The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Premier Miton Global Sustainable Growth Fund – Class A Shares

A sub-fund of Premier Miton Funds

Class A Income Shares, ISIN no.GB00B2QXTK93 (representative share class) & Class A Accumulation Shares, ISIN no.GB00B2QXTP49

Authorised Corporate Director - Premier Portfolio Managers Ltd.

Objectives and investment policy

The objective of the Fund is to provide capital growth over the long-term, being five years or more. Five years is also the minimum recommended period for holding shares in this Fund. This does not mean that the Fund will achieve the objective over this, or any other, specific time period and there is a risk of loss to the original capital invested.

A minimum of 80% of Fund's assets will be invested in an actively managed portfolio of company shares. Those companies will be of different sizes and from a range of geographical regions, including developed and less developed countries (those that are constituents of the FTSE Emerging Index) and will range in size from very large to smaller companies, although the emphasis will be on larger companies. Typically, over 50% of the Fund will be invested in companies that were over US\$ 10bn in size at the time of purchase.

The Investment Adviser believes that to deliver capital growth, companies should have a strong Environmental, Social and Governance (ESG) profile and be focussed on longer term sustainable growth themes, which could include; health and well-being, affordable and clean energy, and waste management amongst others. The United Nations Sustainable Development Goals are being used to provide a set of standards with which to align the investments of the Fund. There will be a focus on sectors that display those characteristics, although there are many companies in other sectors that will also be suitable investments.

Up to 20% of the Fund's assets may be in other investments which may include fixed income (including bonds issued by governments and companies, which could either be investment grade (higher quality) or non-investment grade (lower quality) bonds), convertible bonds (bonds that can convert into company shares), deposits, cash and near cash.

The Fund may invest in derivatives, warrants and forward transactions (these are contracts whose value is based on the change in price of an underlying investment) for investment purposes as well as for the purpose of efficient portfolio management, including hedging (hedging is designed to offset the risk of

another investment falling in price). The use of derivatives in the Fund will be limited.

The Fund is actively managed which means that the Fund Manager will choose the investments, currencies and markets held in the Fund but always within the boundaries outlined in the Fund's objective and policy.

The full investment objective and policy, which outline all the eligible investments, are available in the Fund's prospectus.

You can buy, sell and switch shares in the Fund on any UK business day. We will need to receive your instruction before 12 noon to buy shares at that day's price.

Terms explained:

Investment grade bond: A bond that is assigned a rating in the top four categories by commercial credit rating companies.

Convertible bonds: bonds that can convert into company shares.

Efficient portfolio management: managing the Fund in a way that is designed to reduce risk or cost and/or generate extra income or growth.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

The Fund is ranked as 5 because it has experienced medium to high rises and falls in value over the past five years.

Please note that even the lowest ranking does not mean a risk-free investment.

The Fund holds equities including in emerging markets concentrated on longer term sustainable growth themes. It may, at any one point in time, hold a concentration of assets in one sustainable or renewable theme which can mean sector or geographic location concentration. Equities, and in particular those with new or changing business models such as sustainable environmental ambitions or in emerging markets, can experience higher volatility than other assets such as bonds or money market instruments. Funds concentrated by type of asset, geographic location or sustainable company concentration are more vulnerable to market sentiment impacting on one or more of those characteristics and can carry a higher risk than funds holding a more diversified range of assets.

The indicator may not take fully into account the following risks of investing in this Fund:

- **Operational risk:** arising from investments in overseas markets, in particular emerging markets, which may not have the same level of safekeeping and other controls as UK markets.
- **Liquidity risk:** during difficult market conditions some securities, such as equities in emerging markets, may become more difficult to sell at a desired price.
- **Legal or tax risk:** arising from a change in legal regulations, tax rules or the application of them.

A more detailed description of the risks identified as being applicable to the Fund are set out in the 'Risk Factors' section of the Prospectus.
