

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Jupiter Global Financial Innovation Fund I-Class

I-Class Accumulation Units, ISIN: GB00B58D9P37

The Manager is Jupiter Unit Trust Managers Limited.

Objectives and investment policy

Objective

The Fund objective is to provide capital growth over rolling 5-year periods.

Policy

At least 70% of the Fund is invested in shares of companies in the financial services and related sector based anywhere in the world. Up to 30% of the Fund may be invested in other assets, including shares of other companies, open-ended funds (including funds managed by Jupiter and its associates), cash and near cash. The Fund may also enter into derivative transactions for investment (i.e. speculative) purposes.

The Fund can use derivative instruments for investment purposes. Derivatives allow the Investment Manager to track changes in the price of an item, for example a company share, without actually owning it. Derivatives may be used to gain exposure to a number of different asset classes, including company shares, financial indices, commodities and currency exchange rates. The Fund may also use derivatives for hedging purposes.

Benchmarks

Comparator benchmark - MSCI ACWI Financials with net dividends re-invested

The MSCI ACWI Financials with net dividends re-invested is an industry standard index and is one of the leading representations of global financials stock markets. It is easily accessible and provides a fair reflection of the Fund Manager's investment universe and a good relative measure to assess performance outcomes.

Active Management

The Fund is actively managed. This means the fund manager is taking investment decisions with the intention of achieving the Fund's investment objective; this may include decisions regarding asset selection, regional allocation, sector views and overall level of exposure to the market. The fund manager is not in any way constrained by the benchmark in their portfolio positioning, and will not hold all, or indeed may not hold any, of the benchmark constituents.

Any income arising in relation to this share class will be accumulated (i.e. automatically reinvested and reflected in the price of the shares).

Investors are able to buy and sell units during any business day between 9am and 5.30pm. If you tell us to buy or sell units before 12pm on any business day we will make the transaction on the same day. If you tell us to buy or sell units after 12pm we will make the transaction on the following business day.

Recommendation

This fund may not be suitable for investors who plan to withdraw their capital within 5 years.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

- The lowest category does not mean 'no risk'.
- The Fund is in this category due to the nature of its investments and previous levels of volatility (how much the value of the Fund rises and falls).
- Market and exchange rate movements can cause the value of an investment to fall as well as rise, and you may get back less than originally invested.
- There is a risk that companies providing services such as safe keeping of assets or acting as counterparty to derivatives may become insolvent, which may cause losses to the Fund.
- The Fund invests into a specific market sector and its value may be subject to periods of high volatility, causing the value of the Fund to fall and rise sharply over short periods of time.
- Gearing is a method used to increase the exposure of the portfolio to financials markets through the use of loans or derivatives. Gearing may lead to large and sudden movements in the value of the portfolio.
- The Fund has the ability to use derivatives for investment purposes which under certain market conditions may cause the Fund to significantly fall in value. Investments in financial derivative instruments can introduce leverage risks which can amplify gains or losses in the Fund.

Charges

One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment.

Charges taken from the Fund over a year

Ongoing charges	0.99%
-----------------	-------

Charges taken from the Fund under specific conditions

Performance fee	NONE
-----------------	------

- The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.
- The ongoing charges figure in this document is based on fees and expenses for the year ended 31 December 2021. This figure is fixed and it excludes the costs of buying or selling assets for the Fund.
- Further information about charges is available in sections 18 and 19 of the Scheme Particulars which are available from Jupiter on request.

Past performance
