

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Fidelity US Quality Income UCITS ETF

a sub-fund of Fidelity UCITS ICAV

Accumulating GBP (Hedged) Shares (ISIN: IE00BYV03C98)

This fund is managed by FIL Fund Management (Ireland) Limited

Objectives and Investment Policy

- The fund aims to provide investors with a total return, taking into account both capital and income returns, which reflects, before fees and expenses, the return of the Fidelity US Quality Income Index (the "Index"). For currency hedged share classes, the return will be hedged to the base currency of the relevant share class.
- The Index is designed to reflect the performance of stocks of large and mid-capitalisation dividend paying US companies that exhibit quality fundamental characteristics.
- The investment policy of the fund is to track the performance of the Index as closely as possible, regardless of whether the Index level rises or falls, while seeking to minimise as far as possible the tracking error between the fund's performance and that of the Index.
- The Index comprises the equity securities of the relevant companies. The Index constituents are also screened according to fundamental measures as well as certain environmental, social and governance ("ESG") exclusionary criteria based on norm-based screening and negative screening of certain sectors, companies or practices. For more information on the Index, please refer to the publicly available index methodology at www.spdji.com.
- The fund will aim to replicate the Index by holding all of the Index Securities in a similar proportion to their weighting in the Index.
- The securities in which the fund invests will be primarily listed or traded on recognised markets globally in accordance with the limits set out in the UCITS Regulations.
- The fund may use derivatives for efficient portfolio management and for currency hedging purposes.
- The fund uses a benchmark "index tracking" (also known as "passive") investment management approach by tracking the Index.
- Income will be retained in the share class to grow the value of your investment.
- You can buy and sell shares in the fund on any day the banks in London are open.

Risk and Reward Profile

- Historical data may not be a reliable indication for the future.
- The risk category shown is not guaranteed and may change over time.
- The lowest category does not mean a "risk free" investment.
- The risk and reward profile is classified by the level of historical fluctuation of the Net Asset Values of the share class, and within this classification, categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level and 6-7 a high level.
- The value of your investment may fall as well as rise and you may get back less than you originally invested.
- The fund may invest in instruments denominated in currencies other than the fund base currency. Changes in currency exchange rates can therefore affect the value of your investment.
- Currency hedging may be used which aims to reduce the effect of such changes. However, the effects may not be completely eliminated to the degree expected.

Charges for this fund (ISIN: IE00BYV03C98)

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge N/A

Exit charge N/A

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

Charges taken from the fund over a year
