

**Key investor information**

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

**Xtrackers MSCI GCC Select Swap UCITS ETF**

**Share class: 1C, ISIN: IE00BQXKVQ19, Security code: A12B98, Currency: USD**

a sub-fund of Xtrackers (IE) plc. The management company is DWS Investment S.A., a member of the DWS Group.

**Objectives and investment policy**

The fund is passively managed. The aim is for your investment to reflect the performance, before fees and expenses, of the MSCI GCC Countries ex Select Securities Index (index) which is designed to reflect the performance of the shares of companies based in Bahrain, Kuwait, Oman, Qatar, Saudi Arabia and the United Arab Emirates. A company's weighting in the index depends on its relative size based on the combined value of a company's readily available shares as compared to other companies. MSCI Inc. (index administrator) may exclude certain securities from time to time on the basis that they may have restrictions on foreign

ownership. The index is calculated on a total return net basis which means that all dividends and distributions by the companies are reinvested in the shares after tax. The index is reviewed and rebalanced on a quarterly basis. To achieve the aim, the fund will invest in transferable securities and enter into financial contracts (derivatives) with one or more swap counterparties relating to the transferable securities and the index, in order to obtain the return on the index. The currency of the fund is USD. Returns and gains are not distributed but are reinvested in the fund. You may request the redemption of shares generally on a daily basis.

**Risk and reward profile**

The calculation of the risk and reward profile is based on historical data that cannot be used as a reliable indicator for the future risk profile. This risk indicator is subject to changes; the classification of the fund may change over time and cannot be guaranteed. Even a fund that is classified in the lowest category (category 1) does not represent a completely risk-free investment. The fund is classified in category 5 because its share price fluctuates comparatively strongly and the likelihood of both losses and gains is therefore relatively high. The following risks could be of particular significance for the fund: The fund does not invest directly in the components of the index and its returns will be dependent on the performance of the bonds and/or cash deposits and the performance of the derivatives used. The fund is not guaranteed and your investment is at risk. The value of your investment may

go down as well as up. DWS entities and related companies may act in several roles in relation to the fund such as distributor and management company which may involve conflicts of interest. The fund is exposed to less economically developed economies (known as emerging markets) which involve greater risks than well developed economies. Political unrest and economic downturn may be more likely and will affect the value of your investment. The fund is exposed to market movements in a single region which may be adversely affected by political or economic developments, government action or natural events that do not affect a fund investing in broader markets. The index is rules-based and is not capable of being adjusted to take into account changing market circumstances. As a result you may be negatively affected by, or may not benefit from, the lack of such adjustments in changing market circumstances. The fund will enter into a derivative with a counterparty (HSBC Bank plc). If the counterparty fails to make payments (for example, it becomes insolvent) this may result in your investment suffering a loss.

A more detailed description of risks and other general information can be found in the risk section(s) of the prospectus.
