

Allianz Technology Trust PLC

Half-Yearly Financial Report
30 June 2021

Allianz 
Global Investors

Key Information

Investment objective

Allianz Technology Trust PLC (the Company) invests principally in the equity securities of quoted technology companies on a worldwide basis with the aim of achieving long-term capital growth in excess of the Dow Jones World Technology Index (sterling adjusted, total return) (the benchmark).

Investment policy

The investment policy of the Company is to invest in a diversified portfolio of companies that use technology in an innovative way to gain a competitive advantage. Particular emphasis is placed on companies that are addressing major growth trends with innovation that replaces existing technology or radically changes products and services and the way in which they are supplied to customers.

What constitutes a technology stock

The investment management team views technology companies as those with revenues primarily generated by the application of technology products and services. This is divided into two areas:

- Traditional telecommunications, media and technology (TMT) segments which include Internet, computers and computer peripherals, software, electronic components and systems, communications equipment and services, semiconductors, media and information services.
- Non-traditional technology companies are those in various other industries that use technology in an innovative way to gain a strategic, competitive edge.

As technology becomes ever more pervasive, it is increasingly difficult to differentiate between technology companies and significant adopters as outlined above. Much is spoken of disruptive technologies – those which will force change within an industry and which may often displace the dominance of incumbent market leaders. The challenge is to understand not only current technologies, but also future trends and the likely effects.

Asset allocation

The fund managers do not target specific country or regional weightings and aim to invest in the most attractive technology shares on a global basis. The fund managers aim to identify the leading companies in emerging technology growth sub-sectors. The majority of the portfolio will comprise mid and large cap technology shares.

Risk diversification

The Company aims to diversify risk and no holding in the portfolio will comprise more than 15% of the Company's assets at the time of acquisition. The Company aims to diversify the portfolio across a range of technology sub-sectors.

Gearing

In normal market conditions gearing will not exceed 10% of net assets but may increase to 20%. The Company's Articles of Association limit borrowing to one quarter of its called up share capital and reserves. As at 30 June 2021 there was no borrowing facility in place.

Discount control

The Board will consider buying back shares when the discount is over 7% and all other factors are aligned. The Board considers carefully the parameters which should apply to both the issuance of shares and the buy back of shares from the market and will only proceed when the action is in the best interests of shareholders as a whole.

Liquidity

In normal market conditions the liquidity of the portfolio, that is the proportion of the Company's net assets held in cash or cash equivalents, will not exceed 15% of net assets but may be increased to a maximum of 30% of net assets.

Derivatives

The Company may use derivatives for investment purposes within guidelines set down by the Board.

Foreign currency

The Company's current policy is not to hedge foreign currency.

Benchmark

One of the ways in which the Company measures its performance is in relation to its "benchmark", which is an index made up of some of the world's leading technology shares. The benchmark used is the Dow Jones World Technology Index (sterling adjusted, total return). The Company's strategy is to have a concentrated portfolio which is benchmark aware rather than benchmark driven. Therefore, the Company has tended to have a significantly higher than benchmark allocation to high growth, mid cap companies which are considered to be the emerging leaders in the technology sector. The Managers believe that the successful identification of these companies relatively early on in their growth stages, offers the best opportunity for outperformance over the long-term.

Association of Investment Companies Shareholder Communication Awards 2021

Allianz Technology Trust won the award for 'Best Report and Accounts – Specialist' in 2020 and 2021. The panel thought the winning reports were excellently designed and included engaging, educational content about the sector and its themes.

Shares Awards 2020 – Best Investment Trust

Allianz Technology Trust was pleased to win 'Best Investment Trust' in The Shares Awards 2020. The awards were voted by readers of Shares and by the general public, making the award truly representative of the people who invest in the Trust and its peers. In presenting the award, Shares Magazine noted: "The technology sector had been in the ascendancy even before the events of 2020 but the global pandemic has super-charged this trend. We have been even more reliant on tech to tackle the day-to basics of work and home life... Allianz Technology Trust is plugged into these themes and was voted Best Investment Trust in this year's Shares Awards."

Investment Week Investment Company of the Year Award 2020 – Biotech & Healthcare and Technology category

Allianz Technology Trust won this coveted award in November 2020, having also been victorious in similar categories in 2019, 2018, 2017 and 2015. This award recognises excellence in closed-ended fund management and highlights ATT's consistent performance over time. The judging panel was made up of some of the UK's leading researchers and investors in investment trusts and closed-ended companies, as well as several senior board members with many years' experience in the industry.

Money Observer Investment Trust Awards 2020 – Best Large Trust

Allianz Technology Trust won the Best Large Trust category, in recognition of its consistent, high achievement. The Trust also received this award in 2019. This accolade is an independent, statistical and qualitative assessment of ATT's performance and highlights the Trust's outperformance both in its class and against its peers. 2020 marks the last year that this award will be made as this long running publication unfortunately closed in 2020.

Interim Management Report

Dear Shareholder

Technology stocks stay on track amidst global recovery

After the extreme challenges of 2020, when Covid-19 disruption spurred the use of technology solutions and drove technology stocks sky high, the first half of 2021 brought with it new challenges and a slower pace of progress, but progress, nonetheless. The backdrop for the period was one of a global economy tentatively emerging from the pandemic and a market rotation out of certain technology stocks, into cyclical companies, and then shifting right back to technology stocks by the period-end. Markets were heavily influenced by the significant progress achieved in vaccine roll-outs and broad optimism over the global economic outlook, albeit tempered somewhat by a sharp uptick in inflation and lingering concerns over the eventual costs of the pandemic's economic support measures.

Over the six-month period ended 30 June 2021 your Company's net asset value ("NAV") rose by 7.0%, underperforming the Company's benchmark, the Dow Jones World Technology Index, which rose by 13.9% and the FTSE All-Share Index, which was up 11.1%. The Company's share price fell by 0.8% as the Company's share price moved from a 2.0% premium to NAV as at 31 December 2020 to a 5.5% discount to NAV at the period-end.

Whilst disappointed that the Company has underperformed its benchmark index at the halfway stage of its financial year, your Board recognises that ours is a high conviction concentrated portfolio with attractive growth and valuation characteristics that differs markedly from the benchmark. The shares selected by the Investment Manager focus on long-term investment themes rather than seeking to simply track an index. And, while your Company has lost ground during this period, this comes hot on the heels of an exceptionally strong year and Allianz Technology Trust remains one of the top-performing of all UK-listed investment trusts over five and ten year periods. In short, the Manager's stock selection expertise is well evidenced, having consistently delivered outperformance over the long term.

Shareholders' funds edged up over the period, reaching £1,331.5 million, an increase of £102.3 million since the year end.

For further explanation about the review period, please see the Investment Manager's Review on pages 7 to 13.

Given the nature of the Company's investments and its stated investment objective to achieve capital growth, no dividend is proposed in respect of the current period and the Board considers it unlikely that any dividend will be declared in the near future.

Share split proposal approved

In the Company's annual report published on 15 March 2021, the Board set out its plans to undertake a share split of each of the Company's ordinary shares of 25p each into 10 ordinary shares of 2.5p each. The share split proposal was approved by shareholders at the Company's Annual General Meeting held virtually on 29 April 2021 and the new ordinary shares began trading on 4 May 2021. For every ordinary share held immediately prior to the transaction, shareholders received 9 additional ordinary shares. However, it is worth noting that the split did not affect the value of your investment in the Company, nor your shareholder rights.

Matching supply and demand for the Company's shares

The Board remains committed to increasing the number of shares in issue as a means of growing the Company. This strategy has been implemented very successfully over recent years, whenever market conditions have been conducive. The Board considers carefully the parameters and processes that should apply to ensure that any buy back or issuance of shares is both in the interests of existing shareholders and properly controlled. The Board considers the absolute level of discount, how this compares to other comparable investment companies as well as general market conditions. The Board will consider buying back shares whenever the discount is over 7% but will only do so after considering all other factors.

The Company's shares started the period trading at a premium of 2.0% to the underlying NAV, but have subsequently tended to trade at a discount, the level of which has been volatile but ending the period trading at a 5.5% discount. This contrasts with 2020, when the Company share price frequently traded at a premium and a significant share issuance programme was delivered.

The fluctuations in discount arose from the variable levels of demand for the Company's shares over the period. The Company responded to these changing market conditions by both issuing and buying back shares. A total of 6,800,000 new shares were issued, at an average premium to NAV of 1.1% whilst 1,471,055 shares were repurchased into treasury, at an average discount to NAV of 7.0%. Both the issuance and the buyback activity has been accretive to NAV. Since 30 June 2021, 414,811 shares have been repurchased into treasury.

At the date of writing the called up share capital of the Company was 428,756,680 ordinary shares of which 1,885,866 ordinary shares are held in treasury.

More industry recognition for ATT's shareholder communications

In July, the Association of Investment Companies (AIC) announced the winners of its 2021 Shareholder Communications Awards, celebrating AIC member investment trusts and their managers who communicate exceptionally well to shareholders. Your Company once again won the award for Best Specialist Report and Accounts, having previously won the same category in 2020 and 2018. As a Board, we work closely with Allianz Global Investors to deliver effective communications that are attractively designed and include engaging and educational content so we are delighted to receive this industry acknowledgement. The judging panel noted that the design of the Company's annual report and its level of detail were "superb". They also noted the extensive range of content within the document, including the thematic essays which "brought the technology sector to life in an engaging way".

AGM and subsequent material events and transactions

The Company's AGM on 29 April 2021 was held virtually because of the significant Covid-19 related restrictions on attendance that remained in place at that time. The Board put in place arrangements for shareholders to attend the AGM electronically, ask questions and vote in real time, by using their computer, tablet or smartphone. I am pleased to report that all resolutions put to Shareholders at the AGM were passed and I would like to thank shareholders for their support, particularly in these unconventional circumstances. Details of the resolutions can be found on pages 116 to 120 of the Company's annual report for the year ended 31 December 2020, which is available online.

Apart from the resolutions passed at the AGM and the subsequent share split in May, there were no material events or transactions relating to the Company to report in the six-month period to 30 June 2021 and up to the date of this statement.

Outlook

Investment markets are relatively calm at the time of writing, with little volatility to speak of. However, with 2020's pandemic shock and market meltdowns still in mind, I must caution that we remain in unprecedented times and equity market valuations are historically high against an outlook that is still uncertain. This environment may manifest itself in future market volatility and the possibility of a meaningful correction in the Company's share price at some stage. The portfolio remains ungeared.

The Manager continues to believe that the Company's portfolio of stocks offers attractive growth opportunities, as well as access to cyclical/value stocks. As a Board, we remain confident in the Manager's ability to drive relative performance through the team's high conviction expertise over the next several years, as they continue to focus on identifying trends that have the potential to uncover tomorrow's Apple or Microsoft.

Principal risks and uncertainties for the remainder of the financial year

At the time of writing, the Covid-19 pandemic and the spread of new "variants of interest" remains a dynamic situation of concern. In early July, the World Health Organization reported that the highly transmissible Delta variant had been detected in 96 countries. We continue to monitor this key risk that creates such considerable uncertainty for many sectors of the global economy.

Other than this established risk, the principal risks and uncertainties facing the Company are broadly unchanged from those described in the annual report for the year ended 31 December 2020. These are set out in the Strategic Report on pages 56-59 of that report, together with commentary on the Board's approach to mitigating the risks and uncertainties.

The Board performs a high-level review of the principal risks at every meeting to ensure that the risk assessment is current and relevant, adjusting mitigating factors and procedures as appropriate.

Keeping in touch

Whilst it has been extremely disappointing not to be able to meet shareholders face to face since the beginning of 2020, we look forward to meetings resuming on a more normal basis in due course. Shareholders are reminded that the Company's website www.allianztechnologytrust.com is the 'go-to' destination for the very latest news, views and broadcast content relating to the Company. We continue to offer an ongoing email communications programme distributing monthly factsheets, insights and other occasional Company updates to all those who opt in to receive them. If you would enjoy receiving these targeted communications you can sign up easily via the Company's website.

Going concern

The Directors have considered the company's investment objective and capital structure both in general terms and in the context of the ongoing Covid-19 disruption, even as countries around the world start the gradual process of lifting lockdown. Having noted that the portfolio, which is constructed by the Investment Manager, consists mainly of securities which are readily realisable, the Directors have concluded that the Company has adequate resources to continue in operational existence for the foreseeable future. For this reason, the Directors continue to adopt the going concern basis in preparing the financial statements.

In accordance with our Articles of Association, we are required to propose a continuation vote every five years. The most recent continuation vote was proposed and passed by shareholders at this year's AGM, held on 29 April 2021. Accordingly, the Company will continue as an investment trust for a further period of five years and the next continuation vote will be held at the 2026 AGM.

Related party transactions

In accordance with the definition as provided by the Listing Rules 11.1.4, the only related party arrangement in place is the relationship between the Directors and the Management Company.

Following the end of the Temporary Permissions Regime put in place after the UK's exit from the European Union, the Board understands that Allianz Global Investors plan to replace Allianz Global Investors GmbH, UK Branch as the management company with Allianz Global Investors UK Ltd. This is subject to Allianz Global Investors UK Ltd. being granted the necessary authorisation from the FCA.

The services provided by the Investment Manager under the Investment Management Agreement form a significant contract but are not deemed to be a related party transaction. There have been no material transactions which have affected the financial position of the Company other than fees paid to directors in the normal course of business.

Responsibility statement

The Directors confirm to the best of their knowledge that:

- the condensed set of financial statements contained within the half-yearly financial report has been prepared in accordance with FRS 102 and FRS 104, as set out in Note 1 and the Accounting Standards Board's Statement: 'Half-Yearly Financial Reports';
- the interim management report includes a fair review of the information required by Disclosure and Transparency Rule 4.2.7 R, of important events that have occurred during the first six months of the financial year, their impact on the condensed set of financial statements, and a description of the principal risks and uncertainties for the remaining six months of the financial year; and
- the interim management report includes a fair review of the information concerning related party transactions as required by Disclosure and Transparency Rule 4.2.8 R.

The half-yearly financial report was approved by the Board on 30 July 2021 and signed on its behalf by the Chairman.

Robert Jeens
Chairman
30 July 2021

Investment Manager's Review

Global equities rose over the first half of 2021 as the roll-out of Covid-19 vaccines boosted the outlook for a global economic recovery from the pandemic. US President Joe Biden's plans for fiscal stimulus further bolstered sentiment although concerns grew about rising inflationary pressures. European equities were among the strongest performers as the reflation trade led to a rotation into cyclical companies out of some technology stocks. In addition, energy companies soared, as oil prices rallied on expectations of strong demand. Banks also rebounded as higher long-term bond yields lifted the outlook for their profit margins.

Economic news supported growing optimism over the global economic outlook, with several countries returning to pre-pandemic growth levels. The US economy was particularly strong, helped by massive fiscal support. In Europe, a further wave of infections dampened first-quarter growth, but economies bounced back in the second quarter as the roll-out of vaccines allowed restrictions to be eased. Rising inflationary pressures sparked speculation that

central banks would start to scale back the extraordinary support measures implemented in 2020. In developed markets, central bankers indicated they were in no rush to change monetary policy as the recent increases in inflation were expected to be transient. However, some emerging markets took a different stance, with several increasing rates to counter rising inflationary pressures.

While value stocks outperformed growth stocks over the six months, the Fed's more hawkish tone sparked a reversal of the reflation trade in June: technology companies returned to favour, while cyclical stocks, such as materials and industrials companies, lagged.

During the period, we reduced exposure to some high growth companies we felt would struggle to deliver enough earnings growth to justify high valuations. The team also increased exposure to some cyclical companies in the semiconductor, hardware, and travel segments. Despite the market rotation away from high growth stocks, many of these companies continue to

Apple is benefitting from the work-from-home and learn-from-home trends and reported robust quarterly financial results despite supply constraints.

Seagate Technology was a top active contributor. The data storage specialist launched its high performance FireCuda 530 solid state drive at its inaugural virtual gaming event, SG21, in June.
Photo: Seagate Technology LLC

demonstrate robust fundamentals with strong demand tailwinds. We continue to hold our positions in many high growth companies that we believe are well-positioned to maintain high growth rates. As a result, we have a barbell approach with exposure to both high growth and cyclical/value stocks.

As the world moves beyond the pandemic, we expect long lasting impacts to consumer behaviour and how companies serve their customers. Even prior to the onset of the pandemic there was an imperative for companies to digitally transform to better serve their customers. We believe the pandemic only accelerated this trend and that technology has become a critical piece for companies to operate more efficiently and to have ongoing engagement with their customers.

Top Contributors and Detractors

Allianz Technology Trust underperformed the Dow Jones World Technology Index (sterling adjusted, total return) by 6.9 percentage points and the FTSE All-Share Index by 4.1 percentage points during the period. The portfolio's underperformance has been largely due to the market rotation from growth to cyclical stocks. However, this rotation followed a period of very large outperformance for the portfolio in 2020.

Our underweight position in Apple, one of the largest holdings in the benchmark, was the top contributor to relative performance as shares were negatively impacted by the rotation away from previous winners and into more cyclical stocks. At the end of April, Apple reported robust quarterly financial results that beat expectations with revenue growing 54% year-on-year. Every product category saw double-digit revenue growth led by iPhones, Macs, and iPads, and international growth was very strong in Greater China and Europe. Management's guidance was better than expected despite supply constraints, and the board authorised an increase of \$90 billion to the existing share repurchase program. The iPhone installed base continued to grow beyond a billion units and reached an all-time high, helping to drive record services revenue. In part, Apple is benefitting from the work-from-home and learn-from-home trends as reflected in strength in its PC and tablet product categories. While we maintain a positive long-term outlook, the company's performance is mostly reflected in the stock's revised higher valuation and we think Apple faces difficult near-term comparisons with last year's strong performance. Apple remains in the portfolio, but our position is significantly underweight relative to the benchmark's large position.

Our position in collaboration software provider Asana was also among the top relative contributors during the period. The company reported quarterly financial results that exceeded expectations, driven by year-on-year revenue growth of 61%. Management provided guidance ahead of expectations, driven by accelerating new customer growth, expansion of current customer contracts, investments in enterprise sales capacity, product enhancements, and international expansion. Asana offers a flexible and scalable work management platform that helps individuals, teams, managers, and executives coordinate and execute activities and tasks, streamline and automate workflows, and collaborate more effectively.

Other top active contributors included our overweight position in Seagate Technology and underweights to Alibaba and Tencent.

Paycom Software was the top detractor from relative performance during the period. After a strong fourth quarter rally, shares pulled back as analysts expressed concern over valuation and coronavirus headwinds. Paycom provides cloud-based payroll and human capital management software in a software-as-a-service (SaaS) format to small and medium businesses in the US. The company's software provides unique value to customers because it typically replaces multiple systems and helps manage complex compliance requirements. The single database, ease of implementation, and high customer satisfaction should help Paycom continue to take market share in this market. We see the company as a unique cloud asset modernising the payroll market, which gives it the opportunity to continue experiencing double-digit revenue growth while maintaining best in class net income margins. However, given the near-term headwinds, we have reduced our position size in the portfolio.

Our underweight position in Microsoft was also a top relative detractor. Microsoft delivered impressive quarterly financial results as revenues grew 17% year-on-year. It appears that the impacts of Covid-19 and more rapid adoption of digital transformation among its customers is pulling through more sales across every segment of its business. Management also provided strong guidance reflecting the momentum across all its business lines. We believe Microsoft remains strategically the best positioned large cap enterprise software company on a longer-term basis. As Covid-19 crystallises the urgency of digital transformation, we believe Microsoft remains in an enviable strategic position to help customers

along this journey, with a proven ability to execute across multiple vectors of growth. While we are positive on the company and it remains a top portfolio holding, we are underweight relative to the benchmark's large position in the stock.

Other active detractors included overweight positions in Amazon, Snowflake, and MongoDB.

Outlook

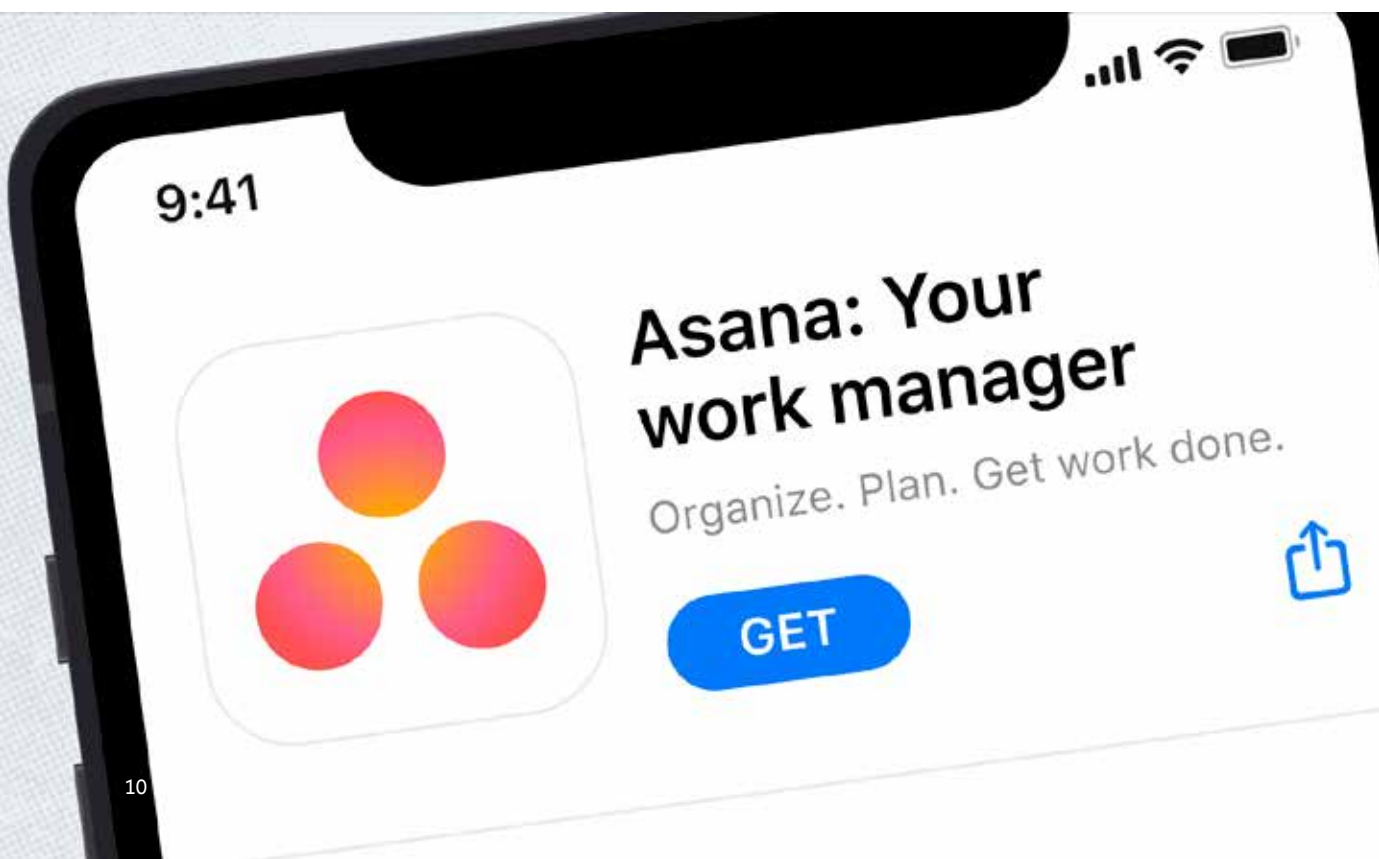

In our view, the technology sector continues to benefit from strong tailwinds which should continue to drive attractive long term appreciation. There is no question in our minds that the Covid-19 crisis will spur the use of technology and change how we live and work in the future. Additionally, many businesses are struggling to find workers to meet customer demand and need technology solutions to improve productivity of limited staff numbers. As companies need to reduce costs

and improve productivity, we expect to see accelerating demand for innovative and more productive solutions such as cloud, software-as-a-service, artificial intelligence, cyber security, etc. We are in a period of rapid change, where the importance of technology is key to the prosperity of most industries. This environment is likely to provide attractive growth opportunities in many technology stocks over the next several years.

We continue to believe the technology sector can provide some of the best absolute and relative return opportunities in the equity markets – especially for bottom-up stock pickers.

Notes

Note 1 – Summary statement of accounting policies and basis of preparation

The condensed set of financial statements have been prepared in accordance with FRS 102 'Interim Financial Reporting' (FRS 104) issued by the FRC in March 2015 and the Statement of Recommended Practice - 'Financial Statements of Investment Trust Companies and Venture Capital Trusts' (SORP) issued by the Association of Investment Companies (AIC) in October 2019.

The accounting policies applied for the condensed set of financial statements with regard to measurement and classification have not changed from those set out on the Company's annual report for the year ended 31 December 2020.

The total column of the Income Statement is the profit and loss account of the Company. All revenue and capital items derive from continuing operations. No operations were acquired or discontinued in the period. A Statement of Total Recognised Gains and Losses is not required as all gains and losses of the Company have been reflected in the Income Statement.

Note 2 – Management

Allianz Global Investors GmbH, UK Branch is the appointed Investment Manager and as such is entitled to a base fee of 0.8% per annum payable quarterly in arrears and calculated on the average value of the market capitalisation of the Company at the last business day of each month in the relevant quarter. The base fee reduces to 0.6% for any market capitalisation between £400m and £1 billion, and 0.5% for any market capitalisation over £1 billion. Additionally there is a fixed fee of £55,000 per annum.

In each year, in accordance with the management contract the Investment Manager is entitled to a performance fee subject to various performance conditions. For years beginning on or after 1 December 2013, the performance fee entitlement is equal to 12.5% of the outperformance of the adjusted NAV per share total return as compared to the benchmark index, the Dow Jones World Technology Index (sterling adjusted, total return). Any underperformance brought forward from previous years is taken into account in the calculation of the performance fee.

A performance fee is only payable where the NAV per share at the end of the relevant Performance Period is greater than the NAV per share at the end of the financial year in which a performance fee was last paid. At 31 December 2020 this 'high water mark' (HWM) was 297.2p per share. In the event the HWM is not reached in any year, any outperformance shall instead be carried forward to future periods to be applied as detailed below. Any performance fee payable is capped at 2.25% of the year end NAV of the Company. For this purpose, the NAV is calculated after deduction of the associated performance fee payable.

Any outperformance in excess of the cap (or where the HWM has not been met) shall be carried forward to future years to be available for offset against future underperformance but not to generate a performance fee. To the extent the Company has underperformed the benchmark, such underperformance is carried forward and must be offset by future outperformance before a performance fee can be paid. Underperformance/outperformance amounts carried forward do so indefinitely until offset.

The performance fee accrued for as at 30 June 2021 was £nil (30 June 2020: £5,429,000; 31 December 2020: £24,688,000).

The Investment Manager's fee is charged 100% to Revenue and the performance fee is charged 100% to Capital.

Note 3 – Earnings per Ordinary Share

The earnings per Ordinary Share is based on the net profit for the half year of £85,474,000 (30 June 2020: net profit of £225,047,000, 31 December 2020: net profit of £490,749,000) and on the weighted average number of Ordinary Shares in issue during the period of 427,710,854 (30 June 2020: 364,643,230, 31 December 2020: 387,060,700).

Note 4 – Valuation of Investments

Investments are designated as held at fair value through profit or loss in accordance with FRS 102 sections 11 and 12. Investments are initially recognised at Fair Value, which is determined to be their cost. Subsequently, investments are revalued at Fair Value, which is the bid market price for listed investments.

FRS 102 sets out three fair value hierarchy levels for disclosure.

Level 1: The unadjusted quoted price in an active market for identical assets or liabilities that the entity can access at the measurement date.

Level 2: Inputs other than quoted prices included within Level 1 that are observable (i.e. developed using market data) for the asset or liability, either directly or indirectly.

Level 3: Inputs are unobservable (i.e. for which market data is unavailable) for the asset or liability.

As at 30 June 2021, the financial assets at fair value through profit or loss of £1,305,272,000 (31 December 2020: £1,215,541,000) are categorised as follows:

	As at 30 June 2021 £'000s	As at 31 December 2020 £'000s
Level 1	1,305,272	1,215,541
Level 2	-	-
Level 3	-	-
	1,305,272	1,215,541

Note 5 – Called up Share Capital

At 30 June 2021 there were 427,285,625 Ordinary Shares in issue (30 June 2020: 389,821,680; 31 December 2020: 421,956,680). During the half-year ended 30th June 2021 the Company repurchased 1,471,055 Ordinary Shares for holding in Treasury (half-year ended 30 June 2020: nil; and year ended 31 December 2020: nil). During the same period the Company issued nil shares into the market from the Ordinary Shares held in treasury, (half-year ended 30 June 2020: nil shares; year ended 31 December 2020: nil shares). The Company issued a further 6,800,000 Ordinary shares, from the authorised block listing facility, during the period. The proceeds from the total number of shares issued amounted to £21,001,062 (half-year ended 30 June 2020: £72,982,000; and year ended 31 December 2020: £154,998,000). Since the period end, a further 414,811 shares have been repurchased into treasury.

Note 6 – Investments

Purchases for the half-year ended 30 June 2021 were £524,186,000 (30 June 2020: £744,796,000) and sales were £523,493,000 (30 June 2020: £586,773,000).

Note 7 – Transaction costs

Brokers commission costs on equity purchases for the half-year ended 30 June 2021 amounted to £83,000 (30 June 2020: £146,000) and sales were £85,000 (30 June 2020: £167,000).

Note 8 – Comparative Information

The half yearly financial report to 30 June 2021 and the comparative information to 30 June 2020 have neither been audited nor reviewed by the Company's auditors and do not constitute statutory accounts as defined in section 434 of the Companies Act 2006 for the respective periods. The financial information for the year ended 31 December 2020 has been extracted from the statutory accounts for that year which have been delivered to the Registrar of Companies. The auditor's report on those financial statements was unqualified and did not contain a statement under Section 498 (2) or (3) of the Companies Act 2006.

Glossary of UK GAAP Performance Measures and Alternative Performance Measures

UK GAAP performance measures

Net Asset Value is the value of total assets less all liabilities. The Net Asset Value, or NAV, per ordinary share is calculated by dividing this amount by the total number of ordinary shares in issue. As at 30 June 2021, the NAV was £1,331,501,000 (31 December 2020: £1,229,187,000, 30 June 2020: £881,469,000) and the NAV per share was 311.6p (31 December 2020: 291.3p, 30 June 2020: 226.1p).

Earnings per ordinary share is the profit/loss after taxation, divided by the weighted average number of shares in issue for the period (see Note 3).

Alternative Performance Measures (APMs)

Discount/Premium is the amount by which the stock market price per ordinary share is lower (discount) or higher (premium) than the Net Asset Value, or NAV, per ordinary share. The discount/premium is normally expressed as a percentage of the NAV per ordinary share.

Ongoing charges are operating expenses, excluding one off costs and performance fees, incurred in the running of the company. These are expressed as a percentage of the average net asset value during the year and this is calculated in accordance with guidance issued by the Association of Investment Companies.

Net Asset Value (or NAV)

The Net Asset Value of the Ordinary Shares is calculated and announced daily and the top ten holdings are announced monthly. They are published on the London Stock Exchange Regulatory News Service. They are also available from Allianz Global Investors, via Investor Services on 0800 389 4696 or on the Company's website: www.allianztechnologytrust.com

How to Invest

Shareholders can invest in Allianz Technology Trust by purchasing shares through an investment platform operated by a third party provider, a stockbroker or a financial adviser. Many online platforms allow share dealing in 'real time' and some offer an option to invest regularly each month as well as lump sum investing. Competition between platform providers is keen so charges are usually very competitive. More information is available from Allianz Global Investors either via Investor Services on 0800 389 4696 or see 'How to invest' on our website, www.allianztechnologytrust.com where there are links to a range of these platforms, many of which allow the holding of shares within an ISA, Junior ISA, SIPP and/or savings scheme.

Shareholders' Enquiries

Link Asset Services are the Company's registrars and maintain the share register. In the event of queries regarding their holdings of shares, lost certificates, registered name and address details, etc., shareholders should contact the registrars on +44 (0)371 664 0300. Lines are open 9.00 a.m. to 5.00 p.m. (London time) Monday to Friday. Calls may be recorded and monitored randomly for security and training purposes.

Any general enquiries about the Company should be directed to the Company Secretary, Allianz Technology Trust PLC, 199 Bishopsgate, London EC2M 3TY. Telephone: +44 (0)20 3246 7405.
