

# Key Investor Information

This document provides you with the key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

## LF Equity Income Fund, Z Sterling Income, a fund within LF Investment Fund (ISIN: GB00BLRZQB71)

The fund is managed by Link Fund Solutions Limited, part of the Asset Services Division of Link Administration Holdings Limited.

### Objective and investment policy

#### Objective

To provide a level of income together with capital growth.

#### Investment Policy

To seek to invest at least 70% in shares of UK listed companies. It may also invest in unlisted companies, overseas entities and derivatives. It is not anticipated that the use of derivatives will have a significant adverse effect on the risk profile of the fund.

- The fund has the discretion to invest without the need to adhere to a particular benchmark.
- You can buy and sell shares in the fund every business day.
- The fund aims to distribute available income every quarter.
- Derivatives may be used for investment purposes and to manage the risk profile of the fund.
- Recommendation: This fund may not be appropriate for investors who plan to withdraw their money in the shorter term (e.g. less than 3-5 years).

### Risk and reward profile

- This indicator shows how much a fund may have risen and fallen in the past, and therefore how much a fund's returns may have varied. It is a measure of a fund's volatility. The higher a fund's past volatility the higher the number on the scale and the greater the risk that investors in that fund may have made losses as well as gains. The lowest number on the scale does not mean that a fund is risk free.
- The fund has been classed as 5 because its volatility has been measured as above average.
- This indicator is based on historical data and may not be a reliable indication of the future risk profile of this fund.
- The risk and reward profile shown is not guaranteed to remain the same and may shift over time.
- Currency Risk: As the fund invests in overseas securities movements in exchange rates may, when not hedged, cause the value of your investment to increase or decrease.
- Counterparty Risk: As the fund may enter into derivative agreements there is a risk that other parties may fail to meet their obligations. This may lead to delays in receiving amounts due to the fund, receiving less than is due or receiving nothing.
- Use of Derivatives: The fund invests in derivatives. Where derivatives are used for hedging, the risk of loss to the fund may be increased where the value of the derivative and the value of the security or position which it is hedging are insufficiently correlated.
- Smaller and Unlisted Companies: The fund invests in listed smaller companies and private companies not available to be bought or sold on the stock market. Both are often more difficult to buy or sell, sometimes significantly harder, when compared to larger more established companies. Unlisted companies and some smaller companies can also be more difficult to value due to less available information on them and can involve a significant amount of estimation. As a result, smaller and unlisted companies may cause large short term swings (both up and down) in the value of the fund.
- For full details of the fund's risks, please see the prospectus which may be obtained from the address in 'Practical Information' below.

## Charges for this Fund

The charges you pay are used to pay the costs of running the fund. These charges reduce the potential growth of your investment.
