CT EUROPEAN REAL ESTATE SECURITIES FUND (THE "FUND")

Class C Income Shares (GBP) IE00B5PZZD25, a sub-fund of Columbia Threadneedle (Irl) III PLC (the "Company"), regulated by the Central Bank of Ireland.

This Fund is managed by Threadneedle Management Luxembourg S.A. (the "Manager")

Objectives and Investment Policy

- The Fund aims to generate a total return greater than the FTSE EPRA Nareit Developed Europe UCITS Daily Capped Net Tax Index and maintain a volatility similar to that of the Index.
- The Fund mainly invests in equities of European listed property companies and companies related to or with significant exposure to European real estate. The Fund can also invest in real estate companies operating outside Europe.
- The Fund may also invest in other investments such as corporate bonds (which are similar to a loan and pay a fixed or variable interest rate) and derivatives (derivatives are sophisticated investment instruments linked to the rise and fall of the value of other assets) to maintain, increase or reduce exposure to securities or indices for investment or hedging.
- Derivatives can also be used to obtain long or short exposure to specific companies. Overall exposure may be in excess of the net asset value of the Fund or derivatives can be used to reduce it below the Fund's net asset value, known as leverage. The Fund may generate varying amounts of leverage at different times. Over the life of the Fund it has maintained a net position (offsetting long and short positions) of between 85% and 110%. The Fund uses hedging to maintain the currency exposure of the portfolio in line with the Index.
- The Fund is actively managed in reference to FTSE EPRA Nareit Developed Europe UCITS Daily Capped Net Tax Index. The index is broadly representative of the securities in which the Fund invests, and provides a suitable comparator benchmark against which performance will be measured. The manager has discretion to select investments with weightings different to the index, and that are not in the index, and the Fund may display significant divergence from the index. The Fund also references this index for the purposes of calculating the performance fee.
- Any income the Fund generates will be paid to you.
- You can buy or sell shares in the Fund on any day which is a business day in Dublin and London. You can find more detail on the investment objective and policy of the Fund in the Prospectus. For more information on investment terms used in this document, please see the Glossary available at columbiathreadneedle.com.
- Recommendation: this fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Lower Risk,
Typically lower rewards

Higher Risk,
Typically higher rewards

- The Fund is rated 6 because historically it has shown a high level of volatility (how much the value of the Fund goes up and down).
- The lowest category does not mean a risk-free investment.
- The indicator does not adequately reflect the following risks of investing in particular assets, which may impact on future investment return:
- Liquidity Risk: the ability to buy and sell assets at a favourable price may be affected by a low level of counterparties willing to enter into a transaction with the Fund.
- Currency Risk: your investment may be adversely affected by changes in currency exchange rates.
- Derivative Risk: derivative values rise and fall at a greater rate than equities and debt instruments. Losses can be greater than the initial investment.
- Counterparty Risk: to gain greater income the Fund may deposit cash with various approved Counterparties. Return of the cash is dependent upon the continued solvency of the Counterparty.
- Restricted Diversification: investments are concentrated in companies which are focused on the property markets. These investments are limited to a relatively narrow segment of the economy. Performance may differ in direction and degree from that of the overall stock market.
- Smaller companies risk: smaller companies carry a higher degree of risk and their value can be more sensitive to market movement.
- The risks currently identified as applying to the Fund are set out in the "Risk Factors" section of the Prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry Charge:	5.00%
Exit Charge:	0.00%

These are the maximum charges that we might take out of your money before it is invested. In some cases, you might pay less and you should speak to your financial adviser about this.
