THREADNEEDLE UK SMALLER COMPANIES FUND (THE "FUND")

Class 1 Income Shares (GBP) GB0001530343, a sub-fund of Threadneedle Investment Funds ICVC (the "Company"), regulated by the FCA.

This sub-fund is managed by Threadneedle Investment Services Limited (the "Management Company") (part of the Columbia and Threadneedle group of companies).

Objectives and Investment Policy

The Fund aims to increase the value of your investment over the long term. It looks to outperform the Numis Smaller Companies excluding Investment Companies (ex ICs) Index over rolling 3-year periods, after the deduction of charges.

The Fund is actively managed, and invests at least 90% of its assets in the shares of companies listed on the London Stock Exchange; predominantly smaller companies traded on the Alternative Investment Market (AIM) or included within the Numis Smaller Companies (ex ICs) Index, that are UK domiciled, or have significant UK business operations.

The Fund selects companies considered to have good prospects for share price growth, from any industry or economic sector, with smaller companies providing potential exposure to niche growth areas that often cannot be accessed by large companies.

The Fund typically invests in shares of fewer than 70 companies. The Fund may also invest in other assets such as cash and deposits, and hold other funds (including funds managed by Columbia Threadneedle companies) when deemed appropriate.

The Numis Smaller Companies (ex ICs) Index is a widely used benchmark for monitoring the performance of UK smaller companies. It consists of companies that make up the smallest 10% of the UK main listed market by value (excluding investment companies). It provides a suitable target benchmark against which Fund performance will be measured and evaluated over time.

Any income the Fund generates will be paid to you, unless you have chosen to have it reinvested.

You can buy and sell shares in the Fund on any day that is a business day in London. You can find more detail on the objectives and investment policy of the Fund in the section of the prospectus with the heading "Investment Objectives, Policies and Other Details of the Funds".

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Lower Risk, Typically lower rewards Higher Risk, Typically higher rewards

- The Fund is rated 6 because historically it has shown a high level of volatility (how much the value of the Fund goes up and down).
- The lowest category does not mean a risk-free investment.
- The value of investments can fall as well as rise and investors might not get back the sum originally invested.
- Where investments are in assets that are denominated in multiple currencies, or currencies other than your own, changes in exchange rates may affect the value of the investments.
- The Fund holds assets which could prove difficult to sell. The Fund may have to lower the selling price, sell other investments or forego more appealing investment opportunities.
- The Fund may invest in derivatives with the aim of reducing risk or minimising the cost of transactions. Such derivative transactions may benefit or negatively affect the performance of the Fund. The Manager does not intend that such use of derivatives will affect the overall risk profile of the Fund.
- The risks currently identified as applying to the Fund are set out in the "Risk Factors" section of the prospectus.
