## Jupiter Strategic Bond Fund L-Class

L-Class Income Units, ISIN: GB00B2RBBC80

The Manager is Jupiter Unit Trust Managers Limited.

### Objectives and investment policy

#### Objective

The Fund objective is to provide income with the prospect of capital growth to provide a return, net of fees, higher than the IA £ Strategic Bond Sector Average over the long term (at least five years).

#### Policy

At least 70% of the Fund is invested in global fixed interest securities denominated in sterling or hedged back to sterling. Up to 30% of the Fund may be invested in other assets, including shares of companies (which may be based anywhere in the world), open-ended funds (including funds managed by Jupiter and its associates), cash and near cash. The Fund may enter into derivative transactions for investment (i.e. speculative) purposes.

#### Strategy

The fund manager strives to explore the full breadth of the global Fixed Income universe in order to generate performance which is attractive relative to competitor funds by maintaining a balance between macroeconomic and company-level risk.

The portfolio construction process starts with a macroeconomic analysis which determines the willingness to take credit or duration risk, the broad asset allocation of the strategy as well as the geographic areas of focus. The team of credit analysts screens the global credit universe within Developed and Emerging markets to find credits that offer an attractive forward-looking return considering the risk assessment.

The fund manager seeks to maintain a diverse portfolio of investments.

#### Benchmarks

Target benchmark - IA £ Strategic Bond Sector

Many funds sold in the UK are grouped into sectors by the Investment Association (the trade body that represents UK investment managers), to help investors to compare funds with broadly similar characteristics. This Fund is classified in the IA £ Strategic Bond Sector.

#### Active Management

The Fund is actively managed. This means the fund manager is taking investment decisions with the intention of achieving the Fund's investment objective; this may include decisions regarding asset selection, regional allocation, sector views and overall level of exposure to the market.

Any income arising in relation to this share class will be distributed to investors on a regular basis.

Investors are able to buy and sell units during any business day between 9am and 5.30pm. If you tell us to buy or sell units before 12pm on any business day we will make the transaction on the same day. If you tell us to buy or sell units after 12pm we will make the transaction on the following business day.

#### Recommendation

This fund may not be suitable for investors who plan to withdraw their capital within 5 years.

### Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Typically lower rewards,  
lower risk

Typically higher rewards,  
higher risk

- The lowest category does not mean 'no risk'.
- The Fund is in this category due to the nature of its investments and previous levels of volatility (how much the value of the Fund rises and falls).
- Market and exchange rate movements can cause the value of an investment to fall as well as rise, and you may get back less than originally invested.
- There is a risk that companies providing services such as safe keeping of assets or acting as counterparty to derivatives may become insolvent, which may cause losses to the Fund.
- Bonds are very sensitive to interest rate changes and it is possible that bond issuers will not pay interest or return the capital promised. Bonds can also be 'downgraded' by ratings agencies. All of these events can reduce the value of bonds held by the Fund and therefore impact performance.
- The Fund can invest a significant portion of the portfolio in high yield bonds and bonds which are not rated by a credit rating agency. While such bonds may offer a higher income, the interest paid on them and their capital value is at greater risk of not being repaid, particularly during periods of changing market conditions.
- In difficult market conditions, reduced liquidity in bond markets may make it harder for the manager to sell assets at the quoted price. This could have a negative impact on the value of your investment. In extreme market conditions, certain assets may become hard to sell in a timely manner or at a fair price. This could

affect the Fund's ability to meet investors' redemption requests upon demand.

- This Fund may use derivatives for investment purposes which may cause large fluctuations in the value of the Fund. Investments in financial derivative instruments can introduce leverage risks which can amplify gains or losses in the Fund.
- The value of income payments will fluctuate.

## Charges

### One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment.
