivatives may result in gains or losses that are greater than the original amount invested. Derivatives also involve counterparty risk, which is the risk that a counterparty to the derivative contract cannot meet its contractual obligations.

Currency Risk - the Fund invests in assets denominated in currencies other than the Fund's base currency. Changes in exchange rates may have a negative impact on the Fund's investments.

What do these numbers mean?

The risk indicator was calculated using synthetic data and may not be a reliable indication of the future risk profile of the Fund. The risk category shown is not guaranteed and may change over time. A category 1 fund is not a risk-free investment - the risk of losing

your money is small, but the chance of making gains is also limited. With a category 7 fund, the risk of losing your money is high but there is also a chance of making high gains. The numerical scale is complex, for example, 2 is not twice as risky as 1.
