

# Key Investor Information

This document provides you with the key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

## LF Macquarie Global Infrastructure Securities Fund, A Accumulation Shares, a fund within LF Macquarie Investment Funds (ISIN: GB00B1W27X27)

The fund is managed by Link Fund Solutions Limited.

### Objective and investment policy

#### Objective

To achieve a total return (the combination of income and capital growth), after all costs and charges have been taken, over any five year period.

There is no guarantee that the objective will be met over any time period and you may get back less than you invest.

#### Investment Policy

To invest at least 80% of the fund worldwide (including emerging markets, which are countries whose economies are progressing towards becoming advanced) in the shares of infrastructure companies (companies which own and operate physical infrastructure assets such as toll roads, airports, railways, electric and gas transmission and distribution, water and sewage).

The fund may also invest up to 20% in infrastructure companies, money market instruments (which are short term loans that pay interest) and cash.

Investments in collective investment schemes will be limited to 10%.

The investment manager seeks to invest in infrastructure companies that it considers operate infrastructure assets that provide essential services in support of communities and their respective economies and that in its view will produce superior growth over the long term taking into account a number of factors including strategic position, price structure, regulatory framework, cash flow stability and predictability.

Other features of the fund:

- The fund is actively managed. The Investment Manager uses its expertise to select investments for the fund and has the discretion to invest without the need to adhere to a particular benchmark.
- The fund will invest in infrastructure, money market instruments and cash both directly and by using, for example, other funds.
- The fund can invest across different geographic regions without limitation.
- Derivatives (whose value is linked to that of another investment, e.g company shares, currencies) may be used to manage the risk profile of the fund.
- In extraordinary market conditions which could result in significant loss, the fund has the ability to invest 100% in lower risk assets such as cash.
- You can buy and sell shares in the fund on each business day.
- Income from the fund will be added to the value of your investment.
- Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 5 years.

### Risk and reward profile

- This indicator shows how much a fund has risen and fallen in the past, and therefore how much a fund's returns have varied. It is a measure of a fund's volatility. The higher a fund's past volatility, the higher the number on the scale and the greater the risk that investors in that fund may have made losses as well as gains. The lowest number on the scale does not mean that a fund is risk free.
- The fund has been classed as 5 because its volatility has been measured as above average.
- This indicator is based on historical data and may not be a reliable indication of the future risk profile of this fund.
- The risk and reward profile shown is not guaranteed to remain the same and may shift over time. The lowest number on the scale does not mean that a fund is risk free.
- Currency Risk: As the fund can be exposed to different currencies, changes in exchange rates may decrease the value of your investment.

- Counterparty Risk: The failure of a firm involved in a transaction with the fund or providing services to the fund may expose the fund to financial loss.
- Emerging Markets Risk: The fund may invest in emerging markets, which are markets in countries that are developing. Emerging markets may have more political and economic risks than developed markets, resulting in price movements that may cause a loss to the fund.
- Concentration Risk: The fund is largely invested in companies which have exposure to infrastructure. This may mean the fund is more sensitive to price swings than other funds.
- For full details of the fund's risks, please see the prospectus which may be obtained from the address in 'Practical Information' below.

## Charges for this fund

The charges you pay are used to pay the costs of running the fund. These charges reduce the potential growth of your investment.

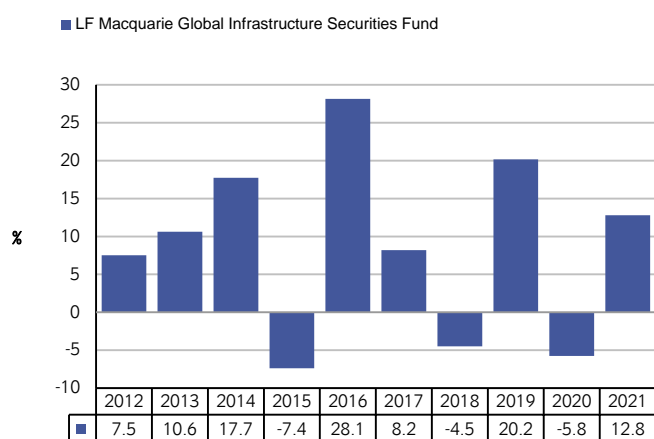

One-off charges taken before or after you invest	
Entry Charge	None
Exit Charge	None
Charges taken from the fund over the year	
Ongoing Charges	1.85%
Charges taken from the fund under certain specific conditions	
Performance Fee	None

The ongoing charges figure is based on expenses as at 30 September 2021. This figure may vary from year to year. The ongoing charges are taken from the income of the fund. They exclude portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling units in another collective investment undertaking.

You may also be charged a dilution levy (an amount to cover dealing costs incurred by the fund) on entry to or exit from the fund.

For more information about the dilution levy and other charges, please see the prospectus sections 3.5 & 7, which may be obtained free of charge from the address in 'Practical Information' below.

## Past performance

- Past performance is not a guide to future performance.
- The past performance in the chart shown opposite is net of tax and charges but excludes the entry charge that may be paid on the purchase of an investment.
- The fund was launched in June 2007.
- Performance is calculated in Pounds Sterling.
