Fund Objective & Policy

The Fund aims to increase the value of your investment over the long term. It looks to outperform the Russell 2500 Index over rolling 3-year periods, after the deduction of charges.

The Fund is actively managed, and invests at least 75% of its assets in shares of American (US) smaller companies.

The Fund selects companies considered to have good prospects for share price growth, from any industry or economic sector, and in some instances, this may provide exposure to niche growth areas that often cannot be accessed by large companies.

The Fund typically invests in fewer than 80 companies, which may include shares of some companies not within the Index. The Fund may also invest in other assets such as cash and deposits, and hold other funds (including funds managed by Columbia Threadneedle companies) when deemed appropriate.

The Russell 2500 Index is regarded as an appropriate performance measure of shares of small to medium sized US companies, with around 2500 companies included. It provides a suitable target benchmark against which Fund performance will be measured and evaluated over time.

Risk & Reward Profile

The Risk and Reward Indicator demonstrates where the Fund ranks in terms of its potential risk and reward. Please see the Key Investor Information Document for more information.

Key Risks

- The value of investments can fall as well as rise and investors might not get back the sum originally invested.
- Where investments are in assets that are denominated in multiple currencies, or currencies other than your own, changes in exchange rates may affect the value of the investments.
- The Fund holds assets which could prove difficult to sell. The Fund may have to lower the selling price, sell other investments or forego more appealing investment opportunities.
- The Fund may invest in derivatives with the aim of reducing risk or minimising the cost of transactions. Such derivative transactions may benefit or negatively affect the performance of the Fund. The Manager does not intend that such use of derivatives will affect the overall risk profile of the Fund.
- The fund typically carries a risk of high volatility due to its portfolio composition or the portfolio management techniques used. This means that the fund's value is likely to fall and rise more frequently and this could be more pronounced than with other funds.
- The risks currently identified as applying to the Fund are set out in the "Risk Factors" section of the prospectus.

Typical Investor Profile

The Fund may be suitable for investors with an investment horizon of more than five years seeking capital growth who are prepared to tolerate large price fluctuations. If investors are uncertain if the Fund is suitable for them, they are advised to contact a financial adviser.

The Morningstar Categories for funds in the Europe/Asia/Africa universe include funds domiciled in Europe and/or traded on European Markets. Morningstar regularly reviews the category structure and the funds within each category to ensure that the system meets the needs of investors and keeps pace with market developments. The performance shown includes Open End Funds and Exchange Traded Funds only and is filtered by Primary Share Class in Morningstar UK Registered Funds Classification.

Annualised performance measures how much an investment has grown on average each year. 12 month Rolling Period shows annualised average returns for the periods stated.

Share classes in the table may not be open to all investors, please refer to the Prospectus for further information. Overall impact of costs: Costs and expected returns may increase or decrease as a result of currency and exchange rate fluctuations, if costs are to be paid in another currency than your local currency. The ongoing charges figure (OCF), exit charges (maximum amount to be deducted shown in the table above) and transaction costs show the percentage that may be deducted from your expected returns. The OCF is usually based on the last year's expenses, includes charges such as the Fund's annual management charge and operating costs. Transaction costs displayed are based on a three year average total and are calculated based on FYE Report and Account figures. Where the fund is less than 3 years old the transaction costs are based on proxy and actual costs. All transaction costs are as at 07/03/21. Additional distributor or intermediary fees may not be included. In some cases, the OCF may be based on an estimate of future charges.
